REPORT

ON THE

Third Census of the Population of the Union, 3rd May, 1921.

PART IV.—MARITAL CONDITION AND FECUNDITY OF MARRIAGES.

1. **Questionnaire.**—The statistics contained in this part are derived from replies given by the European population of the Union to the following questionnaire:—

PARTICULARS AS TO MARRIAGE.	
If SINGLE (i.e. Never Married), insert the figure 1	State, for each MARRIED WOMAN entered on this Schedule, the number of:—
If MARRIED , insert the figure.....2	
If WIDOWED , insert the figure.....3	Completed Years the PRESENT MARRIAGE has lasted. (If no Children Born Alive, write "NONE" in column 8.)
If DIVORCED or JUDICIALLY SEPARATED , insert the figure.....4 (Figures only to be used.)	TOTAL CHILDREN BORN ALIVE. CHILDREN STILL LIVING.
6	7 8 9

The replies to column 6 furnish information which has been secured on the occasion of each previous census; but the statistics derived from columns 7, 8, and 9 represent the first attempt made in the Union to secure information as to the fecundity of marriages.

2. **Marital Condition.**—The tables dealing with this subject follow very closely those given in respect of the census of Europeans in 1918, and call for little explanatory comment. Identical particulars were asked for in the case of persons of coloured and mixed race in the Union, and the resulting statistics are included in Part VIII of this Report, dealing with the non-European sections of the population.

3. **Fecundity of Marriages.**—An examination of the forms after their completion showed that in the great majority of cases the questions had been understood, and had apparently been answered correctly. In a number of cases, however, the nature of the particulars entered gave cause for doubt, and considerable labour was expended in an investigation relating to the particulars given as to the issue of marriages with other details contained on the schedules. After this examination, some forms were found obviously wrong, and were rejected. This elimination was, however, limited to cases where the questions obviously had been misunderstood. Extreme cases found after examination to be not inconsistent with information contained elsewhere on the census schedule (e.g., age of mother and ages of children, etc.) were retained in the tabulated figures.

In some cases no particulars were filled in. Thus the number of marriages of Europeans included in the tables in this part dealing with fecundity is 261,404, while the number of all married women was 271,767. To have secured a complete record of every marriage would have been the ideal; but the value of the statistics is not reduced in any material way because they do not cover the whole of the marriages in the Union.

4. **Uses of Fertility Statistics.**—The labour and expense involved in the collection, examination, and tabulation of the information as to fecundity have been fully warranted. This will be admitted readily by those who have sought for information on the subject of the fertility of the race, and who up to the present time have been faced with a complete blank in this department of Vital Statistics in the Union. It is probable, however, that most persons have not given the subject sufficient thought, and have failed to realize that no investigations into present social conditions can be complete without definite knowledge of this character.

The mass of information resulting from this census inquiry is susceptible to close analysis, and, when further information of similar character is secured in future, deductions will be possible which will have the closest and most important bearing upon the evolution of society. These statistics can in fact be used now, partially, and even more in future years, as the basis for directing a definite course of sound policy, and preventing the aimless and ignorant drift which, in the absence of definite knowledge, would be almost inevitable. This is not the place in which to do more than state the point, but it may be observed as a simple fact that undoubtedly the greatest of the political problems of the present and of future generations will be that of population. Nor is it any longer sufficient to know the total population of a country and its territorial and, in this country as a special feature, its racial distribution. The facts have to be subjected to a far more close and intensive examination than has ever been deemed necessary in the past. Not least is it essential to face that aspect of the problem of the population which is revealed by the statistics in this Part. If these indicate, as they appear to do, for example, that 24 per cent. of the married women in the European population of the Union are responsible for 57 per cent. of the offspring of all marriages, can it be denied that there is the most urgent need to know the answers to questions such as those suggested below—answers that statistics alone can give? Is any tendency to comparative sterility widespread, or increasing? If so, in what sections of the people? Amongst people born in South Africa, or amongst immigrants? At what ages? In what circumstances? Has age at the time of marriage any marked significance? What proportion of the number of children born survive to maturity? Are these children in large or small families? Are they children of the poor, or the well-to-do? Of those in regular employment, or of the unemployed or improvident? Questions such as these, if they can be answered, can only be answered by the patient and skilful massing of material derived from Vital Statistics, such as those included in this part of the census. That the present statistics will give answers at once is, of course, quite impossible. But they provide information upon which future measurements can be based; and they will make it possible for coming generations to discover and to understand something of the laws which in the regions of biology, sociology, and economics are determining the evolution of the European race in this sub-continent. In course of time it may be possible, moreover, to extend statistics of this kind to other races, but the incompleteness of registrations of births and deaths amongst the non-European races renders this extension impossible at present.

