SCARCITY VERSUS ABUNDANCE.

LL.D., F.R.S.E., presents a striking picture of Capitalism. Bastiat wrote it as an argument indictment of the capitalist system. When buying and selling is abolished and mankind produces for the common use, no one, to para-phrase Bastiat's words, will dream of enouraging labour and rendering it more pro-luctive by breaking in pieces labour-saving machinery to neutralise the fertility of the iny circumstance that saves the people an hour or puts that hour at their disposal; they

No Scarcity If Man Did Not Exchange.

If man were a solitary animal, if he laboured clusively for himself, if he consumed directly the fruit of his labour-in a word, if he did not exchange—the theory of scarcity would never have appeared in the world. It is too evident that case, abundance would be advantools, from powerful machinery of his invention, or whether due to the fertility of the soil, the liberality of nature, or even to a mysterious in-vasion of products brought by the waves and left by them upon the shore. No solitary man would ever have thought that, in order to encourage his labour and render it more productive, it was which saved it, to neutalise the fertility of the soil, or give back to the sea the good things it had brought to his door. He would perceive at interdict being laid on all rival manufacturers: that it would be absurd to reject the result for fear of doing injury to the means by which that result was accomplished. He would perceive that if he devotes two hours a day to providing for his wants, any circumstance (machinery, fertility, gratuitous gift, no matter what) which saves him an hour of that labour, the result remaining the same, puts that hour at his disposal, and that he can devote it to increasing his enjoyments; in short, he would see that to save labour

Capitalist Producers's Interest.

Capitalist Producers's Interest.

It is essential to analyse them, and examine

Take the case of any producer whatever, what is his immediate interest? It consists of two things: first, that the fewest possible number of persons should devote themsely of industry; secondly, that the greatest possible number of persons should be in quest of the article he produces. Political economy explains it more succinctly in these terms: Supply very limited, demand very extended; or, in other still, competition limited, demand unlimited.

What is the immediate interest of the conquestion should be extended, and the demand restrained

Seeing, then, that two interests are in opposicoincide with the social interests in general, and

Are we physicians? We cannot avoid seeing that certain ameliorations, improving the sanitary state of the country, the development of certain moral virtues, such as moderati temperance, the progress of knowledge tending to enable each man to take better care of his own health, the discovery of certain simple remedies of easy application, would be so many blows to our professional success. In as far as we are physicians, then, our secret wishes would be anti-social. I do not say that physicians form cous, from whatever quarter it came, whether in the result of his industry, from ingenious they would hail with joy the discovery of a universal panacea; but they would not do this as physicians, but as men and Christians. By a noble abnegation of self, the physician places himself in the consumer's point of view. But as exercising a profession, from which he derives or, if you will, his interests, are antisocial

We should consent willingly to an interdict being laid on all rival manufacturers; and if we could venture to give this wish public expression, or hope to realise it with some chance of success, we should attain our end, to some extent, by indirect means; for example, by excluding foreign fabries, in order to diminish the supply, and thus produce, forcibly and to our profit, a scarcity of clothing.

What Montaigne Said.

In the same way, we might pass in review all other branches of industry, and we should always find that the producers, as such, have anti-social the that the producers, as Montaigne, thrives only by the irregularities of youth; the farmer by the high price of corn; the architect by the destruction of houses; the officers of justice, by lawsuits and quarrels. are won't to do, the Utopian schemes as failures.
Viewed historically, Utopian Socialism performed a useful as well as necessary function—a of the chain of proletarian class-consciousness and solidarity. On the one hand, it tore off the mask of the bourgeois world and its moral sycophants, thereby exposing its true nature; on the other, it inspired the masses with a vision—an ideal state of society. Utopian Socialism was the prede-Socialism.

A scientific Socialist movement must be based on an appreciation of the primacy of the eco-nomic factors in society, the changes in the mode of production and exchange, the consequent consequent division of society into classes, and the struggle continually going on between these

To set up a Socialist theory on this fundamental asis necessitates the application of dialectics o the realm of sociology

The old Greek philosophers had been dialecticians. But with the advance of the scientific era, mankind had unconsciously drifted away from the dialectic mode of reasoning, and substi-tuted for it the meta-physical. This was due to the fact that each scientist being pre-occupied with the collection and collaboration of data in his own particular field of investigation, lost sigh of the entirety—of the world as a whole. Hand in hand with the development of the capitalist mode of production went the rapid development e reflex, in a religious form, of the yearning of the sciences-for the sciences were the tools masses for Communism. with which capitalism "taught mankind to conmodern times, such intellectual expressions quer nature by an assault." This school culminated ad found its highest expression in Hegel.

