BANKING, FINANCE AND CREDIT

THE "MACMILLAN" REPORT

APPOINTEED in November, 1929, "to inquire into banking, finance and credit, paying regard to the factors both internal and international which govern their operation, and to make recommendations calculated to enable these agencies to promote the development of trade and commerce and the employment of labour" the Committee on Finance and Industry under the Chairmanship of Lord Macmillan issued its REPORT in August, 1931.

Shortly after the appearance of the Report the financial crisis directed special attention to its contents and revealed to many in conclusive fashion how fundamentally important to the efficient functioning of modern economic society were the subjects considered by the Committee.

Presenting as it does, a review of the varying factors in a complex economic system, the report will have an enduring value not only for students and specialists, to whom it will appeal as a compact and penetrating summary of the best modern thought in their field, but for non-specialist readers also by reason of the clarity and conciseness of its exposition. Sir Josiah Stamp, who himself gave evidence before the Committee, has said of the Report:—

" . . . To the patient ordinary reader there is more here of intelligible exposition than can be found anywhere else, and the Report is easily the best up-to-date text-book on the financial system. The description of the current working of the Bank of England and Joint Stock Banks, the Accepting Houses, and of the discount market is exceedingly well done and will form the basis of educational work for many years to come In the concluding section of the expository part, "The Influence of Monetary policy on the Price Level" the Report breaks ground which is quite new in banking literature."

The Committee took evidence from a large number of witnesses during the course of its work, among whom, in addition to representatives of the Bank of England, other joint stock banks, trade associations and similar bodies were Professor A. L. Bowley, Professor Henry Clay, Mr. R. G. Hawtrey, Sir Robert Kindersley, Sir Otto Niemeyer, Professor A. C. Pigou, Mr. D. H. Robertson and Sir Henry Strakosch. What they have said upon the problems discussed has now been printed in two large volumes. It will be evident that for students of economic subjects the Evidence will be no less indispensable than the Report itself.

REFERENCE BOOKS

IMPORTS AND EXPORTS

Import and Export List. This handbook contains the official classification of goods for the purpose of Customs returns, and it will therefore be invaluable to all traders and importers. It is published annually. A full index facilitates ready reference to the work.

The edition for use on and from 1st January 1935 may be obtained. Price 9d. net. Post free 11d.

Customs and Excise Tariff of the United Kingdom of Great Britain and Northern Ireland in operation on the 1st January, 1935. This volume consists of a statement, for the convenience of importers and others concerned, showing the duties and drawbacks and allowances of Customs and Excise in operation in the United Kingdom of Great Britain and Northern Ireland. Price 9d. net. Post free 1s. 1d.

OCCUPATIONS AND INDUSTRIES

Industry Tables. Census of England and Wales, 1931.

Statistics of Industry (as distinct from those of Occupations noticed below). The industrial classification differs essentially from the occupational in that the latter only takes account of the nature of the work performed while the former has regard only to the nature of the service or product.

Occupation Tables. Census of England and Wales, 1931.

This indispensable statistical analysis of the distribution of the population over a wide field of the national industrial life is now ready. For the first time statistics are given relating to persons out of work at the date of the Census.

Price 30s. Post free 30s. 9d.

THE UNITED KINGDOM IN FIGURES

The Statistical Abstract for the United Kingdom is published annually. The latest volume relates to each of the fifteen years 1913 and 1920 to 1933. This most compendious statistical year book includes statistics on Social, Civil and Industrial conditions, population, national finance, local finance, banking currency and wholesale prices, provident associations, agriculture and fisheries, mining, metals, etc.; trade and commerce, transport and communications. Price 6s. 6d. net. Post free 7s.

GUIDE TO CURRENT OFFICIAL STATISTICS

This Annual Guide provides a very necessary key to the storehouse of statistical information contained in the hundreds of surveys, periodicals, returns and reports on a wide range of subjects which are published each year by Government Departments. It gives not only a list of the titles and prices of official publications containing statistics but also an extensive alphabetical index showing the nature and scope of the information available on each subject.

