PREFACE.

This is the sixth report in the 1960 Population Census (sample tabulation) series.<sup>1/</sup> It deals with the religious affiliations of all races of the population. The information is shown according to provinces and for Whites and Bantu in respect of each of the 51 economic regions. As the figures for Coloureds and Asiatics in certain regions are, however, small, such regions in respect of Coloureds have been combined and for Asiatics have been omitted from the regional tables.

The total population of each region, and therefore of the provinces and South Africa, according to race, sex, urban and rural, are the actual census figures obtained from the complete census, but (a) the urban-rural distribution as shown in all the sample tabulations differs slightly from the urban-rural distribution as finally accepted and shown in Volume I of the complete census - Geographical Distribution of the Population; and (b) the total Bantu population of South Africa, of the Cape Province and of Region 21, as shown in all the sample tabulations, is 20,133 less than the final figures shown in Volume I of the complete census. These differences are due, in the case of (a), to the fact that the urban and rural classification of areas had not been finalised when the sample tabulation was done, and, in the case of (b), to the fact that after the sample tabulation had been done, the final figures were revised by the addition of 20,133 Bantu.

The sample figures for the various characteristics have been proportionally adjusted to agree with the actual figures.

PRETORIA.

H.M. STOKER.

NOVEMBER, 1963.

DIRECTOR OF STATISTICS.

VOORWOORD.

Hierdie verslag is die sesde in die 1960-bevolkingsensus (steekproeftabellasië) -reeks.<sup>1/</sup> Dit handel oor die kerkverband van al die rasse van die bevolking. Die inligting word getoon volgens provinsies en vir Blankes en Bantoes ten opsigte van elk van die 51 ekonomiese streke. Aangesien die syfers vir Kleurlinge en Asiëte in sommige streke egter klein is, is sodanige streke se syfers in die geval van Kleurlinge saamgetel en in die geval van Asiëte weggelaat uit die streektabelle.

Die totale bevolking van elke streek en derhalwe ook dié van die provinsies en Suid-Afrika, volgens ras, geslag, stedelik en plattelands, is werklike sensussyfers wat uit die volledige sensus verkry is, maar (a) die stedelik-plattelandse verspreiding soos aangetoon in al die steekproeftabellasië verskil ietwat van die stedelik-plattelandse verspreiding soos finaal aanvaar en aangetoon in Boekdeel I van die volledige sensus - Geografiese Verspreiding van die Bevolking en (b) die totale Bantoebevolking van Suid-Afrika, die Kaapprovinsie en van Streek 21, soos aangetoon in al die steekproeftabellasië, is 20,133 minder as die finale syfers wat in Boekdeel I van die volledige sensus aangetoon word. Hierdie verskille is in die geval van (a) te wyte aan die feit dat ten tyde van die steekproeftabellasië die stedelike en plattelandse klassifisering van gebiede nog nie afgehandel was nie en in die geval van (b) te wyte aan die feit dat nadat die steekproeftabellasië gedoen is, die finale syfers hersien is deur die toevoeging van 20,133 Bantoes.

Die steekproefsyfers vir die verskillende eienskappe is verhoudingsgewys aangepas om met die werklike syfers ooreen te kom.

PRETORIA.

H.M. STOKER.

NOVEMBER 1963.

DIREKTEUR VAN STATISTIEK.

THE SAMPLE.

(i) Introduction: A systematic sample with random starting points, consisting of ten per cent of the White, Coloured and Asiatic population and five per cent of the Bantu population, was selected from the census schedules for tabulation. In cases where families or persons were enumerated on single forms (essentially comprising the household or family form B.1 and B.2) each tenth or twentieth form was selected, while in all other cases, for example where single persons in institutions were enumerated in books, each tenth or twentieth person was selected.

(ii) Testing of sample: On the basis of available figures obtained from the complete census, the sample was tested in respect of each race for each enumerator's area as well as in respect of race and sex for each magisterial district. There were about 16,000 enumerator's areas comprising 280 magisterial districts. The tests revealed that the results obtained from the sample tabulation in so far as race and sex were concerned, fell, to the expected extent, within the required confidence limits.

