Die vraag oor die datum van geboorte is slegs ten einde die antwoord op die duske vraag oor die ouderdom te stel en sodanig te verskerp dat noukeuriger resultate verkry word.

By die verwysing van die inligting wat ingewin is, is die meeste baie rekeninge getrek en word die keuse in hierdie opsigte in voltooiing gebring, ook op die dag van die eerste aanvang.

3. Betrekkende die geboorte—Aangesien slegs alle blanke in die Unie weet wanneer hul geboorte is, kan die keuse wat in blanke geboorte word as noukeuriger aanvaar word. Daar is geen opvallende foutwysing op enige besonderse leefitye.

VERSLAG

OR DIE

BEVOLKINGSSENSUS VAN DIE UNIE VAN SUID-AFRIKA, 8 MEI 1951.

DEEL V—LEEFTYE (ALLE RASSE).

INLEIDING.

1. **Verslagreeks.**—Dit is die vyfde deel van die verslagreeks oor die sensus van die bevolking van die Unie van Suid-Afrika, gehou op 8 Mei 1951, en toon besonderhede van die leeftydsindeling van die blanke, Kleurling-, Asiate- en Naturellebevolking.

Die boekdele reeds uitgegee is soos volg:—

- I. Geografiese indeling van die bevolking—U.G. 42/1955;
- II. Huwelikstaat van die blanke bevolking (tesame met 1946-sensussyfers vir alle rasse)—U.G. 61/1954;
- III. Godsdiens van die blanke bevolking (tesame met 1946-sensussyfers vir alle rasse)—U.G. 61/1954; en
- IV. Geboorteplekke, jaar van aankoms en burgerskap van die blanke bevolking (tesame met 1946-sensussyfers vir alle rasse)—U.G. 34/1954.

Die 1946-syfers wat by boekdele II, III en IV ingesluit is, is nie voorheen gepubliseer nie.

2. **Sensusrvaelys.**—Die vrae op die sensusvorms waaruit die tabelle in hierdie boekdeel opgestel is, het soos volg gelui:—

Vir blankes, Kleurlinge en Asiate—

Geboortedatum: Dag _____ Maand _____ Jaar _____
Ouderdom (in jare en maande): _____ Jaar _____ Maande

Vir Naturelle—

Datum van geboorte: Dag _____ Maand _____ Jaar _____
Ouderdom (juiste ouderdom of by benadering): _____ Jaar _____ Maande

Die vraag oor die datum van geboorte is gestel ten einde die antwoord op die direkte vraag oor die ouderdom te toets en sodoende te verseker dat noukeuriger resultate verkry word.

By die verwerking van die inligting wat ingewin is, is die maande buite rekening gelaat en word die leeftye in hierdie boekdeel in voltooid jare, soos op die dag van die sensus, aangetoon.

3. **Betroubaarheid van gegewens.**—Aangesien feitlik alle blankes in die Unie weet wanneer hul gebore is, kan die leeftye wat vir blankes getoon word as noukeurig aanvaar word. Daar is geen opvallende konsentrasie op enige besondere leeftyd nie.

Wat Kleurlinge en Asiate egter betref, toon die syfers abnormale konsentrasies op leeftye wat op 0 of 5 eindig, veral onder volwassenes, en die leeftye vir Kleurlinge en Asiate is dus nie so noukeurig as dié vir blankes nie.

Betreklik min Naturelle weet wat hul juiste geboortedatum is, of selfs in watter jaar hulle gebore is. Die syfers toon uiters matige konsentrasies op leeftye wat op 0 of 5 eindig en in 'n mindere mate op dié wat op 2 en 8 eindig. Die enkeljaarsyfers vir Naturelle is gevolglik onbetroubaar en moet met omsigtigheid gebruik word.

Wanneer die syfers vir Naturelle egter in leeftyds-groep saamgevat word, gee hul waarskynlik 'n betreklik noukeurig aanduiding van die leeftydsindeling.

