EMPLOYMENT, WAGES, COST OF LIVING, AND TRADE DISPUTES IN APRIL.

EMPLOYMENT.

EMPLOYMENT during April was subject to considerable fluctuation, particularly after the Easter holidays and towards the end of the month. At the end of April it was not quite so good on the whole as at the end of

The seasonal improvement in the building trade, in public works contracting, and in the brick and tile and tailoring industries continued; and there was also some improvement in the tinplate industry, in railway carriage and wagon building, in paper manufacture and in the food and drink industries. There was, however, a decline in coal mining, in ship-building and ship re-pairing, in the iron and steel and glass industries, in boot and shoe manufacture, and in most of the textile industries, as well as in the canal, river, dock and harbour service.

Among the workpeople (aged 16-64 inclusive, and numbering approximately 11,800,000) insured against unemployment under the Unemployment Insurance Acts in Great Britain and Northern Ireland, the percentage unemployed (including those temporarily stopped as well as those wholly unemployed) in all industries taken together was 9·6 at 23rd April, 1928, as compared with 9.6 at 26th March, 1928, and 9.4 at 25th April,

The percentage wholly unemployed was $7\cdot 6$ at 23rd April, 1928, as compared with $7\cdot 7$ at 26th March, 1928; while the percentage temporarily stopped was 2.0 as compared with 1.9. The total number of applicants for employment registered at Employment Exchanges in Great Britain and Nothern Ireland at 30th April, 1928, was approximately 1,171,000, of whom 942,000 were men and 160,000 were women, the remainder being boys and girls. At 2nd April, 1928, it was 1,071,000, of whom 865,000 were men and 147,000 were women; and at 25th April, 1927, it was 1,075,000, of whom 867,000 were men and 144,000 were women.

WAGES.

In the industries for which statistics are regularly compiled by the Department, the changes in rates of wages reported to have come into operation during April resulted in a reduction of £9,350 in the weekly full-time wages of 204,000 workpeople, and in an increase of £1,500 in those of 9,000 workpeople, and in an increase of £1,500 in those of 9,000 workpeople. The principal group of workpeople affected by the reductions in April were textile bleaching, dyeing, printing, etc., operatives in Yorkshire, Lancashire, and Scotland, whose wages were reduced, under cost-of-living sliding scales. scales, by about 13/4 per cent. on current rates in Yorkshire, and by 1s. and 8d. per week in the case of men and women respectively in Lancashire and Scotland. There were reductions, also under cost-of-living sliding scales, in the minimum rates fixed under the Trade Boards Acts for pieceworkers in the boot and shoe repairing industry, and for various classes of workpeople

in the brush and broom-making industry. Other groups of workpeople whose wages were reduced during April included blastfurnace workers in Cleveland, Cumberland and Scotland, iron puddlers and millmen in the North of England, and workpeople employed in the seedcrushing and oil-milling industry. Increases occurred in the wages of shale miners and oil workers in Scotland, and in those of furniture trade operatives at certain towns in Yorkshire.

During the first four months of 1928 the changes reported to the Department in the industries for which statistics have been compiled have resulted in net increases of £10,350 in the weekly full-time wages of 105,000 workpeople, and in net reductions of £115,100 in those of 1,114,500 workpeople. Of the total reduction just over one-half was accounted for by the coal-mining industry. In the corresponding period of 1927 there were net increases of over £33,500 in the weekly full-time wages of 517,000 workpeople, and net reductions of £99,800 in those of 685,000 workpeople.

COST OF LIVING.

At 1st May the average level of retail prices of all the commodities taken into account in the statistics compiled by the Ministry of Labour (including food, rent, clothing, fuel and light, and miscellaneous items) was approximately 64 per cent. above that of July, 1914, the same as a month ago and a year ago. food alone the corresponding percentage for 1st May was 54, as compared with 55 a month ago and 54 a year ago.

These statistics are designed to indicate the average increase in the cost of maintaining unchanged the pre-war standard of living of working-class families, and accordingly, in making the calculations, the changes in the prices of the various items included are combined in proportions corresponding with the relative importance of those items in pre-war working-class family expenditure, no allowance being made for any changes in the standard of living.

TRADE DISPUTES.

The number of trade disputes involving stoppages of work, reported to the Department as beginning in April, was 16. In addition, 24 disputes which began before April were still in progress at the beginning of the month. The number of workpeople involved in all disputes in April (including workpeople thrown out of work at the establishments where the disputes occurred, but not themselves parties to the disputes) was about 2,900, and the aggregate duration of all disputes during April was about 30,000 working days. These figures compare with totals of 38,000 workpeople involved and 168,000 working days lost in the previous month, and with 10,200 workpeople involved and 79,000 days lost in April, 1927.

The aggregate duration of all disputes in progress in the aggregate duration of an disputes in progress in the first four months of 1928 was about 360,000 working days, and the total number of workpeople involved in these disputes was about 63,000. The figures for the corresponding period of 1927 were 520,000 days and 34,000 workpeople respectively.

TRADE DISPUTES IN 1927.

THE MINISTRY OF LABOUR GAZETTE.

In the issue of this GAZETTE for January, 1928 (page 5), some preliminary statistics were given of industrial disputes, involving stoppages of work, which occurred in Great Britain and Northern Ireland in 1927. More detailed statistics regarding these disputes, revised in accordance with the latest information received, are now available and are given below.

available and are given below.

The number of disputes, involving stoppages of work, reported to the Department as having begun in 1927 in Great Britain and Northern Ireland, was 308*, the smallest number known to have occurred in any year during the whole period of forty years for which statistics are available. In these disputes about 89,700 workpeople were directly involved (i.e., on strike or locked-out), and 18,000 indirectly involved (i.e., thrown out of work at the establishments where the disputes occurred, but not themselves parties to the disputes). In addition, 6,500 workpeople were involved, either directly or indirectly, in thirteen disputes which began in 1926 and were still in progress at the beginning of 1927. The total number of workpeople involved, either directly or indirectly, in all disputes in progress in 1927, was thus about 114,200. The aggregate time lost in 1927 by these workpeople, owing to the disputes, was approximately 1,174,000 working days; this figure is the lowest ever recorded by the Department.

In 1926 the number of disputes reported as having begun in the year in Great Britain and Northern Ireland was 323—a lower figure than that of any other year save 1927. The number of workpeople involved in all disputes in progress was 2,751,000 (including 1,580,000 in the general strike in May and 1,050,000 in the general stoppage in the coal-mining industry); and the total loss of time in these disputes was about 162,233,000 working days. These totals were the highest ever recorded the highest ever recorded.

The following Table summarises by industries the number of disputes reported as beginning in 1926 and 1927 in Great Britain and Northern Ireland, and the number of workpeople involved in and the aggregate duration of all disputes in progress in each of these years:—

004,83 (8.36)		1926.	A til be	1927.		
Groups of Industries.	No. of Disputes beginning in 1926.	Number of Work- people involved in all Dis- putes in progress.	in Work- ing Days	No. of Disputes beginning in 1927.	Number of Work- people involved in all Dis- putes in progress.	Aggregate Duration in Work- ing Days of all Dis- putes in progress.
General Strike Mining and Quarry- ing: General Coal-	1	1,580,000	15,000,000		100 m	
mining Stoppage Other Stoppages Bricks. Pottery.	68	1,050,000 55,100	145,200,000 1,256,000	ïi5	73,400	695,000
Glass, etc Engineering	5 17	2,600 3,800	45,000 76,000	10 9	300 2,500	12,000 12,000
Shipbuilding Other Metal Textil	7 38 33	9,800 16,500	4,000 141,000 188,000	22 38 27	7,200 5,800 4,700	30,000 39,000 36,000
Clothing Woodworking and	12	1,000	8,000	10	9,200	199,000
Furnishing Building, Public Works Contract-	12	1,500	29,000	18	800	10,000
ing, etc Transport	43 42	3,500 21,300	38,000 167,000	34 16	7,800 2,100	129,000 7,000
Other Total	323	5,400	81,000 162,233,000	308	114,200	1,174,000

Of the total numbers of workpeople shown as involved in all disputes, 10,400 in 1926 and 18,600 in 1927 were *indirectly* involved, *i.e.*, thrown out of work in consequence of the disputes, at the establishments where the disputes occurred, though not actually on strike or locked-out.

PRINCIPAL DISPUTES IN 1927.

No dispute of outstanding magnitude occurred in 1927. The largest, judged by the total number of working days lost, was a lock-out of 5,000 workpeople employed in the slipper industry at Rossendale, which lasted from 20th July to 7th September, following alleged repeated threats of single-firm strikes for advances in wages and an actual strike of clickers at one firm consequent upon the suspension of a workman for refusing to rectify damaged work. The lock-out was terminated on the conclusion of an agreement establishing a Conciliation Board for the industry.

A dispute occurred at a group of collieries near Durham, owing to the refusal of 7,400 colliery workpeople to carry out an agreement providing for the working of one shift on each Saturday instead of two shifts on alternate Saturdays. This dispute caused a stoppage of work on Saturdays only from 14th May until the end of June (in the case of one colliery the stoppage continued until the end of July), when Saturday working was resumed on terms of the agreement.

About 5,500 coal-miners, etc., at Maesteg, Glamorganshire, ceased work on 5th July, objecting to work with non-members of the South Wales Miners' Federation. The non-members had joined the Federation by the next day, but in most cases work was not again available until 14th July.

Masons' and bricklayers' labourers in Glasgow and the West of Masons and brickayers labourers in Glasgow and the west of Scotland ceased work on 1st March against a proposed reduction in the wages of labourers employed by members of a non-federated Employers' Association below the rate fixed under the national agreement. On 7th March the labourers were joined by other building operatives, bringing the total number involved in the dispute to 5,000. The dispute ended on 21st March, when the question was special to the Industrial Court. The Court ruled that the rates fixed by the national agreement did not bind the Employers' Association in question, but was of opinion that no change in labourers' wages should take place.

In the following Table a list is given of the principal trade disputes, involving stoppages of work, beginning in 1927, with particulars of the classes of workpeople involved, the dates of the stoppages, the numbers involved, and the aggregate duration in each case:—

Classes of Workpeople involved.	Dates of beginning and end of Stoppage.	mate Number of Work- people involved.	Approximate Aggregate Number of Working Days lost

CAUSES.

The following Table shows the numbers and proportions of disputes in 1927, and of workpeople directly involved therein, arising from the principal classes of causes. In some cases disputes originate from a number of different causes; e.g., a claim for an advance in wages may be accompanied by one for a reduction in working hours. For the purpose of this and the following Tables such disputes are classified according to what appears to be the principal cause of the

Causes.		iber of putes.	Number of Workpeople directly involved	
Vausus.	Total.	Per- centage.	Total.	Per- centage.
Wage increases	35 71 59	11·4 23·0 19·2	4,600 18,300 7,900	5·2 20·3 8·9
All wage questions Hours of labour Employment of particular classes or	165 22	53.6	30,800 13,100	34·4 14·6
persons	68	22.1	29,200	32.5
Other working arrangements, rules and discipline	22 26	7·1 8·5	5,200 6,000	5.8
Miscellaneous questions	5	1.6	5,400	6.0
Total	308	100.0	89,700	100.0

Wage questions of various kinds proved, as usual, the most fruitful causes of disputes in 1927, 165 disputes out of the total of 308, or more than half of all the disputes beginning in the year, arising on these questions. Of the remaining disputes the causes most frequently occurring were questions respecting the employment of particular classes or persons, 68 disputes arising from such causes; while questions as to working hours, working arrangements, etc., and Trade Union principles, taken together, accounted for about the same number of disputes, viz., 70.

The following Table shows by groups of industries the proportion of workpeople who were directly involved in disputes arising in 1927 from the principal classes of causes:—

	Work- people directly	Prop	Proportions directly involved in Disputes respecting							
Groups of Industries.	involved in Dis- putes begin- ning in 1927.	Wages	Hours of La- bour.	Employ- ment of particular Classes or Persons.	Work- ing Ar- range- ments.	Trade Union- ism.	Other Questions.

and Shipbuilding Textile Clothing Building, Public	9,300 3,200 9,100	50·4 31·7 4·3	2·9 15·6	26·4 43·3 40·8	9·3 9·4 	11.0	54.9*			
Works Contract- ing, etc	7,100	89.2	0.2	2.0	1.4	6.0	1.2			
munication Other Industries and Services	2,100 1,300	36·3 63·3		11.0	6·8 10·2	15.5				
All Industries	89,700	34 · 4	14.6	32.5	5.8	6.7	6.0			

May, 1928.

Judged by the numbers of workpeople directly involved, it will be seen from the above Table that wage questions were a preponderating cause of disputes in the metal, engineering and shipbuilding, the building, etc., and the other industries and services groups; and that questions as to the employment of particular classes or persons were of most weight in the mining and quarrying, the textile, and the transport and communication groups. Questions as to working hours were only of importance as a cause of disputes in the mining and quarrying and the textile groups, where they accounted for 21 and 16 per cent. respectively of all the workpeople. The largest single dispute respecting hours was the dispute in the Durham coalfield, referred to above, where the working of Saturday shifts was in question. vas in question.

RESULTS.

RESULTS.

The following Table shows the number and proportion of disputes beginning in 1927, and of workpeople directly involved therein, the results of which were (a) in favour of the workpeople, (b) in favour of the employers, (c) of the nature of a compromise, and (d) which still remain unsettled. Disputes classified as in favour of workpeople or in favour of employers, for the purpose of this and the following Table, are those in which the workpeople or employers, respectively, were completely successful, or practically so, in attaining or resisting the objects to which the stoppage of work was due. Disputes in which the workpeople, or employers, were partly, but not wholly, successful, are included under "compromised." In the case of one small dispute work had not yet been resumed at the time of going to press.

Results.				Number of Disputes.		Number of Workpeople directly involved.		
					Total.	Per- centage.	Total.	Per- centage.
In favour of w In favour of er Compromised Unsettled					61 118 128	19·8 38·3 41·6 0·3	25,300 27,400 36,900 100	28·1 30·6 41·2 0·1
Total					308	100.0	89,700	100.0

In most years disputes resulting in compromises are considerably more numerous than either the complete successes or the complete silures, but in 1927, as in 1926, the number of disputes in which the employers were successful (118) was not much less than that in which a compromise was effected (128) and was nearly twice that in which the workpeople attained their objects (61). So far as numbers of workpeople involved are concerned, compromises usually outweigh all other results, but in 1927 only 41 per cent. of the workpeople involved were in disputes which resulted in compromise. The remainder were nearly equally divided between disputes resulting in favour of the workpeople and of the employers (28 and 31 per cent.,

The following Table shows, by groups of industries, the proportion workpeople directly involved in disputes beginning in 1927, assified according to their results:——

	Work- people directly	people Disputes beginning in 1927, the Re

Services	1,300	13.0	34.7	52.3			
All Industries	89,700	28.1	30.6	41.2	0-1		

This figure relates to the dispute in the Rossendale slipper industry, hich is referred to in the text above.

Judged by the number of workpeople directly involved, disputes were fairly evenly divided between the three categories of results in the mining and quarrying and the textile groups. In the clothing and building, etc., groups one dispute in each case accounted for the majority of the workpeople involved, and these disputes resulted in a compromise and in a success for the workpeople respectively. In the remaining groups settlements by compromise predominated.

The following Table shows the number of workpeople directly involved in disputes in 1927 classified both by the principal causes and by the results of the disputes:—

	Numi invol in 192				
Principal Causes.	In favour of Work-people.	In favour of Employers.	Compromised.	Un- settled.	Total.
Wages:					
For increase	100	1,700	2,800	100	4,600

METHODS OF SETTLEMENT.

Of the disputes beginning in 1927, 307 had been finally settled at the time of going to press. The principal methods by which these disputes were settled are shown in the Table below:—

Methods of Settlement.	Number of Disputes.	Per- centage of all Dis- putes,	Number of Workpeople directly involved.	Percentage of Workpeople directly involved in all Disputes.
By direct negotiations between		%		%
the parties or their repre- sentatives	227	73.9	69,300	77-4
By conciliation By arbitration	15	4·9 1·3	6,800 4,900	7·6 5·5
By return to work on employers' terms without ne-	100000000000000000000000000000000000000		rayou!	
By replacement of workpeople	30	9.8	5,200 400	5.8
Otherwise	12	3.9	3,000	3.3
Total	307	100.0	89,600	100.0

Most final settlements are effected by direct arrangements or negotiations between the parties or their representatives, and nearly three-quarters (227) of all disputes occurring in 1927, involving over three-quarters of all workpeople involved, were settled in this manner. In the case of 30 disputes,—10 per cent. of the total number, involving 6 per cent. of all the workpeople involved—work was resumed on the employers' terms without negotiation. Two of the largest disputes of the year (those occurring in the Rossendale slipper industry and in the building industry of Glasgow and the West of Scotland) were settled by conciliation and by arbitration respectively. The 17 other disputes settled by conciliation or arbitration were all of relatively small importance. Strikers were replaced by other workpeople in the case of 19 disputes, all very small. Most final settlements are effected by direct arrangements or nego

MAGNITUDE.

In the Table below the disputes of 1927 are analysed from three different aspects of magnitude, viz., numbers of workpeople involved, duration in weeks, and aggregate duration in working days. It will be seen from the figures given that the majority of the disputes occurring in 1927 were of relatively small importance, involving but a few workpeople and lasting for a few days only. More than half of all disputes, or 159 out of a total of 308, had a duration of less than a week, and only 53 disputes lasted for four weeks or more. Over two-thirds of the disputes, or 215, involved less than 250 workpeople, and only six disputes involved 2,500 or more workpeople. Twenty-eight disputes (or rather less than a tenth of the whole) caused a loss of 631,000 working days or nearly three-quarters of the total number of days lost in the 308 disputes; while 198 (or about two-thirds of the whole) caused a loss of 59,000 working days only, or less than 7 per cent. of the total aggregate duration of all disputes.

It should be observed that, for the purposes of this Table, the In the Table below the disputes of 1927 are analysed from three

It should be observed that, for the purposes of this Table, the It should be observed that, for the purposes of this Table, the duration in weeks and aggregate duration in working days take account of time lost in 1928 by disputes which began in 1927 and were still in progress at the end of the year. On the other hand the aggregate duration of disputes which began before 1927 but continued into 1927 is excluded. As regards numbers involved, the Table relates only to disputes beginning in 1927. The figures in the Table, therefore, differ from those given in the first Table in this article (on page 158).

^{*} Disputes involving less than ten workpeople and those which lasted less than one day are omitted from the statistics, except when the aggregate duration .e., number of workpeople multiplied by number of working days, allowing for workpeople replaced by others, etc.) exceeded 100 days.

^{*} The dispute caused stoppage of work on alternate Saturdays only, one Saturday per fortnight being customarily idle.

† The dispute caused stoppage of work on Saturdays only. By the end of June. Saturday work had been resumed at all but one of the collieries involved.

‡ In most cases work was not available until 14th July.

COMPARATIVE FIGURES FOR 1893-1927.

The following Table shows the total number of disputes, involving stoppages of work, reported to the Department as beginning in each of the years 1893–1927, together with the approximate number of workpeople involved in these disputes, and the aggregate number of working days lost in all disputes in progress during the year (irrespective of the date of commencement) at the establishments where the disputes occurred. It should be observed, in comparing these figures with the figures relating to 1926 and 1927 given in the first Table in this article, that in the Table below the particulars of numbers involved relate to persons involved in disputes beginning in each year, whilst in the first Table they relate to the total numbers involved in all disputes in progress, including those beginning earlier which were still unsettled at the beginning of the year:—

Year.	Number of Dis- putes be-		er of Workpoin Disputes bein year.	Aggregate Dura- tion in Working Days of all	
	ginning in year.	Directly.	Indirectly.	Total.	Disputes in pro- gress during year.
1893 1894 1895 1896 1897 1898 1900 1901 1902 1903 1904 1905 1906 1907 1911 1912 1913 1914 1917 1918 1919 1919 1919 1919 1919 1919	599 903 728 906 848 695 710 633 432 380 346 349 479 585 389 479 585 521 872 834 1,450 972 672 532 730 1,155 1,552 1,607 763 576 628 710 633 330 330 330 330 330 330 340 340 340 3	597,000 254,000 205,000 142,000 142,000 139,000 137,000 131,000 111,000 93,000 56,000 67,000 158,000 221,000 168,000 401,000 235,000 575,000 2,401,000 1,770,000 2,401,000 1,770,000 558,000 401,000 2,724,000 401,000 2,724,000 2,724,000 90,000	37,000 68,000 54,000 63,000 63,000 63,000 42,000 53,000 140,000 23,000 31,000 25,000 60,000 46,000 129,000 128,000 128,000 121,000 47,000 47,000 41,000 41,000 41,000 41,000 53,000 15	634,000 322,000 259,000 192,000 252,000 179,000 185,000 179,000 255,000 146,000 297,000 514,000 297,000 664,000 276,000 447,000 448,000 1,116,000 276,000 1,322,000 1,322,000 1,332,000 1,332,000 4,342,000 1,332,000 1,332,000 4,332,000 1,332,000 4,332,000 1,332,000 4,332,000 4,332,000 1,332,000 4,332,000 1,332,000 4,	30,440,000 9,510,000 5,700,000 3,560,000 10,330,000 15,260,000 3,090,000 4,130,000 3,440,000 2,320,000 1,460,000 2,370,000 3,020,000 1,460,000 2,150,000 10,790,000 2,590,000 9,870,000 10,160,000 40,890,000 9,880,000 9,880,000 9,880,000 2,450,000 2,450,000 5,650,000 5,880,000 34,970,000 85,870,000 19,856,000 19,856,000 19,856,000 19,856,000 19,856,000 19,856,000 19,856,000 19,856,000 19,856,000 19,856,000 19,856,000 19,856,000 19,856,000 19,856,000 19,856,000 19,850,000 19,850,000 19,850,000 19,850,000 19,850,000 19,850,000 19,850,000 19,850,000 19,850,000 19,850,000 19,850,000

It will be noticed that the figures show wide variations in different years, especially as regards the aggregate number of days lost, of which the maximum and minimum figures occurred in consecutive years, viz., over 162 millions in 1926 and less than 1½ million in 1927. The high total for 1926 and also those for 1893, 1912 and 1921 largely due to prolonged general stoppages in the coal-mining

REPORT OF THE MINISTRY OF LABOUR FOR THE YEAR 1927.

The fourth Annual Report of the Ministry of Labour, dealing with the work of the Ministry during 1927, has been issued.*

Industrial Relations, Conciliation and Arbitration.—The Report refers to the movement during the year towards industrial peace. As the movement progressed, there emerged a considerable volume of agreement in favour of a greater measure of co-operation between the parties in industry, culminating in a definite invitation from a number of employers to the General Council of the Trades Union Congress to meet them for the joint consideration of certain fundamental factors in industrial reparation and industrial relations. mental factors in industrial reorganisation and industrial relations.

The invitation was accepted, and meetings of this joint body, and of a joint committee appointed by it, have been held during the current

The number of trade disputes causing stoppage of work of which the Department had cognisance was the smallest recorded in any year during the whole period of forty years for which statistics are available. Only 103 cases were dealt with under the Conciliation Act, 1896, and the Industrial Courts Act, 1919; this was the same number as in 1922, and, with that exception, the smallest in any post-war year. No Court of Inquiry was set up during the year.

The Industrial Court issued 82 decisions on cases referred to them for decision under the Industrial Courts Act. About half of these related to Civil Service cases, one of these relating to over 140,000 workers in the Post Office—sorters, counter clerks, telegraphists, telephonists, paper keepers, postmen, porters, messengers, eleaners,

Each award of the Court is printed and published shortly after the date of decision, and an annual issue of all awards is made in volume form.‡ The cases are also summarised monthly in this GAZETTE; see, for example, page 197 of the present issue.

Employment.—The average rate of unemployment among insured persons in 1927 was 9.6 per cent., the lowest rate since 1920. The Report attributes this result partly to a substantial carry-over of work from the previous year, when production had been interrupted by the coal stoppage, and partly to a growing steadiness one of the chief factors affecting industrial production, and an improvement in some directions in the export trade. "The year 1927," the Report proceeds, "may be regarded industrially as that which has made the nearest approach to normal since the War. There is some ground for thinking that the problems of employment and unemployment which have revealed themselves during the year ought to be considered, not merely as residual difficulties of the war period, but as the problems of a new industrial and commercial era. Of these problems undoubtedly the most serious is the continued irregularity in several of the basic industries, notably coal, iron and steel, cotton, and to a less extent shipbuilding, heavy engineering, steel, cotton, and to a less extent shipbuilding, heavy engineering, and wool."

The Report refers to the unemployment in the coal-mining industry, which is much heavier in some coalfields than in others, and observes:—"It is now generally recognised that an appreciable number of those wholly unemployed in the northern coalfield, in South Wales, and in parts of the Scottish coalfield, are unlikely to obtain regular employment in their own industry in their own district; the same is probably true of a smaller proportion in some of the other coalfields." The work of the Industrial Transference Board is referred to in this connection. The Employment Exchanges are continually engaged in this work of facilitating transfers, in all industries and in all districts; but, if such transfers are to be effected with as little hardship and waste of effort as possible, all the agencies involved need to be brought into effective co-operation. Hence the Industrial Transference Board was set up, "to stimulate and assist the workers from distressed areas to openings in other

areas and other industries, both at home and overseas."

Reference is also made in this connection to Section 18 of the
Mining Industry Act, 1926, which empowers the Minister of Labour Mining Industry Act, 1926, which empowers the Minister of Labour to make regulations to secure that preference should be given, in the recruitment of persons for employment in the coal-mining industry, to those who had been previously employed therein. In view of the situation which had developed in the industry, the Minister, instead of making regulations under Section 18, accepted for the time being a voluntary undertaking by the Mining Association to carry out the intention of the Act; this undertaking came into force on 1st August, 1927. Returns rendered by the coal owners in accordance with this undertaking show that there has been general compliance with its terms; and the Employment Exchanges are assisting to an increasing extent in the movement of colliery labour from depressed areas to fill vacancies in other pits. areas to fill vacancies in other pits.

Some modifications have been made in the organisation of

Employment Exchanges during the year, with a view to increasing their usefulness as placing agencies. The new scheme has already been introduced on Clydeside, Tyneside, Merseyside, and in the Inner London and Birmingham areas, where it has proved very successful; and it is being extended to other areas.

The numbers on the live registers of Employment Exchanges in Great Britain at the end of each month during the year 1927 varied from a maximum of 1,331,543 in January to a minimum of 985,513 in May. During the greater part of the five years 1923–1927, viz., in 43 out of the 60 months of the period, the figures only varied between 1,000,000 and 1,300,000.

*Cmd. 3090. H.M. Stationery Office; price 2s. 6d. net. † See the issues of this GAZETTE for February, 1928, page 43, and for April, 1928, page 124.

† The last issue is Vol. VIII, containing Decisions 1169 to 1272, given by the Industrial Court in 1926. H.M. Stationery Office; price 6s. net. The numbers of vacancies notified to Employment Exchanges and of vacancies filled were slightly smaller than in 1925, but considerably greater than in any other of the last five years, as will be seen from the following Table:—

May, 1928.

