WEEKLY

The Captain of Industry in Post War Germany as seen by George Grosz.

THE CONFLICT OF REVOLUTION

Masses and Men. Toller's Great Play.

oller's drama is his conflict in the day there is trained is his conflict in the days revolution, and since: it is the universal effect between peaceable quiescence, and that that brings with it injury, and sufing, and the fervent love of humanity and re to right the wrong. Through this contain must pass who would challenge the ting order.

while their work well. They have prepared eautiful setting for Toller's play, but Syb'l prindike, fine actress as she is, cannot rise the height of it. She is not "The Woman, woman who is Toller's soul in travail, who apply the property of the state of woman who is folier's soul in travial, with he chivalrous love and craving for good at of us. In the two greatest moments of play she has no part. Yet she acts wely. Many will fail to come as near n-

oreting this part as she has done.

the play is exceedingly great. There is hing on the modern stage to come near to

When the scene opens, however, the protument offends a little; it is wooden and ry stagey. The red flag on the attic wall painted. The actual flag should hang they the warm h and beauty of bunting folds the woman is dressed in crude green. Savars it throughout —a mistake; she should dressed in more sombre hues, this woman sorrow and conflict. orrow and conflict.

she sits there, and the light falling so-urply athwart her face makes it seem actu-ve wooden. The workmen, the comrades, haif ted, rigid and stiff in long-held attitudes, kily moved; they seem intentionally un-id. There is some lack of truth, of sincerity, understanding, in making these comrades dolt-like, so utterly submerged in intelli-tion. They should be instinct with a voi-ting fire and purpose, quies and essert and e fire and purpose, quick and eager and

The Man, her husband, enters. He, too, stiff, designedly so, starched by conventions and retarded impulse, rigid from discipline,

arrogant from false pride. And yet throughout he failed a little; he was lacking in force. How could he move her; how could she care for him, this man of straw?

In this scene: she, too, was not fully effective. Too noisy. With slow, quiet and hesitancy, and with a voice that is choked and words that hardly come, should she have confessed her love and longing; but the defiance and the ferrour of the revolutionar might have rung out bolder still. No, you have not caught it, Sybil Thorndike; you must try again. You must indicate that your love for the man is a torture to you; that it is gall to you. It must seem to rise from the depths unasked, although repressed because it deflects you even a hair's treadth from the goal. It must be sweet to you; it must be lovely, you must thrill to it, but it must sear you and unnerve you for what he is. you and unnerve you for what he is.

Study the part further—this should be one of the play's great moments but it has failed.

The comrades who talked of revolution have ft her with the husband, who charges her to leave it. She has resisted the temptation of his pleading—and here, perhaps, Toller also erred a whit in making the man so peremptory. The woman has defied him and the State he serves. He has denied her cry for one more night of love.

That was a keen thrust, Toller, to make him offer her the path of philanthropy— "homes for illegitimate children: even your comrades despise the unmarried mother.

The second scene shows the Stock Exchange—and those who gamble upon the lives and happiness of millions. The satire is pit. ing. It is horrible: it is true. So much is Tol-

As to the presentation of this scene: the ostentatious silliness of its grotesquerie has much to recommend it. Yet we should have preferred these old men, in their fatness and foppishness to have worn actual modern dress. The women they ordered should actually have come in to join their revels. The orgy should have been staged under the directions of that master of satire, George Grosz.

The woman, led by the guide, as she broke in on this was not sufficiently tragic, insistent, indignant. No she should be more noisy, more clamourous, ruder and more impassioned.

Well staged is the rising up of the workers in their need, in their wailing; their frail arms raised. Like a mist they appear, and gradually take shape and stand forth, turbulent and indignant. This is well done by Toller. Well done by all; bravely acted, findly acted. finely staged.

The woman is speaking. No, that robe is it of keeping; something light, if you will; not that raw emerald. And you are throughout too same; sometimes too noisy, at others not sharp enough in your passion; there is no white heat in this, but you must generate it if you would show us this drama at its full height.

'I cry strike," says the woman.

The nameless one answers "Revolution."

He acts well, this "Nameless one," Mr. George Hayes. He is ruthless; he is ugly; !> is naked. He has no feeling, but we do not expect it of him—he is "Mass"—the crowd—the impersonal—that which happens, that

which is capable of being no other.

Behind all this Toller himself puts us the

Strike or revolution? Strike or War?

The woman decided for strike-Mass, fo: armed revolution.

Toller is describing what he has seen, de sired, yearned for.

Yet all is not clearly expressed. Perhaps Toller does not see the way through the tan gle yet. War and strike are not true alterna Toller does not see the way unrough the regle yet. War and strike are not true alternatives. Neither war nor strike construct. If there is strike, striking will not construct, will not produce. The people must bend themselves to production or they are undone. The Italian metal workers knew this, but could not carry out their intentions. Russia realised this at certain stages of its revolution. What the peasants produced, or failed to produce from the land, and the manner of their production was of more importance to the fate of Russia than anything that was done by the armies of Reds or Whites.

The play goes on. Mass rebukes the woman: "Be silent, comrade." The workers cry for revolution and Mass demands it. The woman is over-ridden. Mass grasps her and she worships. The play is Toller's apologia, his remorse, his sorrow, his heart searca-

Outside a prison: The sentries, ghoulish and horrible, debased, decrepit, stunted by poverty and squalor. In the dark of night, in the faint glimmer of lights by the prison wall, they are revelling by new-dug graves; poor palte; mirth.

"My mother bore me in the mud of a

"My father got me in a brawl with a

Horrible laughter follows each line.

Horrible laughter follows each line. Those who are condemned to die, plewi that they may join the revels; may dance and make merry for the last, 'last time Once more, only once more before I go to toy mexorable fate; it is the cry of the woman also; it was Toller's cry as he lay in prison; we all make that cry in the crises of our lives.

Bourgeois Patriots in the days of feat drawn by George Ground

sam and jetsam of parasites who make up the army of those who do not work. In the dimness their sordid, sad revels continue.

The hour of execution dawns: the husband the bourgeois, upholder of the capitalist State stands with his back to the wall awaiting th The woman rushes forward to protect

Mass sits on the platform at the battle headquarters, the woman beside him; he exulting in victory, she torn by doubtings.

