VOORWOORD.DIE INDUSTRIELE KLAASSIFIKASIE VAN DIE EKONOMIES
BEDRYWIGE BEVOLKING.

(Voorlopige opsomming van die 1946 -sensus).

Onderstaande voorlopige verslag toon volgens ras en geslag die getal persone in die Unie opgeneem by die Bevolkingsensus van Mei 1946, geklassifiseer volgens die nywerheid of gebied van ekonomiese bedrywigheid waarin hulle werkzaam is.

Die nie-werkende (nie-ekonomiese bedrywige) bevolking wat in die opsommingstabellie van hierdie verslag aangetoon word, is ook in aamerking geneem met die doel om dit met die Unie se bevolkingsyfers te laat klop. (Tabelle 8 tot 11).

Vir die doel van vergelyking word die syfers van die 1936-sensus, volgens geslag, vir die blanke, aziate en gekleurde rasse aangegee. Die industriële klassifikasie van Asiatis en gekleurde persone word in meer besonderhede aangegee as dié wat in Volume VII van die bevolkingsensus-reeks van 1936 gepubliseer is ("Beroepe en Nywerhede - U.G. No. 11 van 1942").

In 1936 is daar nie probeer om 'n industriële klassifikasie ten opsigte van naturelle te maak nie, hoewel 'n breedvoerige beroepsklassifikasie van die naturellebevolking in die Unie en in die vernaamste stedelike gebiede in Volume IX gepubliseer is. ("Naturelle (Bantoes) en ander nie-blanke rasse" - U.G. No. 12 van 1942).

Daar dien uitdruklik op gelet te word dat volgens die beroepsklassifikasie van naturelle vroue in 1936, 1,659,349 opgeneem is as ekonomiese bedrywig in landbouberoep en 410,110 opgeneem is as afhanklike van wie 312,048 huishoudelike pligte tuis vervul het. In daardie jaar was alle naturelle vroue in die naturellereserves (van 10 jaar en ouer) geklassifiseer as bedrywig in landbou. Volgens die 1946-beroepeklassifikasie was 667,618 naturelle vroue (van 10 jaar en ouer) egter as bedrywig in landbou geklassifiseer en 1,593,947 as afhanklike van wie 1,262,172 huishoudelike pligte vervul het. Ongeveer een miljoen naturelle vroue van 10 jaar en ouer in die naturellereserves is in die 1946-sensus as afhanklike opgeneem en as sodanig geklassifiseer en nie as persone wat in landboudiens is nie.

Dit is miskien 'n betwissbare stelling of hulle juister as afhanklike wat huishoudelike pligte vervul, geklassifiseer moet word, aangesien die meeste naturelle vroue, veral in die reserves, ten minste deeltyd in landboudiens is. Afgesien van landboupligte soos ploeg, skoffel en die uitroei van onkruid en oes, word baie tyd bestee aan die versorging van die kinders, voorbereiding van voedsel (soos byvoorbeeld die maal van meel), die aandra van water en die bymekarmaak van brandhout. Daar word konserwatif en nie amptelik geskat dat nie meer as een-kwart en waarskynlik minder van die getal werkdae in die jaar deur naturelle vroue in die reserves aan landbouwerk bestee word nie.

Vir 'n noukeurige vergelyking met die 1936-syfers, met betrekking tot beroepe van naturelle vroue, sal dit nodig wees om ongeveer eenmiljoen by die landboubedryf te voeg en hierdie syfer van die afhanklike (huishoudelike pligte) af te trek.

P R E F A C E .

THE INDUSTRIAL CLASSIFICATION OF THE ECONOMICALLY ACTIVE POPULATION.

(Preliminary Summary of the 1946 Census).

The following preliminary report shows, by race and sex, the number of persons enumerated in the Union at the Population Census of May, 1946, classified according to the industry or sphere of economic activity in which they were employed.

The non-working (not economically active) population, shown in the summary tables of this report, is also taken into account for purposes of balancing with the Union's population figures. (Tables 8 to 11).