				Vacancies Notified.	Vacancies Filled.
1923	11 11 11 11	916 801	88.83	1,056,970	893,713
1924				1,345,394	1,143,742
1925		24	0.00	1,480,820	1,279,292
1926				1,246,967	1,082,917
1927				1,436,052	1,252,707

Of the vacancies notified in 1927 rather more than half (724.856) were for men; 393,090 were for women; and 318,106 for juveniles. Of the vacancies filled, 671,627 were filled by men; 316,418 by women, and 264,662 by juveniles.

and 204,062 by juveniles.

The trade groups in which the largest number of vacancies for men were filled were: Building; transport trades; general labourers; engineering; and construction of works, in the order named. These five groups covered rather more than half of the total number of men's vacancies filled. Other trade groups with more than 15,000 men's vacancies filled were: Manufacture of metals; shipbuilding; agriculture; cotton; mining and quarrying; and commercial occupations, in the order named.

The trade groups in which the largest number of women's vacancies were filled were: Domestic service; cotton; dress; miscellaneous textiles; commercial occupations. Domestic service alone accounted or over 40 per cent, of the women's vacancies filled.

The number of employers on the King's National Roll at the end of 1927 was 27,500; they were employing approximately 380,000 disabled ex-service men. The total number of disabled ex-service disabled ex-service men. The total number of disabled ex-service men forming part of the industrial community is approximately 400,000; and of these only 5 per cent. were unemployed at the end of December, 1927. This is considerably lower than the proportion of unemployment among the general insured population, showing that disabled ex-service men receive an appreciable preference in the matter of employment.

Other subjects dealt with in this section of the Report include Local Employment Committees; Port Registration Committees; oversea employment; admission of foreign workers under the Aliens Order, 1920; unemployment relief works, etc.

Unemployment Insurance.-The Committee on Unemployment Insurance, under the chairmanship of Lord Blanesburgh, reported on 31st January, 1927; and the Unemployment Insurance Act, 1927, which follows in the main the recommendations of the Blanesburgh Committee, received the Royal Assent on 22nd December, 1927.* The new Act came into force, with certain exceptions, on 19th April 1928. on 19th April, 1928.

One result of the new Act will be that the work of the Local One result of the new Act will be that the work of the Local Employment Committees in respect of claims for "extended" and for dependants' benefit will come to an end; and the Report places on record the Ministry's appreciation of the services which have been rendered by the Committees in this connection. From the inception of uncovenanted benefit in 1921 up to the end of 1927, Committees have dealt with approximately 25,250,000 applications for unemployment benefit (including reviews), and with nearly 1,300,000 applications for dependants' benefit; and the Report acknowledges with gratitude the sympathetic and thorough consideration which has been bestowed upon cases often difficult and complicated

No changes were made in the rates of contributions during the year; but arrangements were made in anticipation of the coming into force, on 2nd January, 1928, of the amendments to the Unemployment Insurance scheme included in the Widows', Orphans', and Old Age Contributory Pensions Act, 1925. Under this scheme the payment of contributions by employed persons ceased, from the date mentioned, on their attaining the age of 65; only the employer's part of the contribution is now payable in respect of

The income of the Unemployment Fund showed a slight increase during the year, and the expenditure a considerable decrease, as a result of the reduction in the number of persons unemployed. The debt of the Fund was increased during the year to the extent of £540,000, owing to interest charges on borrowings in 1926, caused by the large increase in claims following the dispute in the coalmining industry. The debt of the Fund on 31st December, 1927, was £23,180,000, as compared with £22,640,000 on 31st December, 1926, and with £7,262,569 on 31st December, 1925.

rest of this section deals with the administration of unemployment insurance under various headings. Appended to the section are reports of three specially important decisions of the Umpire.

Juveniles.—The numbers of boys and of girls in Great Britain in July, 1927, insured under the Unemployment Insurance Acts, excluding those under the special schemes for the banking and for the insurance industries, were 570,000 boys and 408,000 girls, an increase of 6,000 boys and of 7,000 girls as compared with July, 1926. The boys were employed in the largest numbers in the distributive trades, coal mining, building, engineering (including iron and steple founding) contraction and repair of motor vehicles. outive trades, coal mining, building, engineering (including iron and steel founding), cotton, construction and repair of motor vehicles, and printing (including publishing and bookbinding), in that order. The list is the same as for 1926, except that "construction and repair of motor vehicles" now appears in the list of principal trades for boys, ahead of printing. For insured girls the principal trades were the distributive trades, cotton, tailoring, dress and mantle making, printing (including publishing and bookbinding), laundries (including dyeing and dry cleaning), and woollen and worsted.

There was a steady fall during 1927 in the number of boys and girls unemployed. The percentage of insured juveniles unemployed (3.5) was markedly lower than that for insured adults, which was 10.2. On the other hand, a shortage of suitable boys and girls was beginning to be experienced in some districts. The shortage of boys and girls for the spinning sections of the cotton and of the woollen and worsted trades continued. The hosiery trade in Leicestershire, and the boot and shoe manufacturing trade in the Midlands, reported and the boot and shoe manufacturing trade in the Midlands, reported a shortage of juvenile labour; while in London there was an increased shortage in the West End clothing trades and in better class shops and offices. Local shortages are being relieved to some extent by a redistribution of the juvenile working population; thus, boys and girls are travelling into Oxford, Coventry, and Leeds from the surrounding districts to work in the motor trade, in the silk and metal trades, and in the clothing factories, respectively.

The problem of the supply of juvenile labour in future years, owing to the great fall in the birth rate, has begun to attract public attention. According to the estimate of the Committees on Education and Industry, the number of juveniles available for employment is likely to fall from 2,175,000 in 1927 to 1,756,000 in 1933. The Ministry have therefore set on foot, through the Advisory Committees for

have therefore set on foot, through the Advisory Committees for Juvenile Employment and through the Local Education Authorities, a special inquiry into the redistribution of juvenile labour: reports have been asked for as to the probable extent of the shortage in certain districts and of the surpluses in others, and of the possibilities of transferring boys and girls from the depressed areas to the areas where there is an unsatisfied demand for juvenile labour.

In England and Wales the work of advising boys and girls up to In England and Wales the work of advising boys and girls up to the age of 18 on the choice of a career, and of placing them in suitable employment, is divided between the Ministry and the Local Education Authorities; in Scotland the Ministry is directly responsible in all areas except Edinburgh. The general supervision of this choice-of-employment work, however, whether carried on through Juvenile Advisory Committees or through Local Education Authorities, was transferred to the Ministry of Labour in September last, in accordance with the recommendation of the Committee on Education and Industry (England and Wales).

The number of vacancies for juveniles notified to Exchanges and to Juvenile Employment Bureaux during 1927 was 318,106, as compared with 266,021 in 1926; and the numbers of vacancies for boys and for girls filled during the year were 140,066 and 124,596, respectively, as compared with 114,872 and 105,353, respectively, in

Juvenile Unemployment Centres were continued in a number of Juvenile Unemployment Centres were continued in a number of areas. The maximum number of centres open was 87, during the week ended 23rd December, 1927; and the maximum attendance was reached in the week ended 14th January, 1927, when the average attendance was 7,139, and altogether 8,403 juveniles attended. Special efforts were made, in the later months of the year, to develop the organisation of such centres in the depressed mining areas (South Wales, Durham and Northumberland, and the south of Scotland).

This section of the Report also contains a summary of Part I of the Report of the Committee on Education and Industry (Scotland), and a statement of the policy of the Government in regard to the Reports of the two Committees on Education and Industry.

Trade Boards.—There was no change during the year in the list of Trade Boards.—There was no change during the year in the list of trades to which the Trade Boards Acts are applied. During the year there were 54 meetings of full Trade Boards, and 156 meetings of various committees of the Boards; 19 Boards did not meet at all. The meetings of the Boards were chiefly occupied with questions of minimum rates. 38,574 learners, as compared with 30,177 in the previous year, were certificated by 20 Trade Boards; and 486 indentured apprentices, compared with 424 in the previous year, were registered with seven Trade Boards.

Arrears were claimed on behalf of 6,591 workers, or roughly 6.3 per cent. of the workpeople whose wages were examined by the Ministry inspecting staff.

International Labour.—This section gives an account of the proceedings at the tenth Session of the International Labour Conference, held at Geneva in May and June, 1927, at which two draft Conventions and a draft Recommendation were adopted; also a questionnaire concerning minimum wage-fixing machinery, and a number of resolutions. Officers of the Ministry attended the four meetings of the Governing Body of the International Labour Office; and the Report contains a brief account of the proceedings at these meetings.

H.M. Government ratified during the year the draft Convention concerning simplification of inspection of emigrants on board ship: the ratification is to become operative when the Convention has been ratified by France, Germany, Holland, Italy, Norway, and Spain. H.M. Government have also notified their acceptance of the recommendation regarding the protection of emigrant women and girls on board ship

Training Centres for Young Unemployed Men.-The Ministry has two farm training centres, at Claydon, near Ipswich, and at Brandon, at which training is given chiefly for oversea employment, though there is also accommodation for a number of "handymen" for home employment. The course of training, which was originally six months, was soon reduced to four months, and later to 16 weeks at Brandon and to nine weeks at Claydon. The training—which is carried on as far as possible under the conditions the men will find in Canada or in Australia, with implements, wagons and harness largely of Canadian and Australian types—is designed (i) to eliminate men who would not be likely to succeed in the Dominions, and (ii) to teach those who are found suitable the rudiments of certain farm operations; and it has been found valuable in both directions. The training scheme taps a supply of men from the towns who would

^{*} Inclusive of the aggregate duration in January-April, 1928, of one dispute, involving in all about 100 workpeople, of which no settlement has yet been reported.

† Workpeople involved in more than one dispute during the year are counted more than once in the totals for the year. The extent of such duplication is not very considerable except in the case of industries involved in the general strike in May, 1926, and in the coal-mining group, in which about 41,000 workpeople in 1926, 100,000 in 1921, 300,000 in 1920, 150,000 in 1919 and 106,000 in 1912 were involved in more than one dispute.

A notice of this Act appeared in the January, 1928, issue of this GAZETTE,

not be accepted, or would only be accepted in small numbers, without some such training; and the possibility of obtaining the training attracts a good type of men from the towns, who would not be prepared to embark upon farm work oversea without the training. The upper age limit for applicants has been raised from 25 to 35,

162

the lower age limit remaining at 19.

The success of the experiment has been such as to justify some expansion, particularly in view of the desirability of training an increased proportion of miners from the distressed mining areas. With the additional accommodation now provided, each of the centres is capable of taking 250 men for oversea employment, and 50 "handymen" for home employment. In addition, two summer camps have been established on Crown land near Brandon. Training The numbers of men admitted to, and trained at, the two centres

up to the end of December, 1927, were as follows:-

	Claydon.	Brandon.
Number of men passed through centre :-		
	778	702
	459	121
	290	208

THE MALES BATTLE SAND PERSON AND ADDRESS OF REAL PROPERTY.		

The two centres at Birmingham and at Wallsend each provide accommodation for 400 men, who are in training for home employ accommodation for 400 men, who are in training for home employment. It has been shown that the training produces a marked improvement in the men's physique and morale, that it increases their chances of getting work, and that the work they get is of a better type than what most of them would have got without the training. Notwithstanding the continued depression in trade, no less than 92 per cent. of the men trained were able to secure employment; and the records of the Birmingham centre show that 89 per cent. of the men trained there were still in employment at the end of December, 1927. The trades in which the men have been placed include building and other works of construction, furniture making and other woodworking trades, engineering and allied trades, including the manufacture and repair of motors and cycles, electrical trades, electro-plating, road construction, road transport, railway work, and a number of miscellaneous occupations.

work, and a number of miscellaneous occupations.

The following Table shows the number of men admitted at these two centres up to the end of the year 1927:—

	Birmingham.	Wallsend.
Number of men passed through centre . Wastage—dismissals, withdrawals, etc	201	1,745 392
Completed training, or found employment before completing full course Number of men known to have found	1,993	1,353
TO A CONTROL OF THE PROPERTY O	1,892	1,191

At the end of 1927 it was decided to extend the facilities for At the end of 1927 it was decided to extend the facilities for training on this side also, and, having regard particularly to the needs of men from the distressed mining areas, to provide two additional centres, with accommodation for 200 men at each. These two centres—at Dudley and at Bristol—have been opened during the current year. The number of men in training at Bristol has now been raised to 400, and the number at Dudley to 300.

RECENT CHANGES IN THE AVERAGE LEVEL OF "REAL" WAGES.

In reply to a question in the House of Commons on 19th April, as to the increase or decrease of "real" wages in this country for the years 1924, 1925, 1926, and 1927, respectively, the Parliamentary Secretary to the Ministry of Labour stated that the information in the possession of the Ministry of Labour in the possession. to the Ministry of Labour stated that the information in the possession of the Ministry of Labour is not sufficient to provide a satisfactory basis for precise computations as to the changes in real wages during the period referred to. The following Table, however, was supplied, giving (i) such estimates as are available with regard to the average level of rates of wages for a full ordinary week's work at the beginning of each of the years 1924–28 in relation to the corresponding level in July, 1914 (taken as 100); (ii) the average level of working-class cost of living at the same dates; and (iii) figures indicating the average relative level of real wages for a full week which would be obtained by combining the figures in columns (1) and (2) of the Table:—

August (100) Tol. (100) Vilentatio 2	han i	in his section section for the	Rate of Wages on the Basis of a Mormal Working Week. (1)	Cost of Living.	Real Wages, i.e., Rates of Wages and Cost of Living combined. (3)
July, 1914	***		100	100	100
1st January,	1924 1925 1926 1927 1928		165-170 170-175 175 175 176 170-175	177 180 175 175 168	93-96 94-97 100 100 101-104

The figures as to wages represent only approximate estimates arrived at after consideration of such data as are available, relating

almost wholly to those industries, or sections of industries, in which organised arrangements exist for the negotiation of changes in wage rates on a collective basis. The cost-of-living figures are those regularly calculated by the Ministry of Labour as to the average changes in the cost of maintaining the pre-war standard of living of working-class families. In view of the incompleteness of the data on which the estimates as to changes in wages rates are based, and of the fact that these estimates represent averages of conditions varying widely among different classes of workpeople, the figures given in the final column should not be regarded as affording more than a very general indication of the average movement of real wages, on the assumption of a full week's work. It should be noted that the figures relate to rates of wages and not to earnings. For those in employment, earnrates of wages and not to earnings. For those in employment, earnings have increased in a greater proportion than rates of wages as compared with 1914, owing to the greater prevalence of piece-work and for other reasons; but this greater increase of earnings is offset to some extent by the higher general average of unemployment.

NUMBER OF PERSONS REGISTERED AT EMPLOYMENT EXCHANGES IN GREAT BRITAIN, OCTOBER, 1927, TO MAY, 1928.

In the issue of this GAZETTE for October (page 371), a statement was published bringing up to that date the record of the number of persons registered at Employment Exchanges in Great Britain in each week from 7th January, 1921, to 3rd October, 1927. In the Table below the series is continued to the latest date for which figures

Date.	Number.	Date.	Number.
1927: Oct. 10th 17th 24th 31st Nov. 7th 28th 28th 12th 12th 12th 12th 12th 12th 19th 26th 1928: Jan. 2nd 9th 25rd 30th	1,073,000 1,071,296 1,074,032 1,106,057 1,111,651 1,125,735 1,126,254 1,145,230 1,149,648 1,125,223 1,100,052 No figures available. 1,336,303 1,232,069 1,193,813 1,178,750 1,168,941	1928: Feb. 6th 13th 20th 27th Mar. 5th 19th 26th 26th 4pr. 2nd 9th 16th 23rd 30th May 7th	1,162,153 1,159,772 1,136,687 1,108,676 1,094,452 1,071,735 1,066,077 1,033,845 1,041,935 No figures available. 1,083,774 1,062,285 1,136,003 1,103,822

ESTIMATED NUMBER OF INSURED PERSONS IN EMPLOYMENT.

In the Table below figures are given showing the results of an attempt to arrive at an approximate estimate of the number of insured persons in employment in Great Britain at 23rd April, 1928, with comparative figures for 23rd January, 20th February, and 26th March. The method by which the estimates have been computed is explained in the March issue of this GAZETTE, pages 81 and 82.

EMIGRATION AND IMMIGRATION IN 1927.

The issues of the Board of Trade Journal for 22nd and 29th March, and for 12th and 19th April, give statistics of the emigration and immigration of British subjects during the year 1927, with some particulars of the occupations and ages of the migrants.

The number of British subjects who were recorded as leaving permanent residence in Great Britain and Northern Ireland to take up permanent residence (i.e., residence for a year or more) in non-European countries was 153,505 in 1927, as compared with 166,601 in 1926 and with 140,594 in 1925. The number of British subjects who were recorded as leaving permanent residence in non-European countries to take up permanent residence in Great Britain and Northern Ireland was 55,715 in 1927, as compared with 51,063 in 1926 and with 56,335 in 1925. in 1926 and with 56,335 in 1925.

The following Table shows the numbers of emigrants of British nationality from Great Britain and Northern Ireland to the principal countries in each of the last two years:—

Country of Future Pe	1926.	1927.			
Australia				49,632 44,513	52,916 40,991

STATE-AIDED SETTLEMENT OVERSEAS.

THE MINISTRY OF LABOUR GAZETTE.

A Review for 1927.

According to the Report of the Oversea Settlement Committee for 1927,* the total number of British ettlers who were assisted, under the Empire Settlement Act, to 36 overseas in 1927 was 63,027 (of whom 20,169 were men, 18,010 women, and 24,848 children), as compared with 65,530 in 1936, and with 39,529 in 1925. The following Table shows the total of departures under the Empire Settlement Act to the several Dominions in each of the years 1925, 1926, and 1927.

	-	1925.	1926.	1927.
Canada Australia		 8,779 22,527	20,862 32,678	29,244 29,132
New Zealand South Africa		 8,097 126	11,795 195	4,446 205
Total		 39,529	65,530	63,027

It will be seen that there was a slight decline in the departures to Australia in 1927 as compared with 1926, a great decline in the departures to New Zealand, and a considerable increase in the departures to Canada. The decrease in assisted migration to New Zealand is attributed to some local unemployment in that Dominion, consequent on a temporary setback to prosperity due to difficulties in connection with the marketing of New Zealand butter and other

The Oversea Settlement Committee take the opportunity of the completion of the first five years of the operation of the Empire Settlement Act to examine the causes which have prevented a larger transfer of population from this country to the Dominions under the provisions of the Act. These hindrances they find to a certain extent in unsatisfactory trade conditions, and in the improvement of social conditions in this country through schemes of social insurance. But the chief adverse factor is stated as being that the Dominions, for the most part, restrict the benefits made available by the Act to farm workers and household helps, classes especially welcomed in the Dominions, but which can ill be spared by us. The Committee are of the opinion that the opposition on the part of the Oversea Governments to state-aided immigration on a large scale is based on the fear that a too rapid increase of population might tend to congest the labour market, and thus bring about a might tend to congest the labour market, and thus bring about a fall in wages and an increase in unemployment.

ARTIFICIAL HUMIDITY IN COTTON CLOTH FACTORIES.

The Departmental Committee, appointed by the Home Secretary in November, 1924, "to consider and report whether any, and if so, what modifications of the existing statutory regulations governing the use of artificial humidity in cotton cloth factories are desirable and practicable" have presented their Report.†

and practicable" have presented their Report.†

The Committee state that they are satisfied that, contrary to past allegation, there is no evidence that employment in humid sheds gives rise to more sickness than does employment in non-humid sheds, or vice versa. At the same time they point out that, so far as working conditions are concerned, the present distinction between "wet" and "dry" sheds appears, in many cases, to be of legal rather than of real significance; and they consider that any amendment of the Regulations should be framed to deal with those sheds in which there are extreme conditions, whether the sheds are "humid" or "dry." They are satisfied that the total abolition of the use of artificial humidification would add to the difficulties of a portion of the trade by increasing the cost of manufacturing certain cloths in this country. Foreign competition in the classes of goods concerned is at present of relatively small dimensions; but any serious restriction placed upon manufacturers in this country which is not shared by their competitiors will greatly increase the effect of such competition. The Committee are satisfied that a certain amount of humidity is necessary in weaving, and think there should be no objection to the introduction of humidity by artificial means, provided it is subjected to proper control.

The chief problem is to reconcile the temperature and humidity

The chief problem is to reconcile the temperature and humidity required by the process with those necessary for the health and comfort of the worker; and the Committee go on to suggest a number of improvements in the existing Codes of Regulations, keeping these two points in view. They recommend, inter alia, that artificial humidification shall cease when the wet-bulb reading of the hygrometer exceeds 72½ degrees, instead of 75 degrees, as at present; and that all work shall cease when the average wet-bulb reading of all the hygrometers in any weaving shed exceeds 80 degrees. Other suggested changes in the Regulations are concerned with ventilation, minimum temperature at commencement of work, whitewashing of minimum temperature at commencement of work, whitewashing of windows, cloak-room accommodation, etc.

APPRENTICESHIP AND TRAINING INOUIRY.

164

The sixth volume of the Report of the Ministry of Labour on the Inquiry made in 1925 and 1926 into Apprenticeship and Training for the Skilled Occupations in Great Britain and Northern Ireland has recently been published.* The volume deals with the engineering, nas recently been published. The volume deals with the eighteeting, shipbuilding and ship-repairing industries, railway workshops, railway carriage and wagon building, light castings, forging and drop stamping, sheet metal working, motor body building, scientific instrument manufacture, cutlery manufacture, edge tool manufacture, certain other miscellaneous metal industries, and the precious metal

The Report describes the conditions of apprenticeship and learner-ship training in the various industries, as disclosed by the returns received from a considerable number of representative employers

and from the principal trade unions.

The Report details the methods of recruitment of boys and girls; The Report details the methods of recruitment of boys and girls; the ages at which they commence apprenticeship and learnership; the numbers of indentured apprentices, of apprentices under verbal agreement, and of learners; the premiums paid; the duration of apprenticeship and learnership; methods of factory and workshop training; provisions for technical education; wages, and other conditions of apprenticeship and learnership. Summaries are also included of the various provisions affecting apprentices and learners contained in collective agreements arrived at between employers' associations and trade unions, and in trade union rules.

associations and trade unions, and it states which are in operation or have been recommended for adoption are described at some length, and copies of model indentures and of those in use in some more important engineering and shipbuilding firms are also

Extent of Apprenticeship and Learnership.—The total number of male apprentices and learners covered by the returns was 92,871, of whom the great majority (86,339) were in the engineering, ship-building, and light castings industries, and in the principal railway workshops. These do not, of course, represent the total number of apprentices in the industries concerned, since the inquiry was made by way of sample: but the sample taken was substantial made by way of sample; but the sample taken was substantial, covering, for example, between 55 and 60 per cent. of male workpeople

in the engineering industry, and 72 per cent. in shipbuilding.

Apprenticeship is still the method most usually adopted for the recruitment of boys for the skilled occupations in the larger industries.

Thus, of the 92,871 boys in training included in the returns, nearly four-fifths were apprentices, and little more than one-fifth learners. In engineering, three-quarters, and in shipbuilding, practically all, of the boys in training were apprentices. In some of the smaller metal industries, however, learnership is more usual than apprenticeship, as for example, in religious contents of the smaller metal industries. ship, as for example, in railway carriage and wagon building, in cutlery and edge tool making, and in the several industries to which the provisions of the Trade Boards Acts have been applied; the same is true of some districts even as regards the larger industries, learnership being almost as common as apprenticeship in the engineering industry at Leeds and in the North and West Midlands; while in London there are more than twice as many learners as

apprentices in engineering firms.

A large majority of the firms making returns in the shipbuilding and in the engineering industries reported that they took apprentices. In the smaller metal industries only a minority of the firms take

Character of Apprenticeship Agreements.—Apprenticeship is usually served under verbal agreement, but indentures figure largely in certain industries; thus in engineering, about one-quarter of the apprentices, and in shipbuilding, more than a half of the apprentices,

Premiums.—Premium apprenticeship is relatively rare, except in shipbuilding firms in the Mersey and Barrow district and in Northern Ireland. Some engineering firms also require premiums from apprentices (frequently those who enter as "pupil" or "student"

Methods of Recruitment.—The selection of boys for the skilled occupations is made largely from among relatives of the workers in each industry. Many boys are recruited through the Juvenile Employment Exchanges, or upon the recommendation of Juvenile Employment Committees and similar bodies, of schoolmasters, or of workers already employed in the industries concerned; a very large number of boys in each industry are recruited from casual applicants and by advertisement.

and by advertisement.

The type of boy engaged is usually that of the intelligent and physically strong elementary school boy; but some firms prefer to select their apprentices from among boys who have attended secondary or technical schools, or who possess some academic certificate or diploma. This higher standard is, however, a comparatively rare requirement, except in the case of boys who are trained as "pupil" or "student" apprentices for professional or supervisory positions in such industries as engineering and shipbuilding, and in the case of apprentices in certain occupations (e.g., in the scientific instrument making and precious metal industries).

Most of the employers' associations who have given their opinion on the point consider that the present arrangements for reprinting and training boys produce an adequate supply of skilled workers for the industries concerned. Where individual employers have experienced difficulty in obtaining apprentices or learners, they have generally attributed them to such causes as the reluctance of boys to be bound for long periods of training, or the superior wage-earning

to be bound for long periods of training, or the superior wage-earning attractions of semi-skilled, unskilled, or "blind-alley" occupations

in other industries, or to the comparatively low rate of journeymen's wages, and to the poor prospects in industries which have suffered from long periods of depression.

Probationary Periods.—It is the practice of many firms in the principal industries covered by the Report to make the retention of boys as apprentices or learners dependent upon their progress during a probationary period of actual service, this period being considered part of the agreed training term for those who are retained.

Age at Commencement of Apprenticeship and Learnership.—Apprentices and learners in these industries usually commence Apprentices and learners in these industries usually commence their training at 14, 15, or 16 years of age, the majority commencing at 14 or 16 years. In the engineering and shipbuilding industries generally the predominant commencing age is 16 years; but 14 years is usual for apprentices in certain districts and in some occupations of these industries, and also for apprentices in other industries, such as light castings, motor body building, gas meter manufacture, precious metals, etc.

Relatively few boys enter upon their training at a later age

Period of Apprenticeship and Learnership.—The periods of apprenticeship and learnership are largely determined according to the age at which boys commence their training, and usually conclude at the age of 21 years, rarely extending beyond that age. The periods most commonly served are five and seven years, coinciding usually, but by no means invariably, with commencing ages of 16 and 14 years, respectively; a noteworthy exception is that of apprentices in the light castings industry, who usually commence at 14 years of age and serve for 5 years. On the whole, five years is the period which

Improvership.—Upon concluding their apprenticeship or learner-ship, boys in many occupations are called upon to serve a period of improvership, during which further practical experience must be gained prior to their being paid the full journeymen's rates of wages appropriate to their occupations. In the engineering, railway carriage and wagon building, and light castings industries, improvercarriage and wagon building, and light castings industries, improvership periods are customary; but in shipbuilding and in certain other industries, such as gas meter making and cutlery manufacture, relatively small proportions of the boys serve such a period. The length of improvership varies generally between six months and two years; but in most industries and occupations the usual period is

Wages of Apprentices and Learners.—The rates of wages paid to apprentices and learners in these industries cover wide ranges, both in the first and in the last years of training. Little uniformity appears in the occupational rates paid, either between industry and industry in the occupational rates paid, either between industry and industry or between firm and firm in the same industry, except in such industries as light castings, in which wages have been fixed for various occupations by general collective agreement; lock, latch and key manufacture, in which the wages paid conform closely to those fixed by a Joint Industrial Council; and in the several industries for which scales of minimum wages have been fixed for learners or other juvenile workers by Orders under the Trade Boards Acts. Frequently there is a uniform scale of wages for apprentices or learners in the same is a uniform scale of wages for apprentices or learners in the same firm; while in certain districts boys are paid in accordance with scales determined by local collective agreements or recognised by

scales determined by local collective agreements of recognised by local employers' associations.