Exhausted messengers bring news that the army of the workers is being repelled; that the whites give no quarter and kill all pri-

Mass calls for reprisals. The woman prossts. Their ancient conflict is renewed.

Mass is revenge. No, no, mass is community; mass is construction; mass is love

Yes, the old, old conflict-and vet here. Yes, the old, old conflict—and yet here, too, something is unexpressed. What else then? one asks, seeking Toller's reply. The answer does not come. What then shall be the choice? Shall it be mere submission?

Mass denounces the woman, calls her a traitor for her pleading, accuses her of seeking to protect the class from which she comes The workers join in decrying her. She is seized and will be condemned. . . .

Cries of despair—at that moment the enemy has overcome them. The scattered remnant of comrade defenders rushes inwari with the news.

They gather together, the working fighters in their rags and their poverty.

Then comrades, come rally. The last fight

The strains of the International.

On the stage this is the greatest, most n ing moment of the play, as the soldiers rus, these things? in upon them.

There one might leave it, but the officer's uestion: "Where is the woman that leads ou?" and her hands held out for the handouffs are the inevitable sequel. She is neither of these nor those, and is condemned by both

Now a great vision. The woman is in a cag high up in the Show House of Life. It is placed at night on a dark pinnacle. Behind her stands the guide, sombre and huge. In this scene all appears to be colossal.

The guide accuses the woman of the death those who were killed in the revolution. She says that she protested, but he tells he she was silent in the days of success and she

Grey ghostly figures come in to accuse her of their deaths. She declares it is not she who was guilty, but God.

The ghosts make that their chorus

"God is guilty; he is guilty."
Now the guide tells the woman that she

To take this part of the play literally would be an anti-climax. It would be unsatisfactory to assume that the woman had gained emancipation by casting the blame for the difficult ties of life upon an erring God.

Apparently Toller suggests here that in the inevitable struggle for social change—these deaths were inevitable. Thus was the woman exonerated—this was destiny. At th-bar of conscience, for the guide is conscience. she has been acquitted.

The capitalist State still waits to try the woman. It shows no mercy.

She is in prison, dreaming of wild, free life. The husband enters; come to tell her that

They come forth, all the prisoners; the flot- her high motives have been taken into account, that she is judged not guilty of muder, that her name is not disgraced.

She answers that she is guilty, but the she answers that she is guilty, but that those who uphold the State and its cruelties are more guilty. She turns away from his respectability, the price of freedom; then turns to him for some touch of love, only to

Then Mass enters. The woman's doubts are pardoned. The people need her. She may escape. Two sentries are friends; the other they will kill.

The woman refuses. She will not owe he escape to another's death.

She denounces all tyrannies, all dictator-hips, demanding freedom for the individual Mass also leaves, as the husband did, telling her: "You have been born before your

The officer comes in to tell the woman she is condemned to death. Her motives have been taken into account, but the State demands obedience. He takes her out to ex-

Then follows a piteous climax. Two ward-resses enter; they seize the bread lying on the table, and tear at it ravenously, with muttered cries: "Hungry, hungry."

Two starved creatures; they seize de-lightedly upon a photograph and a scarf the woman has left behind and hide them in

Suddenly a shot rings out; it is the shot of the executioner.

The women take from out their bosoms and lay on the table their little trophies.

'Sister," they falter, "what makes us do

This, on the stage, was the second of the greatest moments in a great play.

LIFE OF JAURES.

By Paul Desanges and Luc Meriga.

In this book the authors relate, clearly and concisely, the life and heroic death of the if the most tragical years of mode. It marks the awakening of his voc. step, to Socialism. The political and social bind in one sheaf the wandering forces of part played by Jaures, as well as his effor so bind in one sheaf the wandering forces o Socialism are outlined in broad strokes, as is also his unceasing struggle against war, his couragous appeals and prophetic views and last of all his dramatic death, a "glorio a ending to a glorious life.

'hroughout the book we follow up the marellous progress of a superior existence and the historical part that Jaures played. His n, according to the authors, was to concili-the old democratic "myths" with the w ones of the proletarian revolution alled the great conciliator. "Failure was certain and probably inevitable. But it had to be attempted as there would have been a missing link in history."

Jaures was probably the last representative of social optimsm. His biography, written without blind passion but with intelligent sympathy should have its place in the libra y every student of the evolution of human estiny towards which the old world is ha:

LESSONS FOR PROLETARIAN SCHOOLS. CELLS.

Most of the animals which have but cell are so small that they cannot be seen the naked eye and must be examined ur the microscope.

Some unicelluar animals are parasites the bodies of higher animals. The ani on which they live is called the flost. Me of these unicelluar parasites are large enout to be clearly visible to the naked eye, (which lives in the lobster actually attains the length of two-thirds of an inch.

Some unicelluar animals secrete chal flint in the form of little shells. Chalk amined under the microscope is found to tain numbers of little shells. Some of have many chambers, all of which were creted by a single cell with a single nucl

These little shells are called calcareo which simply means that they are of cha

They are beautifully constructed. They are beautifully constructed with earther, which communicate with earther, are of various forms. One of the shells looks like a raspberry. It is compos of globe-shaped chambers and called glob

More than 3,000 distinct species have b ound amongst the little animal shells in

These little shell-secreting animals are ouilders. They actually make the chalk.

They are roughly about one-hundredth an inch in diameter

It is estimated that untold numbers them produced about an inch of chalk i year. Ohalk is found in places more t ,,000 feet thick. It, therefore, took more t much more numerous than the sands of

At the present time such tiny creatures built up the chalk are living on the bed the ocean and making there their shell these, together form a paste which is call

It is thus known that the chalk which n forms dry land was once the bed of the oce Nearly 50,000,000 square miles of the oc bed is formed of such chalky shells.

2.290,000 square miles of the ocean bed single celled animals.

The flinty shells are most common in deepest parts of the ocean which is so times five miles deep.

Many unicelluar animals and plants ropelled or rowed along by what is ca flagellum which means a whip or scou To flagellate is, of course, to whip or scou. The flagellum vibrates and so enables the about and draws the cell after it

Sometimes it is in the rear and pushes

Flagella are found on the male reprod tive cells of plants and animals. The plu of flagellum is flagella.

When a cell has a number of flagella vibrating in unison they are called cili These wave to and fro, rowing the cell alon like the oars of a boat. In the higher mucelluar animals, including human beings, of are used to push bodies along. They move and fro creating a current of fluid in whi particles are swept forward.

