161 Directory of Businesses: Coal and Petroleum Products; Chemicals and Allied Industries

The Government Statistical Service has for a considerable time been aware of the public demand for lists of businesses classified on a uniform basis by industrial activity. The Business Statistics Office maintains registers of businesses in the production sector for the purpose of conducting statistical inquiries, particularly censuses of production. Since much of the information contained on those registers has been collected in statutory inquiries carried out under the Statistics of Trade Act, 1947, particulars of individual businesses on these registers cannot generally be disclosed without contravening the provisions of the Act, unless written permission has been given. In the Census of Production for 1968 an attempt was made to overcome this problem and provide as comprehensive a list of businesses as possible for industries covered by the census (ie mining and quarrying, manufacturing, construction, gas, electricity and water) by seeking the agreement of respondents to the following proposal.

"There has been an increasing amount of market research by industry, carried out either directly or by employing specialist agencies, to facilitate forward planning of business activity. This work, however, is made difficult because there is no comprehensive list of businesses rigorously classified by industrial activity on a uniform basis which is available to the general public. The Board of Trade believe that industry as a whole would benefit from the publication of such a list. The Census of Production for 1968 presents an opportunity to go some way towards providing this information. It is proposed to prepare for each industry which is the subject of a census report, a list of larger contributors to the sales of the major products of the industry. There would be no disclosure of any details of the activities of the undertaking concerned. The lists would only include the name and address of the businesses covered by the return.

Your agreement to this proposal would be greatly welcomed. Before any information of this sort can be published, it is necessary for the Board of Trade to have your consent in writing. Would you therefore indicate in Section R whether or not you are willing to allow your firm's name to appear in the lists which the Board proposes to publish, by accepting or deleting paragraph R(ii)."

A large majority of businesses agreed to the proposal, and it is therefore possible to publish a Directory giving names and addresses and the industries to which they have been classified in the Census, of establishments which agreed to publication. The postal code of the establishment is also given in a limited number of instances. Full postal code information cannot be given since it was not in general use when the register was compiled. The Directory will go some way towards meeting the demand for lists of this kind and will also be of assistance in interpreting the results of the Census, although its usefulness is limited by the refusal of some respondents to the Census to agree to their inclusion in the Directory.

The Directory covers all the industries identified in the Census of Production for 1968 and relates to the whole of the United Kingdom. It is divided into thirteen volumes, as listed in the Appendix, each volume covering one or more Orders of the Standard Industrial Classification, 1968. Within each volume information is given on an industry basis. Changes to names and addresses which have occurred subsequent to census returns being made are not reflected in the Directory.

For each industry the list is divided into two parts. The first part (Part A) relates to establishments classified to the particular industry; the name and address of each establishment is given as well as a list of other industries whose principal products also featured among its sales. The second part (Part B) relates to establishments which, although classified to another industry, sell the products of the industry in question. The name and address of each such establishment is given, together with the industry to which it is classified. (The statistics of sales are to be found in Table 5 - "Sales of principal products of the industry by larger establishments, including sales by establishments classified to other industries, 1963 and 1968", and in Table 6 - "Sales of principal products of the industry by larger establishments classified to other industries, 1963 and 1968", of each industry report.)

Generally the information given relates only to establishments employing 25 or more persons, except where details of small establishments (ie establishments employing fewer than 25 persons) have been included in returns for larger establishments. In certain industries (listed in the Appendix), small establishments were known to contribute significantly to the output of the industry, and were asked to complete a modified version of the census questionnaire which included the section relating to the

Directory of Businesses. In these industries the lists contain all establishments which agreed to the publication of their names and addresses. Exceptionally small establishments are excluded from the list relating to the Construction Industry (see below).

In each industry, some businesses did not agree to publication and the usefulness of the lists is affected by this factor. Estimates are given of the percentage of the industry's total employment and sales of principal products accounted for by the establishments included in the lists.

For most industries the extent to which this percentage falls short of 100 reflects refusals to agree to publication, the number of larger establishments from which returns were not received, and the number of small establishments in the industry from which relevant information was not sought. In those industries in which information was sought from small establishments, omissions from the lists depend only upon the number of refusals and the number of establishments from which returns were not received. In the Construction Industry, only a randomly selected sample of firms employing fewer than 25 persons were asked to provide the relevant data and all small firms have therefore been omitted.

A detailed description of the coverage of the census and the methods used in conducting it and processing the returns received is contained in Part 1 - Description of the Census - of the Report on the Census of Production for 1968. It also contains an explanation of the terms used in the census.

## PART NO 24 COKE OVENS AND MANUFACTURED FUEL

This industry corresponds to minimum list heading 261 of the Standard Industrial Classification, Revised 1968.

1 In terms of employment, the establishments in Part A of the following list are estimated to account for 98 per cent. of the total employment of the industry, as given in Table 1 of the report on this industry.

2 In terms of the sales of principal products of the industry:

- a the establishments in Part A of the following list are estimated to account for 99 per cent. of the sales of principal products by larger establishments classified to this industry.
- b the establishments in Part B of the following list are estimated to account for 100 per cent. of the sales of principal products of this industry by larger establishments classified to other industries.
- c all the establishments in the following list are estimated to account for 99 per cent. of the total sales of principal products.

3 Details of the sales of principal products are given in Tables 5 and 6 of the report on this industry.