Opnemers het opdrag ontvang om in 'n geval waar die werklike ouderdom van 'n persoon nie bekend is nie, die ouderdom so noukeurig as moontlik te skat. Ten einde opnemers met die skatting van die ouderdomme van Naturelle behulpsaam te wees, is hul voorsien van 'n historiese kalender getitel „Lys van Belangrike Geskiedkundige Gebeurtenisse”.

4. **Totale bevolking.**—Die bevolkingsyfers in hierdie verslag word op 'n *de facto*-grondslag getoon, d.w.s. persone word getoon volgens die plekke waar hulle opgeneem is. Die enigste uitsondering is in die geval van persone wat gedurende die nag van die sensus op spoorwegtreine opgeneem is. Hierdie persone is volgens hul gewone woonplekke ingedeel. Daar kan egter gemeld word dat die oorgrote meerderheid persone by hul gewone woonplekke opgeneem is.

Alle persone wat gewoonlik in die Unie woonagtig is, maar ten tyde van die sensus tydelik uit die Unie afwesig was, is uitgesluit. Hierdie groep sluit in diplomatieke en konsulerende personeel met hul gesinne in die buiteland, matrose op handelskepe ter see, vakansiegangers en sakebesoekers in ander lande en studente wat in die buiteland studeer. Insgelyks is alle vreemdelinge wat hulle op die dag van die sensus in die Unie op enigiens skip in enige hawe van die Unie bevind het, ingesluit. Hierdie groep sluit in alle vreemde amptelike personeel en alle besoekers in die Unie, afgesien van die duur of doel van die besoek.

5. **Rasseklassifikasie.**—Oral in hierdie verslag word die volgende rasse-groepe onderskei:—

(a) **Blankes.**—Persone wat volgens voorkoms klaarblyklik blankes is of wat gewoonlik vir blankes deurgaen, maar met uitsondering van persone wat, hoewel hulle volgens voorkoms klaarblyklik blankes is, gewoonlik vir Kleurlinge deurgaen. Hierdie groep kan ook as persone van Europese afkoms beskryf word.

(b) **Naturelle.**—Persone wat lede van 'n inbooringras of -stam van Afrika is, of gewoonlik daarvoor deurgaen.

(c) **Asiate.**—Inbooringe van Asië en hul afstammeling, hoofsaaklik Indiërs en Pakistane, met 'n paar duisend Chinese en 'n klein aantal persone van verskeie ander Asiatiese nasionaliteite.

(d) **Kleurlinge.**—Alle persone, wat nie by bovermelde groepe ingegrepe is nie. Die groot meerderheid in hierdie groep is persone wat bekend staan as die Kaapse Kleurlinge, maar die ras of groep wat bekend staan as die Kaapse Maleiers en persone van gemengde blanke en nie-blanke bloed, word ook ingesluit.

Die sensus van 1951 vorm die basis van die Bevolkingsregister, ingestel ingevolge die Bevolkingsregistrasiewet, No. 30 van 1950, en daarom was dit nodig om die rasseomskrywing wat in hierdie Wet voorkom en wat enigins verskil van dié wat voorheen vir sensusdoeleindes gebruik is, te volg. Dit kom daarop neer dat die volgende inbooringrasse, wat voorheen as Kleurlinge geklassifiseer is, nou as Naturelle geklassifiseer word: Boesman, Griekwa, Hottentot, Koranna en Namakwa. Dit verklaar die skynbare teenstrydigheid in die syfers vir Naturelle en Kleurlinge vir 1951, vergeleke met 1946, in sommige landdrostrikte, veral in die Kaapprovinsie.

6. **Administratiewe, stedelike en plattelandse gebiede.**—

(a) **Provinsies.**—Die Unie van Suid-Afrika bestaan uit vier provinsies, naamlik die Kaap, Natal, Transvaal en die Oranje-Vrystaat. Die gebiede Transkei en Zoeloeland wat oorwegend Naturellegebiede is, is onderskeidelik integreerende dele van die Kaapprovinsie en van Natal, en tensy anders gemeld, word die syfers van die Transkeigebied en Zoeloeland onderskeidelik by dié van die Kaapprovinsie en van Natal ingesluit.

