- (2) the Superior Public Health Council;
- (3) the Superior Labour Council;

In view of the fact that in glass works and mirror works the difficulty of recruiting workers and the need for training skilled workers justify the inclusion of boys between 16 and 18 years of age in shifts employed on night work,

And in view of the fact that there is nevertheless no sufficient reason for authorising the employment at night of the persons in question beyond the extent to which the alternation of shifts necessitates the employment of boys between 10 p.m. and 5 a. m. during every third week;

The following Order is issued on the recommendation of Our Minister of Industry and Labour: —

1. In glass and mirror works young male persons over 16 years of age may be employed after 10 p.m. and before 5 a.m. on work which, by reason of the nature of the process, must of necessity be carried on continuously day and night.

The benefit of this relaxation shall be granted only on condition that the young persons in question shall not be employed on the said work at night for more than one week in every three weeks.

2. The relaxations prescribed by this Order shall be authorised for a period of one year.

3. Our Minister of Industry and Labour shall be responsible for the administration of this Order.