The usual range of wages during the first year of apprenticeship (covering the rates paid to 75 per cent. of the apprentices in all occupations in each industry) is very wide—from 3s. to 27s. per week; but most apprentices in the larger industries receive rates which fall within a range of 7s. 6d. to 16s. per week. In the engineering industry generally the usual range is from 8s. to 12s.; in ship-building, 8s. to 12s. 9d.; in railway workshops, 7s. 6d. to 17s. 6d.; but a much higher level is shown for apprentices in wire drawing (10s. to 27s. per week), and in the light castings industry (12s. to 15s. 10d. per week)

The usual range of wages in all the industries dealt with in the Report during the last year of apprenticeship is from 10s. to 50s. per week, but in the individual industries the ranges are usually much narrower. Thus the usual range in shipbuilding is from 17s. 6d.

much narrower. Thus the usual range in shipbuilding is from 1/s. 6d. to 24s. 6d. per week, in the light castings industry 33s. to 39s. per week, and in the engineering industry 20s. to 32s. per week.

The wages of learners during both first and last years of training usually exhibit a higher level than those of apprentices in the same industries and occupations, especially in certain of the smaller

In those industries in which an improvership period is commonly served, the rates of wages paid during this period and the methods of calculating these rates are very varied; but in engineering, for example, it is common for ex-apprentices who are serving a twelve months' improvership to receive from 10s. to 15s. 6d. per week less months' improvership to receive from 10s. to 15s. 6d. per week less than the appropriate journeyman's rate, with increments every three or six months until the full rate is attained; in shipbuilding the improvership rates often are 75 per cent. of the full rates, rising to 85 per cent. in the second six months; in the light castings industry, rates varying from 38s. to 54s. per week are commonly paid. In the last-named industry and in others, such as motor body building, gas-meter making, and edge-tool manufacture, many apprentices and learners are transferred to piecework either during or prior to the last year of apprenticeship or learnership.

Collective Agreements.—Such collective agreements between associations of employers and workers as contain provisions with regard to the conditions of apprenticeship or learnership are of somewhat limited application. Thus in the engineering and shipbuilding in dustries there are no collective agreements of any importance on

May, 1928.

There are, however, agreements of a comprehensive character, which include provisions relating to apprenticeship, in the light castings industry, in heating and domestic engineering, in ship-repairing, and in steel pen manufacture.

The provisions of other agreements affecting apprenticeship vary greatly both in terms and in application. Some (e.g., those covering the wiredrawing and the precious metal industries) determine all the main conditions of service—the limits of commencing age, periods of apprenticeship and improvership, the proportion of apprentices to journeymen, and rates of wages; others specify only one or two of these conditions, e.g., rates of wages during improvership. In such cases, the period of apprenticeship agreed upon is generally five years, while the prescribed ratio of apprentices to journeymen is in most instances 1 to 3, 1 to 4, or 1 to 5.

Special Apprenticeship Schemes.—The comparative rarity of

Special Apprenticeship Schemes .- The comparative rarity of general collective agreements dealing with the conditions of apprenticeship is to some extent offset by the provision of special apprenticeship schemes, such as those prepared and recommended to their members by the River Thames Dry Dock Proprietors' and Ship Repairers' Association, the Hull Iron Trades Employers' Association and the National Federation of Vehicle Trades. These schemes described at some length in the Report.

Workshop Training and Technical Instruction.-The principal method of training apprentices and learners adopted in most industries is to place the boys under the supervision or instruction of journeymen In some of the larger works special teachers are appointed to teach apprentices, or there is a special "nursery" in which apprentices learn the rudiments of their respective trades. The actual training given, and its order and progression, differ largely according to the type and size of firm; but training is usually confined to the particular trade or occupation of each boy, though it is not in some cases restricted to the work of a single department in a firm.

Very few firms insist upon apprentices or learners supplementing their workshop training by attendance at technical or trade classes, but such attendance is generally encouraged, special inducements (time off without loss of pay, prizes, merit bonuses, etc.) being offered by many firms. A few firms, mainly in the engineering and ship-building industries and the principal railway companies, have estab-lished technical classes for boys on their own premises. In a number of firms (e.g., in the shipbuilding and engineering industries) apprentices are trained on the "sandwich system,"

spending alternate periods at a university or technical college and

The character and extent of the facilities offered by local education thorities and other bodies for technical instruction in connection with the various occupations and manufacturing processes of the industries dealt with in the Report are noted.

Girl Apprentices and Learners.—The Report also details the conditions of recruitment and training of girl apprentices and learners. There are few girl apprentices in any of these industries, and the majority of girl learners employed in firms whose returns are summarised in the Report are engaged in scientific instrument making, and in those industries in which labour conditions are governed by Orders under the Trade Boards Acts.

In addition, the Report contains an exhaustive analysis of the rules of trade unions, and of all the known collective agreements, so far as they affect apprenticeship.

SURVEY OF METAL INDUSTRIES

THE Committee on Industry and Trade have issued a Survey of the Metal Industries,* as Part IV. of their "Survey of Industries."†

The present volume deals with the iron and steel, engineering,

electrical manufacturing, shipbuilding, and coal-mining industries. It describes the conditions under which each of these industries has grown up; the development of its main branches, as measured by numbers employed, volume and value of production, and overseas trade; the structure and organisation of the industry; its situation with regard to raw materials, research, standardisation, selling organisations, international agreements, etc.; and its position in regard to competition, both in overseas markets and at home.

Iron and Steel.—Great Britain outstripped all other countries put together in output of pig iron until the later 1870's; but thereafter the iron and steel industry developed so rapidly abroad, particularly in the United States, in Germany, and in certain other Continental countries, that in 1913 production in Great Britain, though greater than in a proportion of the production of the pro than in any previous year, represented less than one-seventh of the world's output of pig iron, and little more than one-tenth of the world's output of steel. The Committee point out the advantage which the foreign competitors of this country have enjoyed through the later development of the industry in their respective countries in that they have been able to start with the most modern plant and technique. Reference is also made to later developments, during and since the War, both in this country and abroad. These developments have taken place both in plant and technique, and also in organisation, as shown, for example, in the formation of the National Federation of Iron and Steel Manufacturers, in the growth of giant undertakings, of terminable agreements and associations, and of buying and selling organisations; in the development of costings

systems, in the supply and training of technical staff and of labour-The sliding scale of wages, which is general in the industry, trade union organisation, and the adoption of the eight-hour shift system are also considered. In conclusion, the question of the ability of the British iron and steel industry to compete in the international market

THE MINISTRY OF LABOUR GAZETTE.

Engineering.—This chapter deals more specifically with mechanical, as distinct from electrical, engineering. The Committee refer to the fluctuations of employment in recent years; the relation between the numbers of men and of women employed, and between the numbers of men and of women employed, and between the numbers of workpeople of different degrees of skill; the effect of the post-war reduction in hours; and the relations between employers and workpeople. The latter part of the chapter is devoted to a discussion of particular branches of the industry (agricultural machinery, locomotive building, the manufacture of automobiles and cycles, and cuttery and files) under the following headings:—development magnitude and cutture organisation: efficiency. development, magnitude and output; organisation; efficiency; standardisation and mass production; research; selling arrangements;

import duties; trade associations; international trade.

If the post-war years 1924 and 1925 be compared with the year 1913, there was a very severe falling off in the exports of agricultural machinery from this country. (The United States dominate the world market for agricultural machinery, as before the War.) On the other hand, the United Kingdom occupied the first place in 1925 as an exporter of health. the other hand, the United Kingdom occupied the first place in 1925 as an exporter of boilers and boiler house plant, prime movers, rail locomotives, and textile machinery, and (on a weight basis, though not in value) of sewing machines. In motor cycles this country has a material lead over the United States, its only serious competitor; it also leads in cycles. In motors, the exports from this country have shown a vigorous upward trend since the War; and, in 1926 and 1927, they exceeded for the first time the retained

Electrical Manufacturing.—Great Britain at first lagged behind other important countries, notably Germany and the United States, in the consumption of electricity, partly owing to the unsatisfactory legislative provisions under which the industry was then carried on, and partly owing to the fact that, when the great development in the application of electrical power to industry began, this country had already become highly industrialised on a basis of steam power. Since the war, however, great progress has been made in this country, so much so that, whereas in 1913 Germany had a position of outtanding predominance, in recent years the exports of Great Britain, the United States, and Germany were about equal, and in 1925 the lead passed to this country.

Certain branches of the electrical manufacturing industry (cable

making, telephone manufacture, electric lamp manufacture, and miscellaneous electrical products) are discussed under headings similar to those stated above for general engineering.

similar to those stated above for general engineering.

Shipbuilding.—In the days of wooden sailing vessels, that is, until the middle of the last century, the British shipbuilding industry held by no means a predominant position; but, on the introduction of the mechanically propelled iron vessel, the United Kingdom at once became by far the greatest builder of such vessels. In the years 1909 to 1913 the United Kingdom launched about three-fifths of the total tonnage of the world; practically the whole of the construction for British owners was in the hands of British builders, who, in addition, were building more than a quarter of all the vessels built for foreign owners. They also received numerous orders for warship construction.

construction.

During and since the war great changes have taken place, and the British share of world output fell from an average of 60 per cent. in the years 1909 to 1913 to about 35 per cent. in the years 1920-21, and about 47 per cent. in the period 1922-26. This last period (1922-26) was a time of very severe depression; in two years of this period, 1923 and 1926, the launchings in this country fell to the lowest figure known for thirty years. There was a noticeable improvement, however, in 1927. The effect of the depression upon employment and wages is traced. Reference is made to the problem employment and wages is traced. Reference is made to the problem of "demarcation" (i.e., to the difficulties that arise when certain classes of work are claimed by rival bodies of workpeople), and certain uggested solutions are mentioned.

Coal Mining.—The Committee had originally intended to include coal mining among the industries to be investigated by them; but, in view of the circumstances of the industry since 1924, and particularly the appointment of the Royal Commission on the Coal Industry in 1925, they have not taken any evidence regarding it. They have, however, arranged for a summary of the Report* of the Royal Commission to be prepared by the Mines Department: this occupies about 70 pages of the present survey, and is preceded by an introductory section, prepared by the Committee, and supplemented by some information as to developments since the Report was issued.

In the introductory section the Committee refer to the exceptional dependence of this country upon the export trade in coal: except in one or two post-war years the exports from this country have usually exceeded the combined exports of all the rest of the world. Hence the heavy post-war decline in British exports, and the decline in the British share in world production and consumption, have seriously affected the fortunes of the British coal industry. Other circumstances troubling the coal industry, in this and in other

circumstances troubling the coal industry, in this and in other countries, have been the difficulty and cost of mining, which have countries, have been the difficulty and cost of mining, which have long been increasing; the rising standard of living, particularly among miners; the increased efficiency in the use of coal (which, of course, reduces the amount required), and the competition of oil fuel and of hydro-electric power. The Committee conclude their introductory note with a brief reference to the industrial disputes, which have been of more serious importance in the coal industry than in any other, culminating in the prolonged stoppage of 1926.

LABOUR DISPUTES ABROAD IN 1927

IRISH FREE STATE.*

During 1927, there occurred in the Irish Free State 53 industria disputes involving 2,312 workpeople and causing a loss of 64,020 working days. These are the smallest numbers of industrial disworking days. These are the smallest numbers of industrial disputes, workpeople involved and working days lost in the Irish Free State since 1922, the first year for which separate statistics were collected. Of the 55 disputes (two from 1926) which terminated in 1927, 14 ended in favour of the workers, 17 in favour of the employers, 17 in a compromise, and 7 had indeterminate results. Settlement was reached by direct negotiation between the parties in 38 disputes, by voluntary conciliation in 10 cases, and 7 were terminated without successful negotiation by any party. The most important disputes, in so far as the number of working days lost is concerned, occurred in the textile industry in which there were three disputes affecting 806 workpeople and involving a loss of 28,602 working days.

CANADA.+

The total number of disputes in Canada in 1927 was 79, affecting 22,683 workers and resulting in a loss of 165,288 working days. In only two years since 1901 has the number of working days lost been lower than in 1927, viz., in 1902, 120,940, and in 1915, 106,149 working days. Of the above 79 disputes, 21 terminated in favour of the workers, 33 in favour of the employers, 15 were terminated by a compromise, and 10 were either without definite result or remained unterminated. Thirty-five disputes were settled by negotiations between the parties, 7 by conciliation or mediation, one by reference to a Board under the Industrial Disputes Investigation Act, 1907, 17 by the voluntary return of the workers, 15 by replacement of the workers, and the method of settlement of the remaining 4 of the workers, and the method of settlement of the remaining 4 disputes was indefinite. The most important disputes, so far as numbers involved and days lost were concerned, occurred in the Nova Scotia coal fields (where 6 disputes affected 11,027 workpeople and involved a loss of 40,555 working days), and in the building industry in Toronto (where a carpenters' dispute and a strike of other building workers in sympathy with the carpenters involved 1,527 workers and a loss of 30,000 working days).

NEW ZEALAND.t

During 1927, there occurred in New Zealand 36 disputes affecting 4,384 workers, as compared with 59 disputes in 1926 affecting 6,264 workers. The total number of working days lost in 1927 amounted to 10,395; no exact figure is available for 1926, but it is estimated at about 33,000 days. The approximate loss in wages was £9,788 in 1927, and £32,355 in 1926. The most important group of disputes occurred in the coal mining industry in both years; in 1926, ther were in this industry 25 disputes involving 4,159 workers, and resulting in an approximate loss of £17,647 in wages; and, in 1927 there were 14 disputes affecting 3,109 workers with a resultant loss of 5,835 working days and approximately £5,875 in wages.

INDIA

INDIA.

The Bombay Labour Gazette for March, 1928, contained information extracted from a statistical bulletin, published by the Department of Industries and Labour for India, showing that, during 1927, there were in India 129 industrial disputes affecting 131,655 workers and resulting in a loss of 2,019,970 working days. For 1926, the corresponding figures were 128 disputes involving 186,811 workers and a loss of 1,097,478 working days.

In 1927, 61 disputes were in respect of wages demands, 36 in respect of questions concerning the employment of particular classes or persons, 5 in respect of leave and hours, whilst the remaining 27 arose from other causes. In 15 disputes, the workers were successful, in 32 cases the result was a compromise, and in 79 cases the workers were unsuccessful, whilst 3 disputes were unterminated at 31st December, 1927. The industries chiefly affected were: cotton, 60 disputes and 350,011 working days lost; jute, 11 disputes and 234,715 working days lost, and railways (including railway workshops), 3 disputes and 1,250,421 working days lost; two strikes on the Bengal-Nagpur Railway alone accounted for a loss of 880,218 working days.

CERMANY

Provisional statistics relating to strikes and lock-outs in Germany in 1927 indicate a recrudescence of labour disputes during that year. Between 1922 (the peak year for labour disputes in Germany) and 1926 (the figures for which were the lowest recorded since 1919) there was a progressive decline in the figures, but this downward tendency ceased in 1927, as will be seen from the following comparative Table:—

Number of disputes (strikes and	1926.	1927. (Provisional)
loek-outs)	365	770
Number of undertakings affected	2,872	8,842
Number of persons on strike, locked out or suspended by reason of		
disputes	96,509	401,298
Number of working days lost	1,404,875	4,618,836

Trish Trade Journal, February, 1928. Dublin.
Canada Labour Gazette, February, 1928. Ottawa.
Monthly Abstract of Statistics. February, 1927, and January, 1928.

Hington. Wirtschaft und Statistik, No. 7, 1928. Berlin.

In 1927, there was a considerably larger number of strikes than of lock-outs, the respective figures being 674 and 96, this disparity extending, to a smaller extent, to the number of undertakings affected (6,924 and 1,918). On the other hand, the number of

affected (6,924 and 1,918). On the other hand, the number of persons affected by strikes during that year was 187,687, as against a total of 213,611 locked out; while 2,442,694 working days were lost by reason of strikes as against 2,176,142 on account of lock-outs. Disputes over wages (particularly in the textile, mining and tobacco industries) caused the largest number of strikes and lock-outs in 1927, while questions of working hours (principally in the mechanical engineering and pottery industries) also resulted in a large number of disputes. Detailed statistics are, however, not yet available in regard to the causes and results of the disputes recorded in 1927. corded in 1927.

AUSTRIA.*

In 1927, there were, in Austria, 189 strikes and 21 lock-outs affecting together 516 undertakings, as compared with 186 strikes and 18 lock-outs in 1926, affecting together 737 undertakings. The total numbers of workers affected by strikes and lock-outs respectively were 27,803 and 6,531 (18,624 and 3,319 in 1926) and the number of days lost through at the number of days lost through the number of th respectively were 27,805 and 6,551 (18,624 and 5,519 in 1926) and the number of days lost through strikes was 475,857, and through lock-outs 209,851 (232,944 and 64,740 in 1926). The increases are accounted for partly by the size of the undertakings affected, and partly by the fact that 38 of the disputes, involving relatively large numbers of workers, lasted for more than 30 days. Of the total number of strikes, 143 affecting 21,906, workers (79 per cent.) were

ue to wages questions.

The highest aggregate of days lost through strikes and lock-outs coursed in the metal industry, the next highest in the clothing

Of the total number of strikes, 86.8 per cent. were successful (24.9 per cent. completely, the remainder partially) and 13.2 per cent. were unsuccessful.

CZECHOSLOVAKIA.†

CZECHOSLOVAKIA.†

During 1927, there occurred in Czechoslovakia 198 industrial disputes which affected 170,702 workers employed in 3,469 undertakings and resulted in a loss of 1,395,024 working days. Corresponding statistics for 1926 were: 150 disputes, 37,267 workers affected, 601 undertakings involved and 464,383 working days lost.

The industries most seriously affected were building (27 disputes, 358,225 working days lost), textiles (23 disputes, 335,070 days lost) stone and clay industry (45 disputes, 230,459 days lost), and the clothing industry (13 disputes, 138,962 days lost).

The principal causes of disputes were wages (116 disputes, 1,198,493 days lost) and engagement and dismissal of workers (32 disputes, 24,247 days lost).

From the workers' point of view 24 disputes terminated successfully, 92 were compromised and 51 were unsuccessful.

The statistics of workers affected by disputes and of working days lost given above include those workers who were rendered idle

lost given above include those workers who were rendered idle as a result of the disputes and the number of working days lost by such workers.

SWITZERLAND +

The official statistics of strikes and lock-outs published by the Federal Labour Office at Berne, include only strikes and lock-outs which terminated during the year, and exclude any disputes which lasted less than one day. During 1927, 26 disputes occurred (23 strikes and 3 lock-outs), covering 328§ undertakings, directly affecting 1,604 workers (454 indirectly) and involving the loss of 34,160 working days (26,855 by workers directly affected and 7,305 by workers indirectly affected) indirectly affected).

indirectly affected).

Strikes in the textile (largely hand embroidery) and watch and clock making industries together accounted for approximately 87 per cent. of the total number of days lost.

Of the total of 23 strikes, 12 arose out of questions of wages, 6 concerned the engagement or dismissal of workers and the remaining 5 were due to other causes.

LABOUR DISPUTES IN SWEDEN.

No settlement having been reached in the dispute in the wood-pulp industry (reported in the issue of this GAZETTE for February, 1928, page 49), the Swedish Employers' Association decided to extend the lock-out to the paper mills as from 5th March. A further 13,000 workpeople were affected by this decision, and the total number of workers locked out was thus increased to 50,000. (The workers in the sawmilling industry were locked out, in connection with the sawmilling industry were locked out, in connection workers in the sawmilling industry were locked out, in connection with the same dispute, on 30th January.) The Conciliation Commission set up to deal with the dispute convened a meeting of the parties for 29th March, and, after protracted discussion, a settlement was reached on 8th April. Under the new agreement for the wood-pulp industry the minimum hourly rate of wages of the highest paid workers remains at 91 ore; but the maximum rate, inclusive of bonuses, is reduced to 1.18 kronor an hour. The number of the reduction in maximum hourly cornings. persons affected by the reduction in maximum hourly earnings is stated to be between 2,000 and 3,000. The hourly rate of yard workers (utearbetare) is increased from 77 to 80 öre. Work was resumed immediately after the Easter holidays, and the lock-outs in the sawmilling and paper industries were terminated.

tistische Nachrichten, April, 1928. Vienna. dustrial and Labour Information, 26th March, 1928. Geneva. pports Economiques et Statistique Sociale, February, 1928. Be-cluding 274 home-work undertakings engaged in handloom emb 0 öre = 1 krona = 1s. 1d. (approximately).

WAGES AND HOURS MOVEMENTS IN GERMANY.

Metal Trades.—The impending lock-out of a large number of Saxon metalworkers, which was reported in the last number of this GAZETTE, became partially operative as from 12th April. Further official conciliation proceedings which took place during the ensuing week resulted in the issue of an award, which was rejected by both parties, and a number of employers who had hitherto kept their works open declared a lock-out. By the end of April the number of workers on strike or locked out was estimated to be 130,000. At the beginning of the present month, further conciliation proceedings were instituted in the public interest by the Federal Minister of were instituted in the public interest by the Federal Minister of Labour, which resulted in the issue of an award (applicable to Saxony excluding Leipzig), increasing the basic hourly wage of time and pieceworkers to 81 pfennigs as from 1st April last. The corresponding rate for the Bautzen district is to be increased to 79 pfennigs, while a separate award for the city of Leipzig provides for the following adjustments in the existing wage scales:—the hourly time rate on engagement is to be increased from 80 to 85 pfennigs and the piecework basis hourly rate from 83 to 87 pfennigs; the minimum hourly time rate after six weeks' employment is raised from 88 to 92 pfennigs. These awards, although not accepted by either party, were declared binding on 9th May.

In Hamburg, 9,000 metalworkers ceased work on 10th April consequent upon their rejection of an arbitration award. This strike, which does not affect the shipbuilding yards, is still unsettled. After the failure of negotiations for the renewal of the metal trades

strike, which does not affect the shipbuilding yards, is still unsettled. After the failure of negotiations for the renewal of the metal trades agreement for Hanover early in April, about 1,000 metalworkers went on strike on April 14th. A lock out was subsequently declared by the employers, with the result that about 15,000 workers are at present out of employment. A conciliation board appointed to deal with the dispute has issued an award; but it is not yet known whether the terms proposed have been accepted.

A wage dispute in the Baden metal industry was settled by the issue of an award, at the end of April, increasing the basic wage from 72 to 77 pfennigs an hour, piecework rates being increased by 4 per cent. This award was rejected by the employers, but has been declared binding.

Shipbuilding.—The Federal Minister of Labour has declared binding an award (issued on 28th March last) granting a flat rate increase of 5 pfennigs an hour for all categories of workers employed in the German shipbuilding industry.

Mining.—Negotiations with regard to the terms of renewal of the district agreements for the Ruhr mining industry began at the end of March. The miners' unions had submitted claims for reduced hours and increased wages, both of which the owners were unwilling to concede because of the effect on costs of production, and of the lack of markets. The matter was referred to the district conciliation of markets. The matter was referred to the district conciliation authorities, and after prolonged negotiations an award was issued providing for the renewal, as from 1st May, of the existing agreements, subject to the following amendments:—Hours: Surface workers directly engaged in handling the raw coal (screeners, banksmen, etc.) are in future to work an eight-hour day; workers in continuous undertakings are required to work 9½ hours a day (with a daily shift time of 11 hours) as from 1st May, and 9 hours (10 hours shift time) as from 1st May, and 9 hours of welcome dependent days as a second continuous to the continuous to the continuous and the con 1st August next. The hours of underground workers do not appear to have been revised. The hours agreement, as thus amended, is to remain in force until 28th February, 1929, after which date it may be terminated subject to two months' notice.

Wages.—The present wage agreement is to be renewed as from 1st May, subject to a general increase of 8 per cent. Provision is made for revision in the case of an increase in coal prices; otherwise the wage agreement, as modified, is to remain in force until 31st March, 1929, after which it may be terminated at a month's notice. This award was rejected by both parties, but was, on 23rd April, declared binding by the Federal Minister of Labour.

A settlement has also been reached in the Saxon hard coal industry, the district agreement for which expired on 1st April last. After conciliation proceedings had been resorted to, a general wage increase of 7 per cent., for both underground and surface workers, was awarded as from 1st May. This award has been accepted by both parties.

Textiles.—Notice was given by the workers to terminate the district wage agreement for the Silesian textile industry as from 1st May last. As the result of subsequent conciliation proceedings, an award (stated to cover more than 60,000 workers) was issued on 2nd May, granting increases of 15 per cent. in time rates and 12 per cent. in piece rates. This award has been declared binding.

A dispute in the South Bayarian cotton industry, affecting the

A dispute in the South Bavarian cotton industry, affecting the conditions of employment of about 30,000 operatives, was settled at the beginning of May by the issue of an award (since declared binding until February, 1929) providing for wage increases averaging 7.7 research

Transport.—Consequent upon the failure of negotiations for the renewal, as from 1st May, of the wage agreement for engineers and firemen employed on vessels engaged in the Rhine transport industry, nearly 12,000 inland navigation workers and dockers ceased work on that date. The employers asked for a wage reduction of 13 per cent., while the representatives of the engine-room staffs claimed that wages should be increased. The dispute has resulted in an almost total stoppage of traffic on the Rhine, which is having an adverse effect on German coal exports, and up to the present no information has been received regarding the possibility of an early settlement.

WAGES AND HOURS IN THE GERMAN TEXTILE TRADES, 1927.

In Germany, until recently, the only wage rates which could be included in official wage statistics were the basic rates prescribed by collective agreements; no adequate data were available showing the extent to which actual earnings were affected by piecework systems, output bonuses, etc., on the wage side, as well as by short time and overtime on the hours side, and, consequently, nothing was known as to how actual earnings differed from the rates laid down by collective agreement. The necessity for statistics of wages actually earned in at least the most important branches of industry had long been recognised, and, accordingly, the Wages Statistics Act of 27th July, 1922, was passed, empowering the Government to issue instructions for the initiation of inquiries into the wages and salaries paid to manual and non-manual workers. The filling up of returns is made obligatory, under the threat of monetary penalties, and both the employer and recognitive of the warders again. and both the employer and representatives of the workers sign the returns. The issue of regulations under the Act was, however, postponed until 1927, owing to the fluctuations and uncertainties of the "inflation" and "post-inflation" periods.

The first inquiries under the Act are to be made so as to cover same branches of industry and groups of workers

practically the same branches of industry and groups of workers as are covered by collective agreements. The investigation is not to be undertaken simultaneously in all the industries, but, as far as possible, industry by industry, at intervals of about two months, the textile industry being the first to be covered.

