Unemployment statistics

—seasonally adjusted series

Introduction

This Historical Supplement gives the latest complete seasonally adjusted unemployment series, by region, as published by the Department of Employment in tables 2.1 to 2.3 of the Labour Market Data section of *Employment Gazette*. The seasonally adjusted figures provide a consistent assessment of the trend in unemployment, estimated according to the current coverage of the monthly count of benefit claimants.

The *Employment Gazette* articles listed below provide further information about the unemployment count and the changes in coverage which have been taken into account in constructing the seasonally adjusted series. In particular, a special feature on p 660 of the December 1988 issue describes the latest revisions to the series, which now relates to claimants aged 18 and over following the change in benefit regulations for young people in September 1988.

Conventions

.. Not available — nil or negligible (less than half the final digit shown)

P Provisional

National and regional unemployment rates incorporate the latest revisions to the denominators using the preliminary results of the 1988 Labour Force Survey. Later revisions will be made in the light of the 1987 Census of Employment results.

Tables 1 and 2 show the seasonally adjusted series back to January 1971 for the United Kingdom and Great Britain respectively. Tables 3 to 14 show the regional series. The series for Scotland, Wales and the English regions go back to April 1974 while the series for Northern Ireland is provided back to January 1971.

The up-to-date series continue to be available, using computer terminals from the National On-line Manpower Information System (NOMIS) run by Durham University. These data are also available on request from Statistics Division B, Room 428, Caxton House, Tothill Street, London SW1H 9NF.

Employment Gazette articles on unemployment statistics

The following articles, published in *Employment Gazette*, give further background information on the unemployment statistics published in this supplement.

Compilation of the unemployment statistics

Changed basis of the unemployment statistics

Unemployment adjusted for discontinuities and seasonality

Change in the compilation of the monthly unemployment statistics

Changes affecting the unemployment count

Measures of unemployment and characteristics of the unemployed

Unemployment statistics: revisions to the seasonally adjusted series