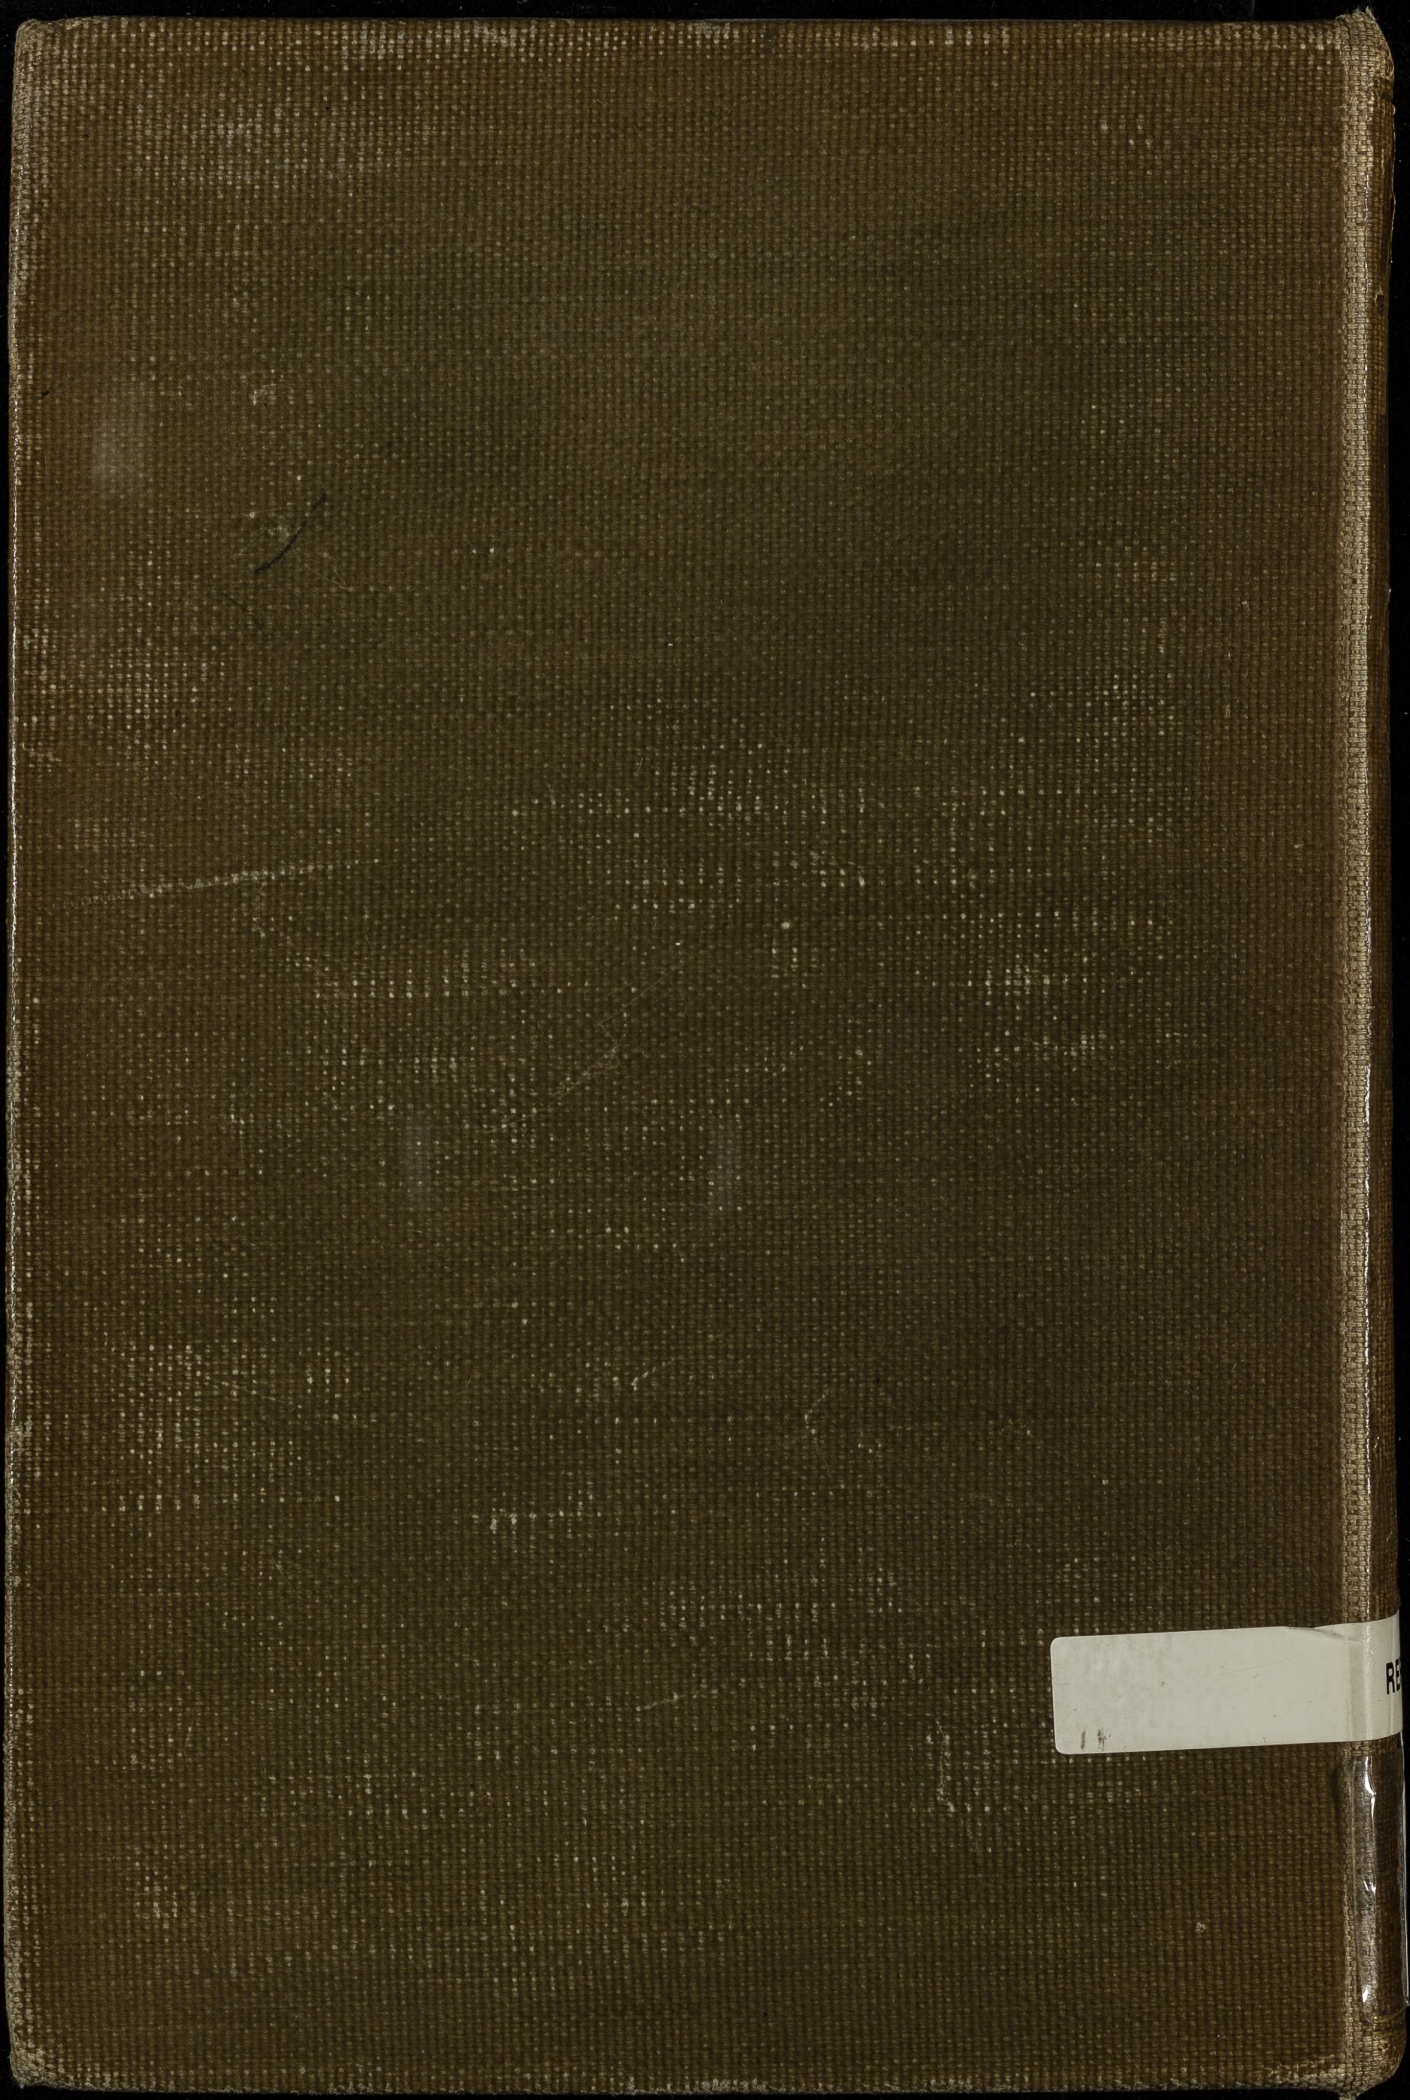

Volume for 1933 now on sale. Price 1s. net. Post free 1s. 5d.