The air passages in our bodies are linwith cilia. They drive foreign bodies up wards the mouth and so out of the system

They line the passages from the ovary a help to pass the human egg into the uter They also line the cells in the cavity of brain and those in the central canal of

Socialism and Literature.

By Henry S. Salt.

printed from "Forecasts of the Coming Century." Published by the Labour Press, Tib Street, Manch ester, in 1897.

supposed incompatibility of Socialism Literature is one of those gloomy pro-tications which sometimes afflict the And it must of literary men. And it must be admitted that if there should prove any natural antagonism between the their collision would indeed be "very (to repeat George Stephenson orie saying) for literature, since Socialis a moral and economic force which, started, is not in the least likely to be reason to believe that these anxieties are fluous: the spread of socialistic princi-does not imply the corresponding triof vandalism over culture, but rather reverse, and an estimate of the probable of socialism on literature may tend to sure those who see in the coming nation tion of letters a still more disquieting nomenon than the nationalisation of chinery and land.

owly, but surely, the new ideal of co-

ration is forcing itself more and more on minds of thoughtful men, and irrevocably

mecine competition; already it begins of the State in the interests of the and not a part, of its citizens—is not ethoically just, but economically inevit authority was most confidentially d against the revolutionary gospel after blustering awhile, is prudently osed to take up a "scientific frontier" h shall freely admit of future convenient stments; while Religion has bethought f of the very timely consideration that welfare of the masses is precisely the tion which the Churches have most at that it, too, should begin to form some conception of the part it is prepared to in the great struggle, and of the position il hereafter fill. Let us assume, then, Socialism, in some form or other, is ulticertain to be realised: to discuss the forms is beside our present purpose, essential feature of any socialistic ne being that every citizen would, as a amass any nucleus of inordinate

t is noticeable that in the history of every ion a certain stage of artificial society— stage which sees the accumulation of fortunes on the one side, and the pinch extreme poterty on the other—is accomined by a corresponding outburst of the

te, would be the probable condition of

While the writer's idea of Socialism is not res, the article is, we think, still of interest.

munity by writing books which are not wanted, and setting other people to print, publish, distribute, review, and in some cases invite the comments of our readers up: 1 actually to read them. Secondly, there is the not less mischievous, though personally tar less contemptible, class of needy, struggling writers, who have taken to the literary profession as one might take to a pedlar's concostermonger's business, for the cogent reason that in the break-neck competition modern society it chanced to offer itself as the readiest means of earning a precarious living. Like the unhappy vendor of boot-laces, matches and other sweated goods, who importune unwilling purchasers along the pavements of our great thoroughfares, so do these impecunious scribblers, the gentlemen of literature, flood the market with more or less worthless productions, and vie with their nual bulk of that vast national refuse heap which is the receptacle for the emptying of our literary dustbins.

The inevitable result of this double process is the grievous degradation of literature. The vast majority of both classes—of the rich men who live to write and the poor men who write to live—have no natural capacity for the work they have undertaken; there is no distinction or individuality about them which can be held to justify their choice; they are the mere blacklegs of the profession, without purpose and without self-respect, who debase the standard of literary workmanship, and spoil the market for those craftsmen who have the true artistic gift. For, of course, 15 investigations are provided in the control of the profession of the professi is not to be denied, but rather to be wel-comed as a matter for sincere rejoicing, that there are many such real workers, albeit a small proportion of the entire number, who, in spite of discouragements of the existing system, do produce good results; though a is important to note that these are usually some other and more vital interest in the realisation of life. At any rate, it is certain that where there is true individuality, where an author has positively something to say, and a distinct faculty for saying it, things are at present so arranged as to put him entirely at a disadvantage; he finds nimsett everywhere jostled and hampered by a crow to self-seeking adventurers, while the venerable Bumble, who nolds the power of the purse, is not usually observed to lend a favourable ear to the promulgator of new ideas All which things being considered, it is no surprising that a deep pessimism, which is not less unmistakable because it is often veiled in the guise of persiflage, has settle! down on our literature.

What then would Socialism do to remedy these evils? To take only that one essential condition of every conceivable Socialist State—the certainty that every citizen, man or woman, would be provided with the means of earning a sufficient and honourable livelihood—can it be doubted that this alone would revolutionise the profession of letters. For consider briefly what it implies. While all necessary writing work, journalistic, clerical, official and the like, would be organised and paid on the same scale as any other, there would be an end to the existence coethes scribendi, the "itch for authorip," which is the bane of all true literary
lling. This evil manifests itself in two difcent directions. First, we have the well-toof anything better to do, would cumber the world with translations from Homer or 'independence,' to wit, the privi-ing in absolute dependence on the others, are able to indulge the r "reminiscences." There would be no povertyvate whims at the expense of the com- stricken quill-drivers, compelled, in defiance

of the inward monitor and the public neglect of the inward monitor and the public neglect to "dre their weird" to the bitter end, and write the more because they write in vain. Incalculable would be the benefit of the mere lessening of the number of published books, and a fair field would thus be opened for those authors who are attracted to writing by a natural and spontaneous aptitude. It was natural and spontaneous aptitude. It was long ago discovered by the poet Ovid that the best remedy for blighted love is regular occupation, and it may safely be surmised that the blighted literateur would be directed n a socialist community, to find comfort .n the same infallible prescription. The "itenfor authorship" would not survive the establishment of a system where everyone could
put his hand, and indeed would be compelled
to put his hand, to some wholesome and
productive employment; and together with
the eacoethes scribendi would vanish, as we
may reasonably hope, that prevalent habit of
morbid introspection and that tone of cultured cynicism which have so largely paralysad the literary struggle of the present generaed the literary struggle of the present genera-

In the prophetic sketch which has beer given by the author of Looking Backward, is observable that a successful writer in and to claim immunity from the ordinary work which the State requires of its citizens; but Mr. Bellamy, as if conscious that he is here on perilous ground, is careful to add that the popular judgment, by which success is conferred, would be far less partial or er-ratic than that of nineteenth century readers, so that the literary class thus established would be at once a smaller and more efficient one. There is little to be gained by speculating on the minor details of the Socialism of a century hence, which, whatever it may prove to be, will not be the tyranny that its opponents anticipate; but pace Mr. Bellamy, it may be hoped that in a socialised community there will be no authors, successful or the contrary, who would besire to be put. on a different footing to their fellows. For Literature (here I refer to belles lettres, and the ornamental departments in writing) is not and never can be, "work" in the ordinary sense of the term, nor can it be made a fam be desirable in special cases for stated per-iods, that certain students should be exempt from other duties, it will be found that in degenerates when its professors avail them selves permanently of any such immunity "Can there be any greater reproach," says hands, which engrosses the attention also, is unquestionably the best method of removing palaver and sentimentality out of one's style, both of speaking and writing."

