**ARRANGEMENT OF CENSUS REPORTS,
1936.**

The tabulated results of the Census will be issued in twelve parts. Each part will be published from time to time not necessarily in numerical order as the information becomes available.

ISSUED TO DATE :—

- Vol. I.—Sex and geographical distribution of all races of the population (with maps and diagrams).
- II.—Ages of the European, Asiatic and Coloured population (with graphs of age and sex constitution).
- III.—Marital condition. European, Coloured and Asiatic population (with graphs).
- IV.—Languages: Official and home languages spoken European, Coloured and Asiatic population (with maps and graphs).
- Supplementary to Volume IX (ages and marital condition —Natives).

TO BE ISSUED :—

- Vol. V.—Birthplaces, Period of Residence and Nationality, European, Coloured and Asiatic population.
- VI.—Religions, European, Coloured and Asiatic population.
- VII.—Occupations and Industries, European, Coloured and Asiatic population.
- VIII.—Dwellings in Urban Areas.
- IX.—Natives (Bantu) and other non-European Races. Distribution, Ages, etc.
- X.—Unemployment. European, Coloured and Asiatic population.
- XI.—South African Life-Table No. 3.
- XII.—Final Report.

| | XII.—Eindverslag. |

11.5.1939

PREFACE.

The five tables in this report are being published in advance of Volume IX as it has been considered advisable to meet the demand for a statement of the ages of the Native population; such information has not been collected or published for 25 years.

The figures show the tabulated results of the replies to the question regarding age, and also of marital condition, at the Census taken on the 5th May, 1936.

The first three tables show the age unrelated to any characteristic of the population other than sex. The results of the Census of 1911 were not encouraging in regard to the statements of age of Natives, but it was felt that during the past twenty-five years some improvement in the knowledge of their ages should be evident, especially among the younger generation, owing to the advance in education, changes in economic conditions and facilities afforded the urban Native population for registering births. Unfortunately, the registration of births and deaths of Natives in rural areas is not yet compulsory.

Improvement upon the 1911 Census figures is evident, but the stated ages are still mostly approximations; it would appear, however, that the statements are probably within a few years on either side of the correct age.

The other two tables relate to Marital Condition. The question appeared on the Census form as under :—

MARRIAGE.

- | | |
|--|----------|
| If never married..... | write 1. |
| If married (including by Native custom)..... | write 2. |
| If widowed, but not remarried.. | write 3. |
| If divorced, but not remarried.. | write 4. |

The tables call for little comment but it is well to stress the point that the figures represent conditions as existing at the date of the Census.

A. W. CARRUTHERS,
Director of Census and Statistics.

November, 1938.

iii

INLEIDING.

Die vyf tabelle in hierdie verslag word voor Deel XI gepubliseer aangesien dit raadsaam geag is om aan die eis vir 'n verklaring van die leeftye van die naturellebevolking te voldeon; sodanige informasie is nie vir 25 jaar ingesamel of gepubliseer nie.

Die syfers toon die getabellieerde resultate van die antwoorde op die vraag ten opsigte van leeftyd, en ook van huwelikstaat, by die Sensus op 5 Mei 1936 opgeneem.

Die eerste drie tabelle toon die leeftyd afgesien van enige onderskeidende kenmerk van die bevolking behalwe geslag. Die resultate van die Sensus van 1911 was nie bemoedigend ten opsigte van die verklarings aangaande die leeftye van naturelle nie, dog dit is vermoed dat gedurende die laaste vyf-en-twintig jaar daarveral onder die jonger geslag, 'n verbetering in die kennis omtrent hulle leeftye te bespeur sou wees, as gevolg van die vooruitgang van onderwys, verandering in ekonomiese toestande, en geleenthede aan die stedelike naturellebevolking verskaf om geboortes te regstreer. Ongelukkig is die registrasie van geboortes en sterfgevalle onder naturelle in plattelandse gebiede nog nie verpligtend nie.

Daar is 'n verbetering in vergelyking met die Sensusyfers van 1911 te bespeur, dog die leeftye wat opgegee word, is nog hoofsaaklik benaderings; dit blyk egter dat die opgawes waarskynlik binne 'n paar jaar bo of onder die juiste leeftyd is.

Die ander twee tabelle het betrekking op Huwelikstaat. Die vraag het op die Sensusform as volg voorgekom :—

HUWELIK.

