Dear Dr. Ker,

Your most heart warming letter
came today. I am not really
ill & enjoying being in bed &
pelted over so much. It is my
bad heel from the blister which
is the chief cause of bed as!

Could put it to the ground yet
at all, but it is going well.

Otherwise it is only my heart
still rather too changeable & all
one's reserve forces used up so I
am making the most of the rest
time to fit fat & sherry. I think the
umbrella is not mine unless it has a
silver handle  of that
kind of shape.