Still more difficult would it be, let us hope, for a special class of professional critic exist under a socialist regime; it is hardly conceivable that such a class would care to exist in a society where any amount of healthy, useful work was to be had for the asking. To re-apply Tennyson's words.

For I trust if an enemy's fleet came yonder round by the hill,

And the rushing battle-bolt sang from the three-decker out of the foam;

That the smooth-faced, snub-nosed rogue would leap from his counter and till And strike if he could, were it but with his cheating yardward, home.

There will be an abundance of free and fearless criticism when every work can be judged on its own merits, and there are no improbable in the highest degree that indivi-dual men of letters will then be so infatuated suppose that their personal judgment can be worth giving to the world.

Our View.

THE ENTIRELY OPPOSITE POLICIES subsisting within the ranks of the Labour Party were Socialism Co-partnership. cussion on a private Member's Bill to set up Industrial Councils, the Second Reading of which was moved by a Liberal, Mr. Murrell.

Messrs Thurtle and Kirkwood, rank and file members of the Labour Party, oppose 1 the Bill as Socialists on the ground that it was a measure perpetuating capitalism.

Miss Bondfield, on the other hand, and Miss Bondfield, on the other hand, and Miss Bondfield is an official of the Labour Government, spoke in favour of the principle of the Bill, while criticising the Bill itself. She very plainly indicated the Labour Government view, which was a guarded approval of measures of this kind. Mr. Thurtle ers who voted with them against the Bill represented the Labour Party minority opin Members, including Messrs. Clynes and Headerson, voted for this particular Bill. Others stayed away. The Labour Party majority is prepared to accept such a modification of the suggests. Though they may quarrel with the details of the Bill, its general outline is what they are actually working for.

Miss Bondfield showed that she, and, of course, the Government, since she was its spokesman, are not opposed to compulsory powers being given to councils of employe's and Trade Unions; but she thinks the time is not yet ripe. Many of the Joint Industrial Councils now operating she thinks are so wear as not to be regarded as representing the whole trade. If the Ministry were to give compulsory powers there must be some guarantee that the bodies are really representa-The Government, she said, would leave Bill to the free vote of the House, she herself, had "always desired to see machinery ment has been arrived at." She approvis
Trade Boards for the poorly organised trades,
Industrial Councils for the well organised
trades. She complained that the Joint Inions and Trade Unions, which sat a few years

pettifogging half-way house proposals of the Joint Industrial Conference seem to have appeared quite satisfactory to Miss Bondentary colleagues.

It is all a question of the point of view. Some desire a complete Social change; others ould merely eliminate the grosser forms of sweating.

For ourselves we are opposed to all attempts to re-build capitalism. Efforts to improve the system are, in our view, merely π waste of time. They raise false hopes which lead people off on experiments which are bound to fail, and which tend to confuse the clear issue between production for profit and production for use.

Even the more advanced wing of the Lab our Party in Parliament is, we think, fa-from realising a complete conception of com-munism and from seeing that when capitalism goes it must be swept away altogether. Nevertheless there is a great divergence between the standpoint represented by Miss Bondfield, Mr. Clynes and Mr. Henderson, and that of the Members who opposed the Industrial Councils' Bill.

In practice the Left Wing finally submits to the Right in all important matters. This is a pity and greatly retards the progress n towards the complete anticapitalist standpoint.

MR. WHEATLEY'S EXPLANATION of

the various charges upon The Financial
Burden on
Housing.

The Financial

A \$2500 house is illuminating. It should open the eyes of all who still believe in the utility and virtue for the various charges upon the upon th the capitalist system. This analysis is as fol-

Land at £200 per acre 1½d. per week; Cost of building materials and builder's profit, $1/10\frac{1}{2}$ per week.

Labour 1/3 per week.

This makes a total of 3/3. The interest on the loan required for building the house at per cent. amounts to 6/6 per week

Mr. Wheatley thus calculated that 3/3 allocated to those who serve in the building of houses by hand and brain, whilst 6/6 goes to the parasites. The estimate is incorrect for we must deduct the profit on building and building material and the cost of land from the service item. Moreover the whole calcu-lation is on a false basis for the wages pand to the labourers are subject to charges for the profit of parasites who subsist on the industries which supply them with all their dark needs, including housing itself. The only way to rid society of subjection to parasites is to end the private property system.

When it is realised that the cost of the 2,500,000 houses Mr. Wheatley proposes to build will be £2,500,000,000 the serious burlen of financial charges so greatly exceeding that of the maintenance of those who actual! build the houses will be clearly seen

It must be remembered that the workers wages are a charge which will cease when the houses are built. The interest on the loan will continue till it is repaid and the repayment of the loan and also the purchase price of the load form. of the land form an enormous burden. Under capitalism these are charges which cannot be They will disappear under com-

WHEN the Government goes into the market Housing and prices are raised at once.
That has always been so, and

we suspect, always will be s under the present system. Mr. Wheatley declares his intention to prevent the old custom from

except where the price of materials has be correspondingly increased. Obviously price of materials will be increased as the tile for Mr. Wheatley merely to attempt the building process.

IT IS INTERESTING to observe that M Wheatley was one of

few members who vagainst the Liberal In Committees and Employers. trial Council's Bill; y

is adopting that very pripele in the building committees composed employers and Trade Union representation which he is setting up under his house

THE COST OF THE HOUSING SCHEM How will these vast Burdens be endured? will amount on comple to one-third of the present to one-third of the pres

well cause all thought people to ponder deeply—even if, which very doubtful, the houses should be forther ing at the estimated price. Housing is one of the many pressing problems facing The lack of adequate accommodation for school children is another question alw growing in urgency and extent. Any serie attempt to deal with it must add further en mous charges to the national burden.