The Thomas case involve mas case involved no intricate technicalities of law, such as a lawyer would have a special advantage in handling; it required, how-ever, an intimate knowledge of the Communist and Labour movements. Serjeant Sullivan, K.C., probably handled the case as well as another ordinary lawyer would have done; but he based the defence on a false and, indeed, an absurd plea. He alleged that the Communist had accused Thomas not of betraying the Labour movement, but of betraying the Communist movement, This was a suggestion that no one could take seriously of course, the accusation against Thomas was that he had betrayed the Labour movement. Serjeant Sullivan said:

"The charges levelled by the Communist were, not that Mr. Thomas was an open enemy, but that he got into an organisation which was really working for Communist ends, and that he did it for the purpose and with the effect that pretending to lead he betrayed and ruined it."

Which is the "organisation working for Communist eds," that Thomas has got into? Is it the N.U.R. or the Triple Alliance, or the Labour Party, or the Trade Union Congress? None of these are "working for Communist ends." Even the man in the street knows better than that. No jury could be imposed on by such a statement. If such false statements could obtain credence, we say that Communists ought in credence, we say that Communists ought in the development of the movement.

Verdict a Foregone Conclusion.

The verdict was, of course a foregone conclu sion. All the class prejudices of judge and jur were aroused against the Communists, and Justice Darling constantly interjected observations which displayed his detestation, not merely of Com-munism, but also of ordinary Trade Unionism. The only thing to be done in such cases is t make the Court a tribunal for Communist propaganda. This cannot be done by spending th hard-got money of the Revolution upon legal expenses and fees to King's Counsel.

Of course, we consider, as before, that Thomas betrayed the Miners and the Labour Cause. But Hodges is a slippery young man; he may presently be making revolutionary speeches again: therefore, let his statement under cross-examination be placed on record: that he does not belong to the hope I shall not, either."

:: CORRESPONDENCE. ::

THE PRESS AND ART O'BRIEN. The following is the text of a letter delivered at the Home Office from Mr. Art O'Brien, flealing with the unnecessary introduction of his name in a statement given out by officials at Scotland Yard.

24th November, 1921.

The Rt. Hon. Edward Shortt, Esq., K.C., M.P.,
The Home Office, Whitehall.

Dear Sir,—Allow me to call your attention to the fact that yesterday your officials at Scotland Yard were giving out to the preess a statement in connection with the raid for arms at Windsor and Chelera Barracks, and the concluding paragraph of this statement was to the effect that

"an arrest has been made at a house rented, it is understood, by a prominent member of the Roger Casement Sinn Fein Club, of which Mr.

Art O'Brien is President."

This statement was read out to press representatives.

Roger Casement Sinn Fein Club, of which Mr.

Art O'Brien is Presidert."

This stigement was read out to press representatives from a typewritten document by Capt. Bodilly. It is clear, therefore, that both the wording and the purpose of the statement are deliberate.

The issue of this statement resulted in my being approached continuously throughout the day by scores of press reporters, asking if I could give them information with regard to the raids, the arrests, etc.

What, I may ask is the purpose for introducing my name into such a statement full of innuendo? The only purpose I can discern to have arisen in the distorted imagination of someone is a desire to create prejudice against me amongst the more ignorant of your people, and thus, in some way, to place an obstacle to the negotiations at present proceeding between your Government and mine.

The organs of the London press, with a couple of notable exceptions with which I am dealing, whilst reproducing the rest of the statement, have, with a better sense of decency and fitness than your officials displayed, omitted the seemingly purposeless mention of my name.

In my turn, I am taking the opportunity of sending a copy of this letter to the press, to which I am sure, in the circumstances, you will not object.

Yours faithfully.

A LETTER FROM ODESSA.

Extracts from two letter sent by a Compade (Harry Jimack) in Odessa, Russia, to his sistent in England.

Ince, however, the war is over, once the interest and his allies have given up any ious attempt to re-establish capitalism, as away with dictatorship; away with maway with dictatorship; away with number of the machinery working, and the sound of hammers. Every blow of the hammer is a blow for the revolution; such is the gist of one of the pluision.

