Dear Mrs Roberts

I think I had better let you have these back at once. Your paper is what I really want, & I am grateful to you for letting me keep it.

I fully agree that the important thing is the realisation of the immense part played by infantile fixation, & that the detail is unimportant. But even if I can make the Commission see that, I do not at all know just how they will re-act to it!

Yours very sincerely
K. W. Brewster