For purposes of comparison, the 1936 census figures are shown by sex, for the European, Asiatic and Coloured races. The industry classification of Asiatics and Coloured persons is given in much greater detail than that published in Volume VII of the 1936 Population Census series ("Occupations and Industry - U.G. No. 11 of 1942").

In 1936 no industry classification was attempted for natives, although a detailed occupation classification of the native population in the Union and in the principal urban areas was published in Volume IX ("Natives (Bantu) and Other Non-European Races" - U.G. No. 12 of 1942).

It should be expressly noted that according to the occupation classification of native females in 1936, 1,659,349 were enumerated as economically active in agricultural occupations and 410,110 were enumerated as dependants of whom 312,048 were on household duties at home. In that year, all native females in the native reserves (of 10 years and over) were classified as being occupied in agriculture. According to the 1946 occupation classification, however, 667,618 native female occupations (of 10 years and over), were classified as agricultural occupations and 1,593,947 as dependants of whom 1,262,172 were on household duties. Approximately one million native females aged 10 years and over in the native reserves were enumerated in the 1946 census as dependants and classified as such and not as occupied in agriculture. Whether they are more correctly classified as dependants on home duties is perhaps a debatable point, as most native females, particularly in the reserves, are engaged at least part time in agriculture. Apart from agricultural duties, such as, plowing, hoeing and weeding and harvesting, much time is devoted to care of the children, preparation of food (for example, grinding of meal), hauling of water and gathering of firewood. It is conservatively and unofficially estimated that not more and probably less than one-quarter of the number of working days in the year is devoted by native females in the reserves, to agricultural work.

For a strict comparison with the 1936 figures in respect of native female occupations, it would be necessary to add approximately one million to the agricultural industry and deduct this figure from dependants (household duties).

I N L E I D I N G .

1. OUDERDOMSGRENS VAN DIE EKONOMIES-BEDRYWIGE BEVOULKING.

Vir blankes, asiate en kleurlinge, word die werkende of ekonomies-bedrywige bevolking geag uit persone van 15 jaar en ouer en vir naturelle, 10 jaar en ouer te bestaan. Geen boonste ouderdomsgrens is vir die werkende bevolking gestel nie, maar alle persone wat hulle opgegee het as persone wat 'n bepaalde beroep uitvoer (met uitsondering van naturellevroue in die reservewes wat in 1936 opgeneem is, sien voorwoord), asook persone wat gemeld het dat hulle "werkloos" is, is by die werkende bevolking ingesluit. Persone wat uit ekonomies-bedrywige beroepe afgetree het, gepensioeneerde ens., asook afhanklikes, ens., is natuurlik by die nie-ekonomies aktiewe bevolking ingesluit.

2. AARD VAN KLASSEFIKASIE: Hierdie verslag handel oor die industriële klassifikasie van die werkende of ekonomies bedrywige bevolking, d.w.s., 'n klassifikasie van gebiede of takke van ekonomiese aktiwiteit waarin die bevolking in diens staan. Persone word volgens tipes aktiwiteit van die inrigting waarin hulle werk, afgesien van die aard van die werk wat hulle doen gegroepeer. Dit is 'n klassifikasie volgens "bedrywe" in die breëre sin van die woord, en nie volgens beroepe of handelsartikels nie. Ook is dit nie 'n klassifikasie volgens die soort eiendomsreg nie (soos byvoorbeeld die regering, 'n maatskappy of 'n private individu) of volgens industriële status nie (soos byvoorbeeld werkgever, werknemer of onbetaalde gesinswerker).

So word tipiese bankberoepes soos bankiers, bankkassiers, bankklerke byvoorbeeld onder Banke (groep 620) gegroepeer, asook nie-tipiese bankberoepes soos regseleerde, tiksters, bodes in diens van 'n bank. Eweneens kan ons vind dat, afgesien van gereelde of tipiese goudmynberoepes, geneeskundige praktisys, vragmotor-bestuurders en groenteboere onder die goudnywerheid gegroepeer word as laasgenoemde persone in diens van hierdie nywerheid staan. Aan die ander kant word inrigtings, organisasies of handelsondernemings wat aan die Regering of plaaslike besture behoort of deur hulle bestuur word, volgens hul industriële aard en nie noodwendig onder "regeringsdienste" geklassifiseer nie. Onderwysers in diens van die Regering word byvoorbeeld onder groep 821 geklassifiseer - Opvoedkundige Dienste (saam met die personele en ander werknelmers in diens van universiteite en private skole, ens.), en die personeel van elektriese sentrales, afslaars by produktemarke of busbestuurders in diens van munisipaliteite word byvoorbeeld nie onder plaaslike besture geklassifiseer nie maar onder die gepaste bedryfsgroep. Die industriële klassifikasie van "regeringsdienste" (81) is wesenlik beperk tot die administratiewe werksaamhede van die Regering op alle trappe en sluit nie regeringswerksaamhede soos vervoer, verbinding, opvoeding, produksie, bemarking, ens., in nie.

Daar dien uitdruklik op gelet te word dat die getal persone wat onder sekere industriële klassifikasie aangegee word, veral met betrekking tot sekere groepe, slegs as naastenby korrek beskou moet word. In sekere gevalle kan hulle heelwat onjuisthede openbaar weens die feit dat die persone wat die vrae moes beantwoord, in gebreke gebly het om die beroep of nywerheid waarin hulle werk, of albei, genoegsaam of korrek te beskryf. Vir 'n breër uiteensetting van die moeilikhede wat in die klassifikasie van persone volgens bedrywe en beroepe teengekom word, word die leser verwys na Volume VII van die bevolkingsensus van 1936 ("Beroepe en Nywerhede" - 1936: U.G. No. 11 van 1942).

Daar word egter gemeen dat die inligting wat verstrek is, in die algemeen voldoende betroubaar is en dat die gevalle wat hierbo genoem is of betreklik seldsaam is of numeriek nie belangrik genoeg is om die betrouwbaarheid van die syfers wesenlik te raak nie.

6

DIE
NG

FRIKA

G

iii Basis van klassifikasie: Die beskrywing van die verskillende takke of gebiede van ekonomiese bedrywigheid (soos uiteengesit op bladsye 22 tot 25), is wesenlik op die Volkebond se klassifikasie wat in 1938 gepubliseer is, gebaseer. Hierdie klassifikasie is nou vervang deur dié wat in 1948 deur die Organisasie van die Verenigde Nasies gepubliseer is. ("International Standard Industrial Classification of all Economic Activities" - aanbeveel deur die Ekonomiese en Maatskaplike Raad van die Verenigde Nasies).

Hoewel die Volkebond se beskrywing of bestek (1938) van die verskillende takke van ekonomiese aktiwiteit in hierdie verslag behou is (ten opsigte van die bevolkingsensus van 1946), is 'n poging aangewend om hulle te hergroep om vir sover moontlik aan die Industriële Standaardklassifikasie van 1948 te voldoen en om sodende verbeterde basis vir internasionale vergelyking van nasionale statistieke te verskaf. As gevolg van sekere fundamentele veranderings in laasgenoemde klassifikasie was die poging nie heeltemal geslaag nie.

In die Internasionale Industriële Standaardklassifikasie word die verskillende takke van ekonomiese bedrywigheid in Afdelings, Hoofgroepe en Groepe verdeel, wat onderskeidelik deur getal syfers 1, 2 en 3 aangedui word. Die afdelings is onderverdeel in hoofgroepe en laasgenoemde weer op hul beurt in groepe. Die aanduidings- of kodenommers word teenoor elke klassifikasie aangegee (sien bladsye 22 tot 25).