Compulsion of any kind is repugnant to Communist ideal. No one may make a ge slave of another; no one may hoard goods for himself that he does not retreat and cannot use; but the only way to

Another enemy of ours is nunger. But even against that steps have been taken, which show that Russia will live through it all. We welcome help from outside, but if it is not given we can't tighten our belts and manage oursefves.

I have now been in Odesa, with two or three breaks, for four years, and there have been, in' that short time, about fifteen changes of power, much street-fighting, and bombardment from the sea. I came when Kerensky was the boss. After him, generally with fighting, came the Reds (Communists, then the Ukranians (Petlura's crowd), Reds again, then the Germans, then Poles, then French, English, then the Kranians, then Poles, then French, English, then Ukranians, then Poles, then French, English, then Ukranians, then Poles, then French, English, Reds, Whites, Reds, and it has been Red ever since! Life has been very eventful, and interesting.

You tell me that many coming back from Russia to England have not been quite truthful. I do not know what they say, but you must take them psychologically. Perhaps their own economic position was very bad, 'therefore, according to them, the revolution was a failure.

Often in England have I, with other Comrades, shouted, 'Long live the Social Revolution ", we have hurrahed until we were hoarse. But we, or at least I, did not know what revolution meant. Do not think that a revolution is easy to make; it is a thing of blood and iron. The capitalists of the world will not give away their riches, land, their all, just because we, the workers of the world, want them. We have got to take them, even if we have to use steel, machine guns, bombs. Only through power can we make our revolution, and only with power can we make our revolution, and only with power can we make our revolution and products. All between 18 and 27 still have to serve. It would be foothard to demobilise all, with Romania and Poland looking at us with hungry eyes, and the hopes of the counter-revolutionaries are still very big, thinking of the famine, and working for revolts all over Russi

WHAT JUSTICE DARLING SAW.

WHAT JUSTICE DARLING SAW.

DEAR FELLOW-TRADE UNIONISTS,—Whatever are things coming to? Here is Frank Hodges, the Secretary of the Miners' Federation of Great Britain, standing up in the witness box, before Justice Darling (as blue a Tory as ever sat on the Bench), and declaring that a decision of his Union was bad tactics, and "alienated public sympathy." Hodges evidently does not care a snap of the fingers about alienating the sympathy of the M.F.G.B. Evidently he thinks they are worms that will never turn, however much their officials tread on them.

Then there is J. H. Thomas declaring that his loyalty to the King, and his Privy Councillor's oath will cause him to defeat you, fellow-Trade Unionists, if ever you should decide to challenge the established order, to change the Constitution to abolish the monarchy, or to overthrow Capitalism. If you should attempt to do any of these things that your fathers thought were imminent, Thomas, the Secretary of the N.U.R., is pledged, by the oath he means to keep, to tell the King and his Ministers all about it, and to assist in your defeat.

Fellow Trade Unionist, you are very blind: it is an open secret that certain Labour Members of Parliament and certain Trade Union Secretaries took bribes from a certain Employers' Association, when a certain agitation was on foot, not long ago.

To expose it would be a, costly business: those who would, can't; and those who could won't; but if you really had your eyes open, you would have discovered for yourselves that something was very wrong in certain quarters.

If you would only be class-conscious, only show the loyalty towards your working comrades, who are meeting the same difficulties, bearing the same burdens that you are, instead of looking through your employers' spectacles and taking opinions from your employer's newspaper, you would not need to be given secret information as to why this or that Labour official is a turncoat, who is taking the employers' part against the workers: it would be enough for you that he is doing it.

Justice Darling is class-conscious enough to object to having a Trade Union official in the Privy Council; because Darling recognises that the business of the Privy Council is the protection of the ruling class, and that the business of the Trade Union is the protection of the working class. Darling does not know what "twisters" the Trade Union officials can be; nor do you; but Lloyd George and the other politicians know it.

A shrewd old woman once said: "In Russia the ruling classes send the Labour leader to prison; in Britain they ask him to dinner."

It was after a House of Commons dinner with Members of all parties, that Frank Hodges offered the compromise, repudiated by his Executive, that the Triple Alliance seized on to slip out of the sympathetic strike.