The same must be said of all the oti crying social needs: including the prop treatment of tuberculosis and other wid spread diseases, and the elimination of

springing from unemployment, accident, health, widowhood, orphanhood and so on.

Apart from these are the growing deman of the air force and other military requirements, and the ever growing army of Go ernment officials.

The capitalist machine is like a busine that has been over capitalised and is pay so heavily to its shareholders that it cam attend to its own upkeep.

THE RAILWAY workers are again in a sta

Another

he Centralia Case. General Education League mittee. Chicago.

THE WORLD'S TRADE UNION MOVEMENT.

Losovsky. Trade Union Education League, Chicago, 50 cents.

There are many things with which we distree in this pamphlet of Losovsky. Among e points on which we disagree is Losovsky attement on disarmament. He says:

"We consider the abstract idea of disarmament as a very injurious one, anti-proletarian and anti-communist." He adds.

"In reality what is this problem of the vorking class? Of course, it is not the working class? Of course, it is not are simple blowing up or all guns, tanks, etc., but in seeing to it that all the armament under the control of the bourgeoisie shall be turned over to the hands of the working class. Therefore, the whole ideology of pacifist disarmament is aimed completely against the interests of the working class

The obvious reply to Losovsky is that if the urgeoisie should introduce disarmament partial disarmament, the torces available fighting the workers might be reduce l certainly would not be increased by battleships and guns being built, and nding armies being reduced in size.

Losovsky perhaps anticipates that when comes along the proletariat efore the bigger the old army turned comist the better. It might happen so, but it might not. The large army may be against communism. If Losovsky bered that communism will come by Act of liament his argument would be more logthan it is, seeing that he is supposed to tra Parliamentary action. No arguments em strong enough to excuse the perpetuaof the swollen armaments of capitalism

With the following passages on the future can agree, but, like the rest of the III ernational, Losovsky, in the tactics of to-, still keeps a foot in the old capitalist

But if our fundamental analysis is corect, that we are moving toward a non-class ociety; if it is correct that the proletarian ictatorship is a temporary historical epoca. on it is absolutely correct, that the created by a class society must disappear ecause there will be no basis upon which hese organs can exist.'

For our generation these questions will make themselves felt practically

We, however, urge that these are the quesese are the questions which are knocking at door of the social organism to-day. Who s to face and to solve them takes no reu t in the creation of the coming order.

WORKERS' OPPOSITION IN RUSSIA.

By Alexandra Kollontay. 6d.

Parliament as we see it.

Our Parliamentary Reports and Comments are based on the official Verbatim Reports.

Servants of Rajastan.

Mr. Pathik and Mr. Chodri, of the Society Mr. Pathik and Mr. Chourt, of the Society of Rajasta, a non-violent organisation for the mutual-service of villagers have been arrested and charged with sedition. Mr. Pathik has been eight months awaiting trial connection with the activities of this socpeaceful and unarmed men and women have been suddenly attacked and beaten at Amergash and twice fired on at Begun.

Mr. Richards, Under Secretary for India, excused all this, saying there had been disturbances in the State of Udaipur and Bundi, which were provoked by Mr. Pathik and other agitators.

The horrible doings at Bundi have been lescribed in the Workers' Dreadnought, and a copy of the issue containing the account may be obtained by any reader desiring it.

Arranging a Marriage.

Mr. Lansbury protested that the Government political agent had arranged the marriage of the unfortunate Rani Saheba, of Bastar, to a son of a Girjadar, who is the cousin of the Maharajah, contrary to the wishes of all concerned.

Lord Olivir is making enqu'ries.

Recruiting of Emigrants for the Assam

A questionaire is read over to recruits for the Assam tea gardens, their thumb prints are taken and without any written agree-ment being given to them they are bound to work on the Assam Tea Estates. Under the Indian Penal Code, Section 492, they can then be imprisoned for a month for refusal to perform work contracted for at a place to which the workman has been conve another person's expense. Under the Work-men's Breach of Contract Act, a magistrate advance of money on account of work contracted to be done, and who refuses to lo the work, to repay the advance or to send him to prison for three months in default. The Government is going to repeal the first Act from April, 1926. The second Act is

Mr. Snell (Lab.) said that whoever approaches a worker on any tea garden in Assam renders himself liable to prosecution for trespass. Therefore it is impossible to start tion without permission of the management.

Miss Scott Troy.

For the Home Office it was stated that Miss cott Troy had been deported in 1919, and Mr. Henderson saw no reason to revoke the

Holloway and Brixton Prisons.

Holloway: accommodation for 937 women Maximum number of prisoners in 1922 and 1923, 476. Officers, 123. Total salaries and onus, £21,600.

Brixton: accommodation for 694 men; maximum number in 1922, 23, and 24, 535.
Officers 110. Total salaries and bonus,

Liquor raffic in U.S.A.

The Prime Minister was informed that Lieut.-Colonel Sir Brodrick Hartwell, Baronet, is sending out circulars asking for puo-lic participation in schemes for smuggling wines into the U.S.A.

Mr. Clynes replied that nothing could be done. Mr. MacDonald was very severe with the late Government for permitting such things. Notice his pamphlet on the foreign policy of the Labour Government, written for the last general election.

Mr. Clynes said the Naval Disarmament of Germany is practically complete.

Britain still maintains a gigantic navy

Lyons and the British Empire Exhibition. Lyons have a monopoly of the catering at the British Empire Exhibition for the whole

The Oil Nuisance Around the Coasts.

Asked to insist that British ships burning oil shall instal apparatus for separating oil from water instead of turning oily water out to the destruction of sea fowl and the inconvenience of bathers. Mr. Sidney Webb, president of the Board of Trade refused sucr

Fair Wages Clause and Wembley.

Though the Government contributes to the British Emp're Exhibition, and will draw some of the profit, if any, therefrom, it pro-tests that it cannot insist upon the applica-tion of the fair wages clause which has been compulsory in the case of Government contracts for many years.

Mr. Lunn said the arrangements were made Asked whether the Labour Government came in.
Asked whether the Labour Government had not increased the grant he said: "The Bill has yet to be passed, but I wish it were."
He gave no pledge.

More Bishops.

Motions were carried approving the creation of four new Bishops by dividing the

Armaments Increase in Austria.

