Dear Miss Ward,

It has been suggested to me that it would be better to have a definite agreement understood by every member of the Committee that at the meeting in the Queen's Hall on November 17th. no question of policy or tactics is to be discussed. The Lancashire Societies who initiated the meeting, are quite at one on the point. They desire to lay before the public the industrial and economic aspect of the question, and they do not desire and could not support on this occasion a meeting which discussed any other question.

We know that the position was thoroughly understood by each member of the Committee, but it is more in order to have it in writing. Will you, therefore, kindly let us know your views at your earliest convenience?

We are,  
Yours truly,

Esther Roper.

Eva Gore-Booth.