5. Fecundity Statistics of Coloured Persons.—The particulars required as to the issue of marriages in the cases of married women of the coloured and mixed races were identical with those required of Europeans. Some allowance must be made for the tendency—greater in this class probably than in that of Europeans—to misunderstand the exact nature of the information desired. The forms were, however, submitted to careful scrutiny, and there is reason to believe that the tables give information which is substantially accurate. These tables are included in Part VIII of this Report, dealing with the census of the non-European sections of the population.

6. Derivative Information and Detailed Analysis.—In Part X of this Report is included a section dealing analytically with these

statistics, and presenting a series of derivative tables which have a definite interest and value. It must be repeated, however, that the greatest possible utility will only be experienced when statistics of a similar character are secured on the occasion of a future census, or perhaps preferably, because more systematically, more constantly, and more accurately, under a revised scheme of statistical information derived from birth registrations.

C. W. COUSINS,
Director of Census.

Office of Census and Statistics,
Pretoria,
January, 1923.

VERSLAG

VAN DE

Derde Volkstelling van de Unie, 3 Mei 1921.

DEEL IV.—ECHTELIKE KONDITIE EN HUWELIKSVRUCHTBAARHEID.

1. Questionnaire.—De opgaven in dit deel vervat, zijn verkregen van antwoorden door de europeesche bevolking van de Unie op de volgende questionnaire gegeven:—

VERHOUDING TOT DIE HUWELIKSTAAT.

Ten opsigte van elke GETROUDE VROU in hierdie Skedule meld die getal:			
Voltotende Jare wat die BESTAANDE HUWELIK.	Kinders Lewendig Gebore uit die BESTAANDE HUWELIK. (As geen Kinders Lewendig Gebore word, skryf "GEEN" in kolom 8.)	GETAL KINDERS LEWENDIG GEBORE.	KINDERS NOG AAN LEWE.
Vir ONGETROUD (d.i., Noot Getroud) vul in die syfer.....	1		
Vir GETROUD, vul in die syfer.....	2		
Vir WEDEWEE (WE-NAAR), vul in die syfer.....	3		
Vir GESKEI (EGSKEIDING OF GESKEI VAN TAFEL EN BED), vul in die syfer.....	4		
(Vul nikas as syfers in.)			
6	7	8	9

De antwoorden in kolom 6 verschaffen informatie, welke ook bij vorige tellingen was opgevraagd; doch de opgaven, getrokken uit kolommen 7, 8 en 9 vertegenwoordigen de eerste poging, in de Unie gemaakt, om informatie in te zamelen betreffende huweliksvruchtbaarheid.

2. Echtelike Konditie.—De tabellen, welke over dit onderwerp lopen, houden nauw verband met die, gegeven ten opsigte van de Census van Europeanen in 1918, en hebben weinig toelichting nodig. Soortgelijke bieuonderheden werden opgevraagd in geval van personen van kleurling en gemengd ras in de Unie, en de resulterende opgaven zijn in Deel VIII van dit Verslag opgenomen, dat over de non-europeesche bevolkingsafdeling handelt.

3. Huweliksvruchtbaarheid.—Een onderzoek van de vormen, na hun invulling, toonde dat in de meeste gevallen de vragen verstaan en klaarlijkelijk correct waren beantwoord. In sommige gevallen echter, gaf de aard van de ingevulde bieuonderheden aanleiding tot twijfel en een onderzoek van de opgaven betreffende kinderen uit het huwelik geboren en van andere gegevens, voor komende op de schedule, kostte veel tijd. Na dit onderzoek was het duidelijk, dat sommige vormen verkeerd waren ingevuld en deze werden verworpen. Dit buiten rekening laten was echter beperkt tot gevallen waar de vragen klaarlijkelijk misverstaan waren. Verdachte gevallen, welke na onderzoek bevonden werden niet onbestaanbaar te zijn met elders gegeven informatie op de schedule (d.i. ouderdom van moeder en leeftijd van kinderen, enz.) werden in de tabulatie opgenomen.