In 'n groot aantal gevalle kom die herindeling van die Volkebond-klassifikasie volgens die Standaardklassifikasie eenvoudig neer op 'n hergroepering van die individuele klassifikasie, of binne die groepe, binne hoofgroepe of binne afdelings wat dus nie die betroubaarheid van of vergelyking tussen die syfers wat die groep uitmaak, raak nie. Enkele van die vernaamste veranderings weens die hergroepering van die gegewens was as volg: (a) Elektrisiteit, gas, hitte en water; (b) Wasserydienste - skoonmaak en kleur; en (c) Fotografie (as 'n saamstellende deel van die vervaardiging van papier en papierprodukte en hier veronderstel om minstens gedeeltelik kommersiële fotografie te dek) is voorheen geklassifiseer onder vervaardiging maar word nou onderskeidelik by Afdeling 5 ingesluit - elektrisiteit, gas en water en in Hoofgroep (Persoonlike Dienste) onder onderskeidelike groepe 844 en 846.

Aan die ander kant verskil die bestek van die industriële standaardklassifikasie van sekere groepe en hoofgroepe soos aangedui deur die kodenommers, in 'n aantal ander gevalle in 'n meerder of mindere mate van die beskrywing of bestek van die Volkebond-klassifikasie soos aangetoon. Aangesien dit nie moontlik gevind is om die syfers vervat binne 'n groep uit die ou by die nuwe klassifikasie aan te pas nie, is hulle ingedeel op die manier wat geag word die beste aan die vereistes sal voldoen.

In Internasionale industriële klassifikasie is natuurlik nie noodwendig die geskikste vir enige bepaalde land nie. Die basiese klassifikasie is in sommige gevalle uitgebrei en in ander gevalle saamgetrek om in die eerste plek aan die Unie se vereistes te voldoen. Die groepklassifikasie is in gevalle uitgebrei waar nywerhede as belangrik of belangwekkend genoeg geag word om aparte indelings te regverdig; in ander gevalle waar hulle van min belang is, is hulle nie apart aangedui nie.

'n Woordjie van verduideliking is nodig ten opsigte van die kodenommers wat op bladsye 22 tot 25 aangegee word. 'n Voorvoegsel voor 'n kodenummer (a, b, ens.), toon aan dat die basiese pf internasionale klassifikasie deur verdere ondervordeling uitgebrei is, byvoorbeeld, Groep 122 - "metaalmyne uitgesondert ystermyne", is in (a) goudmyne en (b) ander metaalmyne verdeel.

In Agtervoegsel (x) na 'n kodenummer toon aan dat die bestek van die groep soos aangedui deur die kodenummer en vergelyk met die beskrywing van die item nie presies identies is nie. Die industriële standaardklassifikasie vir suivelprodukte (groep 202) sluit byvoorbeeld roomys in terwyl hierdie handelsartikel in groep 208 (tesame met lekkers en sjokolade) aangedui word.

iv. Vergelyking met 1936: Die industriële of bedyrfsklassifikasie wat in 1936 gebruik is, stem in die meeste opsigte ooreen met dié van 1946. In 'n aantal gevalle is die gegewens egter nie streng vergelykbaar nie. Op bladsye 26 van hierdie verslag word 'n aanduiding gegee van die gebrek aan vergelykbaarheid tussen die twee stelle syfers.

G

INTRODUCTION.

i. AGE LIMIT OF ECONOMICALLY ACTIVE POPULATION.

For Europeans, Asiatics and Coloureds, the working, or economically active population is considered to consist of persons of 15 years and over and for Natives, 10 years and over. No upper age limit has been taken for the working population, but all persons who returned themselves as following a definite occupation (with the exception of native females enumerated in the reserves in 1936, see Preface), and also persons who returned themselves as "unemployed" are included in the working population. Persons retired from economically active occupations, pensioners, etc., as well as dependants, etc., are of course, included in the non-economically active population.

- ii. NATURE OF CLASSIFICATION: This report deals with the industrial classification of the working or economically active population, that is, a classification of spheres or branches of economic activity in which the population is employed. Persons are grouped by types of activities of the establishment in which they work, irrespective of the nature of the work they do. It is a classification by "industries" and not by occupations or commodities. Nor is it a classification by kind of ownership (for example, government, company or private individual) or by industrial status (for example, employer, employee or unpaid family worker).