(iii) Sampling errors: In results obtained by means of sampling, allowance has to be made for possible errors arising from the fact that the characteristics or values pertaining to the whole are estimated from a part of the whole (in this case from a sample of 5 or 10 per cent). The values or characteristics to be estimated vary between individuals, and this variation is a source of error in the aggregates estimated from the sample. In random sampling, it is possible to calculate the error to be expected from this source and to determine the limits within which the population values will lie, with a given probability. It is clear that the smaller the sample, the larger the sampling error will be; and also that the sampling error is related to the variability of the values or characteristics considered. The results obtained from small samples in respect of highly variable values or characteristics which comprise a small proportion of the total will have large sampling errors (see examples to illustrate use of table of sampling errors).

(iv) Sampling errors for various proportions and sample sizes: In Table O.O the sampling errors for various sizes of sample and for different proportions of the population for any particular characteristic, are shown. These sampling errors can be used with a confidence of 95 per cent, that is, in 95 cases out of 100 the errors will not be larger than those shown in the table. The confidence probability can be increased to approximately 99½ per cent by increasing the sampling errors by 50 per cent. The sampling errors would not apply very strictly to the type of sample on which the results in this report are based, that is a systematic sample of clusters (forms or households) of the population or to small samples and small proportions, but are considered to be satisfactory approximations which can be used for most practical purposes.

Table C.O in this report differs from the corresponding Table O.O in reports No. 1 to 4 published previously. Table O.O in reports No. 1 to 4 is applicable specifically to a 10 per cent sample, while Table C.O in this report applies generally to small samples. The differences between the two tables are however small.

(v) Example to illustrate use of Table O.O: Required to find the sampling error of the number of White members of the Nederduits Gereformeerde Kerk for age group 20 to 29 in South Africa (197,906 in the table below) and the limits within which the true value will lie, with 95 per cent confidence.

Table 1.1 shows the following for South Africa for age group 20 to 29:-

Religion.

Whites - Age group 20-29  
South Africa.

	<u>Number</u>	<u>Percentage</u>
Nederduits Gereformeerde	197,906	45
Gereformeerde	15,439	3
Nederduits Hervormde	29,460	7
Anglican Churches	47,699	11
Presbyterian	13,066	3
Congregational	2,255	1
Methodist	38,119	9
Lutheran	5,310	1
Roman Catholic	28,872	6
Apostolic	16,141	4
Other Christian	23,197	5
Jewish Religion	12,092	3
Other and unspecified	<u>10,736</u>	<u>2</u>
Total Whites	<u>440,292</u>	<u>100</u>

The figure of 197,906 is 45 per cent of the total of 440,292. The sampling error shown in the 45 per cent column of the table against a total population figure nearest to 440,292, that is 500,000 is 1.0 per cent. The sampling error of the figure 197,906 is, therefore, approximately 1.0 per cent of 197,906, that is 1,979, and with 95 per cent confidence it can be stated that the number of persons concerned, lies between the limits  $197,906 \pm 1,979$ , that is between 195,927 and 199,885.

For the members of the Lutheran Church, in the above example 5,310 persons, which comprises a small proportion, namely 1 per cent of the total, the sampling error will be relatively much larger and the confidence limits much wider. The table shows that for a proportion of 1 per cent and a total population of 500,000, the percentage error is approximately 8.9 per cent, and, therefore, the number of persons in this denomination lies between  $5,310 \pm 472$ , that is between 4,838 and 5,782.

In a similar way the sampling errors and confidence limits in respect of any other figure shown in this report, may be obtained from Table O.O.

NOTES TO TABLES.

(i) Economic regions: As the population of many magisterial districts is small, it was decided to tabulate information from the sample according to 51 economic regions as indicated on the map. Each region consists of one or more magisterial districts. The economic regions, as compiled in collaboration with the Bureau of Statistics, are those published by the Bureau of Market Research of the University of South Africa in Market Research Report No. 2. For the Whites and Bantu information is shown for each of the 51 regions. However, many of these regions have very small Coloured and Asiatic populations and therefore, in respect of Coloureds several regions have been grouped together and for Asiatics the regional tables have been omitted. Some of the regions have even a small White or Bantu population and even some of the grouped regions have small Coloured populations, and the sampling errors will therefore be relatively large. The relevant figures for each region or regions were, however, published separately, because the values in respect of one or more groups of a characteristic may in fact constitute a large proportion of the total for that characteristic, indicating at the same time that other groups are relatively unimportant.

As noted earlier, the approximate sampling error can readily be determined by referring to Table O.O. It should be reiterated that the figures for the total population of each region according to race and sex, urban and rural, are actual figures obtained from the complete census and are therefore not estimates.

(ii) Religion: For the purpose of the sample tabulation it was necessary to limit the number of denominations to those shown in this report. The lists of denominations for the various races differ slightly from race to race. A more detailed classification of the denominations will be available in due course from the full tabulation.

