

ONE LOVE PARTY MANIFESTO

The One Love Party aims to unite humanity for world peace and to explore the potential of every individual conscious being and their relation to the Universe, space & time. One Love seeks to promote love, open-mindedness and understanding for all individuals and their potential regardless of any perceived race or divisions and sensitively facilitate the growth of society's enlightenment. We believe that human consciousness is a force of nature and seek to guide it towards a positive and sensitive focus on the development of art, science and technology to aide in the fulfilment of human and natural potential for the pursuit of gregarious enjoyment.

One Love believes in encouraging all individuals in society to be educated to at least a tertiary level in particular to develop epistemological, analytical, nutritional and empathetic understandings. We believe education to be an investment in human capital that instigates long term benefits and growth across all society both economically and culturally. The One Love Party thus also seeks to investigate new technological innovations that may improve the learning capacity at all levels and ages.

Acknowledging a common relation of all human beings and interdependence of national economies and natural resources we seek for a global union of humanity to foster and plan for the greatest possible sustainable and peaceful state of the Earth. We are not limited by national borders and are for the unrestricted movement of people, commodities, goods, services and ideas in respect for all humanity to pursue and achieve a dignified and liberal existence Universally. We further seek to explore our Solar system and beyond to find resources and potential stations to insure the continued evolution of the human condition. One Love Party seeks to better understand climate changes and strategies for reacting to the potential impacts of both global warming or cooling. The One Love Party seeks the eventual unification of all sovereign national armed forces world-wide for the protection of the pursuit of liberty and enlightenment against both terrestrial and extraterrestrial risks.

We believe in providing healthcare and housing to all without stigma so that the entire populace may feel more secure. Hence we believe in inspiration and guidance above deprivation and desperation as being one of the strongest progenitors for individual and societal growth and success. The One Love Party strives to create conditions where all individuals may have opportunity to engage in benevolent competition and collaboration to excel to their maximum possible potential.

One Love is driven by a calling for kindness to all human beings and seeks to understand the perpetrators of crime and their motives to discover potential social or biological triggers for their behaviour and based on such findings provide humane rehabilitation and develop strategies to prevent future malicious acts.

We seek to identify and move away from irrational and redundant traditional beliefs, conditioning and legislations through an intellectual study of their initial adoption and their present limitations and potential dangers to the psychological and physiological state of society.

One Love Party believes in developing the state beyond short term economic and isolated legislative policies. We are for a forward thinking approach that is more sophisticated in considering the ramifications of the emotional and psychological impact of legislation, taxation and regulations that can inadvertently fragment and stress society.

The One Love Party strongly believes in the testing, investigation and the adoption of technological advancements including robotics, renewable energies and A.I. to mitigate the scarcity of resources and to provide infrastructure efficiently for the betterment of lifestyle, increased leisure time and access to information for all.