- | | |
|--|-----------|
| Indien nooit getroud nie..... | vul in 1. |
| Indien getroud..... | vul in 2. |
| Indien in wedustaat en nie weer getroud nie..... | vul in 2. |
| Indien geskei en nie weer getroud nie..... | vul in 3. |
| | vul in 4. |

Die tabelle vereis min kommentaar, dog dit is goed om nadruk te lê op die feit dat die syfers die toestande tydens die datum van die Sensus voorstel.

A. W. CARRUTHERS,
Direkteur van Sensus en Statistiek.

November 1938.

REPORT

ON THE

SIXTH CENSUS OF THE POPULATION OF THE UNION OF SOUTH AFRICA, 5th MAY, 1936.

AGE AND MARITAL CONDITION OF THE BANTU POPULATION.

1. General.—As there appears to be a demand for the information appearing in this publication, it has been deemed advisable to publish it in advance of volume IX of the Census Report in which it will later appear.

Particulars of the ages of Natives have not been collected since the Census of 1911 when the tabulation was performed by the hand method in quinquennial groups. The introduction of electrical sorting and counting machines has made it possible to tabulate particulars in single years of age, and the graphs appearing in this publication illustrate the accuracy, or inaccuracy, of the statements of age recorded on the Census forms.

At the Census of 1921, the enquiry regarding ages of Natives was limited to four groups: Infancy (under 1 year), Childhood (1 to 14 years), Maturity (15 to 50 years), and old age (over 50 years). Comparisons of the numbers or proportions at any particular quinquennial age-group can, therefore, only be made between the Censuses of 1911 and 1936.

The following table shows the change in the proportions of males and females per 1,000 persons in quinquennial age-groups between the years 1911 and 1936.

PROPORTIONATE DISTRIBUTION OF THE NATIVE POPULATION IN QUINQUENNIAL AGE GROUPS—CENSUSES 1911 AND 1936.

Age Group.	Males.		Females.		Persons.	
	1911.	1936.	1911.	1936.	1911.	1936.
0—4	72·6	69·0	78·1	75·4	150·7	144·4
5—9	66·6	69·6	65·8	69·2	132·4	138·8
10—14	64·5	63·8	59·5	58·4	124·0	122·2
15—19	51·9	52·0	51·8	48·5	103·7	100·5
20—24	48·0	40·9	43·9	43·1	91·9	84·0
25—29	42·1	44·2	39·3	38·5	87·4	82·7
30—34	39·5	35·8	38·7	36·0	77·2	71·8
35—39	29·1	33·1	26·7	25·7	56·3	61·8
40—44	24·1	23·0	23·3	25·1	47·4	50·1
45—49	17·1	19·5	15·7	17·1	32·8	36·6
50—54	13·0	14·3	15·9	16·4	28·9	30·7
55—59	7·5	9·9	8·7	10·4	16·2	20·3
60—64	8·9	8·6	11·5	11·8	20·4	20·4
65—69	4·6	6·2	5·6	6·6	10·2	12·8
70—74	3·8	4·7	5·6	5·8	9·4	10·5
75—79	2·0	2·3	2·6	4·6	4·9	—
80—84	1·5	1·6	2·5	4·0	3·9	—
85—89	·4	·7	·7	·8	1·1	1·5
90+	·5	·7	·8	·9	1·3	1·6
Uns.	·1	·3	—	·2	·1	·5
TOTAL.....	503·3	502·2	496·7	497·8	1,000	1,000

The table also shews the change in the relative proportions of males and females. The ratio of males to females declined by 1·1 per 1,000 during the twenty-five years.

The table calls for little comment beyond reference to the unaccountable drop in proportions of males in 1936 at ages 20—24 years and 25—29 years, and a consequent small increase spread over the older age groups.

2. Accuracy of Statement of Age.—Table No. 1 shews the number of males and females at each year of age in each of the Provinces and in the Union. The table records the actual statement of age as given on the Census forms. Comparatively few forms are actually filled in by Natives themselves. In the residential quarters of Urban Areas the European householder or employer usually supplies the information after questioning his Native employees. In large Municipal locations educated Natives are largely employed as Enumerators or interpreters to ascertain the information. In large industrial concerns and in mines this information is probably obtained from the records appearing in the registers of employees. In the Native Reserves and in Rural Areas, the information is usually supplied by the kraal head on behalf of himself and family and relatives after questioning by the enumerator.