Mr. E. D. Morel (Lab.) asserted that the Allied conference of Ambassadors had given extend the armament factories of Austria the resit being that the Austrian armament industry during the past 12 months has sup-European states. In 1923, 1,000,000 Mause rifles were supplied to Jugo-Slavia, and n April, 1924, 116 wagon loads of infantry am-munition were supplied to the same State.

Dockyard Sweating.

Major Hore-Belisha complained that yard craftsmen in the Royal Dockyard at Devonport work an average of 100 hours a week, that their pay is £2 6s. 10d., that they only get six days leave a year when they can be spared. He asked Mr. Frank Hodges, Civil Lord of the Admiralty, to improve these con-

Mr. Hodges said the best way to deal with the matter was through the Whitley Councils and Committees.

Admiralty Staff.

1923	20.1	11.3
1924	14 9	9.7

Checking Education.

It was complained that adult workers who attend technical courses get their unemployment pay stopped.

The 8-Hour Day.

Mr. Waddington (Lib.) pointed out that in the Dutch cotton factories, wages are reduced 7½ per cent., and hours increased from 48 to

50½ per week. He asked that the British Government should expostulate seeing that Holland was a party to the Washington Labour Conference and passed an Act legalising the 48 hour week. licensed by the Dutch Government.

Mr. Tom Shaw, Minister of Labour, said that the British Government has not rati fied the 48 hour week convention, it cannot the suggested protest

Mr. Waddington might take that answer to

proposes introducing a Bill to ratify the convention.

Socialism and Capital.

In relation to Russia Lady Astor inquired "Will the right hon, gentleman explain to me why a Socialist Government needs capital?

The Speaker protested: "This is not the time for evening classes in economics."

Empty Houses for Sale.

Mr. Mills asked the Government to introduce legislation to result in the occupation of 250,000 nouses which are held for sale.

The Government could do nothing.
Mr. H. Greenwood (Lab.) asked the Gov

ernment to advise the municipalities to bu; the houses and let them.

House Building.

During 12 months ending March 31st last, the following houses were built:

By local authorities, 14,371. By private enterprise, with State aid

By private enterprise, with rateable value not exceeding £70 in London; £52 in provinces, 66,000.

In course of construction— By local authorities, 11,731.

By private enterprise, 24,270.
By private enterprise, with rateable value eding £70 in London; £52 in provinces, 36,000.

Houses on which the Exchequer paid tha Annual Deficit in Excess of a Penny Rate-

1920—70,335. 1921—146,122. 1922—166,238. 1923—172,747.

The day when the community will be forced by sheer necessity to take full response sibility for housing the people is not far dis-

A Bit of Socialism.

Mr. Ben Turner (Lab.) moved for leave Mr. Ben Turner (Lab.) moved for leave to introduce a Bill to nationalise all lands, minerals, rivers, streams, and tributaries. Leave was refused by 176 votes to 164. Liberals and Tories, of course, combined

In the Workhouse.

It costs 26/6 to keep an inmate in th Workhouse. The average is compiled from all the Poor Law institutions. This includes official salaries and all charges.

West Ham Coal Relief.

The Minister of Health refused the West Ham Guardians permission to grant half a ewt. of coal weekly during the summer and a ewt. in winter. He has told the Guardian to keep a careful check on the supply of boo's essitous school children.

Airship Swindles.

The late Tory Government made an arrangement with a company in which a cet tain Member of Parliament (Lieut, Commander Burney) is the most prominent figure tor the building of airships. The company was to find £500, the Government £5,500,000 in cash and kind, the airships and other provere to belong to the company. Some 000 of the money was to be return-£2.800.000 of the money was to able to the Government, if and when there were any profits. The Government was to

scheme and substituted another which is a hybrid between State and private enterprise, and under which the Government pays the company to build a machine and then if the passes the requisite tests, sells it back to the company at less than was paid for building it. The company in question is largely comed of an engineering armament firm and a petrol supply company.

The Government was taunted by the Tories with building a military airship.

Mr. Leach defended the Government saying: "So long as the need for military ai. ships exists the Government are going to pay attention to that need."

Empire Settlement.

On a Tory motion regretting that emigration does not proceed fast enough Sir H. Cowan said 'you have to do a propaganda 'or removing millions of people in a comparatively short time. . Australia to-day takes £60,000,000 worth of our manufactures Double the population of Australia by the simple process of transferring 5,000,000 or our people from this country there, and you will trebble the consumption of our manuwill trebble the consumption of our manufactures, while you will eliminate unemployment in this country altogether-

What would happen to the unfortunate emigrants; what is happening to them even to day, though they go in small numbers, is not

Butter, Bacon, Cheese Up.

Mr. MacLean asked the President of the Board of Trade in view of the rise in the prices of butter, bacon and cheese since the Budget, to take power to compel cold stora; companies to declare the nature and quantity of stocks held, to prevent prices being forced

Mr. Sidney Webb did not think it would be useful" to introduce such legislation.

Unemployment Insurance.

The financial resolution of the latest unployment Bill contains three provisos (1) that the Government contribution b: increased from about a fourth to a third; (2) that children between fourteen, now not insurable, are to be brought into insurance. They will get no benefits till they have been in employment and paid contribution therefor for 30 weeks; (3) that the Government contributions payable in respect of men joining the Auxiliary Air Force shall be continu-

Certain Liberal and Labour Members urge! that it was unfair to make insurance levies upon the children, most of which would not spent upon them and that to offer unemoyment benefit to children was an induce ment to send them to work instead of keeping them at school. The Government was asked that what it proposed to give to children's insurance should be devoted instead to maintenance grants to keep the children at

Mr. Tom Shaw, Minister of Labour pro tested that he wanted to help the ur ployed children. "The majority of working ass children between the ages of 14 and 16, e said, "are outside the ken of everybody. The unemployed children, he said, are "kicking about the streets." He wanted "some stitution to take them by the hand and keep them.

Mr. Shaw was reminded that at the best the juvenile unemployment centres only give five weeks' indifferent instruction a year. Finally Mr. Shaw was induced to withdraw this part of the resolution, but would not pledge himself as to what sort of Amendment he would introduce in its place

THE WASTE IN FOOD PRODUCTION. By The Man with the Hoe.

There is much criticism regarding the pr listribution of food problem. We British p ducers may be much behind some countries methods, but can any of our critics t chaotic a state as here?

