PREFACE

THE AIM of this booklet is to provide an Index of the Headings under which different industries appear in the 1968 edition of the *Standard Industrial Classification*. For this purpose the names of industries have been re-arranged in alphabetical order. Alongside each is given the Minimum List Heading to which the industry is classified. The numbers of Minimum List Headings are those in the Standard Industrial Classification. Thus the entry 'Addressing machine manufacture..... 338' means that the industry 'Addressing machine manufacture' is classified in Minimum List Heading 338—Office machinery, while the entry 'Alkali manufacture..... 271/1' means that the industry 'Alkali manufacture' is classified in Minimum List Heading 271—General Chemicals, Sub-division 1—Inorganic chemicals.

The making-up of knitted clothes in knitting establishments is classified in Heading 447, but the making-up of clothes cut from purchased knitted fabric is classified with the making-up of other clothing in Heading 444, 445, or 449.
