14, HOBART PLACE,
S.W.

December 28. 1911:

Dear Mr Simpson

I have been going through the slides
again and see there is not one
of the broken shell of a *Musgum*
house - the very tall ribbed

houses, one of which has fallen in
two. It is so interesting architect-
urally that I am very keen to
show it.

If you are really going to be so
good as to let me have a partise
would one day next week

suit you - on or after Wednesday?
I have a terrible suspicion that
my lecture will be much too long.

Yours very truly

Olive Mae Leed:
