## EXPLANATORY NOTES

1. Basis of enumeration

The population data in this report are shown on a *de facto* basis, that is, persons are shown according to the place where they were enumerated. The following exceptions, inclusions and exclusions should be noted:

- Persons enumerated on trains are shown according to their usual place of residence.
- Where possible, South African residents who were abroad on census day were enumerated at a later date and these persons are also shown according to their usual place of residence.
- Foreign visitors enumerated at the census are not included in this report. This explains the differences between the totals published in this report and those appearing in the report "Geographical Distribution of the Population" (Volume 1).
- Members of the diplomatic services of other countries were not enumerated.
- Foreign Bantu who were employed in South Africa on census day are included in the tables.

2. Race groups

This report is divided into four series of tables containing information on Whites, Coloureds, Asiatics and Bantu, respectively.

3. Presentation

In all tables magisterial districts are grouped according to the 51 economic regions with a sub-total for each region and a total for each province and South Africa. A map and guide showing the economic regions and constituent magisterial districts appear on pages xii and xiii.

4. Marital status

In the tables on marital status, "other" includes marital status "unspecified". "Married" includes persons living together in stable *de facto* unions.

In table D2 (Bantu) "married" also includes persons married by Bantu law or custom (lobola).

- The majority of magisterial districts are comprised of both urban and rural areas. However, there are 11 districts, namely Bellville, Cape, Simonstown, Wynberg, Durban, Benoni, Boksburg, Brakpan, Germiston, Johannesburg and Springs which are entirely urban and 9 districts, namely, Middelburg, Impendle, Mapumulo, Msinga, Ndwedwe, Mahlabatini, Nkondla, Ubombo and Sibasa which are entirely rural.

6. Districts omitted

In certain districts there were no members of the Asiatic race group present on the night of the census. In these cases the names of the districts have been omitted from the relevant tables.

- No separate tabulations have been made in respect of the 7 Asiatics enumerated in the Orange Free State. These Asiatics have been included in the figures for the South Africa totals.

8. Variations in data

In some cases there are differences between the figures for corresponding items in the relevant tables of the same report or of different reports. These variations are ascribable to the method adopted in machine processing the data. The differences are in most cases relatively insignificant and, therefore, unimportant. Furthermore, the total of the persons, tabulated according to the various characteristics in the tables, seldom agrees with the relevant population total. The difference between this total and the relevant population figure is indicated below the "Total" column by a plus (+) or minus (-) sign. This difference added to or subtracted from the total of persons tabulated, gives the "Population Total", which is shown at the foot of each table.

## VERDUIDELIKENDE OPMERKINGS

### 1. Basis van Opname

Die bevolkingsdata in hierdie verslag word op 'n de facto-basis getoon, dit wil sê, persone word getoon volgens die plek waar hulle opgeneem is. Daar moet op die volgende uitsonderings, insluitings en uitsluitings gelet word:

- (a) Persone wat op treine opgeneem is, word ooreenkomstig hulle gewone woonplek getoon.
- (b) Waar moontlik is Suid-Afrikaanse inwoners wat op die sensusdag in die buiteland was op 'n later datum opgeneem, en hierdie persone word ook ooreenkomstig hulle gewone woonplek getoon.
- (c) Vreemde besoekers opgeneem ten tye van die sensus word nie in hierdie verslag ingesluit nie. Dit verklaar die verskille tussen die totale wat in hierdie verslag gepubliseer word en dié wat in die verslag „Geografiese Indeling van die Bevolking” (Boekdeel 1) verskyn.
- (d) Lede van die diplomatieke dienste van ander lande is nie opgeneem nie.
- (e) Vreemde Bantoes wat op sensusdag in Suid-Afrika werksaam was, is in die tabelle ingesluit.

### 2. Rassegroepe

Hierdie verslag is in vier reekse tabelle ingedeel met inligting oor onderskeidelik Blankes, Kleurlinge, Asiate en Bantoes.

### 3. Presentasie:

In alle tabelle is die landdrosdistrikte gegroepeer volgens die 51 ekonomiese streke met 'n subtotaal vir elke streek en 'n totaal vir elke provinsie en vir Suid-Afrika. 'n Kaart en gids wat die ekonomiese streke en die landdrosdistrikte waaruit hulle saamgestel is, toon, verskyn op bladsye xii en xiii.

### 4. Huwelikstaat

In die tabelle oor huwelikstaat is die huwelikstaat „ongespesifiseer” by „ander” ingesluit. „Getroud” sluit persone in wat saamleef in stabiele de facto-verbintenisse.

In tabel D2 (Bantoe) sluit „getroud” ook persone in wat volgens Bantoereg of -gebruik (lobola) getroud is.

### 5.

Die meeste landdrosdistrikte bestaan uit beide stedelike en plattelandse gebiede. Daar is egter 11 distrikte, naamlik Bellville, Kaap, Simonstad, Wynberg (K), Durban, Benoni, Boksburg, Brakpan, Germiston, Johannesburg en Springs wat uitsluitlik stedelik is en 9 distrikte, naamlik Middeldrift, Impendle, Mapumulo, Msinga, Ndwedwe, Mahlabatini, Nkondla, Ubombo en Sibasa wat uitsluitlik plattelands is.

### 6. Distrikte weggelaat

In sommige distrikte was daar geen lede van die Asiaterassegroep op die sensusdag teenwoordig nie. In hierdie gevalle is die name van die distrikte uit die betrokke tabelle weggelaat.

### 7.

Geen afsonderlike tabellasies is gemaak ten opsigte van die 7 Asiate wat in die Oranje-Vrystaat opgeneem is nie. Hierdie Asiate is by die syfers vir die Suid-Afrika-totale ingesluit.

### 8. Afwykings in gegewens

In sommige gevalle bestaan daar verskille tussen die syfers van ooreenstemmende items in die betrokke tabelle van dieselfde verslag of van verskillende verslae. Hierdie verskille moet toegeskryf word aan die metode van masjinale verwerking van die gegewens. In die meeste gevalle is die verskille relatief klein en dus onbelangrik. Daarenbove stem die totale getal persone wat onder die

verskillende eienskappe in 'n tabel ingedeel is selde met die betrokke bevolkingstotaal ooreen. Die verskil tussen hierdie totaal en die betrokke bevolkingstotaal word onderaan die „Totaal”-kolom deur 'n plus (+) of minusteken (-) aangedui. Hierdie verskil, bygetel by of afgetrek van die totale getal getabelleerde persone, gee die „Bevolkingstotaal” wat onderaan elke tabel verskyn.