In sommige gevallen waren geen bieuonderheden ingevuld. Vandaar dat het aantal huweliken van Europeanen, opgenomen in de tabellen in dit deel, dat over vruchtbaarheid loopt, 261,404 is, terwijl het totaal van alle getrouwde vrouwen 271,767 was. Om complete aantekeningen van elk huwelik te verkrijgen, zou ideaal geweest zijn; doch de waarde van de opgaven is niet belangrijk verminderd, omdat zij niet over alle huweliken in de Unie lopen.

4. Nut van Vruchtbaarheidsopgaven.—De arbeid en uitgaven, welke de inzameling, het onderzoek en de tabulatie van de gegevens betreffende vruchtbaarheid met zich sleepte, zijn ten volle gerechtvaardigd. Dit zal zeker door hen worden beaamd, die informatie omtrent het onderwerp van rasvoortplanting hebben gezocht en die tot op heden in deze afdeling van Vitale Statistiek gekonfronteerd geworden zijn met een absolut blank. Het is echter waarschijnlijk, dat veelen het onderwerp weinig aandacht schonken en niet ingezien hebben, dat geen onderzoek van tegenwoordige sociale toestanden volledig genoemd kan worden zonder bepaalde informatie van deze aard.

De volume van informatie, van dit censusonderzoek verkregen, is vatbaar voor nauwkeurige ontleding en wanneer verdere informatie van soortgelijke aard in het vervolg wordt ingezameld, zullen gevolgstrekkingen gemaakt kunnen worden, welke in het nauwste verband staan met en de grootste invloed hebben op, de ontwikkeling van de gemeenschap. Deze opgaven kunnen inderdaad nu gedeeltelijk gebruikt worden en zelfs meer in de toekomst, als grondslag voor het bestuur van een bepaalde richting van gezonde politiek en voor het verhinderen van het doelloze en domme "laisser-aller," wat in de afwezigheid van bepaalde kennis zeker onvermijdelijk zou zijn. Het is hier niet de plaats om meer te doen dan het punt aan te steken, maar als een eenvoudig feit mag er op gewezen worden, dat ongetwijfeld het bevolkingsvraagstuk het grootste politieke probleem van de hedendaagse en toekomstige geslachten vormt. Noch is het langer voldoende om de totale bevolking van een land en zijn grootte te kennen en, in dit land als een speciaal gezichtspunt, zijn rasverdeling. De feiten moeten onderworpen worden aan een veel meer nauwkeurig en ernstig onderzoek dan vroeger ooit nodig werd geacht. Het is niet minder noodzakelijk om dat aspect van het bevolkingsvraagstuk onder de ogen te zien, dat door de statistieken in dit deel wordt blootgelegd. Indien deze aanduiden, zoals zij schijnen te doen, bijv., dat 24 percent van de getrouwde vrouwen in de europeesche bevolking van de Unie verantwoordelijk zijn voor 57 percent van de geboorten van alle huwelijken, kan dan de dringende noodzakelijkheid ontkend worden van de beantwoording van de hieronder gestelde vragen—antwoorden welke de statistiek alleen kan geven? Is de neiging tot betrekkelijke onvruchtbaarheid algemeen, of wordt deze sterker? In het bevestigend geval, in welke afdelingen van de bevolking? Onder in Zuid-Afrika geboren personen of onder immigranten? Op welke leeftijd? Onder welke omstandigheden? Maakt de leeftijd bij het sluiten van het huwelik enig merkbaar onderscheid? Wat percentage van het aantal kinderen bereiken hun meerderjarigheid? Komen deze kinderen uit grote of kleine huisgezinnen? Zijn zij kinderen van de armen of van de welgestelden; van die in vaste dienst of van werkelozen of behoeftigen? Dergelijke vragen, indien zij kunnen beantwoord worden, kunnen alleen beantwoord worden door geduldige en wetenschappelijke sortering van gegevens, verkregen van de Levens-statistiek, zoals die welke in dit deel van de census zijn opgenomen. Dat de tegenwoordige opgaven de antwoorden dadelijk zullen geven, is natuurlik volstrekt

onmogelijk. Doch zij verschaffen informatie waarop toekomstige maatregelen kunnen gebaseerd worden; en zij zullen het voor komende geslachten mogelijk maken om iets te ontdekken en te verstaan van de wetten, welke op het gebied van biologie, sociologie en economie de ontwikkeling van het europese ras in dit sub-kontinent beheersen. In de loop van tijd kan het bovendien mogelijk worden om deze statistieken tot andere rassen uit te breiden, doch de onvolledigheid van registraties van geboorten en sterfgevallen onder de non-europese rassen maakt deze uitbreiding op het ogenblik onmogelijk.

