Dear Stella Newsome,

I hope that the Fellowship Committee will take in as good part as they can my pointing out of dangers ahead. It is the danger itself that matters and not my particular way of calling attention to it.

This was what I wanted to talk with you about when you so kindly sent me that first intimation that the Fellowship Committee desired me to speak as one of the old Movement at Saturday's meeting - but you were so busy and over-worked !

Now it is done publicly and some of you may be hurt by my outrightness - for which I am sorry - so I am writing to say that I really have a definite suggestion to make which will I think negate the danger as we all die off and also do a great deal more than pay emotional tribute to Mrs Pankhurst's memory.....Also I believe it would be the kind of action that the Suffragette Fellowship founder - *Edit* How-Martyn would have approved. She was out for the practical things as Mrs Pankhurst herself was.

And ~~Tied~~ as I am with double or treble calls on my time and money I would help in some small way to ~~help~~ carry things through, *if your Committee decides favourably.* May I be received by your Committee to discuss the matter.

Yours Sincerely,

T. B. G.