Take milk first. During 1918 and 1919 big farmers, with their big herds of cows w allowed 3/3 a gallon for milk which was be produced at no more than 1/6. The writer h at the time to make some inquiries into the economic costs of distribution in difference parts of London. He found that the small distributor with his little milk pram and two three cans, usually sold about 500 quarts milk a week of seven days. The better organised rounds of the co-operative movement which have numbers of men with a cob. milk float and a lad doing 1,800 to 3,000 quarts a week of fewer hours by than the small distributor. When we may distributed, with the evils of short measured it, and adulteration, to a large extent of literated. The conclusions we arrived at we that given a central authority, like the L.C. as the chief distributive agency for Londo with all the Borough Councils subordinate d tributors, with a proper system of house house distributing, at least 1,000 gallons week could be distributed by a man, two la a horse van and bottles. The cost of distributed by a man two lands a horse van and bottles. horse van and bottles. The cost of cibution need not have been more than When we take into consideration that the productive costs were 1/6 against the 3/3 a lowed, we were able to see very plainly he the agricultural labourer, in the first instance and the consuming community in the secon were being robbed for refusing to socialise the production and distribution of this vital necessity.

When we tackle bread we find the sar state of affairs. Thousands of little bake throughout the country find it as much they can do to bake and distribute twelve ourteen sacks of flour a week, yet we h known men working on well-organised roun with a lad, distribute almost as much as the on a Saturday alone.

The conclusion we came to was that und a similar method as that suggested for mi 60 sacks could be delivered to the differen housekeepers in the shape of bread and t price might have been at least 25 per cer

We found also that meat, vegetables, fru etc., could be distributed at a saving of least 25 to 33 per cent. The leaders of working class were so busy on recruiting p forms getting cannon fodder to fight the calist, that they had no time to look after common people's interest. Therefore prival enterprise was allowed to flourish and stab se itself in its work of exploitation.

After the military war had ceased, and wh the purchasing power of the consumer smaller, and the industrial capitalist of grew a little afraid of allowing the robbery dstribution to continue, owing to the la number of wage slaves out of employment Lord Linlithgow Committee was instit and after a long time came to the concl that the consuming public could not afford uxury of keeping so many social parasites

I think in this short summary I have sho that if we food producers have retained of lete methods in production the community self refuses to adopt any more up-to-d methods of distribution.

finds it hard work to distribute 16 organised co-operative rounds men with ouple of light horses distribute over 40 a week. If we were to adopt a method stribution similar to that advocated for and other foods, the same man could delivered 50 or 60 tons a week. With ton lorries instead of horses, and with men and a driver, at least 130 tons a could be distributed. The miner might paid more and the consumers might save per cent. of their coal bills.

Until the working class producers and con-mers put their thinking caps on and look ter their own means of social life, they not to expect the people who benematerially by their negligence, to do their ork for them and if they do expect it they ll not get it, because self interest and not cial interest is the basis of commercialism uy in the cheapest and sell in the dearest rket is the commercial motto.

RUSSIA'S FAILURE. By H. Brown.

The Editor publishes this Article without cepting responsibility for the Statements

The International working class movement een one long struggle, from pillar to The workers have been robbed of the hich, of course, is the foundation of Although the workers have striven ee' themselves from the intolerable condis of capitalism, all their efforts have been

Po-day we have the so-called Socialists, the mmunists, and Bolsheviks, boasting and odwinking the workers of other nations of The system as set up in Soviet pitalism in practice.

or example, let us take a recent happen. In March, 1923, the Central Governnt Clothing Factory in Petrograd reduced wages of its employees by 30 per as to the clause. When the employees in-ed at the office why so much of their es were missing, the factory director rethat they, the workers, ought to be sfied with what they got, and ought to nk them, the directors, and the Governfor supplying them with work at all. dissatisfied with the result the workrefused to work until they got a satis-ory explanation. Union representatives manager told them that if they at-ed to strike, they would be treated as nter-Revolutionists, and would be dea:t accordingly. But, nevertheless, the ers called meetings in which the union ials played no part; they merely did utmost to suppress the strike.

the case of the Skorokad factory, in June the Leather Makers' Union and the munist Committee of the Skorokad Fac t the expense of the Skorokad work-The workers, about 3,000 in number, were that they must work eight hours overto cover the expense of the club. The ers refused on the ground—

That the club is not a worker's, but a munist club; only Communist lectures lelivered there, and no others permitted. That even if they would agree in princiworking on behalf of the club, they ed the action of the Union officials, and Communist Committee in having decided em, as if they were so many cattle, to

only under the threat of victimisation the the workers submitted to work as required, and the most active members were dis-

In June, 1923, through high taxation and high prices of food and other commodities, the workers at the Putilov factory were compelled to strike. This strike lasted for three days, in which a small increase was granted but other demands were absolutely ignored. As a result of this strike, about 400 workers vere discharged and 100 arrested and were

detained in prison as Counter-Revolutionists
These are but a few facts concerning present day Russia, Yet the Bolsheviks are continually publishing stories about the glorious conditions and the freedom that the Russian proletariat enjoys.

"FOUR HOURS BELOW." By a Seaman.

A Bill, dealing with the eight hour day, was recently debated in Parliament. This measure evidently applies to all workers with the exception of farm labourers, domestic servants and seamen. I do not profess to be an archivitism of the conditions authority on conditions governing farm ork, neither am I acquainted with the dework, neither am I acquainted with the de-tails of domestic service, so, although I do not see why those employed in either of these occupations should have to put in longer hours than other workers, I will only tackla a question with which I may claim to be familiar, that of the seamen. The absurdity of the assertion that an eight hour working day for seamen is impracticable, is easily proved by facts. Engine-room staffs, most navigating officers, and all those employed in the stokeholds work in three watches, dividing the 24 hours equally between them. In American and Australian ships, seamen are also included in the three watch system. There is no reason, except that of economy, why seamen should be on a different footing in British ships. No practical person needs to be told from what quarter the opposition to 8 hours for the sea-men originates. Yet, large companies, whose names are household words, would not be really affected by the change. Their ships, being well manned, as regards the number of crew, would not suffer if their seamen were permitted to be split up into three watches instead of two, as at present. This could easily be arranged without affecting work, or impairing efficiency. Firms owning small ships run at the least possible expense, small snips run at the least possible expense, would naturally resist any innovation likely to reduce their profits which, I have no doubt, compare very favourably with those of the more reputable companies, whose expenses are so much greater.