5. **Voortplantingsopgaven van Kleurlingen.**—De opgaven vereist inzake geboorten uit huwelijken van vrouwen van kleurlingen en gemengd ras waren gelijk aan die, vereist van Europeanen. Rekening moet gehouden worden met de neiging—waarschijnlijk groter in deze klas dan in die van Europeanen—om de strekking van de verlangde informatie verkeerd te verstaan. De vormen werden echter aan een nauwkeurig onderzoek onderworpen en men kan aannemen dat de in de tabellen gegevene informatie vrij nauwkeurig is. Deze tabellen zijn opgenomen in Deel VIII van

dit Verslag, waarin de census van de non-europese bevolkingsafdeling wordt behandeld.

6. **Gevolgtrekkingen en Analyse.**—In Deel X van dit Verslag is een afdeling opgenomen, waarin deze opgaven ontleedkundig worden behandeld en een serie van tabellen voorkomt met gevolgtrekkingen van bepaald belang en waarde. Het moet echter herhaald worden, dat het grootst mogelijke nut alleen dan verkregen zal worden, wanneer opgaven van gelijke aard bij latere volkstellingen worden ingezameld, of, nog beter, wanneer deze meer sistematis, meer geregel en meer nauwkeurig van de geboorteregistraties worden getrokken overeenkomstig een herziene schema van statistiese informatie.

C. W. COUSINS,
Censusdirekteur.

Kantoor voor Census en Statistiek,
Pretoria,
Januarie 1923.]

CENSUS, 1921.

ADMINISTRATIVE AREAS AND REGIONAL DIVISIONS.

In order to simplify the reading of census tables, the following explanations are given of areas and divisions adopted by the Census Office for tabulation purposes. The principal terms used are: (i) Areas, (ii) Districts, (iii) Provinces, and (iv) Regional Divisions. The three former fall under the general class of administrative areas, while the fourth is a subdivision of the whole Union arranged as nearly as possible according to climatic conditions.

(i) **Areas:** Urban and Rural.—The former term comprises all municipalities, village boards or councils, health committees, townships local boards possessing urban local government. Certain large towns have grown so rapidly that their populations have spread beyond the boundaries of the area of jurisdiction of the local authority. The population in these instances, although residing in rural areas, is suburban in character. Until these areas are absorbed in the municipality, they are designated for census purposes as rural suburbs. Unless specially mentioned, the populations of rural suburbs are not included with those of municipalities.

Rural areas comprise all farming areas, native reserves, rural settlements, and the land in each magisterial district outside the jurisdiction of an urban local authority.

(ii) **Districts.**—The term district in the caption of the tables is used to designate the administrative area under the jurisdiction of a magistrate. There are also a number of magisterial sub-districts falling either wholly within a magisterial district or made up of portions of several magisterial districts. As magisterial sub-districts were established primarily for the better administration of justice, and do not affect the administrative functions of the parent districts from which they are formed, no cognizance is taken of them for statistical purposes, other than a special tabulation of their populations by race and sex.

(iii) **Provinces.**—These administrative areas consist of the four states of the Cape of Good Hope, Natal, Transvaal, and Orange Free State, which now form the Union of South Africa.

(iv) **Regional Divisions.**—These divisions are non-administrative, but each comprises a group of magisterial districts. The boundaries, although somewhat arbitrarily drawn, follow closely the different climatic conditions found in the Union due to altitude, varying rainfall, etc.

The Union is divided into six divisions, as follows:—

I.—South-Western Coastal.

Extending from Malmesbury District to Alexandria District inclusive.

II.—South-Eastern Coastal.

Mainly the coastal districts of Transkei, Natal, and Zululand, from Bathurst District to the border of Portuguese East Africa.

III.—Karoo and Cape Central.

Bounded on the south by Division I, on the east by Division V, and on the north by the High Veld region. It includes the western coastal districts to the Orange River.

IV.—High Veld.

This embraces the greater portion of the inland plateau land, and includes the whole of the Orange Free State, the inland districts of Natal, that portion of Transvaal lying approximately south of the 25th degree of south latitude, and the remaining districts of the Cape Province adjacent to the south-eastern border of the O.F.S.