The chief results of the inquiry into wages and hours in this industry have now been published in the journal* of the Federal Department of Statistics, from which the following summary has been made. The inquiry was carried out by means of wages returns framed in such a way as to make a comparison possible with the Federal collective agreement statistics for the last payment period prior to the 12th September, 1927, relating to piece-workers in 11 branches† of the textile industry, in 263 undertakings, in 19 chief centres.‡ In order to facilitate comparison between the collective agreement rates of the textile industry, in 253 undertakings, in 19 chief centres.‡ In order to facilitate comparison between the collective agreement rates of wages and the actual earnings, it was decided to limit the inquiry to the two principal occupations of skilled male and female workers (spinner, weaver or hosiery frame worker) paid at piece rates, and to male and female assistant workers over 20 years of age paid at time rates. These occupations, wage categories and age classes comprised 36,519 workers, or 21 per cent. of all the textile workers (171,544, according to the occupational census of 1925) in the

The following Table affords a comparison of the actual earnings of skilled workers in all branches and centres covered, with the average piece-work basis time-rates which are fixed by collective agree

The second secon		the state of the same of the same of		
Occupation.	Average hourly earnings at September, 1927 (exclusive of increases for extra hours and overtime and social allowances).	Average piece- work basis time-rates under collective agreements at September, 1927.	Average percentage increase of earnings over rates fixed by collective agreements.	
Skilled workers, male: Spinners Weavers or hosiery	Reichspfennigs. 82·4 84·9	Reichspfennigs. 65·1 71·4	Per Cent. 26 · 6 18 · 9	
frame workers Skilled workers, female: Spinners	82·2 60·3 55·5	64·7 51·3 47·9	27·0 17·5 15·9	
Weavers or hosiery frame workers	63.0	53.2	18.4	

As regards assistant workers, earnings at time rates only were considered, and a comparison can, therefore, be made with hourly collective agreement rates. For male assistant workers over 20 years the latter rates were, on an average, 55.6 pfennigs, and for female assistant workers over 20 years, 41.4 pfennigs. The actual hourly earnings (exclusive of increases for extra hours and overtime and for social allowances) were, for males, 61·3 pfennigs, and for females $44\cdot4$, being, on an average, therefore, $10\cdot3$ per cent. higher for male assistant workers and $7\cdot2$ per cent. higher for female assistant

workers than the collective agreement hourly time rates.

The average weekly working hours in all branches and centres covered, during the period of the inquiry, excluding the effect of losses due to sickness, absenteeism, etc., but including extra hours or overtime, were as follows :-

Skilled workers, male 50.0 hours. 7, ,, female 50.0 Assistant workers, male 53.1 7, , female 49.6

The average weekly extra hours or overtime, for which an increased rate was payable, amounted to:— Skilled workers, male ... 3.3 hours female 2·8 ,, 6·1 ,, 3·1 ,, Assistant workers, male female 33

Including payments for extra hours or overtime, and allowances for wife and children still paid in certain districts, the average

A comparison is made of the purchasing power of wages in September, 1927, with that of the pre-war period. Using the Federal cost-of-living index number, it is estimated that real wages based on net money wages, after deduction of income tax and social insurance contributions, were, in September, 1927, as compared with 1913 (taken as equal to 100 per cent.), as follows:—

Skilled workers, male ... 104 · 6 per cent.

"", female ... 109 · 6 , , ,

Assistant workers, male ... 107 · 4 , , ,

"", female ... 101 · 0 , , ,

of the 36,519 textile workers covered by the inquiry, more than two-thirds had, during the period of the inquiry, an actual working week of more than 48 hours (of these rather more than one-third worked from over 52 to 54 hours a week); 16.0 per cent. worked 48 hours a week, and 16.3 per cent. less than 48 hours. As regards the several occupations, 85 per cent. of the male assistant workers had an actual weekly working time of more than 48 hours; of these a little more than three-tenths worked from over 52 to 54 hours, and a little more than two-tenths worked more than 56 hours a week. The particularly long hours of male assistant workers are to some extent due to the fact that certain workers of this class are engaged in putting machinery into working order before the commencement of the normal working day, and in cleaning it after

Of the 15.107 skilled male workers covered by the inquiry (spinners of the 15,107 skilled male workers covered by the inquiry (spinners weavers, hosiery frame workers), two-thirds eame within the range of gross weekly earnings—over 32 up to and including 52 Reichsmarks; and 69 per cent. of the workers in this range were working over 48 up to and including 54 hours a week.

The skilled female workers covered by the inquiry (ring-frame spinners, throstle-frame spinners, flyer-frame spinners, weavers and hosiery-frame workers) numbered 15,227, of whom 82.6 per cent.

THE MINISTRY OF LABOUR GAZETTE.

spinners, throstle-frame spinners, flyer-frame spinners, weavers and hosiery-frame workers) numbered 15,227, of whom 82·6 per cent. fell into the range of gross weekly earnings—over 20 up to and including 40 Reichsmarks; and two-thirds of these were contained in the hours classes—over 48 up to and including 54 hours.

The inquiry covered 3,156 male assistant workers, over 20 years of age, paid at time rates of wages. Of these, 86 per cent. came within the range of gross weekly earnings—over 24 up to and including 44 Reichsmarks. The proportion of workers in this range working more than 50 hours a week was 84 per cent.

Of the 3,029 female assistant workers, over 20 years of age, paid at time rates, covered by the inquiry, about two-thirds had gross weekly earnings ranging from over 20 up to and including 28 Reichsmarks. Nearly three-quarters of the workers in this wage range had a working week of over 48 up to and including 54 hours.

Details are given in the source with regard to earnings and hours in each of the eleven branches of the textile industry and in each of certain districts. Concerning certain of the most important of these branches, viz., the cotton, wool, linen, hosiery, knitted goods, lace, and silk weaving industries, the following Table contains information as to the weighted average hours worked, the hourly earnings, the piece-work basis time rates or hourly time rate, according to collective agreements, and the average gross weekly earnings:—

GERMAN IRON, STEEL AND METAL-WORKING INDUSTRIES: 1925.

The German Federal Statistical Office has recently published a detailed analysis* of the figures relating to the iron, steel and metalworking industries (including extraction) based upon the industrial census statistics for 1925.† The industries in question employ, in all, 3,343,000 persons (more than a quarter of the entire industrial population of Germany), and use machinery developing a total of 6,400,000 horse-power (approximately one-third of the total horse-power employed for productive purposes in Germany). The number of undertakings and of employed persons and the motive power

* Wirtschaft und Statistik, No. 6, 1928. Berlin.
† A summary of the provisional results of these statistics will be found on page 212 of this GAZETTE for June, 1927.

used in the various branches of the metal industries in 1925, were

Number of Under- takings.	Number of Persons employed.	Horse- power.
3,097	324,990	2,078,660
481	320,265	1,852,570
41,316	1,235,938	1,480,482
150,300	863,805	543,084
46,442	598,282	455,890
241,636	3,343,280	6,410,686
	Under- takings. 3,097 481 41,316 150,300 46,442	Under-takings. Persons employed. 3,097 324,990 481 320,265 41,316 1,235,938 150,300 863,805 46,442 598,282

It will be seen that the group comprising the mechanical engineering, shipbuilding and automobile industries provides employment for the largest proportion of the workers included in the above statistics; while more than half of the motive power is used in connection with the extracting and semi-manufacturing processes. The Federal Statistical Office comments on the great development in the iron, steel and metal-working industries during the last fifty years, a development shared only by the mining and chemical industries. The relative importance of the extracting groups has diminished owing to the loss of important iron-producing districts which were ceded to other states under the Peace Treaty of 1919.

COST OF SOCIAL INSURANCE IN GERMANY IN 1927.

According to a report for 1927* made by the German Federal Ministry of Labour, in connection with the debates on the Budget for the financial year 1928, the estimated figure for 1927 of the total cost of social insurance (excluding unemployment insurance) was 3,560 millions of Reichsmarks, as compared with 3,130,600,000 in 1926 and 2,679,300,000 in 1925.

The distribution of the total cost over the various forms of insurance† in 1926 and 1927 is shown in the following Table. The

Form of Insurance.	Expenditure (in millions of Reichsmarks) in			
Total To Send to 2 Jane 1 Jane 1 Jane 1	1926.	1927 (estimated).		
Contributions of Employers and Workers: Sickness Accident (paid by employers only) Invalidity Non-manual Workers Miners' Pension	1,487·2 317·7 659·6 250·3 167·7	1,690 323 845 275 215		
Total	2,882 · 5	3,258		
3. Expenditure from Federal Funds: I. Federal grant towards cost of maternity benefit under Sickness Insurance scheme II. Federal grant to Invalidity Insurance Surance	23.6	25 237		
III. Grant to Invalidity Insurance Societies from Customs receipts	40.0	40		
Total	248 · 1	302		
Total (A and B)	3130 · 6	3,560		

Sickness Insurance.—The membership—of sickness funds was 18,400,000 in 1926, as compared with 15,600,000 in 1913, although, generally speaking, there has been little change in the categories of workers liable to insurance. Nearly every sickness fund has made provision for the insurance of dependants; in all, from 14 to 15 millions of insured persons' dependants are eligible for benefit.

Accident Insurance.—In 1927 the cost of industrial accident insurance was 323 million Reichsmarks, as compared with 227 million marks in 1913. Compensation rates, in relation to wages are no higher than before the war; the cost of compensation in 1926 was 1.44 per cent. of the total wage bill, as compared with 1.45 per cent. in 1913.

Invalidity Insurance.—Under the invalidity insurance scheme.

Invalidity Insurance.—Under the invalidity insurance scheme, 1,800,000 persons are in receipt of invalidity pensions, as compared with 1,100,000 in 1913, while 320,000 widows and 800,000 orphans are receiving pensions (12,000 and 83,000 respectively in 1913). The average monthly invalidity pension is at present 30 Reichsmarks—25 Reichsmarks in rural districts, and from 33 to 35 Reichsmarks—25 respectively in 1913). marks in industrial centres.

Non-Manual Workers' Insurance.—In 1927, the total number of Non-Manual Workers' Insurance.—In 1921, the total number of non-manual workers insured was 2,800,000 as compared with 1,500,000 in 1913. The increase is partially attributable to the fact that persons who were formerly in possession of independent incomes are now compelled to earn their living; but mainly it is due to the growth of population. The rate of insurance contributions is now rather lower than before the war.

Mineral Practice Laurence. The mineral results in surance galaxies.

Miners' Pension Insurance.—The miners' pension insurance scheme is, it is stated, in a difficult position, as the number of pensioners is extremely high in proportion to the total membership. In the manual workers' pension fund, there is one pensioner for every three members, while in the general invalidity insurance scheme covering

* Reichsarbeitsblatt, 20th January, 1928. Berlin.
† A description of the various forms of social insurance in Germany was
ven in this GAZETTE for March, 1926, pages 84-86.

all other industries there is only one pensioner for every five an other industries there is only one pensioner for every live insured persons. The pension insurance contribution amounts on an average to between 10 and 11 per cent. of wages in the manual workers' section, and to between 12 and 13 per cent. of salary in the non-manual workers' section. For each ton of coal raised in the Ruhr, the total contributions to miners' insurance amounted to 1.80 Reichsmarks in 1924, 1.81 Reichsmarks in 1925, and 2.03 Reichsmarks in 1926. The authorities are thus faced with the serious problem of maintaining a permanent balance between income and expenditure without imposing an unduly heavy burden on insured persons and their employers.

COMPARATIVE REAL WAGES IN LONDON AND CERTAIN CITIES ABROAD.

THE series of index numbers of comparative " real wages " in THE series of index numbers of comparative "real wages" in London and in certain cities abroad, compiled by the International Labour Office from returns supplied (as a general rule) by official statistical departments in the various cities, is carried down to 1st January, 1928, in the April issue of the "International Labour Review" published by that Office. The computations have for their object a comparison of working-class real wages, so far as these can be gauged by the quantity of food which can be purchased in each city by the wage paid for 48 hours' work at the normal time rate (i.e., apart from extra payment for overtime) to typical categories of adult male workers in certain industries (building, engineering, furniture-making, printing and bookbinding) common engineering, furniture-making, printing and bookbinding) common

to large cities.

The following Table gives the latest figures computed—(a) on the basis of the varying standards of working-class consumption of food appropriate to different countries—see columns I to 6; (b) on the basis of a composite standard of food consumption representing a general average for all the countries concerned—see column 7; and (c) on the basis of this composite food standard with a modification to allow for the varying proportions of rent represented in the working-class budgets of expenditure in the different countries—see column 8. The average level of real wages in the selected occupations in each city is expressed as a percentage of the average level in the same group of occupations in London. Corresponding figures for 1st October, 1927, were reproduced in the issue of this GAZETTE for February last.

It is explained in the "International Labour Review" that the figures are subject to important reservations. In particular, the wage and price data for the different cities used as basis for the comparisons are not strictly comparable. Also in the case of certain cities in Southern European countries, the relatively low index numbers of real wages may be accounted for in part by differences in the items of food consumption in such countries as compared with those ordinarily consumed in most of the other countries included in the Table. Further, the index numbers do not show differences in the general level of real wages, even in the cities included, being based on the wages of a few categories of workers in four industries only and on the prices of a limited number of articles of food. In the second series of general averages given in the last column of the Table, although an allowance is made for rent, no account is taken of expenditure on furniture, clothing and other It is explained in the "International Labour Review" that the no account is taken of expenditure on furniture, clothing and other items of ordinary consumption. The figures, therefore, should not be regarded as affording more than a rough indication of the relative levels of real wages in the occupations and cities selected for com-

* The figures are based on wages in the building, furniture-making, and printing industries only. For other cities the metal industry is also included.
† Based on a weighted average wage. For other cities an unweighted average has been used.

CHANGES IN COST OF LIVING: STATISTICS FOR 1st MAY.

Summary: Average Increases since July, 1914.

... 64% All Items included ... 54% Food only ...

FOOD.

At 1st May the average level of the retail prices of the principal articles of food showed a slight decline as compared with 31st March. Milk showed a reduction of \(^4_3\)d. per quart on the average, and butter also was cheaper. Sugar was reduced by \(^1_4\)d. per 1b. in the majority of cases. On the other hand, potatoes and meat were dearer.

As a net result of all the changes recorded, the average increase over the level of July, 1914, in the retail prices (in Great Britain and Northern Ireland) of the articles of food included in these statistics was about 54 per cent. at 1st May, 1928, as compared with 55 per cent. a month ago, and 54 per cent. a year ago.

In the following Table is given a comparison of retail prices of these articles of food in July, 1914, and at 31st March and 1st May, 1928:—

RENT, CLOTHING, FUEL AND LIGHT,

As regards rents, inquiries which have been made into the changes which have taken effect under the Rent and Mortgage Interest (Restrictions) Acts indicate that the average increase in the rents (including rates) of working-class dwellings between July, 1914, and 1st May, 1928, was approximately 51 per cent. Of the total increase about two-fifths is accounted for by increases on account of rates and water charges, and about two-fifths is on account of the landlord's responsibility for repairs, increases on account of the higher level of mortgage interest permitted by the Acts falling within the remaining one-fifth.

As regards clothing, owing to the wide range of quotations, both now and before the war, to changes in qualities and in stocks held by retailers, and to variations in the extent to which different articles and qualities have been affected by price changes, it is impossible to make an exact calculation of the increase in prices; but information as to the movements of prices of men's suits and overcoats, underclothing and hosiery, textile materials and boots, received from retailers in the principal towns, indicates that at 1st May the level of retail prices of articles in this group, taking goods of the kinds purchased by the working classes and so far as possible the same qualities of goods at each date, averaged approximately 120 per cent. higher than in July, 1914. This figure was somewhat higher than that for a month earlier, owing to increase in the prices of boots. reases in the prices of boots.

In the fuel and light group, the prices of coal at 1st May averaged between 70 and 75 per cent. above the level of July, 1914, and those of gas about 50 per cent. above the pre-war level. For the fuel and light group as a whole (including coal, gas, oil, candles and matches) the average increase at 1st May, as compared with July, 1914, was approximately 70 per cent.

If the average increases in the cost of all the foregoing items are combined in accordance with their relative importance in prewar working-class family expenditure, allowance being also made for the increase in the prices of soap, soda, domestic ironmongery, brushware and pottery, tobacco, fares and newspapers (averaging about 80 per cent.), the resultant general average increase for 1st May is, approximately, 64 per cent.* over the level of July, 1914, as compared with 64 per cent. at 31st March, 1928, and at 30th April, 1927.

The result of this calculation (in which the same quantities and, The result of this calculation (in which the same quantities and, as far as possible, the same qualities of each item are taken in 1928 as in 1914) is to show the average increase in the cost of maintaining unchanged the pre-war standard of living of working-class families (i.e., the standard actually prevailing in working-class families before the war, irrespective of whether such standard was adequate or not). Owing to the variations in the amounts of increase in the prices of different commodities it is probable that economies or readjustments in expenditure have been effected in many families, especially in those cases where incomes have not increased so much as prices. On the other hand, it is probable that the standard of living has been raised in those families in which wages have been increased in greater proportion than prices. No allowance is made in the figures for any such alterations in the standard of living, as to which trustworthy statistics are not available.

SUMMARY TABLE: 1918 TO 1928.

The following Table shows the average percentage increase, as compared with July, 1914, for all the items included in the statistics, at the beginning of each month, 1918 to 1928:—

Average Percentage Increase since July, 1914—All Items. (Food, rent, clothing, fuel and light, etc.)

NOTE.

A brief Statement of the method of compiling these statistics was given on page 236 of the July, 1923, issue of this GAZETTE. A more detailed account was given in the issue of February, 1921.

* If allowance is made for the changes in taxation since July, 1914, on the commodities included in these statistics, the average increase is about 2 per cent. less.

EMPLOYMENT IN APRIL.

GENERAL SUMMARY.

THE CHARLEST CHARTEN.

EMPLOYMENT during April was subject to considerable fluctuation, particularly after the Easter holidays and towards the end of the month. At the end of April it was not quite so good, on the whole, as at the end of March. The seasonal improvement in the whole, as at the end of March. The seasonal improvement in the building trade, in public works contracting, and in the brick and tile, and tailoring industries continued; and there was also some improvement in the tinplate industry, in railway carriage and wagon building, in paper manufacture, and in the food and drink industries. There was, however, a decline in coal mining, in ship-building and ship-repairing, in the iron and steel and glass industries, in boot and shoe manufacture, and in most of the textile industries, as well as in the canal, river, dock and harbour service.

SUMMARY OF STATISTICS.

SUMMARY OF STATISTICS.

Among workpeople covered by the Unemployment Insurance Acts (aged 16 to 64 inclusive and numbering approximately 11,800,000), and working in practically every industry except agriculture and private domestic service, the percentage unemployed at 23rd April, 1928 (including those temporarily stopped as well as those wholly unemployed) was 9.6, as compared with 9.6 at 26th March, 1928, and 9.4 at 25th April, 1927. For males alone the percentage at 23rd April, 1928, was 11.0, as compared with 11.0 at 26th March, 1928; for females the corresponding figures were 5.7 and 5.7. The percentage wholly unemployed fell from 7.7 at 26th March, 1928, to 7.6 at 23rd April, 1928. The total number of persons (insured and uninsured) registered at Employment Exchanges in Great Britain and Northern Ireland at 30th April, 1928, was approximately 1,171,000, of whom 942,000 were men and 160,000 were women, the remainder being boys and girls; at 2nd April, 1928, it was the remainder being boys and girls; at 2nd April, 1928, it was 1,071,000, of whom 865,000 were men and 147,000 were women; and at 25th April, 1927, it was 1,075,000, of whom 867,000 were men and 144,000 were women.

EMPLOYMENT IN THE PRINCIPAL INDUSTRIES.

Mining and Quarrying.—In the coal-mining industry employment continued slack. The total number of wage-earners on the colliery books at 28th April, 1928, was 935,580, a decrease of 1.5 per cent. as compared with March; the average number of days worked per week in the fortnight ended 28th April, 1928, was 4.98, as compared with 4.92 in March.

with 4.92 in March.

In iron-mining employment continued slack, but showed an improvement as compared with the previous month. In the West Lothian shale mines there was a decrease of 0.7 per cent. in the number of workpeople employed at the mines from which returns were received compared with March, 1928, and a decrease of 7.7 per cent. cent. compared with March, 1925, and a decrease of 7.7 per cent. compared with April, 1927. At limestone quarries in the Buxton district employment continued good, and in the Weardale district, moderate; in the Clitheroe district it was reported as fair. At the slate quarries in North Wales it was fairly good. At whinstone quarries in the East of Scotland it was moderate. At chalk quarries employment continued slack; at china clay quarries and at tin mines it was fairly good.

Manufacture of Pig-Iron, Iron and Steel, and Tinplate.—In the pig-iron industry employment continued bad. Of 437 furnaces, the number in blast at the end of April, 1928, was 149, as compared with 150 in March, 1928, and with 189 in April, 1927.

At iron and steel works employment continued slack, on the whole, and short time working was reported in many districts. In the tinplate trade employment showed a further improvement. The arrangement made in November for stabilising prices and regulating output, whereby each works was to stop for three weeks The arrangement made in November for stabilising prices and regulating output, whereby each works was to stop for three weeks out of every thirteen, was still in operation. In the week ended 28th April, 395 mills were reported to be in operation at works from which information is available, as compared with 363 in the week ended 31st March, 1928, and with 406 at the end of April, 1927. In steel sheet manufacture employment continued fair. The number of steel sheet will be a second of the steel steel sheet manufacture employment continued fair. The number of steel sheet mills working was 123 at the end of April, 1928, as compared with 121 in March, 1928, and with 135 in April, 1927.

Engineering, Shipbuilding and Metal Industries.—In engineering temployment was still quiet, and showed a slight decline, on the whole, as compared with the previous month. It remained fairly good in electrical engineering and fair on locomotive and motor vehicle work, but in marine engineering it was still bad; much short time continued to be worked in textile machinery manufacture. In shipbuilding and ship repairing employment remained very bad. continued to be worked in textile machinery manufacture. In shipbuilding and ship-repairing employment remained very bad, on the whole, and showed a further slight decline. In the other metal trades employment continued moderate to fair, on the whole. It was fairly good in the nut and bolt, lock and latch, and tube trades; fair in the hollow-ware, cutlery, file, sheet metal, needle and fishing tackle, and wire manufacturing trades; moderate in the brasswork trade; and slack or bad in the chain and anchor, jewellery and plated ware, metallic bedstead, and stove and grate trades. ware, metallic bedstead, and stove and grate trades.

Textile Industry.—In the cotton industry employment showed slight decline, on the whole. Continued depression was reported

in the American spinning section, with an increase in the number of mills entirely stopped; in the Egyptian spinning section there was some decline, although most of the mills were still running full time. In the weaving department employment continued very slack at

In the wool textile industry employment showed a slight decline in the worsted department, chiefly owing to a decline in the wool sorting and combing section; there was also a slight decline in the carpet trade. In the woollen department there was little general

In the hosiery trade employment continued good generally; in the silk and artificial silk trades, taken together, it continued fairly good; in the lace trade it showed little change; in linen manufacture employment was slack, and showed a marked decline as compared with the previous month; in the jute industry it continued good. In the textile bleaching, printing, dyeing, etc. trades employment showed a slight decline, and was slack generally.

Clothing Industry.—Employment both in the retail bespoke and in the ready made and wholesale bespoke branches of the tailoring trade showed a further seasonal improvement, and was fairly good, on the whole, though in some districts short time was worked and employment was reported to be moderate. In the dressmaking and millinery trades employment also showed a seasonal improvement, and was good in most districts. In the shirt and collar and in the corset trades employment was fairly good; in felt hat making it was fair. In the boot and shoe industry employment was fairly good at the beginning of the month through pressure at many factories to complete orders before Easter; but from the resumption of work after the holidays until the end of the month there was a decline in practically all districts, with an increase both in the numbers unemployed, and in the amount of short time working.

Leather Industry.—Employment showed little change as compared with the previous month; in the tanning and currying section it remained good; in the portmanteau, trunk and fancy leather section it was moderate; with saddlery and harness makers it continued fair.

Building, Woodworking, etc.—Employment in the building trades showed a further improvement, especially in the painting and decorating section; it was generally fair, at most centres, with skilled operatives other than plasterers, and moderate with unskilled workers. As regards individual occupations, employment continued to improve with carpenters, bricklayers and masons, and was generally fair; with slaters and plumbers it remained fair; with skilled painters it was generally good; with plasterers, there was a slight improvement but employment was still slack, on the whole; it continued moderate with tradesmen's labourers. In brick manufacture employment showed a further slight improvement. Building, Woodworking, etc.—Employment in the building trades

Employment in the furnishing trades continued fairly good; with coachbuilders it was good; and with millsawyers, fair

Paper Manufacture, Printing, and Bookbinding. - With papermakers employment was fairly good, on the whole, and showed an improvement as compared with the previous month. With letter-press printers it was generally fair; there was a slight decline, on the whole, but some improvement was reported at Manchester and Glasgow; with electrotypers and stereotypers employment continued generally good on the whole, though reported as bad at Birmingham. With lithographic printers employment was reported to be fair in most districts; at Manchester, however, it was reported to be bad. In bookbinding employment showed some improvement as compared with the previous month and was fair on the whole.

Pottery and Glass.—Employment in the pottery industry in North Staffordshire showed little change as compared with the previous month; in the best china ware and in the sanitary ware section it was fairly good; in other sections of the trade there was still much short-time working. In the glass trades employment showed a decline and was bad in the bottle-making section, and slack in other

Agriculture and Fishing.—In agriculture in England and Wales the supply of labour was sufficient, the increased demand arising from extended field operations being met without difficulty. In Scotland the supply of labour at the end of the month was also generally adequate for requirements. In the fishing industry employment showed a further slight improvement and was moderate.

Dock Labour and Seamen.—With dock labourers employment continued slack; with seamen it was moderate on the whole, the supply of seamen being adequate for requirements at most of the

SUMMARY OF EMPLOYERS' RETURNS.

In Tables which appear on subsequent pages of this GAZETTE, detailed statistics bearing on the state of employment during April are given, based on information obtained from employers or employers' associations in certain industries. In the following Tables some of the principal features of these statistics are briefly

DETAILED REPORTS ON EMPLOYMENT IN SOME OF THE PRINCIPAL INDUSTRIES.

Note.—The numbers of workpeople employed given in the following Tables represent the numbers covered by the Returns received and not the total numbers employed in the various industries. The comparisons of numbers employed and wages paid at different dates relate to the same firms at each date, and cover all the wage-earners, irrespective of age, sex, or occupation, employed by these firms. In comparing the earnings in different industries, it should be remembered that any averages calculated from these figures will be affected not only by the variations in the state of employment and in rates of wages, but also by differences in the proportions of males to females, of adults to juveniles and of skilled to unskilled workers in the respective industries.

COAL MINING.

EMPLOYMENT continued slack during April, and showed a slight decline as compared with the previous month. Schemes for regulating output were put into operation during the month in Lancashire and Cheshire, Yorkshire, and the Midlands, and in Scotland.

Cheshire, Yorkshire, and the Midlands, and in Scotland.

The percentage of insured workpeople unemployed, as indicated by the unemployment books lodged at Employment Exchanges, was 17.9 at 23rd April, 1928, as compared with 17.2 at 26th March, 1928, and 17.8 at 25th April, 1927.

The total number of wage-earners on the colliery books at 28th April, 1928, showed a decrease of 1.5 per cent. as compared with 24th March, 1928, and of 9.1 per cent. as compared with 30th April, 1927.

