Dear Miss Carpenter

I venture to lend for "Rosanna"
2 little books of mine for her
journey. If they are too
heavy to carry, put them in
the fire. As to the
"Notes on Nursing", of course
Nursing must vary in hot &
in temperate climates. But
I venture to think, from
what I myself have seen of
Asiatic & African babies,
that some hints in the little
Chapter on "Minding Baby"
are applicable to them.

Don't trouble yourself to
answer this but believe me
ever yours in heart, even more
in India than in England.
F. Nightingale