(iii) The figures in this report will probably not agree very closely with the membership records of the various churches, for the following reasons -

- (1) Many persons claiming allegiance to a particular church may be merely adherents and not members.
- (2) Children are usually stated to belong to the same church as their parents, although they may not be members, nor even have been baptised in that church.
- (3) Persons who are not active members often do not know the full and correct name of their church, and consequently may not be correctly classified.

(iv) Christian churches not shown separately are included under "Other Christian". It was considered impracticable to distinguish between the Church of the Province of S.A. and the Church of England in S.A. in the sample - this will be attempted in the full tabulation. All Apostolic churches were grouped together.

(v) The Coloureds shown under "Islam" are basically the Cape Malay group.

(vi) All the Bantu Separatist Churches have been grouped together under Bantu Churches, as it is quite impracticable to try to distinguish between the many hundreds of Bantu Churches, with the meagre information furnished on the questionnaire.

(vii) The term "Heathen" is no longer being used, but all those not specifying a definite religion, Christian or non-Christian, have been shown in this report under the heading "Other and unspecified".

DIE STEEKPROEF.

(i) Inleiding: 'n Sistematiese steekproef met ewekansige beginpunte, bestaande uit tien persent van die Blanke, Kleurling- en Asiaatbevolking en vyf persent van die Bantoebevolking, is uit die sensusopgawes vir tabellering gekies. In gevalle waar gesinne of persone op enkelvorms (hoofsaaklik huishoudings of gesinne, vorm B.1 en B.2) opgeneem is, is elke tiende of twintigste vorm gekies; terwyl in alle ander gevalle, bv. waar enkelpersone in inrigtings in boeke opgeneem is, is elke tiende of twintigste persoon gekies.

(ii) Toets van steekproef: Op grond van beskikbare gegewens uit die volledige sensus verkry, is die steekproef ten opsigte van elke ras vir iedere opnemersdistrik, asook ten opsigte van ras en geslag vir elke landdrostdistrik getoets. Daar is ongeveer 16,000 opnemersdistrikte wat 280 landdrostdistrikte omvat. Die toetse het getoon dat die resultate uit die steekproef verkry, betreffende ras en geslag, tot die verwagte mate, binne die gestelde betroubaarheidsgrense geval het.

(iii) Steekproeffoute: By resultate uit steekproewe verkry, moet rekening gehou word met moontlike foute wat kan voortspruit uit die feit dat die eienskappe of waardes wat op die geheel betrekking het, beraam word uit 'n gedeelte van die geheel (in die geval van hierdie verslag, 'n steekproef van 5 of 10 persent). Die waardes of eienskappe wat beraam moet word, varieer tussen individue en hierdie variasie is 'n bron van foute in die totale beraam uit die steekproef. By ewekansige steekproefneming is dit moontlik om die foute wat uit hierdie bron verwag kan word, te bereken en om die grense waarbinne die bevolkingswaardes sal val, met 'n gegewe waarskynlikheid, te bepaal. Dit is duidelik dat hoe kleiner die steekproef is, hoe groter die steekproeffoute sal wees en ook dat die steekproeffoute verband hou met die variabiliteit van die waardes of eienskappe wat hier in

oënskou geneem word. Klein syfers ten opsigte van hoogsveranderlike eienskappe of klein syfers wat 'n klein proporsie van die geheel uitmaak, sal dus groot steekproeffoute toon (kyk na voorbeelde om die gebruik van die tabel van steekproeffoute toe te lig).

(iv) Steekproeffoute vir verskillende verhoudings en steekproefgroottes: In Tabel O.O word die steekproeffoute vir verskillende steekproefgroottes en vir verskeie proporsies van die bevolking, vir sekere eienskappe gegee. Hierdie steekproeffoute kan met 'n 95 persent betroubaarheid gebruik word, dit wil sê, in 95 gevalle uit 100 sal die foute nie groter wees as dié wat in die tabel verstrek is nie. Die betroubaarheidswaarskynlikheid kan tot ongeveer 99 $\frac{3}{4}$  persent verhoog word deur die steekproeffoute met 50 persent te vermeerder. Die steekproeffoute sal nie streng van toepassing wees op die soort steekproef waarop die resultate in hierdie verslag gebaseer is nie, dit wil sê 'n sistematiese steekproef van vorms (gesinne of huishoudings) uit die bevolking, of op klein steekproewe en klein proporsies, maar word as bevredigende benaderings beskou wat vir meeste praktiese doeleindes gebruik kan word.