The crew of the average cargo steamer comprises six seamen, who work, watch and watch, during the time the ship is at sea. This means four fours on deck, for each watch of three men, working alternately.

During the day watches the work of the ship is carried on by the watch on deck, one of whom, of course, will be at the wheel. During the night the four hours is divided as equally as possible between the wheel and look-out, by the three men whose watch it.

I am sure that all who understand the con ditions, will agree that "four hours below does not allow a man to enjoy a sufficie rest. For example we will take the watch which is most favourable in this respect,, that is from midnight until 4 a.m. By the tim the seamen, whose watch it has been up t midnight, are relieved, get below, undress a turn in, it is half past twelve, and they m be out again not later than 3.45 a.m. to gready to relieve their mates at 4 o'clock. O the work.

the workers demanded a meeting of the enfactory, this the Union and shop com- it is utterly insufficient, but when one con-

The little coal distributor, with his horse mittee, which consisted of Communists, residers the experience of those who endure a North Atlantic winter (to mention only one sort of hardship) it is seen that it is absolutely unnatural to expect a man to carry on under the existing system of watch-keeping. Four hours on deck with the temperature about zero, the decks covered with snow or about zero, the decks covered with snow or ice, and a gale from the north-west makes a man long for a good night's rest in comfortable quarters at the end of his watch. Why, a man has hardly time to thaw himself and get warm before he is out again, braving the elements! Surely, a seaman has a right to expect consideration in this respect.

The farm labourer, even if he works excessive hours, ten or twelve, maybe, is stimulated with the knowledge that he will be able to enjoy a good night's rest in comparative comfort "when the toil of the long day

I am aware that improvements have been I am aware that improvements have been made in the seamen's conditions, during the past thirty years or so, but that was inevitable and only in accordance with the laws of human progress. In spite of the reforms which have been effected, however, there still remains much to be done before the seaman and how to spite aware the sight presented. can hope to enjoy even the rights possessed by his fellow workers ashore. Nothing calls more for reform than that of the watch-keeping system prevalent in British ships to-day. It is one of the few surviving relics of that bar-barous era, often referred to by inane sentimentalists, as "the good old days,

ROBBO.

B.L.E.S. REPORTS PROGRESS

A good gathering of London members attended the Annual Meeting of the British League of Esperanto Socialists on April 19 and the Dewsbury Group also was represented The Secretary C. W. Spiller reported that the membership had more than doubled in the year; that twenty Labour and Co-operative journals had printed Esperanto articles; that the Workers' Esperanto Club was a success; that nearly half of the 5,000 edition of "Es peranto and Labour" had been sold; and that lectures and meetings has been arranged and the May Day and No More War Demonstrations attended.

The draft constitution was discussed at length the chief alterations being the raising of the yearly fee to 2s., postal ballot for elec-tion of E.C., and important resolution and a recommendation to the B.L.E.S. to link up with the Sennaeica Asocro Tutmonda." The resolution that members should not be members of "neutral" organisations was defeated. A Press Bureau for re views by Esperanto was set up, and it proposed to supply members with a monthly circular report C. W. Spiller, J. P. Cameron and M. Star were elected secretary, treasurer and chairman respectively.

WHAT WE STAND FOR.

The abolition of the capitalist or private property system.

Common ownership of the land, the means of production and distribution. The earth, the seas and their riches, the industrial plant, the railways and ships, aircraft, and so on, shall belong to the whole people.

Production for use, not for profit. Under modern conditions more can be produced than can be consumed of all necessaries if production is not artificially checked. The community must set itself to provide all the requirements of its members in order that their wants may be met without stint and according to their own measure and desire. The near ing to their own meaure and desire The peo-ple will notify their requirements, and the district and country, the world must co-operate to supply them.

Production for use means that there will be neither barter nor sale, and consequently no money. An immense amount of labour in buying, selling and advertising will therefore

Plenty for all. Thus there will be no inrelaty for all. Thus there will be no insurance, no poor and no poor law, no State or private charity of any kind. Humiliation, officialdom and useless toil, which means putting parasites on the backs of the producers, will be obviated thereby.

No class distinctions, because there will be no economic distinctions. Everyone will be a worker, everyone will be of the educated classes, for education will be free to all, and since tasks will be short, everyone will be able to make use of educational facilities, not merely in early youth, but throughout life.

No patents, no "trade secrets," scientific knowledge will be widely diffused. Since une glass war will be no more, the newspapers will be largely filled with scientific information, art, literature and historical research.

Society will be organised to supply its own Society will be organised to supply its own needs. To-day the essential needs of the people are supplied by private enterprise. Ostensibly we are under a democratic Government, but the most outstanding fact in the average man's life is that he is largely at the disposal of his employer. The government of the workshop where he spends the greater part of his time and energy is despotic.

Under Communism industry will be managed by those at work in it. The workshop will contain not employees, subject to the dictation of the employers and their managers, but groups of co-workers.

We stand for the workshop councils in industry, agriculture and all the services of the community. We stand for the autonomous organisation of the workshops and their ordered co-ordination, in order that the needs of all may be supplied.

Parliament and the local governing bodies Parliament and the local governing boths will disappear. Parliament and the monarch, the Privy Council, the Cabinet, the Houses of Lords and Commons, provided no true democracy. "Self-government is better than good government" is to be found in a society in which free individuals willingly associate themselves in a common effort for the common good. On the basis of co-workers in the workshop according with government. mon good. On the basis of co-workers in the workshop co-operating with co-workers in other workshops, efficiency of production and distribution, which means plenty for all, can go hand in hand with personal freedom.

Elected on a territorial basis, Parliament could not manage efficiently the industries and services of the community. The services at present controlled by it are managed by salaried permanent officials. The condition of the worker employed in such services is the same as in privately owned industry

A centralised Government cannot give free dom to the individual: it stultifies initiative and progress. In the struggle to abolish capitalism the workshop councils are essential.

The trade unions are not based on the workshop, and are bureaucratically governed

Therefore they are not able efficiently to manage the industries. They are ineffective implements in the effort to take industry from the management of the employers and vest t in the workers at the point of production. Therefore we stand for-

The abolition of the private property system.

Production for use, not profit.

The free supply of the people's needs.

The organisation of production and distribution on a workshop basis.
