Between 1st April, 1945, and 31st December, 1952, there was a net increase in unoccupied houses requisitioned by local authorities for residential purposes of 12,476 and a net decrease of 1,749 in January–March, 1953.

The number of operatives engaged on repair and maintenance to existing houses (including conversions, adaptations, extensions, etc.) was estimated to be 170,500 in May, 1952, the latest date for which figures are available.

Tables 7 and 8

Table 7 shows the numbers of sites at different stages from the initial stage of approval for housing to the stage when the site is available for construction of houses. Table 8 shows the number of houses at progressive stages towards completion.

In general a proposal to use a site for housing requires consideration from the point of view of regional and town planning, local transport facilities and so on. The site has then to be acquired, a layout agreed, and roads, sewers and other services provided. The actual construction of the houses themselves is the final process in the chain of production, which also, of course, comprises the fabrication of building materials and components ready for use.

The initial stages in the erection of houses such as the preparation of house plans, bills of quantities and the events leading to the acceptance of a tender are, in many cases, undertaken concurrently with the work of developing the sites.

Notes.—Source—Board of Trade.

(a) The amounts of softwood timber shown in the above table necessarily relate to all qualities and dimensions although only certain qualities and dimensions are normally used in building. Softwood timber is required for use in the repair and construction of ships, the repair and construction of goods vehicles, furniture, agricultural equipment, packing cases, etc. An allocation between the various uses of the supplies available each quarter is agreed inter-departmentally and implemented through the timber licensing machinery.

There is a marked variation during the course of the year in the monthly flow of imports into this country, due both to the logging seasons in the country of origin and to the freezing of the ports in the Baltic Sea and in the Gulf of St. Lawrence. Normally the bulk of imports arrive in this country in the latter part of the calendar year.

(b) Excludes sleepers, poles, pitwood and pulpwood.

(c) From April, 1949, quantities awaiting discharge at ports and certain stocks held by British Railways are not included. The amount in these categories which was included in the figures for March, 1949, was 33.6 thousand standards.

NOTES

1. An alphabetical index of Regions and Counties is shown on page 78.
2. The estimated population shown in Column (8) relates to 30th June, 1952, and includes members of the Armed Forces.
3. The figures given in this Appendix relate to the period from 1st April, 1945, and have been based on Progress Reports received from Local Authorities and New Towns Development Corporations up to 31st March, 1953, inclusive. The progress of Development Corporations is recorded under the counties in which they are situated.
4. Houses shown as being under construction or completed are included in the number of houses on tenders approved or on licences and approvals issued; otherwise, figures in each column are not included in any other column.
5. The data shown for each Metropolitan Borough excludes housing provision made by the London County Council.
6. The numbers of houses on licences issued or approved under Section 94 of the Housing Act, 1936 (as amended by Section 8 of the Housing (Financial Provisions) Act, 1938), under construction and completed by Housing Associations are included in Columns (3), (4) and (5) respectively. The numbers of such houses included in Columns (3), (4) and (5) are shown at the foot of each page for each Local Authority concerned.
7. The total number of dwellings on licences and approvals issued (Column (10)) relates both to new dwellings and to rebuilt war destroyed dwellings. Approvals for the erection of new dwellings include those built under the Housing (Financial Provisions) Act, 1938 (Section 3), and houses approved before 1st February, 1947, on which the work was done without valuable consideration.

The total number of dwellings shown in Column (10) takes into account licences and approvals reported as having lapsed.
8. The number of houses on licences issued at the request of New Towns Corporations for erection for private owners in the New Towns are included in Column (10) against the name of the Local Authority or Authorities in whose area the New Town is situated. The position at the end of June, 1953, was as follows:—

	<i>Family Units of accommodation provided</i>

TEMPORARY HOUSES

The total number of temporary houses allocated to local authorities was 124,455 and the programme was completed in December, 1948. In addition, 515 temporary houses were allocated to Government Departments. This programme was completed in January, 1949.

REQUISITIONED PROPERTIES

A total of 33,345 flats and houses of 12 rooms or less was released from occupation by the Services and Government Departments over the period 1st May, 1945, to 30th June, 1953. Some of the dwellings on release were taken over by the local authorities.

The total number of requisitioned dwellings held by local authorities for residential purposes was 76,815 at the end of June; of these 53,684 were situated in the London Region.

Between 1st January, 1948, and 31st March, 1953, there has been a net decrease in unoccupied houses requisitioned by local authorities for residential purposes of 17,048, and a net decrease in the period April to June, 1953, of 1,840.