Where the age is unknown, an approximation is given by the Enumerator, or in the case of Urban Natives by the householder or employer. It is, therefore, obvious that the ages recorded are on the whole approximations and may err by a few years on one side or other of the true age. Hence, the concentrations on the multiples of 5 and 10 such as 15, 25, 35 years and 20, 30, 40 years and so on. There are lesser concentrations on ages ending with the digits 2 and 8, such as 22, 28, 32, 38, etc.; while ages ending with odd numbers such as 21, 29, 31, 39 and so on did not appear to find favour. These aspects of the age distribution are more obvious from the series of graphs in this publication than from the tables.

A remarkable feature of the age distribution is the enormous concentration on the age 30 years, both for males and females, and the deficiency at ages 29 and 31 years. The figures and proportions to the total at all ages were as under:—

	Age 29.	Age 30.	Age 31.
<i>Males :—</i>			
Number.....	41,205	115,377	22,840
Percentage of Male Population.....	1·24	3·48	6·69
<i>Females :—</i>			
Number.....	28,108	136,514	16,757
Percentage of Female Population.....	4·16	4·16	5·51

3. Ages of children.—As might be expected, the ages of children up to 10 years do not fluctuate from age to age so violently; but even so, it was anticipated that the age curve would be smoother than is actually the case. A division of the figures into children enumerated in Urban and Rural Areas, however, shews that the approximations are mostly in the rural areas, while the urban figures show an evenness from age to age producing a smooth curve. This fact is clearly shewn in graphs Nos. 2 and 3. Compulsory registration of Native births in urban areas, education, and detribalization of urban Natives are all factors in producing these results.

4. Median Age of the Native population.—The median age, that is the age above and below which there are equal numbers of persons living, is found to be approximately 19·5 years for both males and females. This age is slightly higher than for Coloured persons and Asiatics and considerably lower than for Europeans. The following statement shews the comparison :-

MEDIAN AGE—CENSUS, 1936.

Race.	Males.	Females.	Persons.
European.....	24·9	24·8	24·9
Native.....	19·5	19·5	19·5
Asiatic.....	18·7	15·2	17·0
Coloured.....	19·0	18·8	18·9

5. Grouping of Ages.—Although the statement of age in single years shows large concentrations on ages ending in certain digits, when the ages are grouped in quinquennial periods 0-4, 5-9, 10-14, and so on, the violent fluctuations largely disappear and the curve of age, although not ideal, gives a far better idea of

the age distribution. This has been illustrated by insets in the accompanying graphs. The curve for the ages of females is smoother than the curve for males, but the latter is affected by the large number of indentured Native males from Portuguese East Africa and the adjoining Protectorates employed in the labour centres: principally on the mines of the Witwatersrand.

Approximately 160,000 Native males from Basutoland, Swaziland, Portuguese East Africa, Bechuanaland Protectorate and Rhodesia were working in the Union at the date of the Census.

6. Uneven sex and age distribution.—The uneven age and sex distribution in various areas of the Union is the result of the special labour conditions of the country. The bulk of the unskilled labour for heavy industry is performed by the Native, and the supply of this labour is mainly drawn from the areas of the Union set aside for Native occupation. Domestic work is also largely performed by Native males in the urban centres, especially in Natal and Transvaal. The working age of these Natives ranges from about 15 years to 55 years. The following table has, therefore, been prepared to show the sex distribution in the twenty most important types of area of the Union.

It will be seen that the sexes in urban areas of the Cape and Orange Free State were evenly balanced relative to the sex ratio of the total Native population, but in Natal there were nearly twice as many males as there were females, and in the Transvaal the ratio was roughly 3 males to 2 females, giving a surplus of nearly 44,000 males. In the mine compounds and mine locations the males outnumbered the females by almost 350,000 and in industrial compounds there was an excess of almost 92,000 males. The reverse of the picture is seen in the Native areas—locations, tribal farms, mission reserves, Native-owned farms and Crown lands—where there was a surplus of about 460,000 Native women. To these areas can be added the other farming areas where a further surplus of 72,000 women was enumerated.

As mentioned above, the absentee males from the Native areas were chiefly within the reproductive age period of life.

