INCORPORATED HOSTELS.

AIMS.

The Incorporated Hostels are for the care of girls and women suffering from venereal diseases in an infective stage.

The patients are drawn chiefly from the Royal Free Hospital V.D. Clinic, and are selected by the Medical Officer to the Clinic; but cases from any part of London or the country may be received. (*See conditions for admission.*)

Most of the patients admitted to the Hostels are treated as out-patients at the Royal Free Hospital.

The aims of the Committee are :

1. Care and medical treatment of women suffering from venereal disease.
 - (a) Non-pregnant cases. Admitted to Regent's Park Hostel.
 - (b) Pregnant cases. Admitted to Highbury Quadrant Hostel.
 - (c) Mothers and babies. Admitted to Highbury Quadrant Hostel.
2. After-care of these patients when discharged from the Hostels, and medical supervision of the children.

The work is supplementary to that of the Hospital out-patients' clinic. The special daily treatment given at the Hostels, together with rest and good food, help to make hospital treatment more effective, and to shorten the course of the disease.

The greater number of those admitted are wage-earners, such as waitresses, domestic servants, factory workers, or clerks. They are, for the time being, unfit to earn their living, though not ill enough to require a bed in Hospital. Their infectious condition is a danger to others whether at home or in lodgings, and the Hostels provide the special accommodation needed. Whatever the circumstances, these girls all need help to start them on the road to recovery.

The Hostels are conducted on undenominational lines, but during their stay every effort is made to help patients to moral as well as to physical recovery, and to train them in the care of their children.

After-care is an integral part of the scheme, and great importance is attached to keeping in touch with patients over a considerable period of time. The keeping of records of the health and physical development of the children for some years forms an addition to the medical work carried on whilst they are inmates of the Hostel.

ACCOMMODATION.

REGENT'S PARK HOSTEL	15 Beds.
62, Regent's Park Road, N.W.1.	
HIGHBURY QUADRANT HOSTEL	19 Beds.
22, Highbury Quadrant, N.5.	12 Cots.
BARLOW WING	14 Beds.
20, Highbury Quadrant, N.5.	14 Cots.

CONDITIONS FOR ADMISSION.

Cases are admitted by the Medical Officer of the Royal Free Hospital (Venereal Diseases) Marlborough Clinic, who attends at the Hospital (Out-patients) daily from 10 a.m. to 7.30 p.m., and on Saturdays from 10 a.m. to 4 p.m.

Only young women suffering from venereal disease in an infectious stage are eligible for admission.

Applications for the admission of suitable cases are cordially invited from doctors and social workers.

All requests should be made to the Medical Officer of the Marlborough Clinic, or to the Almoner, Royal Free Hospital. A medical certificate and full social history should be forwarded in the first instance, if the patient cannot attend the Clinic.

The object of the Hostels is to provide treatment and after-care for girls who really desire a fresh start.

No patient is refused for lack of means, but patients are asked to contribute towards their maintenance, if able to do so.

Further information regarding the hostels may be obtained from the Almoner, Royal Free Hospital, Gray's Inn Road, W.C.1, or from the Hon. Secretary, 4, Pelham Crescent, S.W.7.

NOTE BY SECRETARY.

This year, to save a repetition, information which concerns both Hostels alike is given under the heading "General Report."

Points of difference, such as Medical reports, further details of Staff, premises, records of occupations, Treasurer's reports, thanks for gifts etc., will be found under the heading "Notes and Records" for each Hostel.

GENERAL REPORT 1935.

Statistical Tables for the year ended Dec. 31st, 1935.

	Highbury Hostel, Regents Pk.		
	Adults	Babies	Adults
Number of patients in residence Jan. 1st 1935 ..	28	22	11
Number of patients admitted during 1935 ..	43	26	49
Number of patients discharged during 1935 ..	40	29	52
Number of patients in residence Dec. 31st 1935	31	19	8
Number of "Patient Days"	9533	6741	4560
Average length of stay in days	134.3	140	76

The above figures are given in tabulated form, so that the work for this year may be seen at a glance.