Tabel O.O in hierdie verslag verskil van die ooreenstemmende Tabel O.O in verslae No. 1 tot 4 wat reeds gepubliseer is. Die Tabel O.O in verslae No. 1 tot 4 is van toepassing spesifiek op 'n 10 persent steekproef, terwyl Tabel O.O in hierdie verslag algemeen van toepassing is op klein steekproewe. Die verskil is egter klein.

(v) Voorbeeld om die gebruik van Tabel O.O. te verduidelik: Gevra om die steekproeffout van die getal Blanke lidmate van die Nederduits Gereformeerde Kerk vir ouderdomsgroep 20 tot 29 in Suid-Afrika (197,906 in die tabel hieronder) te vind en die grense waarbinne juiste waardes sal val, met 'n betroubaarheid van 95 persent.

Tabel 1.1 toon die volgende vir Suid-Afrika vir ouderdomsgroep 20 tot 29:-

Godsdiens.	Blankes - Ouderdomsgroep 20-29 Suid-Afrika.	
	Getal	Persent
Nederduits Gereformeerde	197,906	45
Gereformeerde	15,436	3
Nederduits Hervormde	29,460	7
Anglikaanse Kerke	47,699	11
Presbiteriaanse	13,066	3
Congregational	2,255	1
Metodiste	38,119	9
Lutherse	5,310	1
Rooms-Katolieke	28,872	6
Apostoliese	16,141	4
Ander Christelike	23,197	5
Joodse Godsdiens	12,092	3
Ander en ongespesifiseer	<u>10,736</u>	<u>2</u>
Totaal Blankes	<u>440,292</u>	<u>100</u>

Die syfer 197,906 is 45 persent van die totaal van 440,292. Die steekproeffout verstrek in die 45-persent-kolom van die tabel teenoor 'n bevolkingsyfer naaste aan 440,292, dit is 500,000 is 1.0 persent. Die steekproeffout van die syfer 197,906 is derhalwe ongeveer 1.0 persent van 197,906, dit is 1,979, en met 'n betroubaarheid van 95 persent kan aanvaar word dat die getal persone betrokke binne die grense 197,906  $\pm$  1,979, sal val, dit is tussen 195,927 en 199,885.

Vir die lidmate van die Lutherse Kerk, in die bogenoemde voorbeeld 5,310 persone, wat 'n klein verhouding van die totaal, naamlik 1 persent, omvat, sal die steekproeffout relatief baie groter wees en die betroubaarheidsgrense aansienlik

wyer. Die tabel toon dat vir 'n verhouding van 1 persent en 'n totale bevolkingsyfer van 500,000, die persentasiefout ongeveer 8.9 persent is, en derhalwe lê die getal persone in dié denominasie tussen 5,310  $\pm$  472, dit is tussen 4,838 en 5,782.

Insgelyks kan die steekproeffout en betroubaarheidsgrense ten opsigte van enige ander syfer in hierdie verslag aangetoon, uit Tabel O.O bepaal word.

#### OPMERKINGS BY TABELLE.

(i) Ekonomiese streke: Aangesien die bevolking van heelwat landdrosdistrikte klein is, is besluit om gegewens van die steekproef te tabelleer volgens 51 ekonomiese streke soos aangedui op die kaart. Elke streek bestaan uit een of meer landdrosdistrikte. Die ekonomiese streke soos opgestel in samewerking met die Buro vir Statistiek is dié gepubliseer deur die Buro vir Marknavorsing van die Universiteit van Suid-Afrika in Marknavorsingsverslag No. 2. Vir die Blankes en Bantoes word die gegewens vir elkeen van die 51 streke getoon. Baie van hierdie streke het egter 'n klein Kleurling- en Asiaatbevolking en derhalwe is die syfers in die geval van Kleurlinge vir verskillende streke saamgetel en in die geval van Asiats is die streek-tabelle weggelaat. Sommige van die streke het selfs 'n klein Blanke of Bantoebevolking en selfs vir sommige saamgegroepeerde streke is die Kleurlingbevolking klein en derhalwe sal die steekproeffout relatief groot wees. Die betrokke syfers vir elke streek of streke is egter nogtans afsonderlik gepubliseer, omdat die waardes ten opsigte van een of meer groepe van 'n eienskap inderdaad moontlik 'n groot verhouding van die totaal vir daardie eienskap uitmaak en terselfdertyd aantoon dat die ander groepe relatief onbelangrik is. Soos reeds verduidelik, kan die benaderde steekproeffout met behulp van Tabel O.O maklik bepaal word. Daar moet ook herhaal word dat die totale bevolking vir elke streek volgens ras en geslag, stedelik en plattelands, werklike syfers is wat uit die volledige sensus verkry is, en dus nie beraamde syfers is nie.