SERVICE CAMPS—TEMPORARY ACCOMMODATION

In addition to accommodation already referred to, there were at 30th June, 1953, 34,537 families occupying accommodation in 1,490 camps redundant to the needs of the Services or Government Departments, which had been offered to local authorities for housing purposes and were considered suitable for those purposes. In the main these camps had been taken over by local authorities as part of their pool of housing accommodation or were being managed by them on behalf of the Ministry of Housing and Local Government.

Those family units of accommodation included in the number quoted above that are shown in the Summary on page 4, are at least up to the standard of the temporary accommodation already included in the Summary.

Accommodation for a further 109 families was occupied in 27 camps which are still required for Government purposes, or are unsuitable for housing, or are still subject to decision as to their future use.

HOUSES LET TO COAL MINERS AND AGRICULTURAL WORKERS

The number of new permanent and temporary houses built by local authorities that have been let to miners and agricultural workers up to the end of June, 1953, was as follows:—

	<i>Permanent Houses</i>	<i>Temporary Houses</i>	<i>Permanent Houses</i>	<i>Temporary Houses</i>
April-June, 1953 ...	2,673	—	689	—
Total to end June 1953	59,893	2,508	34,033	1,005

The total numbers of houses let to agricultural workers and coal miners relate to the periods from 1st April, 1945, and 1st April, 1947, respectively.

HOUSING LABOUR FORCE

The following are estimates of the number of male operatives aged 16 and over employed on the construction of new permanent houses and the preparation of housing sites in England and Wales at the dates stated.

<i>31st December 1952</i>	<i>31st March, 1953</i>	<i>30th June 1953</i>
250,100	269,600	272,900

The figure for 30th June, 1953, is provisional and liable to alteration.

These figures do not include the number of building and civil engineering workers directly employed by local authorities. The number of such workers in England and Wales was 20,422 in June, 1953.

Tables 7 and 8

Table 7 shows the numbers of sites at different stages from the initial stage of approval for housing to the stage when the site is available for construction of houses. Table 8 shows the number of houses at progressive stages towards completion.

In general a proposal to use a site for housing requires consideration from the point of view of regional and town planning, local transport facilities and so on. The site has then to be acquired, a layout agreed, and roads, sewers and other services provided. The actual construction of the houses themselves is the final process in the chain of production, which also, of course, comprises the fabrication of building materials and components ready for use.

The initial stages in the erection of houses such as the preparation of house plans, bills of quantities and the events leading to the acceptance of a tender are, in many cases, undertaken concurrently with the work of developing the sites.

Notes:—Source—Board of Trade.