The average number of days worked per week in the fortnight ended 28th April, 1928, was 4.98, an increase of 0.06 of a day as compared with the fortnight ended 24th March, 1928, but a decrease of 0.06 of a day as compared with the fortnight ended 30th April,

The following table shows, for the principal coal-mining districts, the total number of wage-earners on the colliery books and the average number of days worked per week* during the fortnight ended 28th April, 1928, as shown by returns obtained by the Mines Department. Small numbers of workpeople employed at coal mines in raising or handling minerals other than coal are included in the

The average number of coal-winding days lost in Great Britain during the fortnight ended 28th April, 1928, was 0.82 of a day per week, of which 0.79 was due to want of trade and transport difficulties. The figures for the fortnight ended 24th March, 1928, were 0.88 of a day per week, of which 0.80 was due to want of trade and transport difficulties; for the fortnight ended 30th April, 1927, the average time lost was 0.75 of a day per week, of which 0.71 was due to want of trade and transport difficulties. The average nonwinding time for all three periods under review was about one-fifth of a day per week. of a day per week.

The output of coal in Great Britain for the four weeks ended 28th April, 1928, was reported to the Mines Department as 17,678,600 tons, as compared with 19,923,500 tons in the four weeks ended 24th March, 1928, and 19,118,200 tons in the four weeks ended 30th April,

The exports of coal, including that shipped for the use of steamers engaged in foreign trade, and the coal equivalent of coke and manufactured fuel, amounted to 5,379,200 tons in April, as compared with 5,775,500 tons in March, 1928, and with 5,669,800 tons in April,

The numbers and percentages unemployed among insured work-people in the respective areas at 23rd April, 1928, and the increases

* The figures in this and the following article show the number of days (allowance being made in all the calculations for short time) on which coal, iron, etc., were got from the mines included in the returns. It is not necessarily implied that all the persons worked every day the mines were open. Mines not working are omitted in computing the average number of days worked.

† Including Cannock Chase.

or decreases in the percentages, as compared with 26th March, 1928, are shown in the following Table:—

IRON AND SHALE MINING.

TRON MINING.

EMPLOYMENT during April, although it continued slack on the whole,

showed some improvement upon the previous month.

The percentage of insured workpeople unemployed in the iron ore and ironstone mining industry, as indicated by the unemployment books lodged at Employment Exchanges, was 13·1 at 23rd April, 1928, as compared with 16·9 at 26th March, and 9·6 at 25th April, 1927.

The following Table summarizes the information received from

those employers who furnished returns for the three periods under

Medical Time	peop Min	nber of Wo le employe es included he Returns	d at	Average No. of Days worked per week by the Mines.*

SHALE MINING.

The number of workpeople employed in the West Lothian mines during the fortnight ended 28th April, 1928, by firms making returns was 2,510, showing a decrease of 0.7 per cent. compared with the previous month, and of 7.7 per cent. compared with April, 1927. The average number of days* worked per week by the mines was 5.95, compared with 6.00 in March, 1928, and 5.82 in April, 1927.

PIG IRON INDUSTRY.

EMPLOYMENT during April continued bad. The percentage of insured workpeople unemployed, as indicated by the unemployment books lodged at Employment Exchanges, was 14.0 at 23rd April, 1928, compared with 14.6 at 26th March, 1928, and with 13.5 at 25th April, 1927.

. See footnote * in previous column.

According to returns received by the National Federation of Iron and Steel Manufacturers, 149 furnaces were in operation at the end of April, compared with 150 at the end of March, and 189 at the end of April, 1927.

Returns received from 79 firms, employing 18,356 workpeople at the end of April, showed an increase of 1.6 per cent. as compared with March, but a decrease of 10.3 per cent. as compared with April 1927.

The following Table shows the number of furnaces in operation at the end of April, 1928, March, 1928, and April, 1927:

The production of pig iron in April amounted to 555,000 tons, as compared with 592,600 tons in March, 1928, and 680,000 tons in

IRON AND STEEL MANUFACTURE.

EMPLOYMENT in April continued slack, on the whole, and showed a slight decline; it was considerably worse than in April of last year. Short-time working was reported in many districts.

The percentage of insured workpeople unemployed, as indicated by the number of unemployment books lodged at Employment Exchanges, was 21·2 on 23rd April, 1928, as compared with 20·3 on 26th March, 1928, and 17·4 on 25th April, 1927.

According to returns received from firms employing 66.887 work-

on 26th March, 1928, and 17.4 on 25th April, 1927.

According to returns received from firms employing 66,887 workpeople in the week ended 28th April, 1928, the volume of employment in that week (as indicated by the number of workpeople employed, combined with the number of shifts during which work was carried on in each department) decreased by 0.9 per cent. as compared with March, 1928, and by 10.8 per cent. as compared with April, 1927. The average number of shifts* during which the works were open was 5.3 in April, 1928, as compared with 5.4 in March, 1928, and April, 1927.

^{*} The figures relate to the number of shifts during which the works were in peration, taken in conjunction with the numbers of men employed. No ecount is taken of the time lost by individuals owing to absenteeism, etc., and it is not intended to imply that the number of shifts shown were actually worked by all the men employed. Works closed are omitted in computing the werage number of shifts.

The production of steel ingots and castings, as shown in returns received by the National Federation of Iron and Steel Manufacturers, amounted to 644,100 tons in April, 1928, as compared with 793,300 tons in March, 1928, and 850,100 tons in April, 1927.

TINPLATE AND STEEL SHEET INDUSTRIES.

EMPLOYMENT in the tinplate industry showed an improvement as compared with the previous month. The arrangements made in November for stabilising prices and regulating output, whereby a minimum selling price was agreed upon and provision made for each works to stop for three weeks out of every thirteen, were still in operation. In the week ended 28th April, 395 mills were reported to be in operation at works from which information is available, as compared with 363 in the week ended 31st March, and with 406 at the end of April, 1927. In steel sheet manufacture employment continued fair. In the week ended 28th April, 1928, 123 mills were in operation, as compared with 121 in the week ended 31st March, 1928, and with 135 at the end of April, 1927.

The percentage of insured workpeople unemployed at 23rd April, 1928, as indicated by the unemployment books lodged at Employment Exchanges, was 13-8, as compared with 16-8 at 26th March, 1928, and 10-9 at 25th April, 1927.

The following Table shows the number of mills in operation at works covered by the returns received:— EMPLOYMENT in the tinplate industry showed an improvement as

TOTAL	83		- 4	518	+ 34	- 23		

The exports of tinned and galvanised plates and sheets in April, 1928, amounted to 97,615 tons, or 26,137 tons less than in March, 1928, and 9,385 tons less than in April, 1927.

ENGINEERING.

EMPLOYMENT in April was still quiet, and showed a slight decline, on the whole, compared with the previous month. It remained fairly good in electrical engineering, and fair on locomotive and on motor vehicle work; but in marine engineering conditions were still bad, and much short time continued to be worked in textile machinery manufacture.

Compared with a year before, employment was better in most districts, the greatest improvement being shown in marine engineering, which, however, remained the most depressed section of the industry.

The following Table shows the numbers and percentages of insured workpeople unemployed at 23rd April, 1928, and the increase or decrease as compared with a month before and a year before:—

On the North-East Coast employment showed a falling off in marine and general engineering, and was bad, on the whole. In Yorkshire and Lincolnshire it continued rather slack. In Lancashire and Cheshire it remained bad, on the whole. Conditions were fairly good in electrical engineering and fair on locomotive work, and a continued improvement was experienced in the motor section; but in the textile machinery section much short time remained in

In the Birmingham, Wolverhampton and Coventry district employment continued moderate, but showed a decline in general and motor engineering. Some falling off was also observed in electrical work, but conditions in that section were still fairly good. In the Nottingham, Derby and Leicester district employment was again fair. In London and the Southern Counties it showed continued improvement, and was fairly good in general engineering, and good on electrical and motor vehicle work.

In Scotland conditions remained slack; in Wales employment was bad, and showed a decline; while in Northern Ireland it remained bad, with no appreciable change.

SHIPBUILDING AND SHIP-REPAIRING.

EMPLOYMENT, on the whole, remained very bad during April, and again showed a slight decline. Compared with a year ago there was a substantial improvement on the North-East Coast and in Scotland; in other districts comparatively little change was shown, except in Wales, where employment at the end of the month was considerably worse than in March, and worse also than a year ago.

The following Table shows the numbers and percentages of insured workpeople unemployed at 23rd April, 1928, and the increase or decrease as compared with 26th March, 1928, and with a year before:—

COTTON INDUSTRY.

During April employment showed a slight decline, on the whole. Continued depression was reported in the American spinning section, with an increase in the number of mills entirely stopped; in the Egyptian spinning section there was some decline, although most of the mills were still running full time. In the weaving department employment continued very slack at some centres. Extended stoppages took place at Easter in several centres.

The percentage of insured workpeople unemployed (including those temporarily stopped), as indicated by the unemployment books lodged at Employment Exchanges, was 10·1 at 23rd April, 1928, as compared with 9·2 at 26th March, 1928, and with 6·8 at 25th April, 1927.

At Ashton, Stalybridge, Royton, Failsworth, and Hyde the

25th April, 1927.
At Ashton, Stalybridge, Royton, Failsworth, and Hyde the depression in the section spinning American cotton continued. At Oldham employment with spinners continued bad, especially with spinners of coarse counts; a number of mills were closed entirely through financial difficulties, and in those that were open, short time in various forms was fairly general, and represented approximately 27 per cent. of full production. There was much under-employment among female cotton operatives at Shaw. In the manufacturing department in the Oldham district employment was slack; it was, however, reported as fair with velvet and calico sheeting workers, and a further improvement was shown on force goods. At Parse and Rochdale employment continued bad; several firms at Bury made an extended stoppage at Easter; a slight decline was reported at Rochdale. At Bolton and Leigh employment continued good with spinners; it was fair at Bolton with other classes of workers, but not so good as a month earlier; employment in the quilt manufacturing section, was rather quiet.

so good as a month earlier; employment in the quilt manufacturing section was rather quiet.

At Preston the position in the weaving department continued fairly satisfactory, though some firms made extended stoppages at Easter; firms manufacturing fine plain or fancy cloths were, generally speaking, well employed, and employment was described as moderately good on the whole. At Chorley employment continued fair with weavers in the fine goods section, but there was some under-employment in the coloured section. At Blackburn the

severe depression reported last month continued, plain weavers being chiefly affected; many looms were idle and many workers unemployed; extended stoppages took place at Easter. At Darwen a very serious depression was reported; it was estimated that at the end of the month approximately 9,000 looms were idle, and in addition a large number of operatives were under-employed; preparatory workers were very irregularly employed. At Accrington employment was described as slack, and there was an increase in under-employment during the month. At Burnley there was a further improvement, and employment was described as fair and as better than a year ago. At Nelson 80 per cent. of the weavers, winders and beamers were under-employed; this centre, however, was in a better position than some of the Lancashire weaving districts. At Padiham employment with weavers and winders continued fair. With weavers in the Rossendale Valley employment was very bad, and worse than in March.

In Yorkshire employment on the whole continued bad, and very bad in the American spinning branch; there was, however, a co-siderable improvement at Sowerby Bridge.

The following Table summarises the information received from those employers who furnished returns :-

176

The *imports* (less re-exports) of raw cotton (including cotton linters) were 130,074,300 lbs. in April, 1928, compared with 138,858,600 lbs. in March, 1928, and with 179,879,000 lbs. in April, 1927.

THE MINISTRY OF LABOUR GAZETTE.

The exports of cotton yarn were 13,752,800 lbs, in April, 1928, compared with 15,503,700 lbs, in March, 1928, and with 17,327,600 lbs. in April, 1927.

The exports of cotton piece goods were 314,773,200 square yards, as compared with 397,363,400 square yards in the previous month, and with 316,947,700 square yards in April, 1927.

WOOL TEXTILE INDUSTRY.

DURING April employment showed a slight decline in the worsted department, chiefly owing to a decline in the wool sorting and combing section. There was also a slight decline in the carpet trade. In the woollen department there was little general change.

As compared with a year ago, it was better in the worsted department (except the wool sorting and combing section), and much better in the carpet trade; but slightly worse in the woollen

The percentage of insured workpeople unemployed (including those temporarily stopped), as indicated by the unemployment books lodged at Employment Exchanges, was 7·1 on 23rd April, 1928, as compared with 6·7 on 26th March, 1928, and with 9·4 on 25th April, 1927.

Worsted Section.—In this section employment was moderate, and slightly worse than a month earlier. In the week ended 28th April the returns received from employers showed that 15 per cent. of the operatives in the worsted section, taken as a whole, worked short time,* losing nearly 10 hours each on the average; on the other hand, $7\frac{1}{2}$ per cent. worked overtime, to the extent of over 6

Employment showed a decline in the sorting, preparing, and combing departments; it was fairly good in the merino section, but very slack in the crossbred and preparing sections. This followed a seasonal improvement in February and March. About 30 per cent. of the operatives covered by the employers' returns lost an average of 13 hours each in short time during the week ended 28th April; while about 6 per cent, worked overtime to the extent of 8 hours

With worsted spinners there was little change on the whole, the improvement of previous months being maintained; 15 per cent. of the operatives were working short time with a loss on the average of about 9 hours each, while 8 per cent. were working 6 hours each in overtime. With worsted weavers employment was good in the first part of the month, but fell off towards the end, especially in Bradford and in the fine cloth trade of Huddersfield. At Keighley, where there had been a shortage of skilled weavers, there was a marked decline. About 9 per cent. of the worsted weavers were losing 8 hours each in short time during the week ended 28th April, while about 6 per cent. worked 6 hours each in overtime.

Woollen Section.—In this section employment showed little general change. Employers' returns for the week ended 28th April showed that about 25 per cent. of the spinners and about 30 per cent. of the weavers* worked short time, losing, in each case, an average of about 9 hours each. On the other hand, 12 per cent. of the spinners and 3 per cent. of the weavers worked overtime to the extent of 9 hours and 6 hours, respectively. Taking the woollen section as a whole, about 27 per cent. of the operatives were losing an average of about 9 hours each in short time* during the week ended 28th April, while about 7 per cent. worked overtime to the extent of 8 hours each.

about 7 per cent. worked overtime to the extent of 8 hours each.

In the Huddersfield and Colne Valley districts employment was moderate, and slightly better than in March. A number of firms were still working overtime, and one or two running night shifts. In the Heavy Woollen district employment was moderate; but there was a further slight improvement, and some firms were fairly busy at the end of the month. In the Leeds and Morley districts employment was reported as fair, and as showing little change; while in the Yeadon district employment remained bad. In the rag and shoddy trade employment remained poor, but showed a slight improvement. In Stockport employment with woollen workers continued good. In the flannel trade it was moderate to good, and somewhat better than in March. In the blanket section employment was reported as fair in Yorkshire and good at Witney; on the whole it was slightly better than in March. better than in March.

In Scotland employment showed a slight decline, but on the whole remained good, as it has been for many months.

Carpet Section.—Employment in this section continued good, but showed a slight decline as compared with March. All the firms at Kidderminster were on full time at the end of the month, with several departments on overtime. The employers' returns for the week ended 28th April showed that about 7 per cent. were on short time, with a loss on the average of about 10 hours each; while about 5 per cent. worked overtime, to the extent of 6 hours each.

The following Table summarises the returns received from employers as to the number of operatives employed and the wages paid:—

The imports (less re-exports) of raw wool (sheep's or lambs') were 54,642,900 lbs. in April, 1928, compared with 95,860,900 lbs. in March, 1928, and 53,461,900 lbs. in April, 1927.

The exports of woollen and worsted yarns were 3,728,100 lbs., compared with 4,234,700 lbs. in March, 1928, and with 3,761,600 lbs. in April, 1927.

In April, 1927.

The exports of woollen and worsted tissues were 9,969,600 square yards, compared with 15,118,700 square yards in March, 1928, and 9,479,100 square yards in April, 1927.

The exports of blankets were 87,014 pairs, 120,046 pairs and 70,557 pairs in April, 1928, March, 1928, and April, 1927.

BOOT AND SHOE INDUSTRY.

EMPLOYMENT was fairly good at the beginning of April, through pressure at many factories to complete orders before Easter; but from the resumption of work after the holidays until the end of the month there was a decline in practically all districts, with an increase both in the numbers unemployed and in the amount of short-time

The percentage of insured workpeople unemployed, including those temporarily stopped, as indicated by the unemployment books lodged at Employment Exchanges, was 7.5 on 23rd April, as compared with 6.5 on 26th March, and with 8.1 on 25th April, 1927.

Employment in London remained fairly good, on the whole. At Leicester employment declined, and was only moderate at most

establishments; there was a considerable increase in the number of workpeople on short time, over 46 per cent. of the operatives covered by the employers' returns losing about 10 hours each, on the average, in the week ended 28th April. Employment at Hinckley also declined, and was slack. There was a further decline at Northampton, and employment was only moderate at the end of the month; about

THE MINISTRY OF LABOUR GAZETTE.

declined, and was slack. There was a further decline at Northampton, and employment was only moderate at the end of the month; about 40 per cent. of the operatives covered by the returns received lost 11½ hours each, on the average, in the week ended 28th April. Employment was still fair at Higham and Rushden, Wellingborough, Kettering, and most of the smaller Northamptonshire centres, but showed some falling-off as compared with the preceding month; some firms at Kettering extended the holiday stoppage at Easter. At Wollaston employment was reported as bad, with much unemployment and short time working.

Employment at Stafford showed little change, and was moderate, on the whole. At Norwich, there was a decline; employment continued very bad in the turnshoe department, but was fair in other departments; about 32 per cent. of the workpeople covered by the employers' returns were on short time, losing about 9½ hours each, on the average, in the week ended 28th April. In the Bristol and Kingswood district employment was poor, with much short-time working; the holiday stoppage at Easter was prolonged by many firms. Some firms, however, were fairly well employed. At Street employment remained fair, on the whole, but showed some decline. In the Leeds district, employment continued moderately good at some of the larger establishments; in the heavy boot trade it remained slack: the holiday stoppage at Easter was prolonged by several firms. Full time working continued to be general in the slipper trade in the Rossendale Valley and at Bury and Preston, though there was a little short time working in some departments at Rawtenstall and Bury.

In Scotland there was a further decline; employment was reported

Rawtenstall and Bury.

In Scotland there was a further decline; employment was reported as fair at Glasgow and Kilmarnock, very quiet at Edinburgh, and

The following Table summarises the information received from those employers who furnished returns for the three periods under

The exports of boots and shoes in April, 1928, amounted to 120,730 dozen pairs, or 12,383 dozen pairs less than in March, 1928, but 17,329 dozen pairs more than in April, 1927.

BUILDING.

EMPLOYMENT during April showed a further improvement, which was most marked in the painting and decorating section; except with plasterers, it was generally fair, at most centres, with skilled operatives, but was poor or slack in some districts, including Manchester, Keighley, and Cardiff; it was moderate with unskilled workers. Employment showed a decline, on the whole, as compared with April, 1927, but there was some improvement in Northern Ireland. As regards individual occupations, employment continued to improve with carpenters and with bricklayers and masons, and was generally fair. Employment showed little change with slaters and plumbers, and remained fair with these classes at most centres; it continued to improve with painters, and was generally good with

continued to improve with painters, and was generally good with skilled men. There was a slight improvement with plasterers, but employment was still slack, on the whole; it continued moderate with tradesmen's labourers. As compared with April, 1927, employment was considerably worse with plasterers, and also showed a

decline with other classes.

The following Table shows the numbers and percentages of workpeople insured under the Unemployment Insurance Acts who were unemployed at 23rd April, 1928, together with the increase or decrease in the percentages as compared with the previous month and with April, 1927:—

BUILDING PLANS APPROVED.

Returns from Local Authorities in 140 of the principal urban areas in Great Britain (except the London County Council area), with a total population of 15,238,000, show that in April, 1928 plans were passed for buildings of an estimated cost of £4,136,400, as compared with £5,284,800, in March, 1928, and £4,998,900, in April, 1927. Of the total for April, 1928, dwelling-houses accounted for £2,489,500; factories and workshops for £241,100; shops, offices, warehouses and other business premises for £410,000; and other buildings, and additions and alterations to existing buildings, for £995,800

BRICK INDUSTRY.

May, 1928.

EMPLOYMENT during April showed a slight improvement as compared with the previous month.

with the previous month.

The percentage of insured workpeople unemployed in the brick, pipe, tile, etc., trades, as indicated by the unemployment books lodged at Employment Exchanges, was 11·2 at 23rd April, 1928, as compared with 12·2 at 26th March, 1928, and 5·5 at 25th April, 1927.

The following Table summarises the information received from those employers who furnished returns for the three periods:—

		Number of orkpeop		Total Wages paid to all Workpeople.					
Districts.	Week		(+) or -) on a	Week					
	28th April, 1928.	Month before.		28th April, 1928.	Month before.	Year before.*

TOTAL	8,416	+ 2.1	-10.3	22,448	+ 5.1	- 15.1			

Returns from employers relative to short-time working, exclusive of time lost on account of bad weather, showed that, of 8,369 work-people employed by firms furnishing information, 13·7 per cent. were working on an average nearly 9½ hours less than full time in the week ending 28th April, 1928; on the other hand, 7 per cent. were on overtime to the extent of 3·8 hours each on the average.

POTTERY INDUSTRY.

EMPLOYMENT in North Staffordshire showed little change as compared with the previous month; in the best china-ware and in the sanitary-ware sections it was again reported to be fairly good; in other branches of the trade there was still much short-time working. At Derby employment was good, but at Worcester short-time working continued. In the stone-ware section in Scotland employment was again reported to be bad.

The percentage of insured workpeople unemployed, as indicated by the unemployment books lodged at Employment Exchanges, was 12·8 at 23rd April, 1928, as compared with 12·8 at 26th March, 1928, and with 13·1 at 25th April, 1927.

The following Table summarises the information received from employers who furnished returns for the three periods:— EMPLOYMENT in North Staffordshire showed little change as compared

Returns from employers relative to short-time working showed that, of 10,704 workpeople employed by firms making returns, 3,556, or 33.0 per cent., were working on an average about 14 hours less than full time in the week ended 28th April, 1928.

PAPER MANUFACTURE, PRINTING, AND BOOKBINDING.

EMPLOYMENT in the paper-making industry was fairly good, on the whole, and showed some improvement as compared with the previous month. Full time was worked in most of the districts from which reports were received, but some irregularity of work was reported in the Blackburn and Darwen districts.

the Blackburn and Darwen districts.

Employment was generally fair with letterpress printers, but showed a slight decline, on the whole, compared with March. Some improvement, however, was reported at Manchester and Glasgow, but at Birmingham and Leeds employment was reported as slack. With electrotypers and stereotypers employment continued generally good; there was an improvement on the previous month in London, but a decline at Birmingham, where employment was bad.

With lithographic printers employment, on the whole, showed a slight improvement, and was fair in most districts; it was, however, reported as bad at Manchester and Newcastle, and there was a decline compared with the previous month at Aberdeen, Dundee and Belfast.

With lithographic artists employment continued fair; it was not so good as in March in London and at Leeds, while improving at Manchester and Liverpool. With bookbinders employment showed some

chester and Liverpool. With bookbinders employment showed some improvement and was fair on the whole.

The percentage unemployed among insured workpeople covered by the Unemployment Insurance Acts in the printing and bookbinding industries was 4.4 at 23rd April, 1928, compared with 4.3 at 26th March, 1928, and 5.0 at 25th April, 1927. In the paper and paper-board industry the percentage was 3.9 at 23rd April, 1928, compared with 5.2 at 26th March, 1928, and 6.5 at 25th April, 1927. In the cardboard box, paper bag, and stationery industries the percentage was a stationery industries the percentage was series of the per compared with 5·2 at 26th March, 1928, and 6·5 at 25th April, 1927. In the cardboard box, paper bag, and stationery industries the percentage was 4·4 at 23rd April, 1928, compared with 4·6 at 26th March, 1928, and 5·3 at 25th April, 1927.

DOCK AND RIVERSIDE LABOUR.

EMPLOYMENT during April remained generally slack.

Among insured workpeople in the canal, river, dock and harbour service, 30·1 per cent. were recorded as unemployed at 23rd April, 1928, as compared with 28·3 per cent. at 26th March, 1928, and with 25·1 per cent. at 25th April, 1927.

London.—Employment was generally slack. The following Table shows the average daily number of dock labourers employed at docks and wharves in respect of which returns were received for each week of the month :-

AND CARRADA.	Average Docks as	aily Numl	per of La	bourers em	ployed in ondon.
	In	Docks.

Average for April, 1927	4,131	2,250	6,381	8,307	14,688

Tilbury.—The average daily number of dock labourers employed during April was 1,032, compared with 782 in March, and with 1,030

East Coast.—Employment continued moderate with coal trimmers and teemers on the Tyne and Wear. It was good with quayside labourers on the Tyne; with other classes of dock workers on the Tyne and Wear it was fair to moderate. At Blyth employment was fair with harbour workers and slack with other dockers. It declined at Middle harmonic and slack with other dockers. at Middlesbrough, and was only moderate. At Hull it was fair and at Grimsby slack. It was quiet at Ipswich and fair at Yarmouth.

Liverpool.—Employment continued generally quiet. The average eekly number of dock labourers registered at the clearing houses under the Liverpool Docks Scheme as employed in the four weeks ended 27th April was 14,798, compared with 14,772 in March and with 15,627 in April, 1927. The average weekly amount of wages paid to these men through the clearing houses was £35,685 in the four weeks ended 27th April, compared with £39,779 in March and with £38,169 in April, 1927.

Other Ports in England and Wales.—There was general slackness at the South Wales ports, but at Newport employment was brisk for part of the month. At Avonmouth and Gloucester there was a slight improvement, but at Bristol work remained slack. Employment also continued slack at Southampton and Plymouth and other South Western

Scottish and Irish Ports.—Employment at Leith and Glasgow was fair, and it was fairly good, though variable, at Dundee. It was exceptionally quiet at Grangemouth, but fairly good at Ayr and Troon. At Belfast it was moderate, and worse than in March.

SEAMEN.

SEAMEN.

During April employment was moderate, on the whole, the supply of seamen being adequate for requirements at most of the ports.

Among insured workpeople in the shipping service the percentage unemployed at 23rd April, 1928, was 15·0, compared with 15·1 at 26th March, 1928, and 14·8 at 25th April, 1927.

The demand for men on the Thames was fair, and improving during the first three weeks of April; it declined subsequently. On the Tyne the demand was fairly active; on the Wear it was poor in the first half of the month and moderate afterwards. It was good until the middle of April on the Tees, and then became quiet. The demand was generally quiet at Hull; at Southampton it showed a substantial improvement in the first half of the month, and was fairly brisk later. At Bristol the demand was fair; at Avonmouth it was good until late in the month, when a falling off occurred. The demand declined from good to poor at Newport in the course of the month; it fluctuated from poor to good at Cardiff. It was fairly good at Swansea, and quiet to moderate on the Mersey until the end of the third week of April, when a notable improvement was observed. The demand was, on the whole, fair at Manchester, and quiet on the Clyde and at Leith. It was very dull at Belfast, apart from a moderate improvement in the third week of the month.

The following Table shows the number of seamen shipped in British registered foreign-going vessels at the undermentioned ports of Great Britain and Northern Ireland during April:—

UNEMPLOYMENT IN INSURED INDUSTRIES.