7. Masculinity of the Native Population.—The masculinity, or ratio of males to females, is lower for Natives than for the other races of the population, notwithstanding the fact that the Census figures include about 160,000 Native males from outside the Union who were employed on mines and works in the principal industrial centres of the Union. Actually only 28,600 more males than females were enumerated, so that, taking Union Natives only, the females exceeded the males by about 130,000.

Unfortunately registration of births and deaths of Natives is compulsory only in urban areas, and consequently the vast majority of Native births and deaths are not registered. The natural increase, or excess of births over deaths therefore cannot be determined, and the Census figures are the only means of arriving at the increase in the Native population. It would appear, however, that the death rate is higher for males than females, partly as a result of the more dangerous occupations followed by males.

The Census results show that for all races of the population the masculinity is declining, and probably within a few decades the females will outnumber the males for several or perhaps all of the races.

The changes in masculinity since 1911 are shown below:-

NUMBER OF MALES TO EACH 100 FEMALES—UNION.

Census.	European.	Native.	Asiatic.	Coloured.	All Races.
1911.....	115·92	101·35	171·46	101·67	105·70
1921.....	106·05	102·89	142·31	101·81	104·29
1936.....	103·23	100·87	118·51	101·36	101·77

If the 160,000 Natives from outside the Union are excluded the masculinity for Natives is reduced to about 97.

8. Centenarians.—There were 647 Native males and 765 Native females who stated their age to be 100 years or over. Of these, 18 males and 14 females gave their ages as over 119 years.

One female at Aberdeen was stated to be 180 years old, another at Ubombo 133 years, and two, one at Potgietersrust, and the other at Kroonstad, as 130 years.

The highest age enumerated for Native Males was 127 years. This was the age stated for two Natives, one at Durban and the other at Kroonstad.

The table hereunder shews the distribution of Native centenarians by sex.

Here again the concentration on 100 is very marked, for, whereas there were 667 persons at 100 years, there were only 88 at 101 years, and 384 at 99 years.

by Natives under Christian rites. Before the *Native Administration Act* was passed, a customary union was not regarded as a legal marriage in most of the Provinces of the Union, except where Native Code Law was in force. Section 35 of the Act defines the union as "the association of a man and a woman in a conjugal relationship according to Native law and custom, where neither the man nor the woman is a party to a subsisting marriage".

In tabulating the statistics, therefore, the term "married" has been taken to include all forms of recognised legal unions and, of course, includes polygamous unions which are recognised by Native law and custom.

The following table is based upon the total population of each race, irrespective of age, and shows the relative proportions of the population in each degree of conjugal relationship. Only 3,641 Natives or .06 per cent. omitted to state their marital condition.

PROPORTIONS PER CENT. AT EACH DEGREE OF MARITAL CONDITION, UNION—CENSUS, 1936.

Race.	Never Married.	Married.	Widowed.	Divorced.
European	55.50	39.73	4.14	.54
Native	61.13	32.97	5.57	.27
Asiatic	59.75	35.78	3.95	.34
Coloured	65.27	30.19	4.12	.33

The following table shows the change in the numbers and proportions of the Natives for three successive Censuses. The proportions have not changed much over a period of a quarter of a century. The proportion of single persons decreased by 1.8 per cent. and the married and widowed each increased less than 1 per cent.; while the proportion of divorced persons rather more than doubled itself.

MARITAL CONDITION OF NATIVES—UNION, CENSUSES, 1911—1936.

Census.	Never Married.	Married.	Widowed.	Divorced.
NUMBERS.				
1911	2,530,380	1,288,414	193,068	4,906
1921	2,937,752	1,485,921	254,272	9,336
1936	4,032,386	2,174,917	367,814	17,931

PROPORTIONS PER CENT.

1911	62.96	38.06	4.80	.12
1921	62.53	31.63	5.41	.20
1936	61.13	32.97	5.37	.27

11. Registration of Native Marriages.—Marriages solemnized by Christian rites and by Civil rites are registered by the Registrar General under the laws applicable to Europeans and other non-Europeans, but marriages by Native custom are not so recorded. The numbers recorded by the Registrar General are given in the statement below. Marriages of Natives with other races, known in South Africa as "mixed marriages", are also recorded.

