Dear Mrs. Park,

I am very glad indeed that you found that note in our January number useful. I must say that I myself was immensely struck by Mrs. Blatch De Forest's original article from which I summarised those figures. They seem to me extraordinarily telling, and I am glad they have led to credit being given to the "Women's Political World" to which the credit is due.

Yes, we have a bulletin board and are delighted to have news from you to display on it.

With regard to your correction of the International Report on page 54 every single copy in our possession had that correction inserted directly you gave notice of it, which, if I remember rightly was when you were in London in August, so that you may be quite assured that no reports have been issued since then without the correction. I hope that the same has been done to the stock of reports in New York. I quite agree with you that the mistake was most unfortunate, but hardly any reports had been issued before you asked to have the correction made.

I shall be very glad indeed to receive the new edition of your law pamphlet when ready.

May we further enlist your help for an important exhibition of women's work to be held in London at Olympia for three weeks from April the 11th? I have been asked on behalf of the International Alliance to arrange the only suffrage exhibit, and it is to be confined to evidence of the results of woman suffrage in practice. I am therefore most anxious to have an effective exhibit of plans, posters, charts, diagrams, pictures, etc., of all sorts from suffrage States, or referring to suffrage States. The results of women's franchise either municipal or parliamentary will be welcome, and should be in the most telling graphic form possible. Pictures of women in public office, pictures of woman going to the poll, or

anything else likely to strike the eye of the ordinary visitor to an exhibition is what I want. If you and any of your able and energetic friends in California can get up a really nice representative exhibit it will do credit not only to California but to the cause of women in general. I find here that by far and away the most effective argument for the suffrage is tangible results of women's votes.

I should be most grateful for anything you can do.

Yours very sincerely,

*Mary Sheepshanks*