(b) **Landdrostrikte.**—Die landdrostrik is in die eerste instansie 'n onderafdeling van die Unie vir die gepaste regsbedeling, maar in die praktyk is dit werklik 'n gedesentraliseerde gebied vir die behartiging van byna alle regeringswerk. Die landdrostrik is dan ook die eenheid vir sensusopname en by die sensus van 1951 was daar 266 distrikte in vergelyking met 257 by die vorige sensus wat in 1946 opgeneem is. As gevolg van die instelling van nuwe landdrostrikte en die verandering van grense van tyd tot tyd is die syfers vir landdrostrikte vir 1951 nie noodwendig met dié van vorige sensusse vergelykbaar nie.

By vorige sensusse is Walvisbaai by die Kaapprovinsie en by die Unie as 'n distrik ingesluit, maar Walvisbaai word as deel van Suidwes-Afrika uit Windhoek geadminestreer en daar is derhalwe besluit om die syfers ten opsigte van Walvisbaai uit te sluit en hulle by die syfers vir Suidwes-Afrika in te sluit.

(c) **Stedelike gebiede.**—By vorige sensusse is slegs die dorpe wat die een of ander vorm van wetlike plaaslike bestuur gehad het, soos munisipale rade, dorpsbesture, gesondheidskomitees, ens., as stedelik ingedeel, terwyl alle ander gebiede as plattelandse ingedeel is. Vir die sensus van 1951 is daar egter besluit om die omskrywing van „stedelik” uit te brei om twee ander gebiedsoorte in te sluit, wat geen plaaslike bestuur het nie, maar waarvan die aard tog as stedelik genoeg beskou word. Dit is naamlik die aangrensende voorstede van die groter stede, aangedui as substedelike gebiede, en die groter dorpe, aangedui as kwasi-stedelike dorpe.

(d) **Metropolitaanse gebiede.**—In alle gevalle bestaan die metropolitaanse gebied uit die moederstad tesame met die aangrensende gebied (substedelike gebiede) wat stedelik van aard en ook ekonomies aan die moederstad gekoppel is.

(e) **Plattelandse gebiede.**—Die hele gebied buite die jurisdiksie van die verskillende stedelike gebiede word as plattelandse ingedeel. Hierdie gebied bestaan hoofsaaklik uit plase en Naturelleservate, maar sluit ook die klein dorpie in, aangedui as plattelandse dorpe, wat na beskouing te klein is, of nie voldoende verstedelik is nie, om as stedelik ingedeel te word.

(f) **Oorvleueling van grense.**—Die volgende stedelike gebiede wat in hierdie verslag afsonderlik aangewys word, is in meer as een landdrostrik geleë:—

Stedelike gebied.

Distrikte waarin geleë.

Kaapstad (metropolitaanse gebied)	Bellville. Kaap. Simonstad. Wynberg.
Durban (metropolitaanse gebied)	Durban. Pinetown. Umlazi.
Johannesburg (metropolitaanse gebied)	Johannesburg. Roodepoort.
Germiston (metropolitaanse gebied)	Boksburg. Germiston.
Boksburg (munisipaliteit)	Benoni. Boksburg. Germiston.
Krugersdorp (munisipaliteit)	Krugersdorp. Randfontein.

7. **Afkortings en simbole.**—Die volgende afkortings en simbole word in die tabelle in hierdie verslag gebruik:—

M.....	Manlikes (Engels: Males).
V.....	Vroulikes (Engels: Females).
P.....	Persone (Engels: Persons).
O.....	In leeftydskolom beteken dit onder 1.
15+	15 en ouer.
-15	Onder 15.
15-	15 tot.
Ong.....	Ongespesifiseer.

REPORT

ON THE

CENSUS OF THE POPULATION OF THE UNION OF SOUTH AFRICA, 8th MAY, 1951.

VOLUME V—AGES (ALL RACES).

INTRODUCTION.