It may seem surprising that 71 patients and 46 babies at Highbury have provided full-time work to a Staff of nine, and equally that 60 girls have fully occupied four Staff at Regent's Park Hostel. It may therefore be of interest to summarise the many-sided needs of each individual who passes through the Hostel.

The patient arrives at the Hostel at what is usually a critical moment in her life, and before she can be freed from the tangle in which she is involved, an incredible number of people must co-operate, in one way or another.

As a patient she comes into contact, first of all with the Almoner at Hospital, who makes notes of her version of her history. She is then passed to the Medical Officer, and, after examination, drafted to the Hostel where she is received in friendly fashion by the Staff. Regular visits to Hospital take place twice weekly, and a pregnant patient receives ante-natal care from the Medical Officer at Hospital, where the confinement ultimately takes place.

The majority of patients have relations and friends to see them whilst at the Hostel, with whom the Sister-in-Charge must deal with great discretion. Often there is the employer to consider and possibly also the "boy friend" comes into the picture. When the Highbury patient returns there, after the birth of her infant, correspondence with the father may culminate in a voluntary agree-

ment for weekly payments, or if necessary, an Affiliation Order is taken out, which entails attendance at Court. Some time before the patient is discharged arrangements for her future, whether training or employment, are made in consultation with the After-Care worker. If there is a child, it must be suitably placed, whether with mother, grandparents or foster-mother.

This is the outline of the routine procedure, but each one of the 131 patients who passed through the Hostels in 1935, has provided, in addition, a psychological problem which must be tackled.

If these efforts are successful, the girl may leave the Hostel physically re-established, able to support herself, and having behind her a solid background of training and friendship. In any case, further friendly care, interest and thoughtful consideration are given by the After-Care worker.

Changes. There have been two notable changes, this year, in personnel. At Regent's Park Hostel, Miss Mitchell, Sister in charge, broke down in health, and was given 6 months sick leave, from April to October. During her absence, Sister Kempley was in charge. Three months after her return, Miss Mitchell still did not feel strong enough for this very exacting post, which she had filled, with devotion, for 3½ years, and the Committee accepted her resignation with great regret. Sister Kempley has now been appointed as her successor.

Miss Cadmore, who had been After-Care worker for 5½ years, left in July, to take the post of Out-door worker and Superintendent of Girls' Hostel in Bulawayo, Rhodesia. Miss Cadmore was the first After-Care worker appointed by the Committee, and initiated a tradition of unsparing personal work with regard both to the patients and the children who came under her care.

Miss Sykes, trained at Josephine Butler House, was appointed to succeed her, but found herself unable to bear the continuous travelling entailed by visiting, and resigned after five months.

Miss Cashmore, from St. Margaret's House, Bethnal Green, is now happily installed as After-care worker to the Hostels; her brief report follows:

After-care Report. "My first few weeks as After-care worker have been busy ones engaged in collecting information concerning the various sides of this work, making the acquaintance of past and present patients, and visiting the numerous foster-mothers in scattered districts.

I have been impressed by the large-hearted co-operation of these foster-mothers, who care for the babies so splendidly. Also

by the generosity of Dr. Barnardo's Homes who grant, in some cases, a small weekly sum. It is just this extra money which relieves the mothers, who are only able to earn a small wage, of a big anxiety in providing for their children.

My weekly visits to both Hostels are a valuable means of contact with the girls whilst they are still under treatment, and it is inspiring to see the process of reinstatement at work there."

Education. In order to obtain London County Council teachers for educational classes, it has been necessary, up to now, to ensure a minimum of 15 students. It has therefore been difficult to arrange such classes for Regent's Park Hostel, where the average number of occupied beds is about 11 or 12. In future, however, teachers will be available for classes of ten and upwards, and the Committee are already making use of this privilege for 1936.