Thus, e.g., typically banking occupations, such as banker, bank teller, bank clerk will be grouped under Banking (group 620), as well as non-typically banking occupations such as lawyers, typists, messengers in the employment of a bank. Similarly, one may find, apart from regular or typical gold mining occupations, medical practitioners, truck drivers and market gardeners, grouped with the gold mining industry if the latter persons are employed by that industry. On the other hand, Government or local government owned or operated institutions, organisations or trading departments are classified according to their industrial nature, and not necessarily under "government services". Government employed teachers, for example, are classified in group 821 - Educational Services (together with the staffs and other employees of universities and private schools, etc.), and power station personnel, produce market auctioneers or bus drivers, for example, in the employment of municipalities, are not classified under local government, but in the appropriate industry group. The industry classification of "Government Services" (81) is essentially confined to administrative activities of the government at all levels and does not include governmental activities such as, transport, communication, education, production, marketing, etc.

It should be expressly noted that the number of persons shown as falling within certain industry classifications, particularly with respect to certain groups, must be considered as approximately correct only. In some instances they may be appreciably in error, due to the fact that respondents have failed to describe their occupation or industry in which employed or both, adequately or correctly. For a fuller exposition of the difficulties encountered in the classification of persons according to industry and occupations, the reader is referred to Volume VII of the 1936 Population Census ("Occupations and Industry" - 1936: U.G. No. 11 of 1942).

It is considered, however, that in general, the information furnished is sufficiently reliable and that such cases as referred to above, are either relatively infrequent or not of sufficient importance, numerically, to affect the reliability of the figures materially.

- iii. Basis of Classification: The description of the various branches or spheres of economic activity (set out on pages 43 to 46), is essentially based on the League of Nations Classification published in 1938. This classification has now been superseded by that published by the United Nations Organisation in 1948. ("International Standard Industrial Classification of All Economic Activities" - recommended by the Economic and Social Council of the United Nations).

Although the League of Nations (1938), description or coverage of the various branches of economic activity has been maintained in this report (in respect of the 1946 population census), an attempt has been made to re-list them to conform, as far as possible, to the Standard Industrial Classification of 1948, thus affording an improved basis for international comparison of national statistics. Because of certain fundamental changes in the latter classification, the attempt has not been entirely successful.

In the International Standard Industrial Classification, the various branches of economic activity are divided into Divisions, Major Groups and Groups, identified by 1, 2 and 3-digit numbers, respectively. The Divisions are subdivided into Major Groups, and the latter, in turn, into Groups. The notations or code numbers are shown against each classification (see pages 43 to 46).

In a large number of instances, the re-listing of the L. of N. classification to the Standard Classification simply amounted to a re-grouping of the individual classifications, either within the groups, within major groups or within divisions thus not affecting the reliability of or comparison between the figures composing the groups. Some of the major changes due to re-grouping of the data were as follows: (a) Electricity, Gas, Heat and Water; (b) Laundry Service - cleaning and dyeing, and (c) Photography (as a constituent part of the manufacture of Paper and Paper Products and assumed here to cover, at least in part, commercial photography) were formerly classified in Manufacturing, but are now identified in Division 5 - Electricity, gas and water, and in Major Group (Personal Services) in groups 844 and 846, respectively.

On the other hand, in a number of other instances, the standard industrial classification coverage of certain groups and major groups, as indicated by the code numbers, differ to a greater or lesser extent from the description or coverage of the L. of N. classification, as shown. As it has not been found possible to adjust the figures contained within a group from the old to the new classification, they have been listed in such a way as is considered would most nearly meet the requirements.

Naturally, any international industrial classification is not necessarily best suited for any one country. The basic classification has been extended in some cases and contracted in others primarily to suit the Union's requirements. The group classification has been extended in cases where industries are considered to be of sufficient importance or interest to warrant separate listings, in other cases, where they are of little importance, they have not been separately identified.

A word of explanation is required in respect of the code numbers shown on pages 43 to 56. A prefix shown before a code number (a, b, etc.) denotes that the basic or international classification has been extended by further sub-division. For example, group 122 - "metal mining except iron ore mining" has been divided into (a) gold mining and (b) other metal mining. A suffix '(x)' following a code number denotes that the coverage of

Totaal - Total	88.9	62.9(37.5)	76.2(63.9)	83.9	64.9	79.6

1/ 10 jaar en ouer in geval van Naturelle.