1. **Report series.**—This is the fifth volume of the report series on the census of the population of the Union of South Africa taken on the 8th May, 1951, and contains particulars of the age distribution of the white, Coloured, Asiatic and Native population.

The volumes already issued are as follows:—

- I. Geographical distribution of the population—U.G. 42/1955;
- II. Marital status of the white population (together with 1946 census figures for all races)—U.G. 61/1954;
- III. Religions of the white population (together with 1946 census figures for all races)—U.G. 62/1954; and
- IV. Birthplace, year of arrival and nationality of the white population (together with 1946 census figures for all races)—U.G. 34/1954.

The 1946 figures included in volumes II, III and IV have not previously been published.

2. **Census questionnaire.**—The questions on the census forms from which the tables in this volume were compiled appeared as follows:—

For whites, Coloureds and Asiatics—

Date of birth: Day _____ Month _____ Year _____
Age (in years and months): _____ Years _____ Months

For Natives—

Date of birth: Day _____ Month _____ Year _____
Age (exact age or approximate): _____ Years _____ Months

The question on the date of birth was asked in order to verify the reply to the direct question on the age, thus ensuring more accurate results.

In processing the information collected the months were not taken into account and in this volume the ages are shown in completed years at the date of the census.

3. **Reliability of data.**—As practically all white persons in the Union know their date of birth, the ages shown for whites may be accepted as accurate. There is no apparent concentration on any particular age.

For Coloureds and Asiatics, however, the figures show abnormal concentrations on ages ending in 0 and 5, particularly among adults, and accordingly the ages for Coloureds and Asiatics are not as accurate as those for whites.

Relatively few Natives know their exact date of birth, or even the year in which they were born. The figures show extreme concentrations on ages ending in 0 and 5, and to a lesser extent on those ending in 2 and 8. Consequently the single year figures for Natives are unreliable, and must be used with caution.

When combined into age groups, however, the figures for Natives probably give a reasonably accurate indication of the age distribution.

Enumerators received instructions that when the exact age of a person was not known, the approximate age should be estimated as accurately as possible. To assist enumerators in estimating the ages of Natives, they were supplied with a historical calendar entitled "List of Important Historical Events".

4. **Total population.**—Population figures in this report are on a *de facto* basis, that is, persons are shown according to their place of enumeration, the only exception being in the case of those enumerated on railway trains on the night of the census. These persons have been transferred to their usual place of residence. It may be stated, however, that the very great majority of persons were enumerated at their usual place of residence.

All persons normally living in the Union, but temporarily absent from the country at the time of the census have been excluded. This group includes diplomatic and consular personnel and their families located abroad, merchant seamen at sea, holiday and business visitors to other countries and students studying abroad. Likewise, all foreigners who happened to be in the Union or on any ship in any port or harbour of the Union on the day of the census have been included. This group includes foreign official personnel and all visitors to the Union, irrespective of the duration or purpose of the visit.

5. **Racial classification.**—Throughout this volume the following racial groups are distinguished:—

(a) *Whites.*—Persons who in appearance obviously are, or who are generally accepted as white persons, but excluding persons who, although in appearance obviously white, are generally accepted as Coloured persons. This group may also be described as persons of European extraction.

(b) *Natives.*—Persons who in fact are, or who are generally accepted as members of any aboriginal race or tribe of Africa.

(c) *Asiatics.*—Natives of Asia and their descendants, mainly Indians and Pakistani, with a few thousand Chinese and very small numbers of various other Asiatic nationalities.

(d) *Coloureds.*—All persons not included in any of the three groups referred to above. The great majority of the persons in this group are those known as Cape Coloureds, but the race or group known as the Cape Malays and persons of mixed white and non-white blood are also included.

The 1951 census formed the basis of the Population Register established under the Population Registration Act, No. 30 of 1950, and it was therefore necessary to follow the racial definitions of that Act, which differ to some extent from those previously used for census purposes, in that the following aboriginal races, formerly classified as Coloureds, are now classified as Natives: Bushman, Griqua, Hottentot, Koranna and Namaqua. This accounts for some apparent inconsistencies in the figures for Natives and Coloureds for 1951, as compared with 1946, in some magisterial districts, especially in the Cape Province.