THE statistics here presented show, industry by industry, the estimated number of persons insured under the Unemployment Insurance Acts, the number and percentage of such persons who were unemployed on the 23rd April, 1928, and the increase or decrease at that date in the total percentages unemployed compared with a month earlier, a year ago, and two years ago,

180

pared with a month earlier, a year ago, and two years ago, respectively.

The Unemployment Insurance Acts provide, subject to certain exceptions, for the compulsory insurance against unemployment of substantially all employed persons. The principal classes of persons who are excepted from such compulsory insurance are juveniles under 16 years of age, and (since 2nd January, 1928) persons aged 65 and over, persons employed otherwise than by way of manual labour at a rate of remuneration exceeding in value £250 per annum, persons employed in agriculture and private domestic service, and outworkers. Persons employed by local public authorities, railways and certain other public utility undertakings, members of the police forces, and persons with rights under a statutory superannuation scheme may, in certain circumstances, also be excepted.

statutory superannuation scheme may, in certain circumstances, also be excepted.

An unemployment book, on which is recorded, inter alia, the industry in which he is employed, is issued to every insured person, and this book must be lodged at an Employment Exchange whenever the insured person to whom it relates makes a claim for unemployment benefit, or, without claiming benefit, ceases to be employed in an insured trade. The book must be removed and deposited with the employer for stamping as soon as employment in an insured trade is resumed.

deposited with the employer for stamping as soon as employment in an insured trade is resumed.

The files of "lodged" books at the Employment Exchanges thus furnish for each industrial group a record of the unemployment of insured persons. In arriving at this figure the books of those persons who are known to be working in an uninsured trade, or to be sick or deceased, or who are known to have emigrated or gone abroad, are of course excluded. In cases where information on these points is lacking the books remain in the "lodged" files, and are included in the statistics of unemployment, for a period of two months from the date on which the insured person was last in touch with the Employment Exchange. with the Employment Exchange.

This last item determines in the main the difference between the total number of unemployed persons given in the following Table and the figure given on page 183 showing the total number of persons registered at Employment Exchanges. The difference would be greater were it not that this latter figure includes uninsured persons who are maintaining registration. These do not appear in the figures of "books lodged," which relate solely to insured persons

Insured persons who are disqualified for the receipt of unemployment benefit under the trade dispute disqualification are not included in the numbers unemployed, unless they are definitely maintaining registration for other employment.

The statistics of unemployment in insured industries are presented in two separate Tables, one showing the numbers recorded as unemployed, and the other showing the estimated numbers insured and the percentages unemployed.

Special Note. Persons aged 65 and over.

Under the provisions of the Widows', Orphans' and Old Age Contributory Pensions Act, 1925, all persons aged 65 and over ceased to be insured under the Unemployment Insurance Acts as from 2nd January, 1928. The estimates of the numbers of insured persons in each industry prepared on the basis of the information obtained from the exchange of unemployment books in July, 1927, have therefore been revised to exclude persons aged 65 and over who, it is computed, numbered approximately 323,000 men, and 24,000 women. Such persons no longer appear in the statistics showing the number of insured persons recorded as unemployed, and the figures for dates subsequent to 2nd January, 1928, are therefore not comparable with those for earlier dates. The number of insured persons aged 65 and over whose books were lodged at the beginning of January did not exceed 30,000, and a proportion of these continued to register as uninsured persons. For all practical purposes, however, the percentages unemployed can be regarded as comparable with the corresponding figures published each month since July, 1923.

NUMBERS OF INSURED PERSONS RECORDED AS UNEMPLOYED AT 23RD APRIL, 1928.

AT 30th April, 1928, the number of persons on the registers of Employment Exchanges in Great Britain was 1,136,003; in Great Britain and Northern Ireland it was 1,171,343.

Statistics for men, boys, women and girls, separately, are given below:—

The following Table gives particulars relating to certain branches of the work of Employment Exchanges in Great Britain and Northern Ireland during the five weeks ended 30th April, 1928.

Of the 127,164 vacancies filled, 67,730 were for men, 29,970 for women, and 29,464 for juveniles:—

* The term "Employment Exchange," as used in this connection, includes Ministry of Labour Employment Exchanges and Branch Employment Offices, and also Juvenile Employment Eureaux under the control of Local Education Authorities which are exercising powers under Sec. 107 of the Education Act, 1921, and Sec. 6 of the Unemployment Insurance Act, 1923.

† "Vacancies filled" include certain types of cases (described as Class B placings) in which the work of the Exchanges was limited; for instance, obtaining for an employer former employees, or placing the same men on relief works in alternate weeks. During the five weeks ended 26th March, 1928, the average number of such placings was 5,830 per week. The average number of placings of casual workers during the five weeks ended 30th April, 1928, was 650 per week.

‡ The figures include, in addition to those wholly unemployed, persons "suspended" or "stood off," and those who, although employed on a basis of systematic short time, were not actually at work on the date in question.

The following Table shows for each of the Employment Exchange administrative areas, and for the principal towns therein, the number of persons registered at Employment Exchanges in Great Britain and Northern Ireland on 30th April, 1928. In certain cases (e.g., Bristol, Birmingham, Sheffield, Liverpool, Glasgow, etc.) the figures cover more than one Exchange area.

[[]Percentage rates of unemployment, for each of 653 towns in Great Britain, are given in the monthly "Local Unemployment Index"—see Advertisement pages of this GAZETTE.]

UNEMPLOYMENT INSURANCE STATISTICS: GREAT BRITAIN.

COMPOSITION OF STATISTICS.

On page 180 an explanation is given of the unemployment statistics published weekly in the Press, and monthly in this GAZETTE. The following Table gives figures relating to the 23rd April, 1928, for the total of each group included in these statistics. Lines 2 to 5 make up the number of persons on the register; while, by omitting the uninsured persons (line 5) and including lines 1 and 6, the number of books lodged, or, in other words, the number of insured persons recorded as unemployed is obtained: persons recorded as unemployed, is obtained :-

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR.

Rates of Wages.

May, 1928.

In the industries covered by the Department's statistics* the changes in rates of wages reported to have come into operation in April in Great Britain and Northern Ireland resulted in an aggregate reduction of about £9,350 in the weekly full-time wages of 204,000 workpeople, and in an increase of £1,500 in those of 9,000 workpeople.

The groups of industries principally affected were as shown below:—

Group of Industries.	Appro Number of affect	wimate Workpeople eted by	Amount of Change in Weekly Wages.		
an anserting the state of the s	Increases.	Decreases.	Increases.	Decreases.	
Metal		26,000 82,500 37,000 58,500	£ 20 1,480	£ 1,050 3,100 1,950 3,250	
Total	9,000	204,000	1,500	9,350	

Workpeople affected by reductions in the metal group included blastfurnacemen in Cleveland, who sustained a reduction equivalent to about 11 per cent. on current rates. Most classes of blastfurnace workers, except lower-paid day-wage men, in Cumberland and in the West of Scotland also had their wages reduced. There was a reduction equivalent to about 2 per cent. on current rates in the wages of iron puddlers and millmen in the North of England. The wages of bobbin makers in England and Wales were reduced by 1s. and 6d. per week in the case of men and women respectively, and men and women in the bedstead industry had their wages reduced by 2s. and 1s. per week respectively.

The principal reductions in the textile group affected workpeople

employed in the bleaching, dyeing, printing, etc., industry in Yorkshire, Lancashire, and Scotland, whose wages were reduced under cost of living sliding scales; in Yorkshire the reductions amounted to about 13 per cent. on current rates, and in the other districts, to 1s. and 8d. per week in the case of men and women respectively. A bonus paid to workpeople employed in the woollen and worsted industry at Leicester was reduced by ½d. on each shilling earned. In the clothing group there were reductions in the minimum piecework rates fixed under the Trade Boards Acts for workpeople

employed in the boot and shoe repairing industry, the reductions amounting to $2\frac{1}{2}$ or 5 per cent. on list prices. There was also a reduction in this group for felt hat makers, amounting to about $3\frac{1}{3}$ per cent. on current rates.

In the other industrial groups workpeople affected by reductions included those employed in the seed crushing and oil milling in-

dustry, brush and broom makers (under a Trade Board Order), bricklayers in the Glasgow district, waterworks employees in London and in the North-Eastern and Yorkshire areas, wholesale warehouse workers in Manchester, and the employees of local authorities at various towns in the West Midlands. There were increases in the wages of shale miners and oil workers in Scotland, furniture operatives at various towns in Yorkshire, and employees of certain local authorities in Kent, Surrey, and Sussex.

Of the total reduction of £9,350 per week, £8,100 took effect under cost of living scales, including £3,700 under scales agreed upon by Trade Boards and other joint standing bodies of employers and workpeople; £360 took effect under other arrangements made by joint standing bodies; £470 took effect under arkitection scales based on scaling prices; £150 took effect under arkitection are all the selling prices; £150 took effect under arbitration awards; and the remainder was the result of direct negotiations between employers

and workpeople.

Of the total increase of £1,500 per week, £140 took effect under arrangements made by joint standing bodies of employers and workpeople, and the remainder was the result of direct negotiations between the parties.

Public Administration	6,500	12,000	380	880	
Other	300	27,750	30	1,520	
Total	105,100	1,114,500	10,350	115,100	

In the corresponding four months of 1927 there were net increases of over £33,500 in the weekly full-time wages of 517,000 workpeople, and net reductions of £99,800 in those of 685,000 workpeople.

Hours of Labour.

No important changes were reported in April.

PRINCIPAL CHANGES IN RATES OF WAGES REPORTED DURING APRIL, 1928.

Industry.	Locality.	Date from which Change took effect.	Classes of Workpeople.	Particulars of Change. (Decreases in italics.)
Coal Mining	Shropshire (certain firms).‡	March‡	Workpeople employed in or about coal mines, other than those whose wages are regulated by movements in other industries.	Decrease of 11·83 per cent. on basis rates of 1911, leaving wage: 22 per cent. above basis rates, and minimum or subsistence wag- payable to adult able-bodied day-wage men reduced from 6s. 2d to 5s. 6d. per shift.‡
Shale Mining, etc.	Scotland	25 April	Workpeople employed in and about shale mines and oil works.	Increase of 10 per cent., restoring rates to the same level as at 18th October, 1927, with a minimum rate of 9s. per day for miners and 6s. 8d. per day for other adult workers,
Granite Quarrying.	Penmaenmawr and Trevor.	16 April	Settmakers and blockers employed at granite quarries on stone for settmakers only.	Decrease of 5 per cent.
	West Cumberland and North Lanca- shire.	2nd full pay in April.	Workpeople (excluding skilled craftsmen and bricklayers on maintenance work, and also labourers) employed at blast- furnaces,	Decreases in bonuses of amounts varying according to base rates from 2.6d. to 7d. per week, leaving total amount of bonuses from 1s. 7.9d. to 4s. 0.5d. per week.
Pig Iron Manufacture.	Cleveland and Dur- ham.	} 1 April {	Blastfurnacemen	Decrease of 1½ per cent. on standard rates, leaving wages 9 per cent. above the standard of 1919 (plus, in some cases, an output or input bonus). Minimum rate after change for scale labourers 6s. per shift, plus 9 per cent.
ACT recepts the	North Staffordshire	1st making-up day in	Tonnagemen employed at blast- furnaces.	Decrease of \(\frac{1}{2} \) per cent. on standard rates, leaving wages 43\(\frac{1}{2} \) per cent. above the standard.
of change view	West of Scotland	April. 29 April¶	Workpeople (excluding certain lower-paid day-wage men) employed at blastfurnaces.	Decrease of 2 per cent, on standard rates, leaving wages 6 per cent, above the standard (wages of lower-paid day-wage men remaining at 21 per cent, above standard).
[North of England	2 April	Iron puddlers and millmen	Decrease of 2½ per cent. on standard rates, leaving wages 24½ and 22 per cent. above the standard for puddlers and millmen
Iron and Steel Manufacture.	West of Scotland	30 April	Iron and steel sheet millmen	respectively. Percentage payable on base rates reduced from 50 to 47½ for work-people with a normal base of over 33s, per week and not more than 35s, 6d., from 50 to 45 for those with a normal base of over 35s, 6d, and not more than 40s, and from 50 to 42½ for those with a normal base of over 40s, per week.**

^{*} The particulars of numbers affected and amount of change in weekly wages exclude changes affecting Government employees, agricultural labourers, shop assistants and clerks, for which classes the information available is not sufficient to form a basis for statistics. Where information is available, however, details of changes in the current rate of wages of these classes are included in the list of principal changes recorded. The statistics are based on normal conditions of employment, and do not take into account the effect of short-time working, etc.

† In addition to the numbers quoted, wages stand at the same level as at the beginning of the year in the case of over 28,000 workpeople, whose addition to basis rates was similarly reduced by equal amounts during the year.

‡ The above decrease applied to two of the four firms included in the Shropshire Coal Owners' Association. In the case of another firm the percentage addition to basis rates was similarly reduced from 1st May, and a subsistence wage of 5s. 6d. per shift reduced to 5s. 2d., while the remaining firm, on 2nd May reduced the percentage addition from 42 to 37 and the subsistence wage from 6s. 2\frac{1}{4}d. to 6s. per shift.

§ Under cost-of-living sliding-scale arrangements.

¶ Under selling-price sliding-scale arrangements.

¶ The change took effect from the pay starting nearest 1st May; in most cases this was 29th April.

** The percentage payable to workpeople with a normal base of 33s. per week and under remained unchanged at 50.

Baking and Confectionery.	Lanark Paisley Vale of Leven, Dumbarton and Helensburgh,	April 24 March 31 March	Bakers and confectioners	Decrease of 1s. 6d. per week. Minimum rate after change, 72s. Decrease of 1s. 6d. per week. Minimum rate after change, 72s. Minimum rate after change, 72s.

* In the March issue of this GAZETTE (page 102) it was stated that it was agreed that as from December, 1927, the percentage addition to hase rates (for men on base earnings of not more than 5s. 10d. per shift) should not fall below 40 when base rate was 4s. 6d. or under, or 37½ when base rate was over 4s. 6d. This provision has applied since December, 1927, but it is not a permanent arrangement, and is subject to review on the consideration by the Employers of the Wages Board of each bi-monthly ascertainment of prices.

† Under cost-of-living sliding-scale arrangements.

‡ The decrease for youths engaged after 18th October, 1926, was 1s. per week for those 18 to 20 years of age, and 1s. 6d. per week for those from 20 to 21 years of age.

of age.

The change applied to workers employed by firms who are members of the British Cotton and Wool Dyers' Association, Ltd. (Slubbing Section), the Leeds Dyers' and Finishers' Federation, the Yorkshire Indigo, Scarlet and Colour Dyers, Ltd., the Leeds and District Worsted Dyers' Association, Ltd., the Huddersfield and District Master Dyers' Association, the Yorkshire Dyers' Federation, the West Riding of Yorkshire Master Slubbing Dyers' Association, The Bradford Dyers' Association, Ltd., and the Employers' Federation of Cotton Yarn Bleachers, Dyers, and Sizers (certain firms). Except in a few cases in the Bradford area the change did not apply to workpeople employed in the home dyeing and finishing departments of woollen and worsted manufacturers.

If I respect of the preceding pay period.

The change applied to workpeople employed by firms who are members of the Federation of Calico Printers, the Employers' Federation of Dyers and Finishers, the Employers' Federation of Bleachers and the Employers' Federation of Cotton Yarn Bleachers, Dyers and Sizers (certain firms). At Hebden Bridge the reductions for timeworkers were similar to those in Lancashire (see above); for pieceworkers the cost-of-living wages were reduced from 54 per cent. to 51 per cent. for netherwood cutters, from 57 per cent. to 54 per cent. for hand cutters, from 48 per cent. to 46 per cent. for menders, and from 54 per cent. to 51 per cent. for all other pieceworkers.

** This rate applies principally to men doing odd work for which no piece rate is provided. It does not apply to labourers, packers, etc., whose wages are governed by Orders under the Trade Boards Acts.

PRINCIPAL CHANGES IN RATES OF WAGES REPORTED DURING APRIL, 1928 (continued).

Industry.	Locality.	Date from which Change took effect.	Classes of Workpeople.	Particulars of Change, (Decreases in italics.)
Seed Crushing and Oil Milling.	Great Britain*	lst full pay in April.	Workpeople employed in the seed crushing and oil milling industry (except those whose wages are regulated by movements in the engineering and other industries). . Cerement Making	Great Britain	1 April	Female workers	Decrease in the minimum rates fixed under the Trade Boards Acts of \{\frac{1}{4}\). per hour for those 16 years and over, the rates for those under 16 remaining unchanged. Current minimum rates for time workers: 2\{\frac{1}{4}\). at under 14\{\frac{1}{4}\}\) years, increasing to 5\{\frac{1}{4}\]. and 6\{\frac{1}{4}\]. (according to experience), and to 5\{\frac{1}{4}\]. (6\{\frac{1}{4}\]. 6\{\frac{1}{4}\]. and 7\{\frac{1}{4}\]. (according to experience) at 21 and over; pinkers and choppers to receive 1d. and \{\frac{1}{4}\]. Per hour more respectively Piecework basis time rates: 1d. per hour more than appropriate minimum time rate (see page 152 of April GAZETTE.)

* Under cost-of-living sliding-scale arrangements.
† The increase is the result of a special Recommendation of the Provincial Industrial Council, which stabilised the new rates of wages for twelve months. The Authorities affected are those which follow the recommendations of the Provincial Council and include: Grade B.—Exeter, Exmouth, Ilfracombe, Newton Abbot, Poole, Swanage, Weymouth, also Torquay and Paignton (scheduled at 50s. 6d.); Grade C.—Tiverton; Grade D.—Bideford; Grade E.—Fowey, Launceston, Scaton. In some cases there was no actual change in wages and in others the increase was less than that shown above as some Authorities were previously paying above the scheduled rates.

‡ These rates were fixed under an award of the Industrial Court (dated 23rd March, 1928), and fluctuate in accordance with the cost of living.

§ Viz., men 21 years and over with three years' experience in certain operations and those of all ages who have served at least five years' apprenticeship in one or more of these operations.

|| It was arranged that the minimum time rates for those 16 years and over should be increased by \{\frac{1}{2}\)d. per hour from 1st October, 1928.

CHANGES TAKING EFFECT IN MAY, 1928.

The following groups of workpeople are among those affected by changes in rates of wages already reported as having been arranged to take effect in May. *Increases.*—Workpeople employed in the jute industry in Great Britain (under a Trade Board Order); men employed in railway electricity generating stations. *Decreases.*—Coopers in Great Britain; glass bottle makers in London; plasterers in Scotland;

PRICES AND WAGES IN THE IRON AND STEEL TRADES.

The following Table shows the results of recent ascertainments of selling prices of pig iron and manufactured iron and steel:—

* Stated to the nearest farthing

The fall in the price of Cleveland pig iron indicated in the Table resulted in a decrease in April of $1\frac{1}{2}$ per cent. on the standard rates of blastfurnacemen in that area. The January-February ascertainment for Cumberland resulted in decreases in March of ascertainment for Cumberland resulted in decreases in March of from 1½d. to 3d. per shift for Cumberland iron ore miners, of from 1d. to 3d. per shift, for Furness iron ore miners and surfacemen, and of 3½ per cent. on the output bonus earnings of keepers, slaggers, and certain other classes of men employed at West Cumberland and North Lancashire blastfurnaces. In North Staffordshire the fall in price resulted in a reduction in April of ½ per cent. on standard rates, but this was not applied to datal workers. The ascertainment for West of Scotland resulted in a decrease in April of 2 per cent. on the standard rates of blastfurnacemen, but this reduction did not apply to lower paid day-wage men, whose wages have cent. on the standard rates of blastfurnacemen, but this reduction did not apply to lower paid day-wage men, whose wages have remained at 21 per cent. above the standard since August 1925. As a result of the ascertainment for Nottinghamshire, the wages of blastfurnacemen in Nottinghamshire and of ironstone miners in Leicestershire and the adjoining parts of Lincolnshire remained unchanged. The reductions warranted by the working of the Northamptonshire Agreement in the wages of blastfurnacemen and ironstone miners and conveyment were not enforced.

ironstone miners and quarrymen were not enforced.

As regards manufactured iron, the North of England ascertainment resulted in a reduction in April of 2½ per cent. on the standard rates of iron puddlers and millmen in that area, whilst the West of Scotland ascertainment did not warrant a change in the wages of iron puddlers and millmen and iron and steel sheet millmen in that area. In the case of Siemens steel-workers in South-West Wales no change was warranted by the January-March ascertainment. The ascertainment for South Wales and Monmouthshire warranted a reduction, but this was not enforced.

TRADE DISPUTES IN APRIL.*

May, 1928.

Number, Magnitude and Duration.—The number of trade disputes involving a stoppage of work, reported to the department as beginning in April in Great Britain and Northern Ireland, was 16, as compared with 31 in the previous month and 16 in April, 1927. The total number of workpeople involved in these disputes (including those thrown out of work at the establishments where the disputes occurred, thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes) was approximately 1,900. In addition, about 1,000 workpeople were involved, either directly or indirectly, in 24 disputes which began before April and were still in progress at the beginning of that month. The number of new and old disputes was thus 40, involving about 2,900 workpeople, and resulting in a long during April of the total 2000 workpeople. people, and resulting in a loss during April of about 30,000 working

days.

The following Table analyses the disputes in progress in April in Great Britain and Northern Ireland by groups of industries, and indicates the number of workpeople involved at the establishments concerned and the approximate time lost during the month in all disputes in progress:

		er of Disp gress in Mo		Number of Work-	Aggregate Duration in Working Days of all Dis- putes in progress in Month.	
Groups of Industries.	Started before begin- ning of Month.	Started in Month.	Total.	people in- volved in all Dis- putes in progress in Month.		
Mining and Quarrying Bricks, Pottery, Glass, etc Building, Public Works	2 2	2	4 3	800 300	4,000 6,000	
Contracting, etc Other Industries	6 14	2 11	8 25	500 1,300	9,000	
Total, April, 1928	24	16	40	2,900	30,000	
Total, Mar., 1928	15	31	46	38,000	168,000	
Total, April, 1927	20	16	36	10,200	79,000	
	The second second	The state of the s				

Causes .- Of the 16 disputes beginning in April, 3, directly involving 150 workpeople, arose out of proposed reductions in wages; 5, directly involving 1,350 workpeople, on other wages questions; 6, directly involving 330 workpeople, on questions respecting the employment of particular classes or persons; and 2, directly involving 30 workpeople, on other questions.

Results.—Settlements were effected in the case of 10 new disputes, directly involving 1,180 workpeople, and 8 old disputes, directly involving 320 workpeople. Of these new and old disputes, one, directly involving 30 workpeople, was settled in favour of the workpeople; 9, directly involving 880 workpeople, in favour of the employers; and 8, directly involving 590 workpeople, were compromised. In the case of one dispute, directly involving 190 workpeople, workpeople, were recompromised. people, work was resumed pending negotiations.

Totals for the First Four Months of 1927 and 1928.†

The following Table summarises the figures for Great Britain and Northern Ireland for the first four months of 1928, as compared with the corresponding period of 1927:—

	Jan	uary to Ap	oril, 1927.	January to April, 1928.			
Groups of Industries.	of Disputes beginning in Use of Disputes beginning in Use of Days of Disputes Disputes in Use of Disputes of Dispu		Disputes	No. of Disputes beginning in period.	Number of Work- people involved in all Disputes in progress.	Aggregate Duration in Working Days of all Disputes in progress.	
Mining and Quarrying	28	22,300	399,000	44	55,500	276,000	
Bricks, Pottery, Glass, etc Engineering and		.4.		6	500	18,000	
Shipbuilding Other Metal Textile	11 13 9	700 1,800 2,100	3,000 13,000 11,000	15 7 7	1,700 300 1,200	6,000 2,000 8,000	
Woodworking and Furnishing Building, Public	6	100	1,000	9	300	4,000	
Works Contracting, etc Transport Other	12 6 7	5,500 500 900	83,000 2,000 8,000	17 6 13	1,600 700 900	29,000 3,000 14,000	
Total	92	33,900	520,000	124	62,700	360,000	

* Disputes involving less than 10 workpeople, and those which lasted less than one day, have, as usua!, been omitted from the statistics, except when the aggregate duration (i.e., number of workpeople multiplied by number of working days, allowing for workpeople replaced by others, etc.) exceeded 100 days.

days, allowing the totals for the several months of the year the figures have been amended in accordance with the most recent information. Workpeople involved in more than one dispute are counted more than once n the totals; the amount of such duplication is, however, very slight.

[The usual tabular statement of principal disputes in progress during the month is omitted, as there were no disputes involving large numbers of workpeople in April.]

TRADE DISPUTES IN 1927.

A special article dealing with the statistics of trade disputes in Great Britain and Northern Ireland in 1927 appears on pages 158-160 of this issue.

DISEASES OF OCCUPATIONS.

THE total number of cases of poisoning, anthrax, and epitheliomatous and chrome ulceration in Great Britain and Northern Ireland
reported during April, 1928, under the Factory and Workshop
Act, or under the Lead Paint (Protection against Poisoning) Act,
1926, was 54. Ten deaths were reported during the month,
nine due to lead poisoning and one due to epitheliomatous ulceration.
In addition, two cases of lead poisoning (including one death)
among plumbers not employed in factories came to the knowledge
of the Home Office during April, but notification of these cases is
not obligatory.

FATAL INDUSTRIAL ACCIDENTS.

THE number of workpeople, other than seamen, in Great Britain and Northern Ireland, reported during April, 1928, as killed in the course of their employment, was 181, as compared with 201 in the previous month and with 201 in April, 1927. Fatal accidents to seamen reported in April numbered 39, as compared with 57 in the previous month and with 43 in April, 1927.

POOR LAW RELIEF IN GREAT BRITAIN.

(Data supplied by the Ministry of Health in England and Wales and by the Board of Health in Scotland.)

The number of persons* relieved on one day† in April, 1928, in the poor-law areas in the thirty-one selected urban areas named below was 737.584, or 1.5 per cent. less than in the previous month, and 8.7 per cent. less than in April, 1927. The numbers relieved at these three dates were equivalent, respectively, to rates of 413, 419 and 452 per 10,000 of the estimated population.

EMPLOYMENT OVERSEAS.

May, 1928.

[N.B.—The following paragraphs include an abstract of such official information as is available with regard to the state of employment abroad, in order to indicate, as far as possible, the furtuations in employment in each country from period to period. The bases of the official statistics published in the various countries are, however, not the same as those of the statistics relating to this country, and therefore the figures quoted below cannot properly be used with those on pp. 171–172 to compare the actual level of employment in Great Britain and Northern Ireland with that of other countries. For details of the bases of the unemployment statistics of the various countries, reference should be made to the Reports on Statistics of Unemployment issued by the International Labour Office (Studies and Reports, Series C., No. 7, and Series N., No. 7).

GERMANY.

Reichsarbeitsblatt* states that from the middle of January to the middle of March a slow but steady decline took place in the number of persons registered as unemployed at the Employment Exchanges, the total of which at the earlier date had exceeded two millions. Leading industries up to the middle of March were still suffering from depression. In the second half of the month employment conditions, under the influence of more settled weather, underwent a rapid improvement. The seasonal revival in the clothing industry a rapid improvement. The seasonal revival in the clothing industry continued in a more marked form. Other industrial groups showed fewer unemployed, with the exception of the textile, in which the decline in employment which had been in progress since October last became accentuated during the month under review.