At Highbury, the L.C.C. have provided a teacher for Choral singing and "Current Events." When the latter course was over, Mrs. Anthony Hare kindly volunteered her services. Talks were also given by Mrs. Cameron Hunter and Miss Corry, and two sets of four discussions on religion have been taken by Dr. Soper and Mr. Simpson, which were very greatly appreciated. At the end of the year a course of 6 "Keep Fit" classes was given by Mrs. Mitchell to the mothers in the Barlow wing, which were so popular that they have been continued in the new year.

The Committee are most grateful to the above, who have wholeheartedly given their time and energy.

At Regent's Park, Mrs. Marsh has taken regular bi-weekly classes in Choral singing and sewing. In the autumn the girls were preparing for a children's stall at a sale of work, and besides making a number of useful garments under Mrs. Marsh's clever direction, tried their hands at toy-making and achieved a completely furnished doll's house.

Past and Future. In previous reports emphasis has been laid on the home conditions of Hostel patients, and the fact that in so many cases, they have not had a normal family life. This is again apparent in the years' records.

Of the 49 patients admitted to Regent's Park Hostel in 1935:

- 9 were orphans.
- 5 were known to be illegitimate.
- 4 were fatherless.
- 2 were cases of congenital syphilis.

The above figures are clear evidence of the handicap suffered by young people who are deprived of normal home surroundings.

The Committee therefore feel their heavy responsibilities towards the illegitimate children at Highbury, and every effort is made to place them with good foster-mothers or with relations where home influences will be strong and stable.

Children who grow up feeling that they are not wanted and do not belong anywhere, soon learn to feel that it does not matter what they do.

Finance. The Income and Expenditure accounts of both Hostels show a depressing Deficit this year. In each case it is attributable to heavy but necessary outlay on repairs and re-decorations and to a decrease in certain items of income.

But on Capital Account, 1935 has been notably fortunate. For Sir Thomas Barlow has once more made a marvelous gift to the Hostels and has handed over to them £1,000 of Canadian Pacific Stock. The dividends are divided equally between Highbury and Regent's Park, and the Committee are immensely grateful for this splendid gift, which gives them a reassuring feeling of stability.

REGENT'S PARK HOSTEL.

Notes and Records for 1936.

This year has been somewhat chequered by Miss Mitchell's ill-health. During her absence on sick-leave, Miss Kempley carried on as Sister-in-Charge, but a trained nurse had to be found to take her place as second-in-command. Sister Baker who had held such a post at Highbury 6 years ago, came temporarily to the rescue, and stayed 4½ months. Miss Cook who had been House-Matron for 3 years, left in July, and her place has been taken by Miss Butler. Miss Lambert still continues in the post of Kitchen-Matron.

The Committee greatly appreciates the devotion and unselfishness shown by the Staff. For, curious as it may seem, Hostel patients are intensely conservative: any change of regime seems to upset them, and this attitude has added to the difficulties of the Staff this year.

The Committee would here like to express their gratitude to Miss Crockett, for her regular weekly visits to the Hostel, and to Mrs. Marsh, who, besides her regular lessons, has several times given voluntary help in an emergency, and to Mrs. Stephenson for keeping the records required annually by the London County Council.

Report from Dr. Playfair, Medical Officer, Marlborough Department, Royal Free Hospital.

Medical Report. "The number of patients resident in Regent's Park Hostel has varied considerably throughout the past year.

The majority have been cases of gonorrhoea in the earlier stages of infection; many have been transferred from other Hospitals. The very efficient way in which the Hostel Staff has carried out the treatments, combined with the extensive use of diathermy, has given encouraging results and the duration of stay within the Hostel appears, on the whole, to have been shortened.

A disappointing feature, however, is the failure of some of the girls, on leaving the Hostel, to report weekly for observation at Hospital until finally discharged, despite repeated efforts on the part of our After-care worker to induce them to attend. Many whose employment has taken them a distance from the Royal Free Hospital have been provided with transfers to Clinics nearer their work.

