Hengwrt,
Dolgelley,
N. Wales.

17th Dec

1897

My dear Mr. Hawcett,

I am extremely
pleased to hear of your
Notes. They form a
valuable addition to
what is becoming a large
branch of our work; the
repetition of cruel ex-
periments

2 useless operations ~~per~~
humans
~~formed~~ on patients, in
- and of hospitals.

He has not been paid
some money while active
money a Dr. Suardelli,
who got hold of five

unhappy men undergoing
quarantine in Monte Video
& wounded men with

Yellow fever. He describes
capturing his satisfaction
in witnessing the develop-
ment of all the terrible
symptoms of the disease,
ending with the "final
collapse". The Boston
Transcript referring to
the incident actually
remarks "and is a
question" (!) whether such

Proceedings are treated in the
interests of science & of the
frankly revealed them as "murder"
It is clear to the justice
into the subject of our
journal & matter of starting
testimony - beside the papers
of our own on Cancer - starting
which I will enclose under
this -

I hope your health & spirits
continue good? I have much
to do of spirits! Alas I fear
that duty vote wants us further
any manner from our
substance - Ever affly Yrs
J. P. Cobbe