At the end of March, the Employment Exchanges making returns reported 1,664,440 persons on the "live register," as against 1,933,320 at the end of February, and 1,919,518 at the end of March, 1927.

at the end of February, and 1,919,518 at the end of March, 1927. The number of vacant situations registered at the Exchanges at the end of March was 85,308, as compared with 71,855 at the end of the preceding month and 56,678 at the end of March, 1928.

The number of insured persons in receipt of benefit in respect of total unemployment on 31st March, 1928, was 1,208,406 (including 197,643 in receipt of emergency unemployment benefit). On 29th February the corresponding total was 1,452,416 (including 214,912 in receipt of emergency benefit). On 15th April the total in receipt of benefit fell to 1,027,283 (including 182,393 in receipt of emergency benefit).

benefit).

Returns relating to 4,162,658 organised workers were received from national trade unions. Of these 383,224, or 9·2 per cent., were totally unemployed on 31st March, 1928, as compared with 10·4 per cent. on 25th February, and 11·5 per cent. on 26th March, 1927. In addition 155,797, or 3·7 per cent., were working short time, as against 3·6 per cent. on 25th February, and 4·4 per cent. at the end of March, 1927.

The following Table gives particulars of total unemployment among the principal groups of trades represented in the above total:—

with maker equative every a	Membership reported on at	Percentage unemployed at end of month.			
Groups of Trades.	end of March, 1928.	March, 1928.	February, 1928.

Clothing	93,700	10.8	14.1		
Building	606,500	28.2	33.5		
Printing	140,000	3.3	3.4		
Transport	330,500	5.1	5.1		

Employers' returns were received in March from 3,766 establishments in various industries. On the 15th of the month, 31 per cent. of the aggregate workpeople covered by the returns were employed in establishments reporting good employment (as compared with 26 per cent. in the previous month and 22 per cent. in March, 1927) and 23 per cent in those reporting bad employment (as against 19 per cent. in the previous month and 25 per cent. in March, 1927).

FRANCE.

The total number of unemployed persons remaining on the "live register" of the Exchanges on 28th April, 1928, was 18,420 (12,739 men and 5,681 women). At the end of March the corresponding total was 22,325. The total number of vacancies remaining unfilled on 28th April was 12,529 (7,595 men and 4,934 women), as compared with 11,634 at the end of March. During the last week of April the Exchanges succeeded in placing 24,402 persons in situations, including 8,104 dock workers at seaports, and in addition found employment for 490 foreign immigrants. employment for 490 foreign immigrants.

DENMARK.+

Returns supplied to the Danish Statistical Department by trade unions and by the Central Employment Exchange show that 22.5 per cent. of the 273,876 workpeople covered by the statistics were unemployed at the end of March, as against 25.9 per cent. at the end of the preceding month and 26.2 at the end of March, 1927.

* Reichsarbeitsblatt, 20th April and 1st May, 1928. Berlin † Bulletin du Marché du Travail, 4th May, 1928. Paris, ‡ Statistiske Efterretninger, 25th April, 1928. Copenhagen.

SWEDEN.*

The percentage of members of trade unions making returns who were unemployed on 31st March, 1928, was 13·1, as compared with 13·2 per cent. on the last day of the preceding month, and 14·1 per cent. on 31st March, 1927.

BELGIUM.+

Returns received by the Ministry of Industry and Labour from 155 approved unemployment insurance societies, with a total membership of 623,814, show that 5,243 (0·8 per cent.) of these were totally unemployed on 31st March, 1928. The corresponding percentage at the end of the preceding month was 1·2, and in March, 1927, 1·8. In addition 17,081 members (2·7 per cent.) were employed intermittently during the month. The total days lost through unemployment in March numbered 233,100, or 1·56 per cent. of the aggregate possible working days: in the preceding cent. of the aggregate possible working days; in the preceding month the percentage was 2·22, and in March, 1927, 2·36. The figures relating to March, 1928, are provisional.

HOLLAND.+

The Journal of the Dutch Statistical Office contains preliminary figures compiled by the State Department of Unemployment Insurance and Employment Exchanges, which show that out of 311,549 members of subsidised unemployment funds making returns for the week ended 31st March, 1928, 12,915 (4·1 per cent.) were unemployed during the whole week and 3,874 (1·3 per cent.) for less than six days. In the corresponding week of the preceding month (ended 25th February, 1928) the percentages were respectively 6·1 and 1·9.

AUSTRIA.

Austrian.

According to the issue of Statistische Nachrichten (the journal of the Austrian Department of Statistics) for 25th April, 1928, the total number of applicants for work registered at the Employment Exchanges at the end of March, 1928, was 219,534 (including 90,469 in Vienna), as compared with 252,272 at the end of February. The number of persons in receipt of unemployment benefit at the end of March was 193,449 (including 76,335 in Vienna), as compared with 223,964 (85,332 in Vienna) at the end of February.

The industrial groups having the greatest number of unemployed were the building, commercial, clothing, and the hotel, etc., service.

According to statistics furnished by the National Social Insurance Fund, 413,383 persons were unemployed on 29th February, 1928, as compared with 439,211 on 31st January, 1928, and 259,059 at the end of February, 1927. The total for February 29th includes 112,832 engaged in agriculture and fishing and 130,870 in the building, road construction, etc. industries. In addition 58,109 persons were partially unemployed at that date, as compared with 76,327 at the end of the preceding month, and 56,113 at the end of February, 1927. These totals are stated to be approximate only. In February, 1928, 120,489 insured workers received benefit in respect of a total of 1,948,743 days of unemployment.

SWITZERLAND.||

On 31st March, 1928, 8,265 applications for employment (6·3 per thousand of the employed population according to the Census of 1920) were registered at employment exchanges, as compared with 12,017 at the end of the preceding month, and 13,568 at the end of March, 1927. The reduction is stated to be due partly to seasonal causes, and to be indicative in some degree of general improvement. The building, metal, and textile industries reported the greatest reduction in the numbers unemployed. Offers of situations at the dates mentioned above numbered 4,535, 3,564, and 3,810 respectively. respectively.

UNITED STATES.¶

UNITED STATES.¶

Figures relating to the volume of employment in March, based on returns from 10,880 establishments in 54 of the chief manufacturing industries, are published by the Federal Bureau of Labour Statistics. These establishments reported 3,023,122 persons employed in March, 1928, an increase of 0.7 per cent. as compared with the total for February. The aggregate wages paid for March showed an increase of 1.3 per cent., as compared with those for February, and the average earnings per head an increase of 0.6 per cent. The most outstanding increase in employment was shown in the fertiliser industry where employment increased by 39 per cent. between February and March, whilst increases in employment ranging from 3.1 per cent. to 4.9 per cent. were shown in the agricultural implements, cast-iron pipe, stamped and enamelled ware, motor car, ice-cream, glass and brick, etc. industries. The notable decreases in employment in March were in the woollen goods, book and job printing, chewing tobacco, rubber boots, and shipbuilding industries. building industries.

As compared with March, 1927, there was in the month under As compared with March, 1927, there was in the month under review, a decrease of 5.8 per cent. in the numbers employed, and a decrease of 6.7 per cent. in the aggregate wages paid. The most notable decreases in employment were shown in the fertiliser, agricultural implement, motor car, rubber tyre, slaughtering and meat packing, and flour industries.

CANADA.

For 1st April, 1928, returns were received by the Dominion Bureau of Statistics from 6,191 firms, with an aggregate of 842,940 on their pay rolls. On 1st March, 1928, the same firms reported 844,294 employed, and the total for the 1st April thus shows a decrease of 1,354. If employment in the week ended 17th January, 1920, be represented by 100, the index number of employment for 1st April, 1928, is 101·1, as compared with 101·4 at the beginning of the preceding month, and 96·2 on 1st April, 1927.*

On 29th February, 1928, 7·0 per cent. of the aggregate membership

of trade unions making returns were unemployed, as compared with 6.8 per cent. at the end of January, and 6.5 per cent. at the end of

AUSTRALIA.‡

The proportion of members of trade unions making returns who were unemployed in the first quarter of 1928 amounted to 10·2 per cent., as compared with 8·9 per cent. in the preceding quarter, and 5·9 per cent. in the first quarter of 1927. (These figures relate to persons out of work for three days or more during a specified week in each quarter.)

LEGAL CASES AFFECTING LABOUR.

Trade Union Act, 1871.

TRADE UNION AND MEMBER—SUPERANNUATION ALLOWANCE—ALTERATION OF THE RULES—TEMPORARY MEASURES.

MEMBER of the National Union of Foundry Workers of Great Britain and Ireland brought an action for a declaration that resolutions passed by the national executive council of the union altering certain of the rules of the union were ultra vires; he also sought njunctions to restrain the union from putting those resolutions

In 1921 the plaintiff, having attained the age of 66 years, ceased work, and under Rule 33 became entitled to a weekly superannuation allowance of 7s. 6d. This was paid to him until the 10th January, 1927, when the allowance was reduced to 5s. weekly by the resolution

Rule 33 provided for the payment of superannuation allowance: in the plaintiff's case the rate to which he was entitled under that rule was 7s. 6d. a week. The rule could not be altered unless five-sixths of the members voted in favour of such a course. Bule 34 provided that certain sums should be paid for funeral expenses on the death of a member: the sums payable were set out in a schedule embodied in the rules. The national executive council had no power to make new rules, and the rules could only be amended by the vote of the members or by the rules revision committee properly

The national executive council on the 4th January, 1927, passed resolutions reducing by one-third the superannuation allowance and the payments for funeral expenses. It was contended on behalf of the defendant union that the resolutions of the 4th January were purely concerned with administration, and were not passed with a view to altering the rules. It was pointed out that the Union could not afford to pay the full superannuation allowance, owing to the poor financial position in which it found itself at present. It was further submitted that Section 4 of the Trade Union Act, 1871, precluded the plaintiff from bringing the action, since that enactment provided that no action could be brought by a member to recover benefits; and it had been decided in the case of McCluskey and Others v. Cole and Others (1922, 1 Ch. 7) that, when an action could not be brought under Section 4, an injunction would not be granted to restrain the enforcement of a resolution.

Counsel for the defendant union said that there were heavy liabilities in the balance sheet, and, in addition, the Ministry of liabilities in the balance sheet, and, in addition, the Ministry of Labour in December, 1926, were urging the union to improve its financial position. For five years it had been unable to pay its contribution to the Unemployment Fund, and unless that payment were made, the arrangement made with the Ministry of Labour for paying unemployment benefit to the members would have to cease. Those members who would have been prejudiced by the cessation of payment of unemployment benefit greatly outnumbered those who were in receipt of superannuation allowance.

Counsel for the plaintiff urged that the rules which had been made to provide for the objects of the union and the means of enforcing

to provide for the objects of the union and the means of enforcing the rules were made under statutory authority, and that the Court had power to construe the rules and to consider whether proper provision had been made for altering them. The plaintiff was en-titled to receive the full allowance of 7s. 6d. a week, since the defen-dant union had not suggested that they had not sufficient funds

In the course of his judgment, Mr. Justice Astbury said that he fully realised the unfortunate position in which the plaintiff and other old members of the union were placed. In his view, however, the council had not intended to alter the rules, and the resolutions

The April Employment Situation, 1928. Ottawa. Information supplied by the Canadian Department of Labour, Ottawa. Information supplied by the Prime Minister's Department, Canberra, and viterly Summary of Australian Statistics, December, 1927. Melbourne.

were temporary measures, to be operative only while the financial position of the union did not permit payment in full: he hoped that ultimately there would be a return to the old scale.

The union would be bound to come to an end if unemployment benefit were not paid, since there would be no contributions

In his opinion the resolutions did not amount to alterations of the rules, the temporary arrangement which the resolutions were intended to provide for was not ultra vires, and the Court had no authority to interfere with the internal affairs of the union. any case, Section 4 of the Trade Union Act, 1871, debarred the plaintiff from obtaining relief in this action. If the injunction asked for would not effectively obtain for the plaintiff the benefits sought by him, it would be useless: it was admitted that the plaintiff could not sue for those benefits.

The action was dismissed with costs.—Cox v. National Union of Foundry Workers of Great Britain and Ireland. High Court of Justice, Chancery Division. 1st March, 1928.

Coal Mines Regulation Act, 1887.

CHECKWEIGHMAN-INTERFERENCE WITH APPOINTMENT-SEPARATE

The defendant, Captain Muschamp, agent to the New Hucknall Colliery Company, was summoned by Arthur Thompson, a checkweigher, for unlawfully interfering with the appointment of a checkweigher by requesting George Alfred Spencer to make known to the persons entitled to appoint a checkweigher that he (Thompson) would not be allowed to act, or continue to act, as checkweigher, that if he were elected to that post the Waterloo seam would not be re-opened, and that Thompson had been responsible for the seam being closed.

being closed.

Sir Henry Slesser, K.C., M.P., for the prosecution, pointed out that one of the issues in the case would be as to what constituted a mine, and whether the seams worked at the colliery in question formed one mine or separate mines. In his submission the three seams worked formed one mine because they had a common system of ventilation, and so long as any part of the mine continued to be worked, the complainant, Thompson, was checkweigher at the mine. Thompson was originally appointed checkweigher in 1918, and was re-elected to that office for the Waterloo seam after the stoppage of 1926; two other checkweighers were elected for the Low Main seam and the Deep Hard seam. Counsel submitted that, although the chairman of the meeting at which the appointment was made failed chairman of the meeting at which the appointment was made failed to make the necessary statutory declaration afterwards, that did not make the election bad. In any event, the complainant was the recognised checkweigher, and acted as such until November, 1927, when notices were posted to the effect that, unless new terms could be arranged, the Waterloo and Deep Hard seams would close on

It was alleged that the defendant would only communicate the olliery company's terms to the men through Mr. G. A. Spencer.

H.M. Inspector of Mines for the district gave evidence to the effect that there was a common ventilation system shared by the three seams at the colliery; there was, however, a separate under-manager for each seam, and there were distinct and separate shafts.

Another witness produced a copy of a price-list which related to the three seams and was signed by the defendant: the list was signed separately by the checkweighmen of the three seams, and the witness stated that the Waterloo seam was regarded as separate for the ourpose of checkweighmen.

Mr. Norman Birkett, K.C., for the defence, said that nobody would deny that it was of vital importance that the appointment of a check weigher should be made in accordance with the Act, and that there should be no interference, bribery or intimidation. He contended that this case was not merely a question of the appointment of a checkweigher, but that it was a manifestation of the rivalry existing between two unions. His first point was that whatever the defendant had done did not constitute an offence if the Waterloo seam was in fact a separate mine, for, if such was the case, there could have been no interference with the appointment, since there would have been no no interference with the appointment, since there would have been no persons employed at the mine entitled to appoint a checkweighman. The prosecution had in effect assented to this proposition, but argued that the Waterloo seam was not a separate mine, because no notice had been sent to the Mines Inspector. In his (counsel's) submission the evidence of H.M. Inspector of Mines was not proof that no notice was ever sent; no witness had been called from the Home Office, which was the authority to which notice should have been sent at the time, as the Ministry of Mines was not then in existence. The Ministry of Mines had, for the purpose of returns, treated the Waterloo seam as a separate mine. A further point was that there could have been no interference with the appointment of the complainant, because his appointment in 1926 was not valid, and in 1928, therefore, he was not a checkweigher. It had been decided recently in a County Court case that the absence of the statutory declaration he was not a checkweigher. It had been decided recently in a County Court case that the absence of the statutory declaration rendered such an appointment null and void; it was admitted that the statutory declaration was not made in 1926, and, moreover, the meeting had not been properly convened. Quite apart from anything else, the prosecution could not succeed if the Court were satisfied that what the defendant said on the 31st January, 1927, did not amount to interference with the appointment of a checkweigher.

Captain Muschamp, giving evidence, said that on the 31st January, 1927, Mr. Spencer asked him whether the Waterloo seam could be re-opened. He replied that the matter was in the hands of the directors, and added that he thought Thompson would not be acceptable to the directors if he were re-elected checkweigher. He told Mr. Spencer that he was at liberty to let the men know what had been

said. He (the witness) had never laid it down as a condition of the re-opening of the mine that Thompson should not be appointed checkweigher. If the pit had been working, he would not have made the remark about the complainant which he did make, lest it should have been construed into an attempt to interfere with the appointment, but, as a matter of fact, the pit was closed at the time.

May, 1928.

Mr. G. A. Spencer, M.P., gave evidence corroborating Captain

The Chairman of the magistrates announced that the Bench found as a fact that the Waterloo seam was a separate mine, and that there as a fact that the waterioo seam was a separate mine, and that there had not been interference with the appointment of a checkweigher. The case was accordingly dismissed, and the prosecution were ordered to pay a sum not exceeding £100 towards the costs of the defence. Eleven other summonses against the defendant, under the Coal Mines Regulation Act, 1887, were withdrawn. Thompson v. Muschamp. Mansfield Petty Sessions. 17th April, 1928.

Workmen's Compensation Act, 1925.

"IN THE COURSE OF HIS EMPLOYMENT"-PRACTISING.

The applicant, a surface haulage engine driver, claimed compensation from his employers, the Nanthir Colliery Company, Blaengarw, for injuries sustained in an accident.

The applicant, giving evidence, stated that about fourteen days before the accident he was asked by the colliery manager if he would take on a job as a winding engineman; he agreed to do this, but said that it would take him some time to learn the work. On the date of the accident, after finishing his ordinary duties, he practised for two hours; but when he was leaving the colliery premises he fell into a cultout and brake his lea

into a culvert and broke his leg.

After hearing evidence on behalf of the respondent company, his Honour Judge Rowlands said that he was satisfied that it had been made a condition of employment that the applicant should first of all have some opportunity of practising with the engine; but he did not think that it could be said that, because a workman might make such a condition, he would be "in the course of his employment" whilst he was performing the condition. In effect the accident took place at a time when he was actually doing nothing at all for his employers.—Parry v. Nanthir Colliery Co. Bridgend County Court. 25th April, 1928.

Factory Act. 1901.

EMPLOYMENT OF JUVENILES—OMISSION TO OBTAIN A MEDICAL CERTIFICATE.

Proceedings were brought under the Factory Act against the Goole Co-operative Society for employing in their bakery a lad under the age of sixteen years without his having been certified by a medical

The lad in question was only fourteen years old, and had been employed in the bakehouse since the 3rd February. The prosecution stated that the defendants had already been warned twice for similar offences. The defence was that the matter was due to an

The Bench warned the defendants against a repetition of the offence, and made an order for the payment of 7s. costs.—Rex v. Goole Co-operative Society. Goole Petty Sessions. 28th March, 1928.

Other Recent Decisions of Interest.

Illegal Employment of School Children.

Two bookmakers were summoned for employing school children after 7 p.m. Each of the defendants had employed a lad whose duty it was to hold up a board on which were displayed the odds at a dog racing track.

The prosecution said that it was usual to give two warnings in such cases before proceedings were taken, but, having regard to the sur-roundings in which the lads were employed in these particular cases, it had been thought desirable in the public interest to ventilate the facts in Court.

In the case of one defendant a fine of 5s. was imposed, and in the case of the other defendant the summons was dismissed on payment of costs.—Bradford Petty Sessions. 26th April, 1928.

Lightning Strike-Breach of Contract-Laying Pit Idle.

An action was brought by a colliery company against seventy atters for breach of contract. It was stated that the defendants had laid the Hazelrigg Pit idle from the 1st to the 10th March owing to some grievance which they felt they had with regard to the wages standard. They had also absented themselves from work from March 15th to March 24th, and twenty-four hewers had had to do March 15th to March 24th, and twenty-four hewers had had to do their work. It had been the practice of the putters for some years to lay the pit idle whenever they thought they had a complaint. The colliery owners had carried on at a considerable loss for some years, and had spent a great deal of money on new plant in order to provide employment. On this particular occasion the actual loss suffered by the colliery company owing to the defendants' action was £1,500, though only one-third of this sum was being claimed as damages.

Damages and costs were awarded by the Court against each of the seventy defendants.—Newcastle Petty Sessions. 4th April, 1928.

The Harton Colliery Company sued 987 of their workmen for damages for breach of contract for laying the pit idle without notice on three days in March last. The company had lost £759 through the defendants' absence from work, though they were only claiming

£378 by way of damages.

The miners' officials agreed to judgment against each man for 15s. Judge Sir Francis Greenwell gave judgment against each man for 13s. Judge Sir Francis Greenwell gave judgment accordingly, and said that these lightning strikes were brought about by pernicious influence, which did not emanate from the men's official leaders.—South Shields County Court. 25th April, 1928,

UNEMPLOYMENT INSURANCE ACTS, 1920-27.

DECISIONS GIVEN BY THE UMPIRE.

THE Umpire is a judicial authority independent of the Ministry of Labour, appointed by the Crown under Section 12 of the Unemployment Insurance Act, 1920, for the purpose of determining disputed claims to benefit. His decisions* are final and conclusive.

Appeals to the Umpire may be made by the Insurance Officer or by an Association of which the claimant is a member, or, with the permission of the Court of Referees, by the claimant himself.

The following is a recent decision of general interest:—

Case No. 688/28. (24/4/28.) Section 8 (2) of the Principal Act-

MANAGER OF GROCERY STORE DISMISSED BECAUSE OF 10 PER CENT. DEFICIENCY OF STOCK AT STOCKTAKING—NEGLIGENCE AMOUNTING TO MISCONDUCT.

In the case of an appeal against the disallowance of a claim for benefit on the ground of misconduct, the Umpire gave the following decision in which the circumstances are explained:—

Decision.—" On the facts before me my decision is that the claim for benefit should be disallowed.

for benefit should be disallowed.

"The applicant was the manager of a grocery store of which he was in sole charge, and he commenced that employment about September, 1926. On 24th December, 1927, he was dismissed for misconduct in the following circumstances:—Stock is taken at the store every three months. At the stocktaking in September, 1927, there was a deficiency of 1 per cent., which is recognised as being accountable for by mistakes in weighing and loss of weight in certain commodities. When stock was again taken in December, 1927, there was a deficiency of 10 per cent., or £175. The applicant could not account for this large and unusual deficiency, and was dismissed for misconduct. It should be observed that no allegation of dishonesty was made against the applicant, the allegation of dishonesty was made against the applicant, the discrepancy being attributed solely to the negligent discharge of his duties.

'It is now suggested that the discrepancy may have been due to two causes: (1) theft of money or goods by the shop assistants who worked under the direction and control of the applicant; (2) the

unsatisfactory method of stocktaking,
"With regard to the first cause suggested, it is the duty of the
manager to ensure as far as he can that thefts of such a nature do
not take place, and, in any event, to detect them before they reach
the magnitude which these thefts had reached in the space of three
months, if this be the correct explanation of the large deficiency

"With regard to the second cause suggested, stock was again taken five days after the stock-taking at which the deficiency of £175 was discovered, and the figures were in no way altered. An offer was made to the applicant to see the full result of the stock-taking with all the figures, an offer of which no advantage was taken, though it is said, for reasons which I am unable to appreciate, that had the offer been accepted it would have afforded the applicant no means of knowing whether the stock had been correctly taken

In these circumstances I see no reason for disagreeing with the Court of Referees, who came to the conclusion that the negligence of the applicant was such as to amount to misconduct."

COURTS OF REFEREES REGULATIONS, 1928.

The Unemployment Insurance (Courts of Referees) Regulations, 1928,† dated 3rd April, 1928, made by the Minister of Labour under the Unemployment Insurance Act, 1920 (10 & 11 Geo. 5,

The Minister of Labour, by virtue of the powers conferred on him by Sections 13 and 35 of the Unemployment Insurance Act, 1920, and of all other powers enabling him in that behalf, hereby makes the following Regulations:—

1.—(1) The panels of persons chosen to represent employers and insured contributors respectively required to be constituted by the Minister shall be composed of such number of members as the Minister sees fit to appoint for each district.

(2) Before appointing a person to be a member of a panel, the Minister shall take into consideration the name of any person suggested for appointment by the Advisory Committee for the district concerned, or, if in the district there is no such Advisory Committee, he shall take into consideration the name of any person suggested for appointment by or on behalf of any employers or insured contributors or by any associations of employers or employed persons if in his opinion the person or association making the suggestion is an

interested party.

(3) The members of a panel shall hold office for three years from the date of their appointment or for such other term as the Minister

Provided that the Minister may at any time terminate the appointment of any member of a panel.

* Volumes containing selected decisions of the Umpire are published annually by H.M. Stationery Office, the latest being a volume of selected decisions given during the year 1927 (price 7s. 6d. net). Selected decisions are also issued monthly in pamphlet form, and may be obtained, as and when issued, on payment of an annual subscription; the latest monthly pamphlet issued is that for March, 1928. Applications should be made to H.M. Stationery Office at any of the addresses shown on the front cover of this GAZETTE.

(4) Where a vacancy occurs by reason of the death or retirement of a member of a panel before the termination of his appointment, any person appointed by the Minister to fill such vacancy shall hold office only until the expiration of the term for which that member was appointed.

Provided that nothing in these Regulations shall be construed as implying any obligation upon the Minister to fill any vacancy in a

- 2.—(1) A Court shall consist of a chairman appointed by the Minister and one person drawn from the employers' panel and one person drawn from the insured contributors' panel and duly summoned to serve on the Court.
- (2) So far as practicable the persons drawn from the two panels shall be men when men's cases are being considered and women when women's cases are being considered.
- (3) Each member of a panel shall, so far as practicable, be sumed to serve in turn upon a Court.
- (4) Any case may, with the consent of the claimant or association concerned but not otherwise, be proceeded with in the absence of any member or members of the Court other than the Chairman, and in any such case the Court shall be deemed to be properly constituted, and the Chairman shall, if the number of the members of the Court s an even number, have a second or casting vote.
- (5) No member of a panel shall act as a member of a Court during the consideration of a case in which he appears as the representative of the claimant or by which he is or may be directly affected or in which he has taken any part as an official of an association or as an employer or as a witness or otherwise or whilst he is himself claiming unemployment benefit or is disqualified for the receipt of
- 3. Where an insured contributor has required the insurance officer to report any matter to a Court the Chairman of the Court may at any time before the matter has been taken into consideration by the Court, refer the matter for previous examination and report to two persons, who are persons resident in the neighbourhood in which the insured contributor resides, and of whom one shall be drawn from the employers' panel and the other from the insured contributors'
- 4.—(1) (a) Save as hereinafter provided reasonable notice of the time and place at which a Court will sit for the consideration of any case shall be given to the claimant and except by consent of the claimant a Court shall not proceed to the consideration of any case unless such notice has been given.
- (b) During the consideration by a Court of any case the claimant, (6) During the consideration by a Court of any case the claimant, an insurance officer, and any officer of the Ministry of Labour that the Minister may direct shall be entitled to be present at the sitting of the Court and the claimant may be represented at the sitting of the Court by any person, not being counsel or solicitor, authorised by him, but for the purpose of discussing its recommendations the Court may order all persons not being members of the Court to withdraw from the sitting of the Court.
- (c) The provisions of paragraph (a) hereof, and of paragraph (b) hereof, so far as they relate to a claimant and any representative authorised by him shall not apply in the case of any review under Section 11 (2A) of the Act: provided that before making any recommendation to disallow the continuance of unemployment benefit the Court shall give an opportunity to the claimant to attend, and be represented as aforesaid before it.
- (2) Where the case to be considered by a Court is a claim by an association which has made an arrangement under Section 17 of the Act for payment of a sum in lieu of unemployment benefit, the secretary of the association, or the secretary of the branch of the association through which the claim was made, shall have the same rights as to notice, presence at the sitting of the Court, and representation by another person, as are given to a claimant by these Regulations.
- (3) The Court may allow any person appearing to the Court to be likely to be affected by the decision of the Court to be present during the consideration of a case, but save as aforesaid, there shall not be admitted to the sitting of the Court any member of the public or the representative of any newspaper.
- (4) The decision of a majority of a Court shall be the decision of the Court, but any member dissenting from any decision of the Court may record his dissent and the reason therefor, and a statement that the member so dissented, and of the reason recorded by him for so dissenting, shall be transmitted to the insurance officer with the recommendation of the Court.
- 5. In these regulations the following expressions have the meanings hereby assigned to them respectively, that is to say:—
 - "The Act" means the Unemployment Insurance Act, 1920,
 - as amended by any subsequent enactment.