The number of operative cases has been fewer than formerly, but all have done well and a change to Convalescent Homes was arranged for two of the very protracted cases.

Two rather difficult girls, who on admission to the Hostel proved hysterical and obstructive, were removed for observation of their nervous disorders to a suitable Hospital.

On the whole, the general health of the girls has been quite good.

Within the past year additional tests of cure have been added to the routine of the Royal Free Hospital, and unless in exceptional cases, no girl leaves the Hostel until the laboratory reports justify a cessation of daily treatment." (Signed) Bessie Playfair.

Premises. Early in 1935 it was discovered that the electric wiring at Regent's Park Hostel was in a faulty condition. Mr. Harold Bright, consulting Electrical Engineer to the Royal Free Hospital kindly gave his expert advice, and reported that re-wiring was essential throughout the house. The cost was about £70, and this together with some unexpected re-plumbing and new flooring, and the re-decoration of dining room, Staff-room and basement has once more made repairs a heavy item in the Accounts.

Sale of Work. Mrs. H. F. Goldschmidt most kindly lent her house, 41, Ennismore Gardens and provided a splendid tea on Nov. 24th for a Sale of Christmas presents. Regent's Park Hostel contributed articles for a children's Stall, and the Sea Rangers of the S.R.S. Wren had made a large variety of attractive gifts. Half the proceeds went to the Hostel and the other half was for the benefit of Unemployed Seamen's families which are the special care of the Sea Rangers.

After-care. Past patients still continue their correspondence with, and visits, to the Hostel. Some of these in domestic service regard it as a matter of course to come to the Hostel on their half-day off, others go regularly on Sundays to tea with the After-care worker, who keeps open house on that day.

The following are the figures for the visits and letters to the Hostel :

	1933	1934	1935
Letters received from Old Girls..	72	124	130
Letters to Old Girls	92	139	135
Visits from Old Girls	181	173	286
Letters to Employers, friends, etc.		391	282
Visitors to the Hostel		218	247

Treasurer's Report. The Income and Expenditure account shows a deficiency on last year's working of £181, due to an increase in expenditure of £117 and a decrease in income of £63. The main items of expenditure showing an increase are Provisions, and Miscellaneous Expenses, the extra £68 of which was largely absorbed by the establishment of additional education classes for the girls—a very important part of the Committee's policy. Renewals and repairs have increased by £25 but this is always a variable item. There is a welcome fall in the cost of fuel and lighting.

Turning now to the fall in income, subscriptions and donations have dropped seriously, but this loss is to some extent offset by the grants from Cinemas out of takings from Sunday performances; these have risen by £103—a most gratifying result. Patients' Payments have fallen, but against this for the first time we have had the full benefit of the increased grant from the London County Council, and thanks to Sir Thomas Barlow's munificent gift an increased sum is now shown to the credit of dividends and interest.

It is clear from the above facts and figures that it is essential to enlist further support if the splendid work of the hostel is to be maintained at its present volume. Present subscribers and donors are therefore earnestly asked to introduce new friends.

Thanks. The Committee wish to thank their friends for their generous support and the following for their gifts in kind.

Clothing. Miss d'Avigdor, Miss Elliott, Dr. Hare, Lady Weaver, and the Staff.

Furniture. Miss Nash, Dr. Rorke.

Flowers and Plants. Miss Beale, Mrs. Philpot, and the Old Girls.

Provisions. Miss H. M. Beale.

Entertainments and Zoo Tickets. Dr. Hare, Miss Royden, Mrs. Wilshaw.

Christmas Gifts. Dr. Burgess, Miss Cashmore, Dr. Playfair, Dr. Rorke.

HIGHBURY HOSTEL.

Notes and Records for 1935.