Prior to the year 1925 all non-European marriages were tabulated as one group. From that date each race has been tabulated separately.

Marriages of Natives to Natives: Civil and Religious Rites:—

1925	11,723	1931	12,145
1926	12,165	1932	11,552
1927	12,230	1933	11,653
1928	13,198	1934	13,135
1929	12,791	1935	15,163
1930	12,774	1936	15,807

Inter-marriage of Natives with other races is not common, except for a small proportion each year with members of the Cape Coloured community.

In the year 1927, the *Immorality Act* was passed. This act prohibited extra-marital intercourse between Europeans and Natives, and no doubt was the cause of the sudden rise in the number of mixed marriages in 1927 and 1928 between those persons who were previously co-habiting. The following table shows the inter-marriage over a period of twelve years.

INTER-MARRIAGE OF NATIVES WITH OTHER RACES, 1925—1936.

European.	Native Grooms to—			Native Brides to—		
	Asianic.	Coloured.	European.	Asianic.	Coloured.	
			Brides.			Grooms.
1925	6	—	187	13	4	75
1926	5	1	170	20	4	81
1927	3	1	180	61	4	69
1928	7	—	207	35	6	90
1929	1	1	211	15	3	91
1930	1	—	198	16	3	86
1931	—	—	174	7	3	111
1932	—	—	199	6	3	119
1933	—	—	166	9	4	102
1934	—	—	201	7	7	106
1935	—	—	216	7	4	147
1936	—	—	233	6	8	184

It will be observed that since 1931, no European woman has married a Native, and also that the number of European men who take Native brides has declined since the year 1930.

A. W. CARRUTHERS,

POPULATION AND VITAL STATISTICS SECTION,
CENSUS OFFICE,
PRETORIA, November, 1938.

Die tabel toon die verandering in die verhoudings van mans- en vrouspersone. Die verhouding van mans- tot vrouspersone het gedurende die vyf-en-twintig jaar met 1·1 paar duisend gedaal.

ix
VERSLAG
OMTRENT DIE
SESDE SENSUS VAN DIE BEVOLKING VAN DIE UNIE VAN
SUID-AFRIKA, 5 MEI 1936.

LEEFTYD EN HUWELIKSTAAT VAN DIE BANTOEBEVOLKING.

1. Algemeen.—Aangesien daar 'n aanvraag blyk te wees vir die inligting wat in hierdie publikasie voorkom, is dit raadsaam geag om dit voor Deel IX van die Sensusverslag waarin dit later sal verskyn, te publiseer.

Besonderhede omtrent die leeftye van naturelle is nie sedert die Sensus van 1911 ingesamel nie, toe die tabellering in vyfjaarlike streke van stedelike gebiede verskaf die blanke huishouer van werkgewer gewoonlik die inligting nadat hy sy naturellewerkemers ondervra het. In groot munisipale lokasies word opgevoede naturelle grotendeels as opname van tolke in diens geneem om die inligting te verkry. In groot industriële besighede en in myne word hierdie inligting waarskynlik verkry uit die rekords wat in die werkemersregister voorkom. In die naturellerereserves en in plattelandse gebiede word die inligting gewoonlik deur die kraalhoof ten opsigte van homself en sy familie en bloedverwante verskaf nadat hy deur die opname ondervra is.

By die Sensus van 1931 is die ondersoek ten opsigte van die leeftye van naturelle tot vier groeppe bepaal: Babetjies (onder een jaar), Kinders (een tot veertien jaar), Jong volwassenes en Volwassenes (vyftien tot vyftig jaar), en Bejaardes (oor die vyftig jaar). Derhalwe kan vergelykings van die getalle of die verhoudings by enige besondere vyfjaarlike leeftydsgroep slegs tussen die Sensusse van 1911 en 1936 gemaak word.

Die volgende tabel toon die verandering in die verhoudings van mans- en vrouspersone per 1,000 persone in vyfjaarlike leeftydsgroep tussen die jare 1911 en 1936.

PROPSIONELE INDELING VAN DIE NATURELLEBEVOLKING IN VYFJAARLIKSE LEEFTYDSGROEPE—SENSUSSE 1911 EN 1936.