(ii) Godsdiens: Vir die doel van die steekproeftabellering was dit nodig om die getal denominasies te beperk tot dié in hierdie verslag aangetoon. Die lys van denominasies verskil in geringe mate van ras tot ras.

'n Gedetailleerde indeling van die denominasies sal mettertyd uit die volledige tabellering beskikbaar wees.

(iii) Die gegewens in hierdie verslag gepubliseer, sal moontlik nie goed vergelyk met dié van die lidmaatskapregisters van die betrokke kerke nie, en wel om die volgende redes -

- (1) Heelwat persone mag hulle godsdiens opgegee het as behorende tot 'n spesifieke kerk hoewel hulle in werklikheid slegs aanhangers van daardie kerk is en nie noodwendig lidmate nie.
- (2) Kinders word gewoonlik opgegee as behorende tot dieselfde kerk as hul ouers hoewel hulle nie noodwendig lidmate mag wees nie of selfs nie eers in daardie kerk gedoop is nie.
- (3) Persone wat nie aktiewe lidmate is nie, is dikwels nie bekend met die juiste benaming van hulle kerk nie en mag gevolglik nie reg geklassifiseer wees nie.

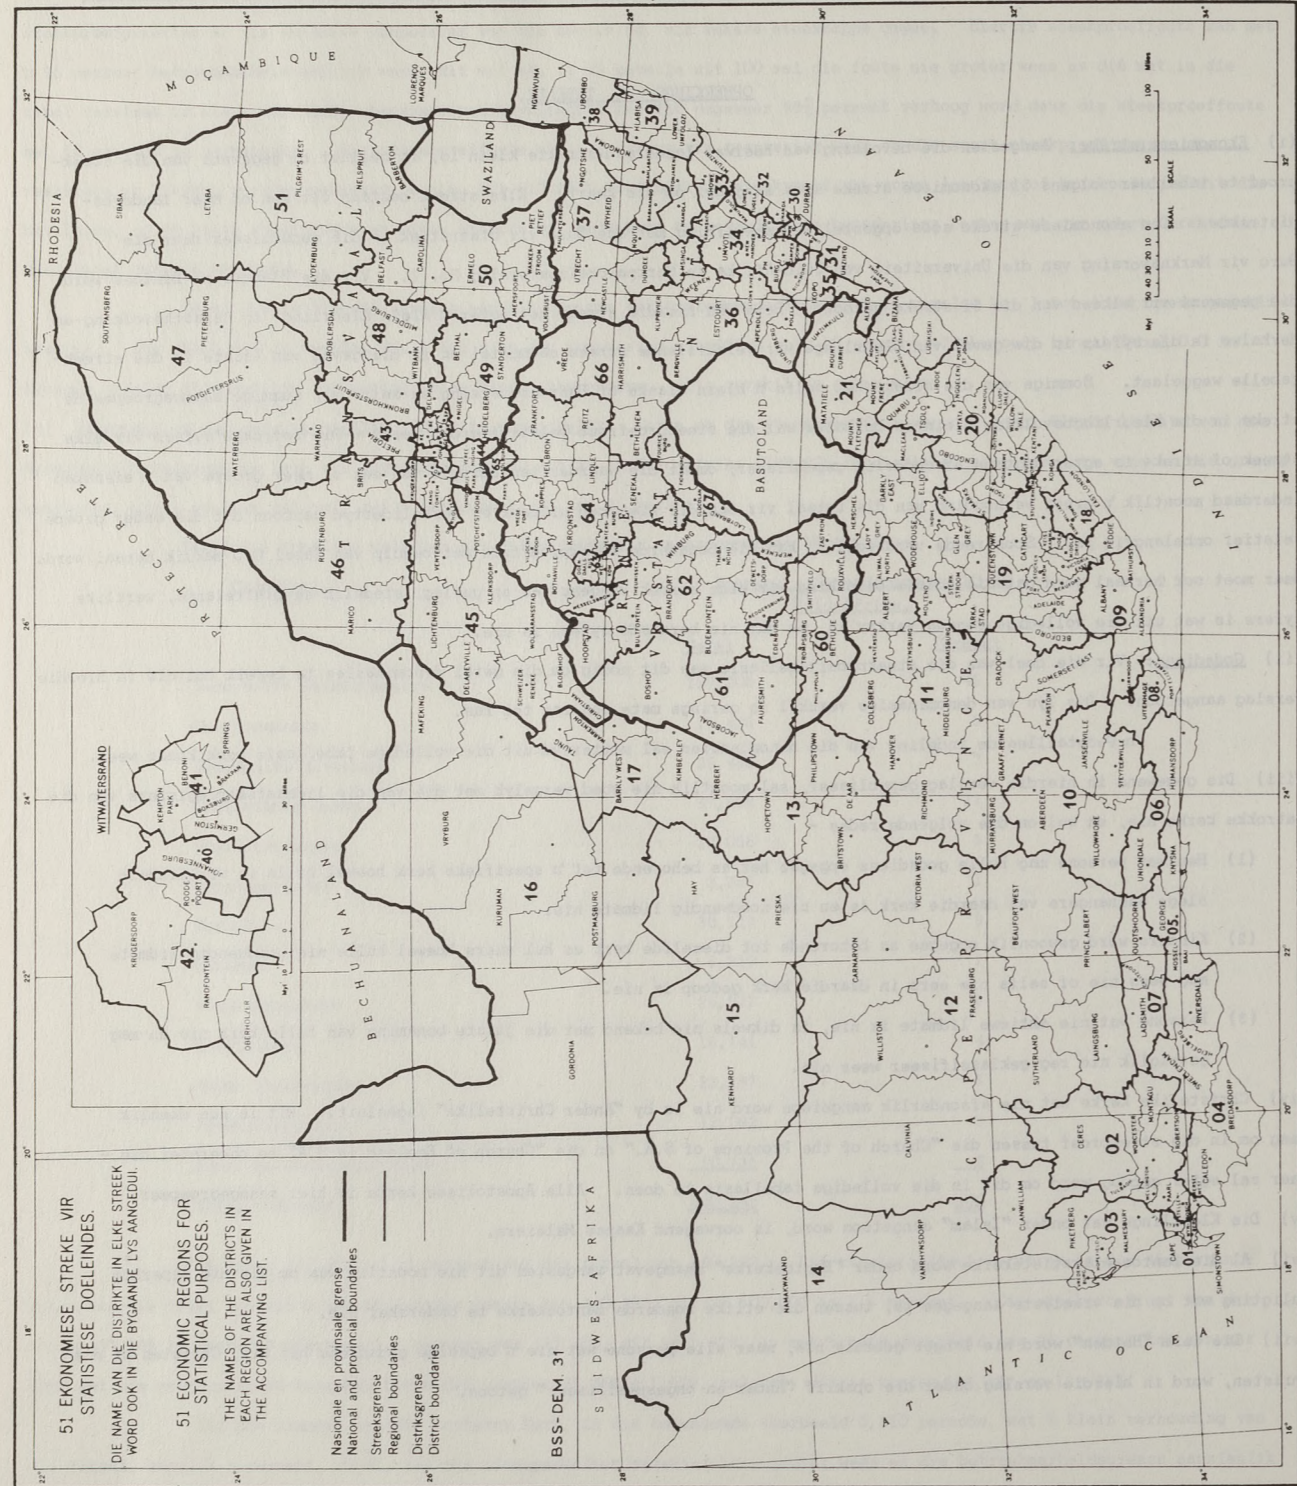

(iv) Christelike kerke wat nie afsonderlik aangetoon word nie is by "Ander Christelike" ingesluit. Dit is nie doenlik geag om in die steekproef tussen die "Church of the Province of S.A." en die "Church of England in S.A." te onderskei nie - daar sal egter gepoog word om dit in die volledige tabellering te doen. Alle Apostoliese kerke is hier saamgegroepeer.

(v) Die Kleurlinge wat onder "Islam" aangetoon word, is oorwegend Kaapse Maleiers.

(vi) Al die Bantoeeparatistekerke word onder "Bantoeekerke" saamgevat aangesien dit nie moontlik was om uit die beperkte inligting wat op die vraelyste aangegee is, tussen die etlike honderde Bantoeekerke te onderskei nie.

(vii) Die term "Heiden" word nie langer gebruik nie, maar alle persone wat nie 'n bepaalde godsdiens het nie, Christen of nie-Christen, word in hierdie verslag onder die opskrif "Ander en ongespesifiseer" getoon.
