

Please return, Mr. S. F. AL/1822

HILL SIDE,  
Feb 25/81 CHESTERTON ROAD,  
CAMBRIDGE.

Dear Mr. Fawcett

I find that

during their attendance on  
of Porter's course of lectures

the same students attend  
either  
two or three demonstrations at

the University laboratory at

and experiments involving  
vivisection are shown. The

students see but do not themselves

take part in these experiments.

The animals used are always  
thoroughly anaesthetised, and

are invariably killed before  
the effect of the anesthetic  
goes off. Neither Newman

and other students nor  
some demonstrators have  
ever performed any of these  
experiments themselves. Without

a license it would be  
illegal for them to do so  
and it has never been

suggested that any of  
them should try to obtain

a license.

a license.

These are the facts, but  
I hardly know whether  
you will think them worth  
communicating to Miss Gbor.  
They might irritate rather  
than soothe!

I ought to have sent them  
to you before, but was rather  
busy and overlooked it.

Believe me  
Yours sincerely  
Charles Richard Sedgwick
