General footnotes

(a) Details of classification and other changes affecting comparison between the years are given in Table 1.

(b) Including estimates for unsatisfactory returns and for small establishments that were not required to complete detailed returns. Unsatisfactory returns have been included in the lowest size range, except for 1970 when they were allocated according to their size structure.

(c) For some size ranges separate particulars cannot be shown and these have been included in the next lower size range available.

(d) As defined in the Standard Industrial Classification (Revised 1968.)

(e) For 1970, where net output figures are not shown in a particular size range they are included in the next higher one available.

(f) For the years 1958 to 1968 the figures given are grouped according to size of enterprise; for previous years they are grouped according to size of return. It is not thought, however, that there is any material difference. The construction industry was not included in the census for 1970.