Leeftydsgroep.	Manspersone.		Vrouspersone.		Personae.	
	1911.	1936.	1911.	1936.	1911.	1936.
0—4	72.6	69.0	78.1	75.4	150.7	144.4
5—9	66.6	69.6	65.8	69.2	132.4	138.8
10—14	64.5	63.8	59.5	58.4	124.0	122.2
15—19	51.9	52.0	51.8	48.5	103.7	100.5
20—24	48.0	40.9	43.9	43.1	91.9	84.0
25—29	43.1	44.2	39.3	38.5	87.4	82.7
30—34	39.5	35.8	38.7	36.0	77.2	71.8
35—39	29.8	33.1	26.7	28.7	56.3	61.8
40—44	24.7	25.0	23.3	25.1	47.4	50.1
45—49	17.1	19.5	15.7	17.1	32.8	36.6
50—54	13.0	14.3	15.9	16.4	28.9	30.7
55—59	7.5	9.9	8.7	10.4	16.2	20.3
60—64	8.9	8.6	11.5	11.8	20.4	20.4
65—69	4.2	6.2	5.6	6.6	10.2	12.8
70—74	3.8	4.7	5.6	5.8	9.4	10.5
75—79	2.0	2.3	2.6	4.6	4.9	4.9
80—84	1.5	1.6	2.5	2.3	4.0	3.9
85—89	.4	.7	.7	.8	1.1	1.5
90+	.5	.7	.8	.9	1.3	1.6
Onges.	.1	.3	—	2	1	.5
TOTAAL.....	503.3	502.2	496.7	497.8	1,000	1,000

Die tabel toon ook die verandering in die betreklike verhoudings van mans- en vrouspersone. Die verhouding van mans- tot vrouspersone het gedurende die vyf-en-twintig jaar met 1·1 paar duisend gedaal.

Die tabel eis min kommentaar behalwe 'n verwysing na die onverklaarbare daling in die verhoudings van manspersone in 1936 op die leeftye 20-24 jaar en 25-29 jaar, en 'n ooreenkomslike klein vermeerdering oor die ouer leeftydsgroep verdeel.

'n Merkwaardige feit van die leeftydsgroepindeling is die enorme konsentrasie by die leeftyd 30 jaar, vir mans- sowel as vrouspersone, en die tekort by die leeftye 29 en 31 jaar. Die syfers en verhoudings tot die totaal by alle leeftye was as volg:

	Leeftyd 29.	Leeftyd 30.	Leeftyd 31.

<tbl_r cells="4" ix="3" maxc

4. Mediaanleeftyd van die naturellebevolking.—Die mediaanleeftyd, d.w.s. die leeftyd waarbo en waaronder daar gelyke getalle van lewende persone is, word gevind naasteby 19·5 jaar vir mans- sowel as vrouspersone te wees. Hierdie leeftyd is iets hoër as vir kleurlinge en Asiatische, en aanmerklik langer as vir blankes. Die volgende staan toon die vergelyking:

MEDIAANLEEFTYD—SENSUS 1936.

Ras.	Mans- persone.	Vrous- persone.	Persone.
Blankes.....	24·9	24·8	24·9
Naturelle.....	19·5	19·5	19·5
Asiatische.....	18·7	15·2	17·0
Kleurlinge.....	19·0	18·8	18·9

5. Groepering van leeftye.—Hoewel die opgaaf van leeftye in enkele jare 'n groot konsentrasie toon by leeftye wat met seker syfers eindig, verdwyn die geweldige fluktuasies grotendeels wanneer die leeftye in vyfjaarlike tydperke 0·4, 5·9, 10·14, ens., gegroepeer word, en verskaf die leeftydskromme, hoewel dit nie ideaal is nie, 'n veel beter idee van die leeftydsindeling. Dit word deur middel van bykaarte in die bygaande grafieke

Dit sal gesien word dat die geslagte in stedelike gebiede in die Kaap en die Oranje-Vrystaat ongeveer dieselfde verhouding toon as die verslagsverhouding van die totale naturellebevolking, dog in Natal was daar byna tweemaal soveel mans- as vrouspersone, en in die Transvaal was die verhouding naasteby drie mans- tot twee vrouspersone wat 'n surplus van byna 44,000 vrouspersone beteken. In die mynkompounds en mynlokasies was daar byna 350,000 meer mans- as vrouspersone en in industriële kompounds was daar 'n surplus van byna 92,000 vrouspersone. Die keers van die skildery sien mens in die naturellegebiede—lokasies, stampplase, sendingreserves, plase wat aan naturelle behoort en kroongrondes,—waar daar 'n surplus van ongeveer 460,000 naturelle-vrouspersone was. By hierdie gebiede kan die ander boerderygebiede gevog word, waar daar 'n verdere surplus van 72,000 vroue opgeneem is.