V.—Cape Thorn Veld.

Comprising the Transkei hinterland and adjacent districts.

VI.—Transvaal Bushveld.

This comprises the districts lying approximately north of the 25th degree of south latitude.

VOLKSTELLING 1921.

ADMINISTRATIEVE AFDELINGEN EN LANDSTREKEN.

De volgende verklaring in verband met de door het Censuskantoor voor tabulering aangenomen landafdelingen en streken zal kunnen dienen om de bestudering van de censustabellen te vereenvoudigen. De belangrijkste termen gebezigd zijn de volgende: (i) Afdelingen, (ii) Distrikten, (iii) Provincies en (iv) Landstreken. De drie eersten vallen onder de algemene klas van administratieve afdelingen, terwijl de vierde een onderverdeling van de gehele Unie is, zo nauwkeurig mogelijk gerangschikt volgens klimaatstoestanden.

(i) **Afdelingen:** Stedelijk en Landelijk.—De eerste term omvat alle municipaliteiten, dorpsraden, gezondheidscomités en dorpsbesturen, die lokaal stedelijk bestuur nitoefenen. Zekere grote steden zijn zo snel aangegroeid dat hun bevolking zich over de grenzen van de lokale autoriteit heeft gevestigd. Hoewel in een landelike afdeling wonende is de bevolking in deze gevallen voortstelkarakter. Totdat deze afdelingen in de municipaliteiten zijn opgenomen, worden zij voor censusdoeleinden aangeduid als landelike voorsteden. Tenzij speciaal vermeld, is de bevolking van landelike voorsteden niet bij zulke municipaliteiten ingesloten.

Landelike afdelingen omvatten alle landbouwstreken, naturellereserves, landbouw-volksplantingen, en het land in elk magistraatsdistrict buiten de jurisdictie van de stedelike lokale autoriteit.

(ii) **Distrikten.**—De term distrikts aan het hoofd van tabellen wordt gebezigd om de administratieve afdeling onder de jurisdictie van een magistraat aan te duiden. Er bestaan ook een aantal magistraatsubdistrikten die of geheel binnen een magistraatsdistrict vallen of uit gedeelten van verschillende magistraatsdistricten zijn opgemaakt. Daar magistraatsubdistrikten in de eerste plaats voor een betere administratie van justitie werden gevormd en onafhankelijk zijn van de administratieve functies van de oorspronkelijke distrikten waaruit zij gevormd zijn, wordt voor statistiese doeleinden geen rekening met hen gehouden, behalve voor een tabulatie van hun bevolking volgens ras en geslacht.

(iii) **Provincies.**—Deze administratieve afdelingen bestaan uit de vier staten van de Kaap de Goede Hoop, Natal, Transvaal en Oranje Vrijstaat, welke nu de Unie van Zuid-Afrika vormen.

(iv) **Landstreken.**—Deze afdelingen zijn non-administratief; doch elk bevat een groep van magistraatsdistricten. De grenzen, ofschoon min of meer ruw getrokken, volgen nauwkeurig de verschillende klimaatstoestanden in de Unie, afhankelijk van hoogte, regenval, enz.

De Unie is in zes streken verdeeld, als volgt:—

I.—Zuidwest Kustreek.

Lopende van Malmesbury Distrik tot Alexandria Distrik inklusief.

II.—Zuidoost Kustreek.

Hoofdzakelijk de kustdistricten van Transkei, Natal en Zululand, van af Bathurst Distrik tot de grens van Portugees Oost-Afrika.

III.—Karoo en Kaap Centraal.

In het zuiden afgerekend bij Streek I, in het oosten bij Streek V en in het noorden bij de Hogeveldstreek, omvat deze streek de westelijke kustdistricten tot de Oranjerivier.

IV.—Hogeveld.

Dit beslaat het grotere gedeelte van het middenlandse plateau en sluit de gehele Oranje Vrijstaat in, alsmede de inlandse districten van Natal, vrijwel dat gedeelte van Transvaal, dat ten zuiden van 25° Z.B. ligt, en de overblijvende kaapse districten, liggende aan de zuidoostelijke grens van de O.V.S.

V.—Kaapse Doornveld.

Bestaande uit het transkeise hinterland en aangrenzende districten.

VI.—Transvaal Bosveld.

Dit omvat de districten welke ongeveer ten noorden van 25° Z.B. liggen.