1/ 10 years and over in respect of Natives.

2/ Kyk na opmerkings in Voorwoord. Met die doel om 'n meer direkte vergelyking tussen die jare 1946 en 1936 te verkry van die Naturelle en totale ekonomies bedrywige bevolking, is 'n beraming van een miljoen Naturellevroue, in 1946, in tabel (a) bygetel.

Die persentasies wat in tabel (c) in hakies aangetoon word sluit die miljoen Naturellevroue uit indien hulle as nie ekonomies bedrywig beskou word nie, maar as afhanglike met huishoudelike pligte.

2/ See remarks in Preface. For purposes of more direct comparison of the Native and total economically active population in 1946 and 1936, an estimate of one million Native Females have been added to table (a) above, for the year 1946.

The percentages shown in brackets in table (c) exclude the one million Native Females, if they are considered as not economically active, that is as dependants on household duties.

Ander houtware (nie meubels nie) en mandjie ware

Vervaardiging van Meubels:

Vervaardiging van Papier en Papierprodukte:

Drukwerk en Boekbindery:

Vervaardiging van Leer en leerware (nie skoeisel nie):

Looi en toebereiding van huide, velle en leer

Vervaardiging van leerware (nie skoeisel nie)

Vervaardiging van Rubber:

Vervaardiging van chemikalië en chemiese produkte:

Chemikalië - vervaardiging van sure, kleur, dip, mis, looistowwe (311); en verfstowwe, vernis, skoonheidsmiddels (319); ens.

Springstowwe

Vuurhoutjies

Seep, kerse, politoer, ens.

Vervaardiging van Mineraalbrandstof:

Petroleumraffinaderye en olieskaliedistileerde

Verwerking van Nie-Metaalhoudende Minerale:

Bakstene, teels (331); glas (332); potte, porselein en erdeware (333), ens.

Sement (334); kalk, beton, kunssteen (339); en asfalt, teerdakwerk (329), ens.

Vervaardiging van Yster en Staal:

Vervaardiging van Metaalprodukte (nie masjienerie en voertuie nie):

Metaalprodukte, algemeen

Grofsmede, slottemakers, monteurs, bankworkers, tinworkers

Vervaardigings en herstel van masjienerie (nie elektris nie), ens.

Vervaardiging en herstel van Elektriesse masjines, ens.:

Vervaardiging van Vervoersmiddels

Vervaardiging en herstel van skepe en bote

Vervaardiging en herstel van lokomotiewe en rytuie en toerusting

Vervaardiging en monteer van motorvoertuir, fietse

Herstel van motorvoertuie en fietse

Vervaardiging en herstel van vleigtuie

Vervaardiging en herstel van ander voertuie

Diverse vervaardigingsbedrywe

Vervaardiging van wetenskaplike, genseeskundige en oogheekundige instrumente

Vervaardiging en herstel van klokke en horlosies

Vervaardiging van juweliersware en aanverwante artikels

Vervaardiging van musiekinstrumente (met inbegrip van fonograwe en plate)

Vervaardiging van speelgoed, spele, sportgoedere pype, roekbenodighede, besems en borsels, ens.

VERGELYKING TUSSEN 1946 EN 1936 KLAASSIFIKASIE.

COMPARISON BETWEEN 1946 AND 1936 CLASSIFICATION.

Die volgende opsomming gee 'n aanduiding van die veranderings in die klassifikasie sisteeme wat in 1946 en 1936 gesig is. As gevolg hiervan is in 'n meer of mindere mate die syfers vir 1946 en 1936 nie streng vergelykbaar nie.

The following summary gives an indication of the changes in the classification systems used in 1946 and 1936. As a result, the figures for 1946 and 1936 are to a greater or lesser extent not strictly comparable.

Klassifikasie Classification	In 1936 inbegrepe by Nommer. In 1936 included in Number	Klassifikasie Classification	In 1936 inbegrepe by Nommer. In 1936 included in Number