 "Advisory Committee" means an advisory committee appointed under subsection (5) of Section 2 of the Labour Exchanges Act, 1909.
 - Court" means a Court of Referees for the purposes of the Act.
 - "Employers' Panel" and "Insured Contributors' Panel" mean the panels of persons chosen to represent employers and insured contributors respectively required to be constituted under subsection (3) of Section 13 of the Act.

 "The Minister" means the Minister of Labour.
- 6. The Unemployment Insurance (Courts of Referees) Regulations, 1920, the Unemployment Insurance (Courts of Referees)

- (Amending) Regulations, 1921, and the Unemployment Insurance (Courts of Referees) (Amending) (No. 2) Regulations, 1921, are hereby revoked, but such revocation shall not affect any right, privilege, obligation or liability acquired, accrued or incurred under any of those Regulations.
- 7.—(1) These Regulations may be cited as the Unemployment Insurance (Courts of Referees) Regulations, 1928, and shall come into force on the 19th day of April, 1928.
- (2) The Interpretation Act applies to the interpretation of these Regulations as it applies to the interpretation of an Act of Parliament. Signed by order of the Minister of Labour this 3rd day of April,

H. J. Wilson, Secretary of the Ministry of Labour.

EXEMPT PERSONS REGULATIONS, 1928.

The Unemployment Insurance (Exempt Persons) Regulations, 1928,* dated 2nd April, 1928, made by the Minister of Labour under the Unemployment Insurance Act, 1920 (10 & 11 Geo. 5,

The Minister of Labour, by virtue of the powers conferred on him by the Unemployment Insurance Act, 1920, hereby makes the following Regulations:—

1.—(1) In these Regulations, unless the context otherwise

"The Acts" means the Unemployment Insurance Acts, 1920 Employed Person" shall have the same meaning as in the

Acts.

"The Minister" means the Minister of Labour.

"A person over 65" shall have the same meaning as in the Unemployment Insurance (Collection of Contributions for Persons over 65) Regulations, 1928.†

"Unemployment Book" shall have the same meaning as in the Unemployment Insurance (Collection of Contributions)

the Unemployment Insurance (Collection of Contributions) Regulations, 1920.1

- (2) The Interpretation Act, 1889, shall apply to the interpretation of these Regulations as it applies to the interpretation of an Act of
- 2.—(1) Any employed person, not being a person over 65, who can
- (a) in receipt of any pension or income of the annual value of twenty-six pounds or upwards, which does not depend on his personal exertions; or

(b) ordinarily and mainly dependent for his livelihood upon

(c) ordinarily and mainly dependent for his livelihood on the earnings derived by him from an occupation employment in which does not make him an employed person within the meaning of the Acts; or

(d) a person who is employed in an occupation which is of a seasonal nature and does not ordinarily extend over more than eighteen weeks in any year, and who is not ordinarily employed in any other accuration employment in which would make him

in any other occupation employment in which would make him an employed person within the meaning of the Acts, nay apply to the Minister for an Unemployment Insurance Exemp tion Certificate exempting him from liability to be insured under the Acts, and every application for such a certificate shall be made on the appropriate form prescribed in the first schedule hereto, or in such other form as the Minister may deem expedient, and shall be forwarded to the Minister in such manner as he may from time to time

(2) Every person making application for an Unemployment Insurance Exemption Certificate, or for the renewal of such a certificate,

(a) state fully and correctly all particulars required to be given in the form of application; and
(b) make a full disclosure of all facts on which he relies to show that he is entitled to exemption; and
(c) furnish such further evidence in relation to his application as the Minister may in any particular case require.

- 3.—(1) An Unemployment Insurance Exemption Certificate shall be in the form prescribed in the Second Schedule hereto, or in such other form as the Minister may deem expedient, and any employed person who shows that he is the holder of an Unemployment Insurance. person who shows that he is the holder of an Unemployment Insurance Exemption Certificate, or of a certificate of exemption granted under the provisions of Section 2 of the National Health Insurance Act, 1924, shall be entitled to an Unemployment (Exempt Persons) Book in place of an Unemployment Book, and so long only as the holder of a certificate of exemption granted under the National Health Insurance Act, 1924, is the rightful holder of an Unemployment (Exempt Persons) Book that certificate shall have effect as an Unemployment Insurance Exemption Certificate. Unemployment Insurance Exemption Certificate.
- (2) An Unemployment (Exempt Persons) Book shall be in such form as the Minister may from time to time direct, and any Regulations for the time being in force with regard to the issue, custody and stamping of Unemployment Books shall, so far as they are not inconsistent, apply to the issue, custody, and stamping of Unemployment (Exempt Persons) Books.
 - * Statutory Rules and Orders, 1928, No. 307. † Statutory Rules and Orders, 1928, No. 14. † Statutory Rules and Orders, 1920, No. 2014,

4.—(1) An Unemployment Insurance Exemption Certificate shall remain in force for such period, not exceeding five years, from the date of its being granted or renewed, as may be specified in the certificate.

Provided that-

May, 1928.

(a) if while the certificate is in force the circumstances of the exempt person alter in such a way as to disentitle him to exemption, or if he attain the age of 65, the certificate shall

thereupon become void; and
(b) if at any time the exempt person gives notice to the
Minister that he desires that the certificate of exemption granted
to him shall be cancelled, the certificate shall be cancelled accordingly, and shall thereupon become void as from such date as the Minister may determine.

(2) An Unemployment Insurance Exemption Certificate which has expired or become void shall be surrendered forthwith by the holder thereof to the Minister, or otherwise as the Minister may direct, together with a statement in such form as the Minister may direct of the circumstances in which the certificate is surrendered, and any employed person surrendering an expired or void Unemploymen Insurance Exemption Certificate or Certificate of Exemption granted under the provisions of the National Health Insurance Act, 1924, shall at the same time surrender to an Employment Exchange, Branch Employment Office, or Juvenile Employment Bureau, or otherwise as the Minister may direct, the Unemployment (Exempt Persons) Book held by him.

Provided that for the purposes of this provision paragraph (ii) of Regulation 2 of the Unemployment Insurance (Collection of Contributions for Persons over 65) Regulations, 1928,* shall not

(3) Where an exempt person desires to obtain a renewal of his Unemployment Insurance Exemption Certificate, he may, if he can prove that he will after the expiration of that certificate continue to be qualified under the first paragraph of Regulation 2 of these Regulations, make application to the Minister before the expiration of his certificate for the renewal thereof in such a manner as the Minister may direct.

5. The Unemployment Insurance (Exempt Persons) Regulations, 1920,† are hereby revoked, but such revocation shall not affect any right, privilege, obligation or liability acquired, accrued or incurred under those Regulations.

6. These Regulations may be cited as the Unemployment Insurance (Exempt Persons) Regulations, 1928, and shall come into operation on the 19th day of April, 1928.

Signed by Order of the Minister of Labour this 2nd day of April,

H. J. WILSON, Secretary of the Ministry of Labour.

PAYMENT OF TRAVELLING EXPENSES REGULATIONS, 1928.

The Unemployment Insurance (Payment of Travelling Expenses)
Regulations, 1928,‡ dated 16th April, 1928, made by the
Minister of Labour under the Unemployment Insurance Act,
1920 (10 & 11 Geo. 5, c. 30).

The Minister of Labour, by virtue of the powers conferred on him by the Unemployment Insurance Act, 1920, and with the consent of the Treasury, hereby makes the following Regulations:—

1. Where an advance under subsection (1) of Section 2 of the Labour Exchanges Act, 1909, and the Regulations made thereunder has been made on or after the date upon which these Regulations come into force to an insured contributor on account of the expenses of travelling to a place where employment has been found for him of travelling to a place where employment has been found for him and the insured contributor at the time the advance is made is a person in whose case the first statutory condition is fulfilled, the amount which the Minister may repay under Section 30 of the Act out of the Unemployment Fund to the Fund out of which the advance was made shall be one-half of the amount (if any) by which the sum

* Statutory Rules and Orders, 1928, No. 14. † Statutory Rules and Orders, 1920, No. 1959. ‡ Statutory Rules and Orders, 1928, No. 325.

2. The Unemployment Insurance (Payment of Travelling Expenses) Regulations, 1921, are hereby revoked, but such revocation shall not affect any right, privilege, obligation or liability acquired, accrued or incurred under any of those Regulations.

3. In these Regulations the expression "the Act" means the Unemployment Insurance Act, 1920, and the expressions "the Minister," "insured contributor," "Unemployment Benefit" and "Unemployment Fund" have the same meanings as in the Act.

4. These Regulations may be cited as the Unemployment Insurance (Payment of Travelling Expenses) Regulations, 1928, and shall come into force on the 19th day of April, 1928.

Signed, by order of the Minister of Labour, this 16th day of April, 1928.

H. J. Wilson.

H. J. WILSON, Secretary of the Ministry of Labour.

REVIEW OF CLAIMS REGULATIONS, 1928.

- The Unemployment Insurance (Review of Claims) Regulations, 1928,* dated April 18, 1928, made by the Minister of Labour under the Unemployment Insurance Act, 1920 (10 & 11 Geo. 5,
- The Minister of Labour, by virtue of the powers conferred on him by Section 35 of the Unemployment Insurance Act, 1920, and of all other powers enabling him in that behalf, hereby makes the following
- 1. For the purposes of subsection (2A) of Section 11 of the Unemployment Insurance Act, 1920:—
 - (a) The period therein specified shall, in relation to any insured contributor, be reckoned as beginning either on the date of the beginning of the preceding benefit quarter, or the date next following that on which the claim of that insured contributor was last reviewed by the Court of Referees, or a date three months prior to that on which the benefit year began, whichever of such dates is the latest:

- ever of such dates is the latest:

 Provided that where any benefit quarter begins on or after the 19th April, 1928, but before 19th July, 1928, the said period shall not be reckoned as beginning on a date earlier than the date of the beginning of that benefit quarter; and

 (b) The said period shall, in relation to any insured contributor, be reckoned as ending on the date on which that insured contributor shall have received benefit for periods amounting in the aggregate to thirteen weeks since the beginning of the said period.
- 2. These Regulations may be cited as the Unemployment Insurance (Review of Claims) Regulations, 1928, and shall come into operation on the nineteenth day of July, 1928.

 Signed by Order of the Minister of Labour this 18th day of April, 1928.

H. J. Wilson, Secretary of the Ministry of Labour.

BENEFIT AMENDMENT REGULATIONS, 1928.

The Unemployment Insurance (Benefit) (Amendment) Regulations 1928,† dated April 18th, 1928, made by the Minister of Labour under the Unemployment Insurance Act, 1920 (10 & 11 Geo. 5,

Whereas the Minister of Labour (hereinafter referred to as "the Winister ") has made the Unemployment Insurance (Benefit) Regulations, 1920 (hereinafter referred to as "the principal Regulations"), and those Regulations have been subsequently

And whereas it is expedient further to amend the principal

Regulations:
Now therefore the Minister, by virtue of the powers conferred on him by Section 35 of the Unemployment Insurance Act, 1920, and of all other powers enabling him in that behalf, hereby makes the following Regulations:—

1. The following paragraph shall be substituted for paragraph (1) of Regulation 3 of the principal Regulations:—

"3.—(1) Where an insured contributor desires to obtain unemployment benefit or to obtain any payment in respect of un-employment from an association of employed persons with which an arrangement has been made under Section 17 of the Act, he shall

(a) make an application or give notice, as the case requires, to the Minister in such manner as the Minister may direct or may for good cause accept as sufficient in any special case; and
(b) lodge his unemployment book at a local office; and
(c) furnish such evidence as the Minister may require that

he is not in receipt of sickness or disablement benefit or disablement allowance under the National Health Insurance Act, 1924;

(d) furnish such evidence as the Minister may require that he is not in receipt of an old age pension under the Old Age Pensions Acts, 1908 to 1919, or under those Acts as extended

by Section 1 of the Blind Persons Act, 1920; and
(e) if required so to do, furnish a certificate of his birth or such other evidence as the Minister may direct or may for good

cause accept as sufficient in any particular case; and

(f) furnish such other evidence as to the fulfilment of the
conditions and the absence of disqualifications for receiving or
continuing to receive unemployment benefits or other payments
as the Minister may require, and shall for that purpose attend
at such offices or places as the Minister may require.

* Statutory Rules and Orders, 1928, No. 323. + Statutory Rules and Orders, 1928, No. 322.

Provided that where in any special case the Minister is satisfied that the insured contributor is unable or has omitted for good cause to produce his unemployment book the Minister may, if he thinks fit, dispense with the lodging of the book under this Regulation.

Provided also that for the purpose of this Regulation neither an arrears book nor an emergency book shall be deemed to be an unemployment book."

2. The proviso to Regulation 6 and Regulation 8 of and the First and Second Schedules to the principal Regulations shall cease to have effect.

3. These Regulations may be cited as the Unemployment Insurance (Benefit) (Amendment) Regulations, 1928, and shall come into force on the 19th day of April, 1928.

Signed by Order of the Minister of Labour this 18th day of April,

H. J. WILSON, Secretary of the Ministry of Labour.

PERIODS OF INCAPACITY REGULATIONS, 1928.

The Unemployment Insurance (Periods of Incapacity) Regulations, 1928,* dated 19th April, 1928, made by the Minister of Labour under the Unemployment Insurance Act, 1920 (10 & 11 Geo. 5,

The Minister of Labour (hereinafter referred to as "the Minister"), by virtue of the powers conferred on him by Section 35 of the Unemployment Insurance Act, 1920, and of all other powers enabling him in that behalf, hereby makes the following Regulations:—

1. An insured contributor who desires to prove for the purposes of subsection (4) of Section 5 of the Unemployment Insurance Act, 1927, that he was during any periods falling within the period of two years mentioned in the first statutory condition, incapacited for work by reason of some specific disease or by bodily or mental disablement, shall furnish particulars of such incapacity for work in the following manner: in the following manner:

(a) If he is insured under the National Health Insurance Act, (a) If he is insured under the National Health Insurance Act, 1924, he shall, unless he satisfies the Minister that he is unable to do so, obtain and forward a certificate in the form set forth in the Schedule to these Regulations, signed, in the case of a member of an Approved Society, by the Secretary or other responsible official of the Society or the Secretary of a branch of the Society of the Secretary of the specific property of the Secretary of the Secre the Society, of which he is a member, and, in the case of a person who is not a member of an Approved Society, by an officer of the Ministry of Health or the Scottish Board of Health.

(b) If he is not insured under the National Health Insurance

Act, 1924, or if, being so insured, he satisfies the Minister that he is unable to obtain such a certificate as aforesaid, he shall furnish particulars in such manner as the Minister may direct or may for good cause accept as sufficient in any special case.

2. These Regulations may be cited as the Unemployment Insurance (Periods of Incapacity) Regulations, 1928, and shall come into operation on the nineteenth day of April, 1928.

Signed by Order of the Minister of Labour this 19th day of April,

H. J. WILSON, Secretary of the Ministry of Labour.

LOCAL EDUCATION AUTHORITIES, CHOICE OF EMPLOYMENT GRANT REGULATIONS, 1928.

The Local Education Authorities (Choice of Employment Grant)
Regulations, 1928,† dated April 16, 1928, made by the Minister
of Labour under Section 118 of the Education Act, 1921,
(11 & 12 Geo. 5, c.51), with regard to grants to Local Education
Authorities in aid of their expenditure under Section 107 of the

Whereas by the New Ministries and Secretaries Act, 1916, provision is made amongst other things for the transfer to the Minister of

* Statutory Rules and Orders, 1928, No. 324. † Statutory Rules and Orders, 1928, No. 327.

Labour (hereinafter called "the Minister") of all such powers and duties of any Government Department relating to labour or industry whether conferred by statute or otherwise as His Majesty may by Order in Council transfer to him.

And whereas it is further provided by the said Act that where any powers and duties are transferred by virtue of the said Act the transfer would take effect as from a date to be fixed by Order of His Majesty in Council and that different dates may be fixed for different powers

And whereas it is provided by the Ministry of Labour (Transfer of Powers) Order, 1927, that:—

(1) From and after the 18th day of September, 1927, there be transferred to the Minister the powers and duties of the Board of Education hereinafter specified, that is to say:—

(a) the power of approving arrangements made under Section 107 of the Education Act, 1921, by local education authorities for giving to boys and girls under the age of 18 years assistance with respect to the choice of suitable employment; and

(b) the power of approving schemes made by local education authorities under Section 6 of the Unemployment Insurance Act, 1923, regulating the exercise of their powers and duties under the said Section 107 of the Education Act, 1921, as extended by the said Section 6 of the first mentioned Act.

(2) From and after the 31st day of March, 1928, there shall be transferred to the Minister the powers and duties of the Board of Education under Section 118 of the Education Act, 1921, so far as they relate to grants to local education authorities in respec the exercise of their powers and duties under the said Section 107 of that Act as extended as aforesaid.

Now, therefore, the Minister, by virtue of the powers transferred to him as aforesaid, and of all other powers enabling him in that behalf, makes the following regulations:—

1. A substantive grant will be payable by the Minister, subject to the conditions of these regulations, for each year beginning on the 1st April to local education authorities in respect of their expenditure in that year under Section 107 of the Education Act, 1921, in the exercise of their power of giving assistance with respect to the choice

2. The grant payable for a year to a local education authority (hereinafter called "the authority") will be equal to one-half of the net expenditure of that year of the authority under the said section recognised by the Minister as expenditure in aid of which Parliamentary grants should be made to the authority.

3.—(1) The amount of grant estimated to be payable for the year will, subject to the provision by Parliament of the necessary moneys, be payable by one or more instalments on account during the

(2) The inclusion by the Minister of expenditure for the purpose of calculating the instalments of grant payable on account is not to be regarded as committing the Minister to the recognition of such expenditure for the purpose of these Regulations.

(3) The authority shall make a claim to the grant in such form as the Minister may direct and shall furnish such other returns in connection therewith as the Minister may require, and the balance of the grant will be paid after the claim has been duly certified by the district auditor of the Ministry of Health.

(4) The grant will be calculated to the nearest pound, a fraction of a pound in the final result being ignored or reckoned as a pound according as it is or is not less than ten shillings.

4. The grant is conditional upon the Minister being satisfied:-

(1) that the provisions of Section 107 of the Education Act, 1921,

(2) that the arrangements made by the authority have been efficiently carried out;

(3) that the authority have supplied punctually such information and returns as the Minister may require.

If the Minister is not satisfied on any of these matters he may withhold or make a deduction from grant.

5. For the purpose of these regulations net expenditure shall be ascertained by deducting from the recognised expenditure incurred under Section 107 of the Education Act, 1921, and the administrative under Section 107 of the Education Act, 1921, and the administrative expenses incurred under Section 6 of the Unemployment Insurance Act, 1923, all receipts relating to the services of choice of employment and unemployment insurance administration, except receipts from rates raised by the authority, or grants paid by the Minister under these regulations, or payments made by a county council by virtue of their powers under subsection (2) of Section 107 of the Education Act, 1921.

6. If any question arises as to the interpretation of these Regulations, or as to the inclusion or exclusion of any items of receipt or expenditure for the purpose of calculating the grant, the decision of the Minister shall be final.

7. These regulations may be cited as the Local Education Authorities (Choice of Employment Grant) Regulations, 1928.

Signed by Order of the Minister of Labour this 16th day of April, 1928.

H. J. WILSON, Secretary to the Ministry of Labour.

May, 1928.

Recent Proceedings.

INDUSTRIAL COURT DECISIONS.

SENIOR GRADES, MERCANTILE MARINE OFFICES, BOARD OF TRADE, —Association of Executive Officers and other Civil Servants v. Board of Trade. Difference.—Salary scales—Claim for increase. Decision.—No alteration in the scales of pay. Award issued 2nd April, 1928.

PLASTERERS, SCOTLAND.—Scottish Master Plasterers' Association v. Scottish National Operative Plasterers' Federal Union. Difference.—Rates of wages. Decision.—Present rates of wages to be reduced by ½d. per hour, operative as from 1st May, 1928. Award issued 10th April, 1928. (1365.)

Engineers, Wilson & Longbottom, Ltd., Barnsley.—Amalgamated Engineering Union v. Messrs. Wilson & Longbottom, Ltd. Difference.—Claim for increase of 2s. a week to plain time workers. Decision.—Rates to be advanced by 2s. a week operative from beginning of pay-week following 19th March, 1928. Award issued 10th April, 1928. (1366.)

BAKERS, L.C.C. MENTAL HOSPITALS.—Amalgamated Union of Operative Bakers, Confectioners and Allied Workers v. The London County Council. Difference.—Grading of certain Mental Hospitals under Award No. 368 for purpose of calculating wages. Decision.—Grade (c) rates awarded tor bakers employed at the Mental Hospitals at Bexley, Horton, Long Grove and West Park and at The Manor certified institution. Operative from beginning of the first pay period following date of award. Award issued 18th April, 1928.

RIVETERS, CAULKERS & DRILLERS, H.M. DOCKYARDS .- Boilermakers' and Iron and Steel Shipbuilders' Society, and Shipconstructors' and Shipwrights' Association v. Admiralty. Difference.—Award No. 1219—Interpretation. In Award No. 1219 the Court laid down that where notice of discharge had not been given, the question whether a case was one of "redundancy" or "temporary transfer" would have to be considered. Decision.—The Court ruled that for this purpose "redundancy" means that the service of a man in his titular grade is no longer required by the Admiralty. "Temporary transfer" means that a man is transferred from the work of his titular grade for employment on other work to meet requirements of the Service, and implies that at the time when the man is so transferred his service in his titular grade is merely suspended. With regard to the two specific cases that were brought before the Court the evidence was not sufficient for the Court to give a decision as to the category within which the cases fall. Award issued 18th April. 1928. (1368.)

RAILWAYS ACT, 1921. NATIONAL WAGES BOARD.

FINDINGS have recently been issued by the National Wages Board on the following cases referred to them by the National Union of Railwaymen :--

Hybrid Grades of Porter-Guard and Porter-Signalman—Claim for abolition.—Prior to the National Agreement of 1919 there were a number of hybrid grades on the various railways, but it was then agreed to abolish all such grades except those of porter-guard and porter-signalman. The Board stated in their finding that the evidence submitted did not indicate that the railway companies had adopted, or were contemplating the adoption, of any general policy of substituting porter-guards for guards or porter-signalmen for signalmen; and that in their opinion a case had not been established for terminating the agreed settlement providing for the hybrid grades of porter-

Passenger Guard's post, Tweedmouth, London and North Eastern Railway—Regrading as that of Porter-Guard.—On 30th October, 1926, the London and North Eastern Railway regraded a position at Tweedmouth, formerly that of passenger guard, as a porter-guard's post, on the ground that, in consequence of the reduction in the amount of guard's work attaching to the turn of duty, the post did not justify the employment of a passenger guard. Parties were not in agreement as to the amount of time in the rostered workings properly to be allocated to guard's duties, but under either computaproperly to be allocated to guard's duties, but under either computa-tion the man is working more than 50 per cent. of his time as a guard, and is accordingly paid the minimum rate for guards. The Board agreed that a further elucidation of the facts would be advisable, and that the parties should meet and discuss the matter further.

Signalman—Claim to be paid rate applicable to Relief Signalman in respect of certain work.—Signalman H. J. Scott is employed normally at Hare Park Signal Box, London and North Eastern Railway—a Class 4 box for which the rate is 55s. a week. On 3rd April, 1926, the signalman employed at Sharlston West Box—a Class 5 Box, rated at 53s. per week—was granted a day's special leave of absence. Owing to sickness, a relief signalman was not available, and signalman Scott was sent to perform the work at Sharlston West Box. He claimed payment at the Class II relief signalman's rate of 60s. per week for the turn of duty performed. The opinion of the Board was that, having regard to the special circumstances of this particular case, the relief signalman's rate should not be paid.

Porters, Mill Hill Station, London, Midland and Scottish Railway—Payment for Sunday Duty.—The Union and the Company, while in

agreement as to the actual time on duty of the men concerned, disagreed as to the division of this time in turns of duty. The Union claimed that the time is divided into three turns, but the Company claimed that the time is divided into two turns. The difference was in the treatment of certain intervals which the Company contended were meal intervals; the Union were opposed to this contention. The Board's finding was that there appear to be no definite provisions either by agreement or decision of the National Wages Board governing meal times on Syndows for excelling meals that the training meals the state of ing meal times on Sundays for conciliation grades other than trainmen, and the Board recommended that the parties should confer again on the merits of the case at Mill Hill.

Checker W. Shipton, Shoreditch Goods Depot, London, Midland and Scottish Railway—Claim for Higher Grade Duty Pay.—The claim was in respect of three hours during which the Supervising Officer is not on duty. The finding of the Board was that the claim for higher pay had not been established.

Sheeters, Brentford Docks, Great Western Railway—Claim to be brought under Railway-owned Docks' Agreement.—Goods arriving at Brentford Docks by lighter are unloaded and placed in the warehouse or in railway trucks for despatch to their destinations. The duties of the men concerned consist of sheeting wagons after they have been loaded. An agreement was made on 4th August, 1920, between the Companies and the National Union of Railwaymen, prescribing rates of wages and conditions of service for men of various grades employed of wages and conditions of service for men of various grades employed at the railway-owned docks. Attached to this agreement was a schedule setting out the different places and grades covered by the agreement. The men concerned in this claim are not included in the schedule, and are paid under the terms of the settlements for conciliation grades. The finding of the Board was that the claim had not been established; the representatives of the National Union of Railwaymen did not concur in this finding.

Checkers, Newport Docks, Great Western Railway-Claim to be brought under Railway-owned Docks' Agreement.—The work performed by the checkers is in connection with the labelling of wagons. The bulk of the time is occupied in preparing the labels, the remainder being spent in putting the labels on the wagons. The agreement referred to in the preceding case is relevant to this one. The finding of the Board was that the claim had not been established.

Meal Time Allowance—Extra Gang, Leeds, London Midland and Scottish Railway.—The men concerned are attached to and work within the area of the Leeds permanent way district inspector. On certain days in November and December, 1926, they were called upon to work at Royston, which is within the area of the Normanton district inspector. They claimed that they were working away from their home station and were not undertaking their ordinary duties, which are those performed within their own district. In the opinion of the Board the men in the course of their ordinary duties are employed away from their home station, and are therefore, not are employed away from their home station, and are, therefore, not entitled to the 1s. per day allowance claimed. The representatives of the National Union of Railwaymen did not concur in the Board's