Soos hierbo aangehaal, was die afwesige manspersone uit die naturellegebiede hoofsaaklik binne die reproduksiyelperk van die lewe.

7. Manneverhouding van die naturellebevolking.—Die manneverhouding, of die verhouding van mans- tot vrouspersone, is langer vir naturelle as vir die ander rasse van die bevolking, nie teenstaande die feit dat die Sensusyfers sowat 160,000 naturellemanspersone van buitekant die Unie insluit, wat op myne en werke in die vernamste industriële sentrusse van die Unie in diens was. Daar is feitlik slegs 28,600 meer mans- as vrouspersone opgeneem, sodat om slegs die Unie-naturelle in aanmerking te neem, daar sowat 130,000 meer vroue- as manspersone was.

Ongelukkig is die registrasie van geboorte en sterfgevalle van naturelle slegs in stedelike gebiede verplicht, en gevoglik word die oorgrote meerderheid van naturellegeboretes en -sterfgevalle nie geregistreer nie. Die natuurlike aanwas, of surplus van geboorte oor sterfgevalle, kan derhalwe nie bepaal word nie, en dus is die Sensusyfers die enigste middel om die aanwas van die naturellebevolking vas te stel. Dit blyk egter dat die sterfsterfe vir mans- hoër is as vir vrouspersone, gedeeltelik as gevolg van die meer gevaarlike bedrywe van die mans.

Die Sensusresultate toon dat die manneverhouding by alle rasso van die bevolking afneem, en waarskynlik sal die vrouspersone binne enkele tientalle jare vir sommige of miskien al die rasso in die meerderheid wees.

Die veranderings in die manneverhouding sedert 1911 word hieronder getoon:

GETAL MANS- VIR ELKE 100 VROUERSPOERSE—UNIE.

Sensus.	Blankes.	Naturelle.	Asiatische.	Kleurlinge.	Alle Rasse.
1911.....	115·92	101·35	171·46	101·67	105·70
1921.....	106·05	102·89	142·31	101·81	104·29
1936.....	103·23	100·87	118·51	101·36	101·77

As die 160,000 naturelle van buitekant die Unie buite rekening gelaat word, dan daal die manneverhouding van die naturelle tot sowat 97.

8. Honderdjariges.—Daar was 647 naturelle-manspersone en 675 naturelle-vrouspersone wat verklaar het dat hulle 100 jaar of meer

10. Huwelikstaat.—Die tabelle van huwelikstaat vir naturelle is op opgawes in die sensusvorms gebaseer. Die term „getroud“ sluit in alle huwelike, hetby ooreenkomsdig burgerlike of christelike plegtigheid, of naturelle-gebruik.

Die *Naturelle-administrasie Wet van 1927* besig die term „gebruiklike verbinding“ in plek van „huwelik“. ’n Gebruiklike verbinding is, in wetlike terminologie, nog ’n burgerlike huwelik nog ’n huwelik deur naturelle volgens christelike plegtigheid aangegaan. Voor die *Naturelle-administrasie Wet* aangeneem is, is ’n gebruiklike verbinding in die meeste van die Provincies van die Unie nie as ’n wetlike huwelik beskou nie, behalwe waar die Wetboek van *Naturellereg* van krag was. Artikel 35 van die Wet omskryf die verbinding as „die samelewé van ’n man en ’n vrou in ’n egtelike verhouding ooreenkomsdig *naturellereg* en -gebruik, waar nog die man nog die vrou ’n party is by ’n bestaande huwelik“.

In die tabellering van die statistieke is derhalwe aangeneem dat die term „getroud“ alle vorme van erkende wetlike verbindings insluit en, natuurlik, verbindings insluit met meer as een vrou, wat deur *naturellereg* en -gebruik erken word.

Die volgende tabel is op die totale bevolking van elke ras, afgesien van leeftyd, gebaseer, en toon die verhoudings van die bevolking in elke afsonderlike huwelikstaat. Slegs 3,641 naturelle, of 40 persent, het versuim om hulle huwelikstaat op te gee.