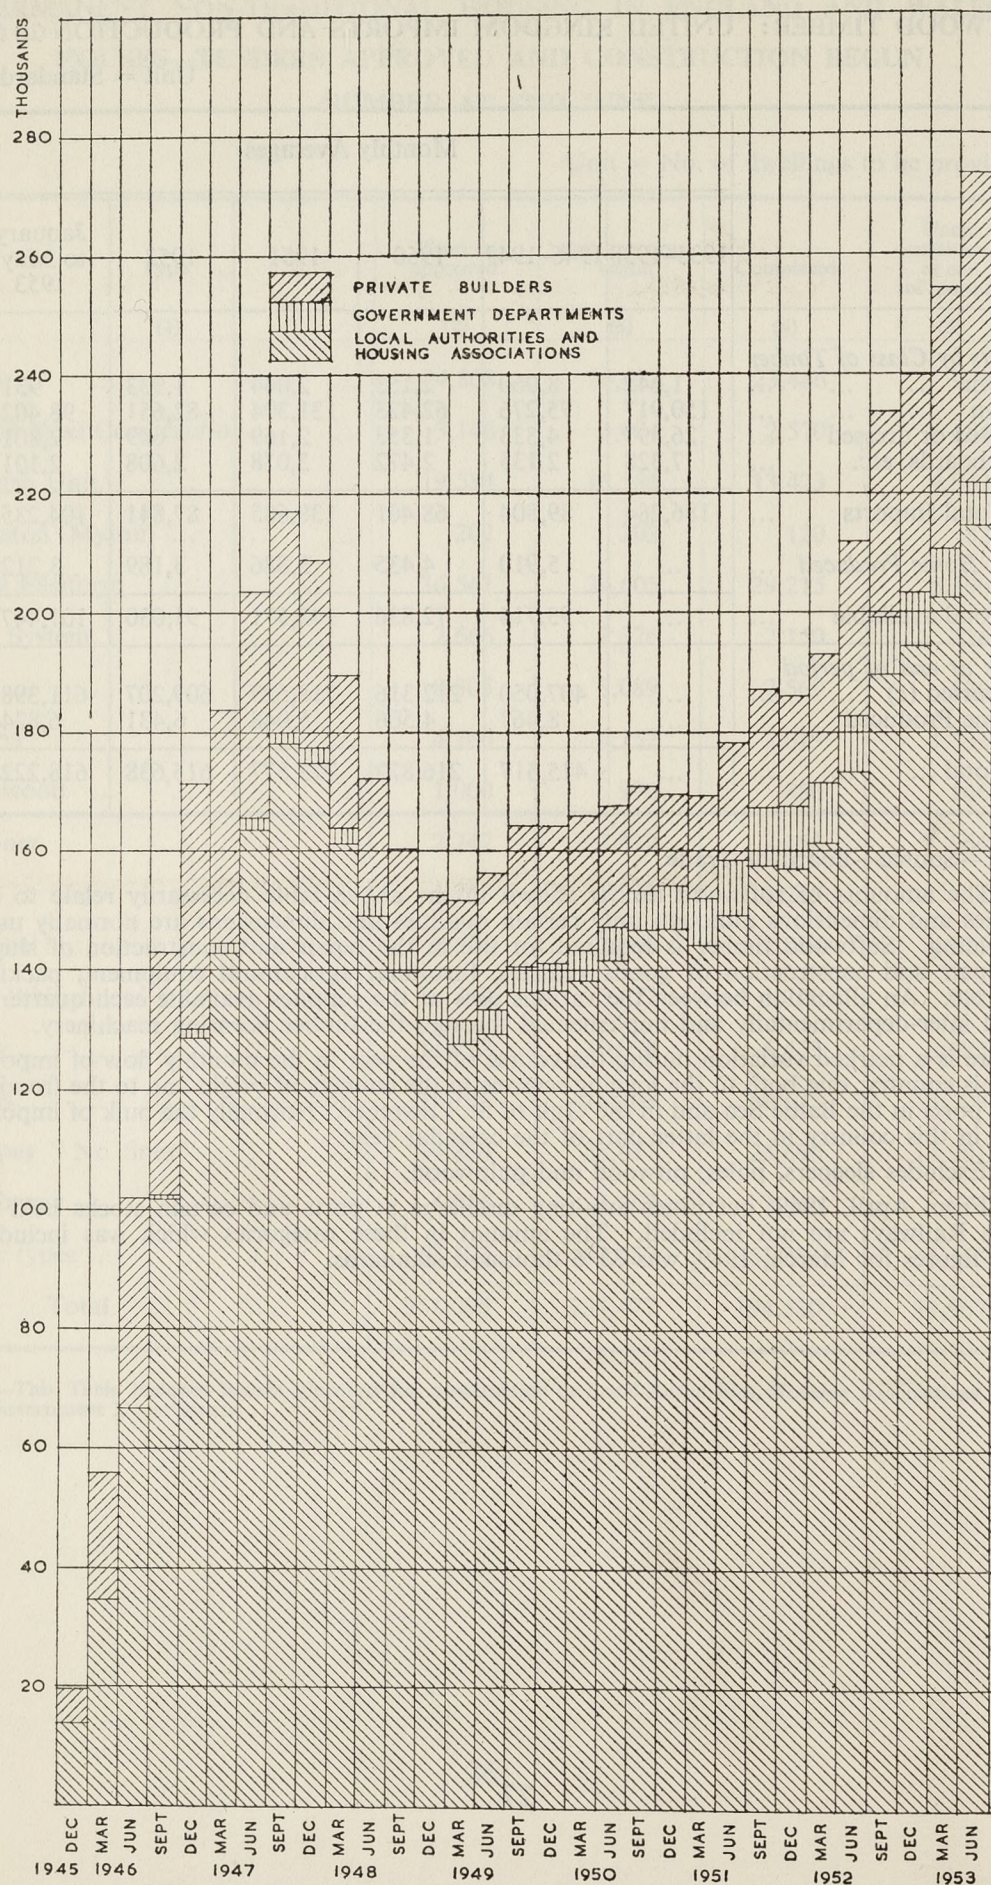

(a) The amounts of softwood timber shown in the above table necessarily relate to all qualities and dimensions although only certain qualities and dimensions are normally used in building. Softwood timber is required for use in the repair and construction of ships, the repair and construction of goods vehicles, furniture, agricultural equipment, packing cases, etc. An allocation between the various uses of the supplies available each quarter is agreed inter-departmentally and implemented through the timber licensing machinery.

There is a marked variation during the course of the year in the monthly flow of imports into this country, due both to the logging seasons in the country of origin and to the freezing of the ports in the Baltic Sea and in the Gulf of St. Lawrence. Normally the bulk of imports arrive in this country in the latter part of the calendar year.

(b) Excludes sleepers, poles, pitwood and pulpwood.

(c) From April, 1949, quantities awaiting discharge at ports and certain stocks held by British Railways are not included. The amount in these categories which was included in the figures for March, 1949, was 33.6 thousand standards.