At the beginning of 1935 the basement of No. 20, Highbury Quadrant was for many weeks in the hands of builders, owing to the subsidence of foundations mentioned in the report last year. Under-pinning entails digging out and filling up with cement, and is a lengthy process. The opportunity was taken to put in a good composition floor in the girl's Mess-Room, as well as Crittal windows and two new sinks. The recreation-room was also given a new floor and re-decorated, and the babies' nursery above was re-distempred. During the time that workmen were in occupation it was impossible to keep the maximum number of girls and babies in residence.

Staff. No change has taken place in Staff this year, except for the nursery probationers, who come for a year's training, and who naturally move on when they have passed their two preliminary examinations. Sister Noakes and her Staff once more deserve the Committee's warmest thanks for their very loyal and devoted work. In addition to their ordinary duties, they are always ready to put their hearts into devising some entertainment with the girls, such as singing or acting; and this year three performances of a Show were given at Xmas time.

*Report from Dr. Anne Campbell, Medical Officer,
Highbury Hostel.*

Medical Report. "The usual routine work has been carried on at Highbury Hostel in 1935. The number of babies in residence has been average, the Barlow Wing being well filled. The babies in residence have all been exceedingly well throughout the whole year. One baby was born with a Pyloric Stenosis. He was operated on and returned to the Hostel, and is now a flourishing infant."

In all our eleven years of routine work, our infant mortality has never exceeded two per annum, and never before has there been any signs of inherited disease in the babies. We have been fortunate in having had the mothers admitted in an earlier stage of pregnancy,

giving time for full and adequate treatment, and as a result ensuring the birth of healthy babies free from disease.

This year, however, the infant mortality has been unusually high. Five babies were born prematurely and died after a few days. An analysis of these cases shows that the earlier the treatment is given in cases of pregnancy complicated by syphilis, the better is the chance for the baby; and even three months intensive treatment may not prevent a tragedy.

Taking these cases of premature birth individually, these are the histories.

One girl was admitted with a very toxic form of the disease. She had three months treatment but the baby was born showing generalised syphilitic toxæmia.

A second case was that of a girl with a severe form of syphilis. She had only two months treatment and the baby was born prematurely and died at ten days.

A third case had only nine days treatment. Her child was abnormal as well as premature, and died at nine days old.

A fourth case had been only five days in the Hostel, but had had a good deal of Out-patient treatment, which was probably rather irregular.

The mother of the other premature baby had only been in the Hostel twelve days, and was suffering from gonorrhœa.

We had only one party this year for "Old Babies" as the increasing number has made it impossible to hold parties indoors. We therefore have a garden party in June, and even the garden will soon be inadequate to contain all the visitors, whose ages vary from one to ten years.

The Staff have, as usual, been unremitting in their care of the girls and babies."

After-care. The number of letters and visits varies little from year to year, under normal conditions. In the figures given below, the very large number of visits from old girls in 1934 was accounted for by the fact that four babies spent some months in the Barlow Wing, without their mothers, and that these consequently visited them weekly.

Once more the figures indicate the immense amount of trouble taken over each individual, both whilst at the Hostel and when she

has left. The Committee believe that the utmost possible is done to keep in touch with every patient, who needs help, whether she be "easy" or "difficult."

	1933	1934	1935
Visits from Old Girls	364	510	395
Letters from Old Girls	155	236	184
Letters to Old Girls		157	171
Letters from Employers, Friends etc.	260	327	339
Letters to Employers, Friends, etc.	303	396	379

Treasurer's Report. As fore-shadowed in the last report, we have had to expend a very large sum of money on structural repairs necessitated by the subsidence of the ground at the back of No. 20 Highbury Quadrant. We took the opportunity of putting in Crittall windows in the girls' dining room which have made it much lighter and more airy.

But our deficit on the year is £395, as unfortunately income was £171 less than in 1934, chiefly owing to a big decrease in payment on behalf of patients, and to a drop in donations. We also had to replenish our stock of linen, and this, with the above repairs, made our expenditure very much higher than usual.

The total cost of each patient and her baby, per week, including Extraordinary Expenditure was £2 13s. 2d., and the average cost of food for each adult was 8s. 7½d. per week.