PERSENTASIEVERHOUDING VAN ELKE AFSONDERLIKE HUWELIKSTAAT—UNIE—SENSUS, 1936.

Ras.	Nooit getroud nie.	Getroud.	Wedustaat.	Geskei.
Blankes.....	55·50	39·73	4·14	·54
Naturelle.....	6·13	32·97	5·57	·27
Asiate.....	59·75	35·78	3·95	·34
Kleurlinge.....	65·27	30·19	4·12	·33

Die volgende tabel toon die verandering in die getalle en verhoudings van die naturelle vir drie agtereenvolgende Sensusse. Die verhoudings het nie oor ’n tydperk van ’n kwarteeu veel verander nie. Die verhouding van ongehuwe persone het 1·8 persent gedaal en dié van die getroudes en van persone in die wedustaat het elk minder as 1 persent vermeerder; terwyl die verhouding van geskeie persone iets meer as verdubbel het.

HUWELIKSTAAT VAN NATURELLE—UNIE, SENSSUSSE 1911 TOT 1936.

Sensus.	Nooit getroud nie.	Getroud.	Wedustaat.	Geskei.
GETALLE.				
1911.....	2,530,380	1,288,414	193,068	4,906
1921.....	2,937,752	1,485,921	254,272	9,336
1936.....	4,032,386	2,174,917	367,814	17,931

VERHOUDINGS PERSENT.				
1911.....	62·96	32·06	4·80	·12
1921.....	62·53	31·63	5·41	·20
1936.....	61·13	32·97	5·57	·27

11. Registrasie van Naturelle-huwelike.—Huwelik ooreenkomsdig christelike of burgerlike plegtigheid word deur die Registrateur-generaal geregistreer ooreenkomsdig die wette wat op blankes en ander nie-blankes van toepassing is, dog huwelike ooreenkomsdig naturelle-gebruik word nie aldus geregistreer nie. Die getalle deur die Registrateur-generaal geregistreer, word in onderstaande tabel gegee. Huwelike van naturelle met ander ras, in Suid-Afrika bekend as „gemengde huwelike“, word ook geregistreer.

Voor die jaar 1925 is alle nie-blanke huwelike as een groep getabellier. Vanaf die datum is elke ras afsonderlik getabellier.

Huwelike van naturelle met naturelle : Burgerlike of Godsdienstige plegtighede :

1925.....	11,723	1931.....	12,145
1926.....	12,165	1932.....	11,552
1927.....	12,230	1933.....	11,653
1928.....	13,198	1934.....	13,135
1929.....	12,791	1935.....	15,163
1930.....	12,774	1936.....	15,807

Oor en weer trou van naturelle met ander ras gebeur nie dikwels nie, behalwe wat betrek ’n klein aantal elke jaar met lede van die Kaapse kleurlingbevolking.

In die jaar 1927 is die *Ontug Wet* aangeneem. Hierdie wet het buite-egtelike omgang tussen blankes en naturelle belet, en was ongetwyfeld die oorsaak van die skielike toename in die getal gemengde huwelike in 1927 en 1928 tussen persone wat tevore saamgeleef het. Die volgende tabel toon die gemengde huwelike oor ’n tydperk van twaalf jaar.

GEMENGDE HUWELIKE VAN NATURELLE MET ANDER RASSE, 1925–1936.

Blanke.	Naturellebruidegom met		Naturellebruide met		
	Asiatiese.	Kleurling.	Blanke.	Asiatiese.	Kleurling.
			Bruide.	Bruidegom.	
1925.....	6	—	187	13	75
1926.....	5	—	170	20	81
1927.....	3	1	180	61	69
1928.....	7	—	207	35	90
1929.....	1	1	211	15	91
1930.....	1	—	198	16	86
1931.....	1	—	179	7	31
1932.....	—	—	199	6	31
1933.....	—	—	166	9	102
1934.....	—	—	201	7	106
1935.....	—	—	216	7	147
1936.....	—	—	233	6	184

Dit sal opgemerk word dat sedert 1931 geen blanke vrou met ’n natuur getrou het nie, en ook dat die getal blanke mans wat met naturellebruide trou, sedert die jaar 1930 afgeneem het.