6. **Administrative, urban and rural areas.**—

(a) *Provinces.*—The Union of South Africa comprises four provinces, namely the Cape, Natal, Transvaal and the Orange Free State. The predominantly Native areas of the Transkeian Territories and Zululand are integral parts of the Cape Province and Natal respectively, and, unless otherwise stated, the figures for the Cape Province and Natal include the figures for the Transkeian Territories and Zululand respectively.

(b) *Magisterial districts.*—The magisterial district is primarily a sub-division of the Union for the suitable administration of justice, but in practice it is a decentralized area for the administration of nearly all government work. The magisterial district is also the unit for census enumeration. At the census of 1951 there were 266 districts as compared with 257 at the previous census taken in 1946. As a result of the creation of new districts and changes in district boundaries from time to time, the 1951 figures for magisterial districts are not necessarily comparable with those for previous censuses.

At previous censuses Walvis Bay was included in the Cape Province and in the Union as a district, but as Walvis Bay is administered from Windhoek as part of South West Africa, it has been decided to exclude the figures for Walvis Bay from those for the Cape and the Union and to include them in those for South West Africa.

(c) *Urban areas.*—At previous censuses, only those towns and villages which had some form of urban local government constituted under any law, such as municipal councils, village management boards, health committees, etc., were classified as urban, and all other areas were classified as rural. For the 1951 census, however, it has been decided to extend the definition of "urban" to include two other types of area, not having any form of local government, but which are considered sufficiently urban in character. These are the outlying suburbs of the larger towns, designated sub-urban areas, and the larger villages, designated quasi-urban townships.

(d) *Metropolitan areas.*—In each case the metropolitan area consists of the parent town together with the adjoining areas (sub-urban areas) which are urban in character and which are economically linked with the parent town.

(e) *Rural areas.*—The whole area outside the jurisdiction of the various urban areas is classified as rural. This area consists chiefly of farms and Native reserves, but also includes the small villages, designated rural townships, which are considered too small, or not sufficiently urbanized, to be classified as urban.

(f) *Overlapping of boundaries.*—The following urban areas, separately identified in this volume, are situated in more than one magisterial district—

Urban area.	Districts in which situated.
Cape Town (metropolitan area)...	Bellville. Cape. Simonstown. Wynberg.
Durban (metropolitan area).....	Durban. Pinetown. Umlazi.
Johannesburg (metropolitan area).	Johannesburg. Roodepoort.
Germiston (metropolitan area)....	Boksburg. Germiston.
Boksburg (municipality).....	Benoni. Boksburg. Germiston.
Krugersdorp (municipality).....	Krugersdorp. Randfontein.

7. **Abbreviations and symbols.**—The following abbreviations and symbols have been used in the tables in this volume:—

M.....	Males (Afrikaans: Manlikes).
F.....	Females (Afrikaans: Vroulikes).
P.....	Persons (Afrikaans: Persone).
O.....	In age column means under 1.
15+.....	15 and over.
-15.....	Under 15.
15-.....	15 to.
Uns.....	Unspecified.

TABLE 5.—LEEFTEYDSINDELING IN STEDELIKE, PLATTELANDSE EN ALLE GEBIEDE—UNIE EN PROVINSIËS, 1951.

Table with columns for age groups (Leefte (Jare)) and regions (UNIE—UNION, KAAP—CAPE, NATAL, TRANSVAAL, ORANJE-VRYSTAAT). It shows population distribution across various age ranges from 0-4 to 65-74.

TABLE 5.—LEEFTEYDSINDELING IN STEDELIKE, PLATTELANDSE EN ALLE GEBIEDE—UNIE EN PROVINSIËS, 1951 (Continued).

Continuation of Table 5 from page 46, showing population distribution for age groups 55-64, 65-69, 70-74, 75-79, 80-84, 85-89, 90-94, 95-99, and 100-104. Columns include population counts for different regions and the total.
