BRITAIN STRONGER  EUROPE

**It's vital we remain in Europe so we can
work closely with our neighbours to
tackle climate change and cut emissions:**

 **The EU is a champion of environmental protection** and the fight against climate change - and its laws help protect nature across Europe

 Being in the EU means **the UK benefits from environmental legislation and funding** - helping the fight against climate change and pollution, and also supporting vital scientific research

 620 Special Areas of Conservation in the UK are protected under **EU laws – helping to conserve 8,013,467 hectares of British nature.**
