### General footnotes

- (a) The enterprises included in this table consist of establishments under the same ownership or control within scope of the census of production and for the years shown are included in the enterprise employment size structure then existing.
- (b) Including estimates for small establishments that were not required to complete detailed returns, and for unsatisfactory returns. For 1970, particulars relating to unsatisfactory returns have been included in the appropriate size cells but for other years separate estimates have been shown.
- (c) References to Orders are those in the Standard Industrial Classification (Revised 1968).
- (d) For 1970, the establishment is defined as being the smallest economic unit for which a return could be made to the census and where a firm made a return covering two or more separate locations these were regarded as 'local units': in previous censuses they were counted as establishments.
- (e) Including persons engaged in merchanting or factoring and canteen workers (where particulars in respect of these activities could not be excluded from the returns) and working proprietors, but excluding outworkers.
- (f) Capital expenditure on new building work plus the net value of acquisitions less disposals of vehicles, and plant and machinery. From 1963 acquisitions less disposals of land and existing buildings is also included. Capital expenditure for establishments not yet in production is included for 1958 and 1970 but not for 1963 and 1968 except in the coal, gas and electricity industries.
- (g) Water companies are included in the public sector for all years but publicly-owned iron and steel companies are included in the private sector in 1958 and 1963 as are those privately owned and in subsequent years in the public sector.
- (h) For 1970, excluding undertakings classified to the construction industry which was not collected in the census for that year.
- (i) For 1970, particulars of enterprises classified to the mining and quarrying industries (other than coal mining) are included in the appropriate size cells.
- (j) Mining and quarrying (other than coal mining) and Construction. The figures for mining and quarrying relate only to Great Britain.
- (k) Including Central Government trading bodies, local authorities and public corporations. Water companies and boards are also included but for 1970 undertakings classified to the construction industry are excluded.
